BIDDING METHODS

HERITAGE Live!®¹ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Wednesday, December 2, by 12:00 PM CT.

Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.

Live Proxy bidding continues through the session.

HA.com/1227

Fax Bidding

Fax bids must be received on or before Wednesday,

December 2, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before

Wednesday, December 2.

This Auction is catalogued and presented by Heritage Numismatic Auctions, Inc., doing business as Heritage Auctions.

Dear Bidder:

One of our favorite end-of-year traditions is the U.S. Coins auction in Houston, an event that always delivers a high-note conclusion to the current year and a springboard into the next. Heritage is proud to be the Official Auction at the Houston Money Show for the 9th consecutive year, and we look forward to meeting with collectors, dealers, and numismatists in all specialties at this exciting auction venue.

More than 3,300 lots are featured at this year's event thanks to the participation of nearly 150 consignors. Three floor sessions will present more than 1,700 lots, kicked off by a lively Premier Session on Thursday evening with 475 high-value coins. Our popular Online Signature® Session will be held on Sunday, December 6, with nearly 1,600 additional lots.

Please take a few moments to review our Featured Collection and other auction highlights:

THE LEON HENDRICKSON COLLECTION

Born in 1926 in Union City, Indiana, Leon Hendrickson says his numismatic interests “started out of a cigar box under a lunch counter” that led to the founding of SilverTowne L.P. He became a full-time coin dealer in 1967. He is a member of more than 30 numismatic organizations and a former president of the Professional Numismatists Guild (PNG) and the Central States Numismatic Society (CSNS). In 2012, he received the Coin Dealer Hall of Fame Award from PCGS CoinFacts. Leon has consigned one of the nicest collections of Indian Head gold we have handled in recent memory as part of The Leon Hendrickson Collection. The set includes exceptional proof and circulation-strike coins from the Indian gold series including quarter eagle, half eagle, and ten dollar denominations. Many finest-knowns and near finest-knowns are included, all certified by PCGS. The Leon Hendrickson Collection also presents an equally impressive collection of Buffalo nickels – again, in proof and circulation strike formats – with the dates and mints represented by coins of tremendous eye appeal and surface quality. In particular, the challenging issues from the 1920s are of high quality with sharp strikes. It is refreshing to see a collection of such quality from the early 20th century focused on gold coins and nickels entirely from the 1908 to 1937 era, a golden age of American coinage that emerged despite World War I and the Great Depression.

COLONIAL HIGHLIGHTS

Some remarkable Colonials highlight the Houston event including a 1652 Noe-2 Oak Tree shilling in MS64 NGC, a 1787 Liber Natus Copper with the rare Globe and Eagle reverse in XF40 NGC, a 1662 Small 2 Oak Tree twopence, and a 1652 Noe-6 Pine Tree shilling in MS63 NGC. A 1787 Massachusetts cent, Ryder 4-C, in MS65+ NGC is the finest known of its variety.

19TH CENTURY GOLD

The 1850-D gold dollar is an underrated branch mint issue in MS62 NGC. Likewise, a scarce 1856-S gold dollar in MS62 PCGS is an underappreciated value – the final Type Two, Indian Princess Small Head issue. An 1898 quarter eagle in PR67 Ultra Cameo NGC offers outstanding visual appeal. No less than three 1870-S Liberty Head double eagles will cross the block in Mint State condition (two are MS61 PCGS and another is MS62 PCGS, almost unknown any finer), followed by a rare 1871-S twenty in MS64 NGC.

NOTABLE SILVER

An 1843 Seated quarter in PR64 NGC is one of just seven examples traced, and the second-finest certified. A fantastic 1853 Arrows dime, PR66+ joins an equally important 1864 Seated dollar in MS65+ PCGS. Both coins are easily among the top Condition Census examples of their dates and denominations.

We hope you will join us at the Houston Money Show of the Southwest and stop by our booth on the bourse to say hello. As always, we value your participation even if you cannot attend, and there are a variety of methods to place your bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are second to none in the auction industry, with real-time mobile or computer bidding from anywhere in the world. Our staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction.

We would like to take this opportunity to thank all of our clients, consignors, and numismatic friends and associates for making 2015 such a memorable and successful year!

Sincerely,

A blue ink signature of Greg Rohan, written in a cursive style.

Greg Rohan
President

SESSION ONE

COLONIALS

1662 Oak Tree Twopence, MS63
Small 2, Noe-30, Ex: Picker/Partrick
The Finest Known

3001 1662 Oak Tree Twopence, Small 2, MS63 NGC. CAC. Noe-30, W-240, Salmon 1-A, R.4. Ex: Donald Groves Partrick Collection. 12.2 grains. The surfaces on this outstanding example show golden-brown fields and lavender high points. All peripheral letters are fully intact, although the obverse is misaligned a few degrees toward 7 o'clock. The long tail on the 2 in the date, and the absence of a parallel break above, respectively differentiate Noe-30 from Noe-29 and Noe-31. This piece is superior to any others that are known to us. The Ford coin was called Choice AU, and three others are also graded AU.

Ex: Richard Picker (7/1966); Donald Groves Partrick Collection (Heritage, 1/2015), lot 5557. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1652 Noe-2 Oak Tree Shilling, MS64
Plated in Wurtzbach and Noe
The Finest Known

3002 1652 Oak Tree Shilling, ANDO MS64 NGC. CAC. Noe-2, W-440, Salmon 1-B, Low R.7. Ex: Donald G. Partrick Collection. 70.1 grains. This CAC-endorsed Choice Mint State piece is plated on Carl Wurtzbach's 1937 photograph record and in the Noe reference. It is also plated in the Whitman *Colonial Encyclopedia* and in the Salmon book. The distinctive rocker-press wave is clearly visible on this oval shilling that features a sharp tree and full legends. Rich grayish-gold toning appears on the fully lustrous surfaces, graced with splashes of navy-blue patina. The impression is nicely centered with most of the outer border beads visible on each side.

This piece is the finest known and the only Mint State example that we have seen or heard of. Second place in the Condition Census appears to be the XF in the Stearns Collection, along with an XF in the Alan Weinberg Collection. A small number of VF coins follow these top three examples. There are nine or 10 representatives known, according to Michael Hodder in the Ford catalog.

Carl Wurtzbach's collection ticket had on it inscribed the following narrative concerning this piece:

"Uncirculated Small Cleft. Excessively rare always unique in this condition. Another grand prize. Crosby's 1883 good. Clapp to CW very good. Probably same piece. This one from Virgil Brand Collection to Carl Wurtzbach March 18th 1936."

Ex: Virgil Brand; Carl Wurtzbach; T. James Clarke; F.C.C. Boyd; John J. Ford, Jr. (*Stack's*, 10/2005), lot 17; Jon Hanson (10/18/2005); Donald Groves Partrick; FUN Signature (*Heritage*, 1/2015), lot 5526. NGC ID# 2ARN, PCGS# 20

1652 Noe-2 Pine Tree Shilling, Large Planchet, VF35

- 3003** 1652 Pine Tree Shilling, Large Planchet VF35 PCGS. CAC. Noe-2, W-700, Salmon 2-C, R.5. 67.9 gn. No pellets at trunk. The distinctive "Straight Tree" variety with straight, parallel branches on the tree. This dove-gray example is slightly off center toward 6 o'clock, but most peripheral letters are intact. A pair of faint creases are noted near the pellet circle, created by being struck in a rocker press. Listed on page 39 of the 2016 *Guide Book*.
Ex: FUN Signature (Heritage, 1/2007), lot 20; ANA Signature (Heritage, 8/2007), lot 1. NGC ID# BFM, PCGS# 23

1652 Noe-6 Pine Tree Shilling, MS63
The Finest Known

- 3004** 1652 Pine Tree Shilling, Large Planchet MS63 NGC. CAC. Noe-6, W-720, Salmon 5-Di, R.6. Ex: Hain, Donald G. Partrick Collection. 73.9 grains. A rich silver-gray example with exemplary surfaces and pleasing eye appeal, this piece is nicely centered, and the legends are complete aside from the tops of SA near 9 o'clock. The rocker-press coining technology produced the wavy surfaces seen here. The strike is sharp except on the obverse exergue, which has a distorted appearance due to die slippage during production. In the Hain Family catalog it was described as Noe-6.1, which implies a striking prior to Noe-6. However, the die breaks through the M in DOM, and over the 6 in the date, are more advanced than sometimes seen on Noe-6. The AU58 Newman coin is the next finest we have handled, and we believe this piece from the Hain Family Collection is the finest known.
Ex: Corrado Romano Collection (Stack's, 6/1987), lot 4; Hain Family Collection (Stack's, 1/2002), lot 110; Donald Groves Partrick; FUN Signature (Heritage, 1/2015), lot 5576. NGC ID# BFM, PCGS# 23

1652 Noe-25 Pine Tree Shilling, Small Planchet, XF40

- 3005** 1652 Pine Tree Shilling, Small Planchet, XF40 PCGS. Noe-25, W-890, Salmon 8-E, R.5. The legends are fully intact on this attractive silver-gray shilling. The reverse is misaligned slightly toward 3 o'clock, but the obverse centering is nearly perfect. The mildly granular surfaces are nearly unabraded. Listed on page 39 of the 2016 *Guide Book*.
Ex: St. Louis Central States (Heritage, 5/2007), lot 14. NGC ID# 2ARZ, PCGS# 24

1787 Massachusetts Cent, MS65+ Brown
Ryder 4-C, The Finest Known, Ex: Norweb, Partrick

- 3006** 1787 Massachusetts Cent, Arrows in Left Talon MS65+ Brown NGC. CAC. Ryder 4-C, W-6100, Low R.4. Ex: Norweb, Donald G. Partrick Collection. The Greco plate coin is believed to be the finest known of the Ryder 4-C variety and one of only two examples known in Mint State (the other being the Eric P. Newman MS64 coin). The dies are in a late state with die polishing seen in some of the recesses, but the devices are nonetheless razor-sharp in the centers. Original luster illuminates blended shades of olive, burgundy, and rich mahogany over glossy surfaces. This is one of just two uses for this reverse, though the undated obverse die was employed for three other marriages including the 17-1 die pairing of the 1788 issue. Ryder 4-C is seldom seen in any grade and is notably challenging finer than the XF level. This high-end Gem is a truly exceptional condition rarity.
Ex: Norweb Collection (Bowers and Merena, 3/1988), lot 2653; Jon Hanson; Donald Groves Partrick; FUN Signature (Heritage, 1/2015), lot 5703. NGC ID# 2B25, PCGS# 302

1787 Liber Natus Copper, XF40
W-5800, Eagle and Globe Reverse
Second-Rarest Excelsior Variety

3007 1787 Liber Natus, Excelsior Eagle on Globe Copper, XF40 NGC. Breen-991, W-5800, Low R.7. Ex: Eric P. Newman Collection. 148.3 grains, 99% copper per NGC metallurgical tests. There were only seven examples of this variety known prior to the present century. Two more were located at the time of the May 2004 Ford sale, and the present copper from the Eric P. Newman Collection brings the total population to 10 examples. This impressive piece exhibits pleasing chestnut-brown surfaces despite trivial roughness on each side. The peripheries display lovely steel-gray toning that frames the design motifs. This example is the fourth finest in our census:

1. Mint State. Lorin G. Parmelee Collection (New York Coin & Stamp Co., 6/1890); James Ten Eyck Collection (B. Max Mehl, 5/1922), lot 185; Carl Wurtzbach; Virgil Brand; Brand Estate (Bowers and Merena, 6/1984), lot 958.

2. AU. Matthew A. Stickney Collection; Col. James W. Ellsworth; John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 602.

3. XF. F.C.C. Boyd Estate; John J. Ford, Jr. (Stack's, 5/2004), lot 313.

4. XF. Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3029. **The present specimen.**

5. XF. John L. Roper, 2nd (Stack's, 12/1983), lot 276.

6. VF. Matthew A. Stickney Collection (Henry Chapman, 6/1907), lot 239; DeWitt Smith Collection; Virgil Brand; Brand Estate (Bowers and Merena, 6/1984), lot 959.

7. VF. Americana Sale (Stack's, 1/2002), lot 234.

8. Fine. Donald Groves Collection (Stack's, 11/1974), lot 337.

9. Unknown Grade. Massachusetts Historical Society.

10. Unknown Grade. Long Island Specialist.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3029. NGC ID# B8DW, PCGS# 439

(1785) Bar Copper, W-8520, Good 4
Curious Private Issue, Post Revolution

- 3008** (1785) Bar Copper Good 4 PCGS. Breen-1145, W-8520, R.4. It is rare to see a Bar copper in this condition — indeed, the present coin is the only Good 4 example certified by either service. The well-worn state is a testament to the acceptance of the Bar cents as a circulating medium. The intertwined letters USA are weak (perhaps more from uneven strike than wear) while the reverse parallel bars are complete and of considerably finer condition. Pleasing deep-brown surfaces show slight iridescence. The undated design is modeled after certain Revolutionary War buttons, perhaps made by Thomas Wyon in Birmingham, England. NGC ID# 2B5J, PCGS# 599

HALF CENTS

1794 Half Cent, AU50
C-4a, Small Letters Edge

- 3009** 1794 Normal Head, C-4a, B-6b, R.3, AU50 NGC. Manley Die State 1.0 to 2.0. A satiny and richly detailed lavender-brown and steel-blue example. Free from consequential contact, and granularity is confined to small areas to the west of the date and the numerator. An early die state with minimal clashes and delicate cracks across portions of UNITED STATES OF AMERICA. Our EAC grade VF35. NGC ID# 4FW6, PCGS# 35036 Base PCGS# 1003

1803 Draped Bust Half Cent, MS64 Brown
Popular C-3, B-3 Variety

- 3010** 1803 Widely Spaced 3, C-3, B-3, R.1, MS64 Brown PCGS. CAC. Manley Die State 4.0. Mint records indicate 92,000 Draped Bust half cents were struck in 1803, and four die varieties are known for the date. This coin represents the B-3 variety, with the 0 and 3 in the date widely spaced and the zeros in the fraction very close on the reverse. The B-3 is an available variety in most grades, but it is conditionally rare at the MS64 level.

The present coin is an attractive Choice example, with smooth chocolate-brown surfaces and iridescent mint luster. The design elements are well-detailed, with a touch of softness on the upper wreath that is often seen on examples of this die state. A slight bulge developed in the area of the date on the obverse, which is probably related to the weaker strike on the wreath. An extensive die crack is visible on the reverse, from the rim through the second T in States, F in HALF, and the wreath, but the clash marks seen in earlier states on the obverse are very faint, probably due to lapping. Our EAC grade MS60. Population: 2 in 64 Brown, 0 finer (10/15). NGC ID# 222E, PCGS# 35134 Base PCGS# 1060

1806 Half Cent, MS64 Brown
C-4, Large 6, Stems

- 3011** 1806 Large 6, Stems, C-4, B-4, R.1, MS64 Brown NGC. Manley Die State 1.0, as are most high-grade examples with a well-struck date. This splendid half cent is mostly chocolate-brown but displays many glimpses of mint red in design recesses. The strike is good despite minor incompleteness on portions of the wreath and the ES in STATES. Our EAC grade MS62. C-4 Census: 4 in 64 Brown, 2 in 64 Red and Brown, 0 finer (10/15). NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

LARGE CENTS

1793 Wreath Cent, AU Details
S-8, Vine and Bars Edge

- 3012** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Holed / Plugged — PCGS Genuine. AU Details. Plugged and re-engraved near the BE in LIBERTY and the fraction, but this walnut-brown Wreath cent is otherwise pleasing. The surfaces are glossy and minimally abraded. The sharpness is impressive, with wear generally limited to the high points of Liberty's curls. The usually seen diagonal bisecting crack across the reverse is present but delicate. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1794 S-24 Cent, AU53

- 3013** 1794 Head of 1794, S-24, B-8, R.1, AU53 PCGS. CAC. S-24 is identified by the telltale bisecting crack from the L in LIBERTY to the opposite rim east of the date. Die flaws near the denominator provide further confirmation. A well defined Liberty Cap type coin with refreshingly unabraded medium brown and chestnut surfaces. Granularity is confined to a small obverse area near 8 o'clock. Our EAC grade VF25. NGC ID# 223P, PCGS# 35537 Base PCGS# 901374

1795 S-76b Cent, MS64 Brown
Plain Edge, ONE CENT High

- 3014** 1795 Plain Edge, S-76b, B-4b, R.1, MS64 Brown PCGS. CAC. A splendid and truly Mint State example of the 1795 S-76b Plain Edge cent, and seldom seen at this grade level. PCGS has only certified 43 Mint State examples of the Plain Edge variant, and most of those are S-78. This splendid chestnut-brown example has smooth and glossy surfaces with olive toning on the devices. Myriad surface marks remain from the planchet before this piece was struck. There are a few exceptional pieces among the dozen or so Mint State examples known of this die marriage. Our EAC grade MS60. Population (all Plain Edge varieties): 7 in 64 (2 in 64+) Brown, 4 finer (10/15). NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

**1799/8 S-188 Cent, Fine Details
Draped Bust Key Date**

- 3015 1799/8 S-188, B-2, R.4 — Environmental Damage — PCGS Genuine. Fine Details.** The widely spaced date is clear, including the knobs of the 9s. The remaining legends are fully readable and generally sharp. The portrait exhibits noticeable inner hair detail. The deep brown surfaces are granular but without any detrimental abrasions. The scarcer of the two collectible varieties for this key Draped Bust date. Our EAC grade Good 4.

**1813 S-292, B-2 Cent, MS62 Brown
Glossy Surfaces, Later Die State**

- 3016 1813 S-292, B-2, R.2, MS62 Brown PCGS.** Breen Die State IV. The second S in STATES is right-aligned with the leaf tip to confirm the Sheldon-292 variety. The 3 in the date is distant from star. Uniformly toned a deep, ebony-brown with sharply struck motifs on both sides. An inner ridge is visible above STATES replacing the dentils, but the letters are not merged to the ridge. Numerous flowlines and areas of minor porosity visit the surfaces of this glossy cent. Our EAC grade AU50. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

INDIAN CENTS

**1860 Indian Cent, MS66
Pointed Bust, Rare Type this Fine**

- 3017 1860 Pointed Bust, FS-401, MS66 PCGS. CAC.** The scarce 1860 Pointed Bust cents were struck from leftover, undated 1859 obverse dies with the 1860 logotype added. Perhaps one in 20 1860-dated cents are of the Pointed Bust design, and in high Uncirculated grades the type is rare. This lustrous example displays tan-gold surfaces with fleeting orange highlights. The strike is pinpoint-sharp on the headdress feathers including the tips. A scattering of tiny flecks are microscopic and not distracting in the least from the sharp appeal of this impressive Premium Gem. Population: 10 in 66, 2 finer (10/15). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

**1865 Fancy 5 Cent, MS66 Red
Tied for the Finest Certified**

- 3018 1865 Fancy 5 MS66 Red PCGS.** The Fancy 5 1865 Indian cent is more plentiful than its Plain 5 counterpart, but high-grade examples are nonetheless rare. This Red Premium Gem is among the finest seen by either leading certification service. Fine metal-flow lines in the obverse fields denote a late die state, but the sharpness of Liberty's portrait and the headdress feathers is largely unaffected. The wreath is sharp on the oak leaves but slightly soft on the bow. There are no bothersome abrasions. A few trivial flecks do not detract from the radiant surfaces, which show bronze-gold in the margins and coppery-red in the centers. Population: 11 in 66 Red, 0 finer (10/15). NGC ID# 227N, PCGS# 2084

**1874 Cent, Top-Grade MS66 Red
Struck From Late-State Dies**

- 3019 1874 MS66 Red PCGS.** The 1874 Indian cent issue was a generous one, but examples are difficult to find either in high grades or with full Red surfaces — much less both. This Premium Gem Red PCGS coin is nonetheless one of only nine so certified, and none are finer (10/15). The surfaces are orange-red on the obverse and orange-tan on the reverse, with no concessions at all to carbon or “turning.” Both sides are in remarkably late states, however, producing quite perceptible die cracks — on the obverse, running heavily through the date, and on the reverse, meandering up through the left-side wreath and from the rim to the upper-left shield border. Much of the dentilation around both sides is softly detailed from die erosion. A top-grade coin, but one with equal parts appeal and intellectual interest. Population: 9 in 66 Red, 0 finer (10/15). NGC ID# 227Z, PCGS# 2120

**1877 Cent, MS63 Red and Brown
Woodgrain Toning Pattern**

- 3020 1877 MS63 Red and Brown PCGS.** A well-struck Select example of this key Indian cent issue, attractively toned in a woodgrain pattern with streaks of straw-gold and chestnut-brown. The surfaces are vibrant, and the overall eye appeal is strong. This pleasing piece would make an excellent cornerstone for a set of similarly graded small cents.
Ex: *FUN Signature* (Heritage, 1/2007), lot 521. NGC ID# 2284, PCGS# 2128

**1879 Indian Cent, MS66 Red
Few Known This Fine**

- 3021 1879 MS66 Red PCGS.** The 1879 is the most readily available Indian cent from the 1870s in circulated grades, but high-end Mint State pieces are nonetheless scarce. This Red Premium Gem is boldly struck with satin luster and rich coppery-orange color. A few tiny ticks on Liberty's cheek are all that prevent a finer grade, and a couple of insignificant specks do not detract. Population: 16 in 66 Red, 3 finer (10/15). NGC ID# 2286, PCGS# 2135

**1882 Indian Cent, MS66+ Red
Frosty, Radiant Luster**

- 3022 1882 MS66+ Red PCGS. CAC.** Most full Red 1882 Indian cents are clustered around the MS64 to MS65 grade range. Premium Gems such as this Plus-designated piece are rare, and anything finer is almost unobtainable. The strike is boldly rendered, and the vibrantly lustrous surfaces showcase intermingled copper-red and rose-gold hues. A few trivial specks are barely noticed with a loupe. Population: 21 in 66+ Red, 2 finer (9/15). NGC ID# 2289, PCGS# 2144

**1908-S Indian Cent, MS66 Red
Rich, Glowing Luster**

- 3023 1908-S MS66 Red PCGS. CAC.** Frosty orange-gold luster illuminates the beautifully preserved surfaces of this Red Premium Gem 1908-S cent, showing also occasional hints of cherry-rose, lilac, and olive. The strike is bold, and there are no obvious carbon specks. The 1908-S is a semikey issue and is rarely seen as fine as this impressive representative. Population: 45 in 66 (1 in 66+) Red, 1 finer (10/15). NGC ID# 2296, PCGS# 2234

**1909 Indian Cent, Lustrous MS67 Red
Tied for Finest Certified**

- 3024 1909 MS67 Red PCGS.** Both the final-year 1909 Indian Head and first-year 1909 Lincoln Head designs attracted collectors, although the 1909 Philadelphia Indian Head issue in Superb Gem Red is six times rarer than its Lincoln Head counterpart of the same grade and format. This lustrous MS67 Indian Head cent is flame-orange with deeper orange accents at the borders, plus peach-red highlights at the centers. The diamonds are sharp and the headdress shows crisp definition on most of the feather tips. A few tiny flecks are microscopic in nature. Population: 11 in 67 Red, 0 finer (10/15). NGC ID# 2297, PCGS# 2237

PROOF INDIAN CENTS

**1859 Indian Cent, PR66 Cameo
Rare This Starkly Contrasted**

- 3025 1859 PR66 Cameo PCGS.** Just 20 Cameo examples of the debut Indian cent proof are reported by PCGS, and this Premium Gem is one eight that are tied for the finest (10/15). The design elements are thickly frosted and brought up to needle-sharp definition. The fields exhibit deep mirroring with a few insignificant specks. Each side is warm honey-gold with coppery-red undertones. NGC ID# 2299, PCGS# 82247

**1878 Cent, PR66 Red Cameo
Uncommon Contrast**

- 3026 1878 PR66 Red Cameo PCGS.** Though few proof Indian cents ever were made to a Cameo standard and even fewer kept it after more than a century of potential toning, this Premium Gem Cameo has defied the odds. Fresh copper-orange surfaces offer clear contrast and only minor spotting near the devices. Population: 7 in 66 Red Cameo, 0 finer (10/15). NGC ID# 4YVB, PCGS# 82323

LINCOLN CENTS

**1909-S VDB Cent, MS66 Red and Brown
Softly Glowing Luster**

- 3027 1909-S VDB MS66 Red and Brown PCGS.** Although actively traded just one grade point lower, the 1909-S VDB Lincoln cent crosses into a scarce category at the MS66 level, regardless of color designation. This Red and Brown example displays coppery-orange and cherry-gold hues beneath a faint overlay of olive-brown patina, which precludes a full Red assessment from PCGS. Well-struck and free of bothersome abrasions. Population: 41 in 66 Red and Brown, 0 finer (9/15). NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS66 Red and Brown
Glowing Registry Candidate**

- 3028 1909-S VDB MS66 Red and Brown PCGS. CAC.** A mix of golden-amber, copper-orange, and olive hues colors this top-notch Premium Gem. The designer's initials are bold, as are the wheat sheaves and Lincoln's portrait detail. Tiny marks occur on the hair and shoulder and in the lower reverse field, but they are only apparent under magnification. This is one of the finest surviving representatives from one of the most recognizable key dates in American numismatics. Population: 42 in 66 Red and Brown, 1 finer (10/15). NGC ID# 22B2, PCGS# 2427

**1918 Cent, MS67 Red
Few Known This Fine**

- 3029 1918 MS67 Red PCGS. CAC.** This Registry-grade 1918 Lincoln cent is one of fewer than a dozen Superb Gems endorsed by CAC. The strike is sharp throughout and the satiny surfaces display rich coppery-orange luster. No obvious carbon spotting is observed. Population: 30 in 67 (4 in 67+) Red, 1 finer (10/15). NGC ID# 22BV, PCGS# 2506

**1926-S Cent, MS64 Red
Beautiful Red Surfaces**

- 3030 1926-S MS64 Red PCGS.** The 1926-S is a well-known semikey in the series, but it is especially noted as a rarity with full red color. It is also a major strike rarity. This particular coin has the usual softness of strike, but the color is all there. Medium cherry-red overall with a couple of hints of lilac on the reverse, this is an exceptional 1926-S and one that will surely be heavily contested by Lincoln cent collectors. Population: 70 in 64 (1 in 64+) Red, 2 finer (10/15). NGC ID# 22CL, PCGS# 2575

**1950-D Cent, Lustrous MS67+ Red
Bold Registry Set Contender**

- 3031 1950-D MS67+ Red PCGS. CAC.** Bright orange-gold highlights complement deep red luster that radiates from both sides of this high-end Superb Gem. Razor-sharp definition is apparent on the design elements, including Lincoln's hair and the grains and lines of the wheat stalks. A few minor marks in the O of ONE do not distract. The 1950-D cent is extremely elusive in MS67+ Red, where it is tied for the finest at PCGS. Population: 6 in 67+ Red, 0 finer (9/15). NGC ID# 83XR, PCGS# 2782

**1972 Doubled Die Obverse Cent
MS67 Red, FS-101**

- 3032 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** Strong doubling on all obverse legends identifies the Guide Book 1972 doubled die cent. The spread is nearly as dramatic as seen on the 1955 FS-101. This orange-gold Superb Gem offers potent luster and an intricate strike. The surfaces are essentially unabraded and display merely minuscule carbon. Population: 35 in 67 Red, 1 finer (10/15). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**1982 Cent, MS67+ Red
Bronze, Small Date**

- 3033 1982 Bronze, Small Date MS67+ Red PCGS.** A Registry-grade example, tied for the finest at PCGS of this type. The Small Date bronze 1982 Lincoln cent is differentiated from its zinc counterpart most easily by its heavier weight, and from its Large Date sibling by studying the height of the 9 in relation to the 1 — on the Small Date coin, the two numerals are level. This Plus-graded Superb Gem is boldly struck and free of carbon spotting. Coppery-orange luster shows hints of olive-green when tilted beneath a light. Population: 16 in 67 (5 in 67+) Red, 0 finer (10/15). NGC ID# 3AJG, PCGS# 146020

PROOF TWO CENT PIECES

**1864 Large Motto Two Cent Piece
PR66 Red and Brown Cameo**

- 3034 1864 Large Motto PR66 Red and Brown Cameo NGC.** This is among the finest Red and Brown Cameos certified of the Large Motto 1864 proof. The design elements are sharply defined, set against mirrored coppery-brown fields. A few trivial flecks do not detract, and there are no contact marks. The 1864 proof mintage was rather low, with 100 pieces confirmed to have been struck and perhaps a similar number of additional coins distributed in minor proof sets. Census: 2 in 66 Cameo, 0 finer (10/15). NGC ID# 274T, PCGS# 83623

**1873 Closed 3 Two Cent, PR65 Red
Elusive This Fine**

- 3035 1873 Closed 3 PR65 Red PCGS.** A proof-only issue with a small 600-coin mintage, the Closed 3 1873 two cent piece is a challenging but essential acquisition for a complete date set of this underappreciated series. This Gem example displays fully struck motifs and reflective fields. Coppery-red surfaces yield amber and olive overtones, which produce excellent eye appeal. Population: 19 in 65 Red, 14 finer (10/15). NGC ID# 5L57, PCGS# 3653

**1860 Three Cent Silver, MS67
Among the Finest Certified**

- 3038 1860 MS67 NGC.** The 1860 three cent silver is a seldom-seen issue, particularly in Gem or finer grades. This piece is one of just three MS67 coins at NGC (one in MS67 ★), with none finer; PCGS shows one coin in this grade, also with none finer (10/15). This piece displays delicate, satiny luster with blended shades of lavender-gold and olive-gray toning over each side. Trivial softness is noted on the central shield, as usual, but the strike is otherwise well-executed. NGC ID# 5LDM, PCGS# 3678

THREE CENT SILVER

**1851-O Three Cent Silver, MS66
Only Branch Mint Issue in the Series**

- 3036 1851-O MS66 PCGS.** This is the first and only branch mint issue in the entire series (720,000 coins minted), but enough examples survive through MS64 to satisfy the majority of collector demand. However, those seeking finer a piece will find Gems to be very scarce and Premium Gems to be notable condition rarities. This is one such coin with splendid lilac and golden-gray tones that effectively hide the grade-limiting marks on each side. The devices are typically struck with softness on the shield and stars. Population: 28 in 66 (3 in 66+), 0 finer (10/15). NGC ID# 22YY, PCGS# 3665

PROOF THREE CENT SILVER

**1863 Silver Three Cent, PR66+
Beautiful Original Toning**

- 3039 1863 PR66+ PCGS.** A beautifully rendered, high-end proof, showing subtle cameo contrast beneath rich multicolor toning. Lilac-blue and cottonwood-green centers reside amid sun-gold, amber, and russet peripheral ribbons. The strike is bold throughout and there are no distinctive flaws. Rarely seen this fine. Population: 15 in 66 (2 in 66+), 0 finer (10/15). NGC ID# 7VZE, PCGS# 3712

**1855 Three Cent Silver, MS65
Lustrous with Original Toning**

- 3037 1855 MS65 PCGS.** The 1855 three cent silver is a better date with a small 139,000-coin mintage. High-end survivors are rarely seen and command strong premiums at auction. This well-detailed Gem representative exhibits some dramatic clash marks on the central reverse, and the lustrous surfaces are blanketed in vivid shades of golden-brown, amber, and deep violet toning. Population: 15 in 65, 9 finer (10/15). NGC ID# 22Z4, PCGS# 3671

**1871 Silver Three Cent, PR67 Cameo
Among the Finest Certified**

- 3040 1871 PR67 Cameo NGC. CAC.** The proof 1871 silver three cent is difficult to acquire in Cameo grades, and Superb Gem examples in this category are genuine rarities. This remarkable piece is among the finest certified. Rich lavender-gold and pale sea-green hues emerge from the watery depths of the fields, contrasting against sharp, satiny devices. Census: 7 in 67 Cameo (3 in 67 ★ Cameo), 0 finer (10/15). NGC ID# 27CG, PCGS# 83722

THREE CENT NICKELS

1868 Three Cent Nickel, MS67 Tied for Finest Certified

- 3041 1868 MS67 NGC. Frosty, shimmering luster sets this Superb Gem 1868 three cent nickel aglow with a hint of champagne toning. Close inspection reveals immaculate preservation. The dies are lapped and peripherally cracked, suggestive of a late die state, and the reverse is poorly defined on the high points of the wreath and the left Roman numeral. This issue is readily available in lower grades but extremely rare this well-preserved. Census: 5 in 67, 0 finer (10/15). NGC ID# 2756, PCGS# 3734

1876 Three Cent Nickel, MS66 None Numerically Finer

- 3042 1876 MS66 PCGS. CAC. Just a tinge of iridescent ice-blue toning accents the frosty nickel-gray surface of this conditionally rare three cent nickel. The left-hand numeral in the denomination is not fully brought up, but the strike is otherwise sharp. Only a few minor grazes on Liberty's cheek preclude an even finer grade from PCGS. Population: 11 in 66, 0 finer (10/15). NGC ID# 275A, PCGS# 3744

PROOF THREE CENT NICKELS

1865 Nickel Three Cent, PR65 Razor-Sharp First-Year Proof

- 3043 1865 PR65 NGC. As do most proof 1865 three cent nickels, this modestly contrasted Gem displays a tripled date, showing secondary numerals most prominently to the left of the 6 and 5. Struck from fresh dies, the design elements are in bold relief and display sharp detail. Traces of champagne toning warm the reflective fields. Census: 55 in 65, 15 finer (9/15). NGC ID# 275K, PCGS# 3761

1865 Nickel Three Cent, PR67 Cameo Conditionally Rare Debut Proof

- 3044 1865 PR67 Cameo PCGS. CAC. The year 1865 kicked off the three cent nickel series with what would be by far the highest circulation strike coinage of its entire duration and what is estimated to be the lowest proof coinage. The *Guide Book* proof mintage of 500 pieces reflects those coins distributed through silver proof sets but neglects the unrecorded distribution of minor proof sets and individual specimens. However, the scarcity of surviving proofs in high grade supports the probability that the 1865 was, indeed, produced to a limited extent.

This Superb Gem Cameo is among the finest seen by either PCGS or NGC. The strike is tack-sharp, and the champagne-toned surfaces are seemingly pristine. Ample reflectivity in the fields further heightens the eye appeal. The date numerals show the typical recutting of the proof dies. Population: 3 in 67 (1 in 67+) Cameo, 0 finer (10/15). NGC ID# 275K, PCGS# 83761

**1878 Nickel Three Cent, PR67+
CAC-Endorsed Cameo**

- 3045 1878 PR67+ Cameo PCGS. CAC.** There was no nickel circulation coinage in 1878 of either the three or five cent denominations, although 2,350 proofs were struck of each type for sale to collectors. This high-end Superb Gem Cameo example of the three cent piece boasts an excellent strike and impressive preservation with taces of champagne toning. Excessive die polishing is evident on the lower wreath and at the bridge of Liberty's nose, although the same contributes to the field-motif contrast. Population: 28 in 67 (4 in 67+) Cameo, 1 finer (10/15). NGC ID# 275Y, PCGS# 83774

SHIELD NICKEL

**1870 Shield Nickel, Sharp MS66+
Tied for Finest at PCGS**

- 3046 1870 MS66+ PCGS. CAC.** A remarkable full strike characterizes each side of this high-end Premium Gem, complementing vibrant, frosty luster and a hint of champagne toning. The usual array of fine die cracks appears around each periphery, denoting the Mint's difficulty in making dies withstand the hard nickel alloy. The 1870 is scarcer in Mint State than any of the preceding Shield nickel issues and is a genuine rarity this fine. Population: 16 in 66 (3 in 66+), 0 finer (10/15). NGC ID# 22P4, PCGS# 3797

LIBERTY NICKELS

1885 Nickel, Intensely Lustrous MS66

- 3047 1885 MS66 PCGS.** Intense luster emanates from the nickel-gray surfaces of this key-date representative, and the design elements are well-impressed, except for the usual weakness in the leaves and corn ear left of the bowknot. There are no marks worthy of individual mention. Population: 29 in 66 (2 in 66+), 3 finer (10/15). NGC ID# 2773, PCGS# 3846

**1887 Liberty Nickel, MS67
Brilliant, Untoned, and Exceptional**

- 3048 1887 MS67 PCGS.** Struck from freshly polished dies, this remarkable Superb Gem nickel is razor-sharp throughout, including all of the star centers, Liberty's hair definition, and all of the wreath elements. The gleaming surfaces contrast boldly with frosted central motifs. Die polish lines are visible with a lens, yet they are a natural part of the die preparation process and do not inhibit the in-hand appeal of this nickel one bit.

The 1887 often comes dull and lifeless because the dies were utilized to their maximum production. The known number of coining dies (143 obverse dies for a mintage of more than 15.2 million pieces) confirms the hard use of Mint equipment on the unforgiving, hard-nickel planchets. This rare MS67 survivor is tied with two others at PCGS for finest-known, while NGC has yet to report any examples at MS67 or finer. Population: 3 in 67, 0 finer (10/15). NGC ID# 22PL, PCGS# 3848

1890 Liberty Nickel, MS66+
Only One Numerically Finer at PCGS

3049 1890 MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on the lower wreath. The impeccably preserved surfaces radiate vibrant mint luster under shades of attractive pale gold toning. Population: 19 in 66 (5 in 66+), 1 finer (10/15). NGC ID# 22PM, PCGS# 3851

1894 Liberty Nickel, MS66+
In the Top Five at PCGS

3050 1894 MS66+ PCGS. CAC. The 1894 mintage of 5.4 million pieces was down substantially from the 1893 production of more than 13 million pieces — a legacy of the Panic of 1893. In contrast, this nickel could not be brighter. The untuned, frosty surfaces display vibrant mint luster and sharply defined central motifs. The left-side stars lack some detail, as does the bow knot and the left-hand ear of corn on the reverse wreath, but overall this high-end Premium Gem dazzles. Population: 4 in 66+, 1 finer (10/15). NGC ID# 2779, PCGS# 3855

1900 Liberty Nickel, MS67
Dazzling Luster and Eye Appeal

3051 1900 MS67 PCGS. CAC. Seemingly flawless, glowing surfaces show emerging ice-blue hues overall from frosty silver-gray luster with a dash of champagne along the lower-right reverse border. A handsome cartwheel effect is produced with the slightest tilted of the hand, and the only obvious strike softness is seen on the corn ear to the left of the wreath bow, as usual. Among the finest certified and rare as such. Population: 8 in 67, 0 finer (10/15). NGC ID# 22PS, PCGS# 3861

1912-S Nickel, MS66
High-End Key-Date Coin

3052 1912-S MS66 PCGS. Although Gems are offered with frequency, Premium Gem 1912-S nickels are rare. This piece displays smooth, satiny surfaces with soft olive-gray and champagne toning. As is typically seen on this branch mint issue, the corn ear to the left of the wreath bow is weakly struck; the obverse is nonetheless well-defined. Population: 24 in 66 (1 in 66+), 0 finer (9/15). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKEL

1894 Liberty Nickel, PR67 Cameo
Stellar Eye Appeal

3053 1894 PR67 Cameo PCGS. CAC. An outstanding example, among the finest Cameos seen by either service — no Deep Cameos are known. This incredibly eye-appealing representative showcases stark field-motif contrast and fully rendered design elements, including the corn ear to the left of the wreath bow. Ice-blue hues appear in the fields while soft champagne accents the devices and rims. Population: 8 in 67 (2 in 67+) Cameo, 0 finer (10/15). NGC ID# 5EJM, PCGS# 83892

BUFFALO NICKELS

1914-D Buffalo Nickel, MS67 Challenging Early Issue

- 3054 1914-D MS67 PCGS. CAC.** With a mintage of just over 3.9 million pieces, the little-saved 1914-D has become a popular semikey Buffalo nickel issue. While examples through MS64 and even MS65 are available for a price, the opportunity to own anything finer comes only rarely. The fact that PCGS and NGC combined have certified only eight coins in MS67 — with none finer — confirms the substantial condition rarity of the issue.

This impressive Superb Gem, housed in a green label holder, is sharply detailed with vibrant, frosty luster that complements light-orange, lilac, and green-gold patina. The finely textured obverse in particular is ruggedly attractive, and the coin is as carefully preserved as it is appealing. CAC endorsed and a formidable Registry Set candidate. Population: 7 in 67, 0 finer (10/15).

Ex: Philadelphia Signature (Heritage, 8/2012), lot 5046.

From The Leon Hendrickson Collection. NGC ID# 22R5, PCGS# 3925

1914-S Buffalo Nickel, MS66 Vibrant Multicolor Toning

- 3055 1914-S MS66 PCGS. CAC.** An impressive display of gold, violet, blue, and orange toning appears on each side of this colorful Premium Gem. The strike is needle-sharp with nearly full detail on all design motifs. Brilliant luster and full mint frost appear beneath the toning for dramatic eye appeal — a challenging branch mint nickel that is virtually unobtainable any finer. CAC endorsed. Population: 36 in 66 (7 in 66+), 1 finer (10/15).
Ex: Chicago Signature (Heritage, 8/2011), lot 3437.
From The Leon Hendrickson Collection. NGC ID# 22R6, PCGS# 3926

1915-D Nickel, MS66 Remarkably Sharp Strike for the Issue

- 3056 1915-D MS66 PCGS. CAC.** Like other early branch mint Type Two nickels, the 1915-D is much rarer than its Philadelphia counterpart in Gem or finer Mint State. The present shimmering Premium Gem representative displays subtle gunmetal-gray, lilac, and jade-green toning. Although the surfaces are virtually devoid of contact, the best feature may be the strike, which is remarkably close to full for a circulation issue and rarely encountered so sharp on the 1915-D. Population: 34 in 66, 2 finer (10/15).
From The Leon Hendrickson Collection. NGC ID# 22R8, PCGS# 3928

**1916-S Nickel, Premium Gem
Still Only Four PCGS Coins Finer**

- 3057 1916-S MS66 PCGS. CAC.** Sharply struck with lilac color overall and golden elements interspersed. A dramatic streak of toning stabs upward at 4 o'clock on the obverse. Great eye appeal for this S-mint Buffalo issue, underrated because of its mintage of more than 11 million pieces but a condition rarity this fine. CAC endorsed. Population: 37 in 66 (3 in 66+), 4 finer (10/15).
Ex: *The Oliver Collection/Chicago Signature (Heritage, 8/2011)*, lot 3439.
From *The Leon Hendrickson Collection*. NGC ID# 22RC, PCGS# 3933

**1917-S Buffalo Nickel, MS66
None Finer at PCGS**

- 3058 1917-S MS66 PCGS.** A brightly lustrous and faintly toned Premium Gem with powder-blue color at the margins on both sides, while the reverse also displays glimpses of gold patina. The 1917-S typically shows average to below-average detail on the motifs, yet definition on the hair strands and braid knot is sharp, and the bison's shoulder-wool is bold. Population: 25 in 66 (1 in 66+), 0 finer (10/15).
Ex: *The Oliver Collection / Chicago Signature (Heritage, 8/2011)*, lot 3441.
From *The Leon Hendrickson Collection*. NGC ID# 22RF, PCGS# 3936

**1918/7-D Nickel, Lustrous MS62
Scarce Overdate Issue, FS-101**

- 3059 1918/7-D FS-101 MS62 NGC.** Struck from an advanced state of the dies, a characteristic die crack from just above the braid knot reaches nearly to the Indian's mouth and metal flow lines appear on the borders. Even so, this example of the famous Denver overdate is thoroughly sharp and attractive. Exceptional definition for the variety graces the central motifs on both sides. Reddish-orange mint luster glows from beneath olive-gray and blue overtones to create a rich patina that the variety seldom offers.
Attractive 1918/7-D examples are coveted by nickel specialists in all grades. Those with significant eye appeal (like the present coin) are especially rare when in Mint State, and therefore always in demand. Based on the infrequent appearance of Uncirculated pieces in our auctions, it may be many years before we offer another 1918/7-D Buffalo with this much eye appeal for the assigned grade. Census: 18 in 62, 24 finer (10/15). NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918-D Buffalo Nickel, Scarce MS66

- 3060 1918-D MS66 PCGS.** An original and stunning Premium Gem, this 1918-D nickel is destined to compete for the finest Registry set. Both sides display brilliant satin luster beneath pastel gold toning, with light gray at the centers. The strike is uniformly sharp and the surfaces are pristine. Population: 25 in 66 (2 in 66+), 1 finer (10/15).

Ex: Long Beach Signature (Heritage, 6/2012), lot 3357.

From The Leon Hendrickson Collection. NGC ID# 22RH, PCGS# 3938

**1918-S Buffalo Nickel, MS65
Glossy and Sharply Struck**

- 3061 1918-S MS65 PCGS. CAC.** The 1918-S is one of the great condition rarities in the Buffalo nickel series. It is certainly one of the rarest in MS65. Although nearly 5 million pieces were minted, the vast majority were spent (and spent and spent again), leaving only a small quantity of Uncirculated pieces. From that number, most exhibit dullish luster and weak strikes.

The present example is certainly an exception, displaying glossy brilliance and unexpectedly sharp definition of high point details — the hair braid, the bison's head, horn, and tail. Each side exhibits an original, naturally toned appearance, presenting a rare opportunity for the Buffalo nickel specialist. CAC endorsed, while PCGS has certified only one coin numerically finer (10/15).

Ex: ANA Signature (Heritage, 7/2005), lot 10137; FUN Signature (Heritage, 1/2011), lot 5459; Chicago Signature (Heritage, 8/2011), lot 7055.

From The Leon Hendrickson Collection. NGC ID# 22RK, PCGS# 3940

**1919-D Buffalo Nickel
Sharply Rendered Gem**

- 3062 1919-D MS65 PCGS.** Sharply detailed in most areas, this attractive Gem exhibits a little blending on the bison's shoulder, the result of a marginally incomplete strike, yet this coin is far better-defined than many survivors of the Denver issue. Mint luster glows softly beneath warm-gray surfaces, with pleasing hints of gold and ice-blue toning most visible on the reverse. Housed in a green label holder. Population: 59 in 65 (3 in 65+), 18 finer (10/15).

Ex: Chicago Signature (Heritage, 8/2011), lot 3444.

From The Leon Hendrickson Collection. NGC ID# 22RM, PCGS# 3942

**1920 Buffalo Nickel, Superb Gem
Tied for Finest, Lustrous and Sharp**

- 3063 1920 MS67 PCGS.** A brightly lustrous Superb Gem example of this Philadelphia issue, tied for numerical finest in the combined PCGS and NGC certified populations. Both sides display attractive, nickel-gray surfaces with faint tinges of lilac and rose. A Mint-made strike-through which begins below a feather and rises through it is of no significance, but may serve as a future pedigree marker. Population: 11 in 67, 0 finer (10/15).

Ex: The Oliver Collection/Chicago Signature (Heritage, 8/2011), lot 3445.

From The Leon Hendrickson Collection. NGC ID# 22RP, PCGS# 3944

**1923-S Nickel, MS65
Pleasing Strike and Surface Quality**

- 3064 1923-S MS65 PCGS.** The 1923-S Buffalo nickel is rare at the Gem level, despite a substantial mintage of more than 6 million pieces. This well-struck Gem displays hints of gold and ice-blue toning along with strong, satiny mint luster. The mintmark is sharp. Housed in a green label holder. Population: 34 in 65, 2 finer (5/11).

Ex: Summer FUN (Heritage, 7/2011), lot 3322.

From The Leon Hendrickson Collection. NGC ID# 22RW, PCGS# 3950

1924 Nickel, Superb Gem
Tied for Finest Known

- 3065 1924 MS67 PCGS. CAC.** In an article published in *Numismatic News* dated November 25, 2008, Paul M. Green notes that the Philadelphia Buffalo nickels as a whole are overlooked, though he also highlights the 1924 as being the most challenging (and most expensive!) P-mint issue of its period. This Superb Gem, tied with nine others at both services for finest in the combined certified population, is immensely lustrous beneath delicate nickel-blue patina that shows apricot-tan and lavender peripheral accents. An excellent strike, with a "chin-whiskers" die clash below the portrait's chin adding interest. The series enthusiast should take a close look at this beauty. Population: 6 in 67, 0 finer (10/15).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 5052.
From The Leon Hendrickson Collection. NGC ID# 22RX, PCGS# 3951

1924-S Buffalo Nickel, MS64
Seldom Encountered Finer

- 3066 1924-S MS64 PCGS.** This issue and the 1926-S are among the keys in higher Mint State grades to a Buffalo nickel set. The present piece shows some weakness on the Indian's braid above the knot, but the bison is much better impressed than normal with good detailing on the tail and horn, and only slight weakness on the shoulder. There are glints of gold and azure on each side along with generous helpings of mint luster that contribute to the overall appeal and confirm the near-Gem assessment. PCGS has graded 43 examples finer (10/15).
Ex: Central States Signature (Heritage, 4/2006), lot 1078; Beverly Hills Signature (Heritage, 11/2011), lot 3178.
From The Leon Hendrickson Collection. NGC ID# 22RZ, PCGS# 3953

1925-D Nickel, Sharp MS66
Registry Set Upgrade

- 3067 1925-D MS66 PCGS Secure. CAC.** The D-mint Buffalo nickels of the mid-1920s are some of the most strike-challenged issues in the entire series, often vying for the title with some of the more-notorious S-mint strike rarities such as the 1920-S and 1925-S. The 1926-D is a special case, one about which David Lange writes in his series reference (*italics added for emphasis*):

"This date has long been cited as the most difficult to find fully struck, probably due to an early citation in R.S. Yeoman's *A Guide Book of United States Coins*. While most 1926-D nickels are indeed found with extremely worn dies, particularly on the reverse, *the problem is no worse than for 1919-D, 1919-S, 1920-S, 1925-D, and 1925-S.*"

The present Premium Gem 1925-D is far better-struck than the typically encountered example, despite some minor weakness in the central obverse above the braid. But the bison has a split tail, the horn is well-defined, and other details and the peripheral lettering are far sharper than usual. The centers are a consistent purplish-gray, accented by lighter champagne tones near the reverse rims. Said reverse is rotated about 10 degrees counterclockwise. Only a few tiny contact marks are in concert with the MS66 grade, one of 10 such at PCGS and none finer (10/15).

Ex: Chicago Signature (Heritage, 8/2011), lot 7057.

From The Leon Hendrickson Collection. NGC ID# 22S3, PCGS# 3955

1925-S Nickel, Pleasing MS65
Only One Numerically Finer Example at PCGS

- 3068 1925-S MS65 PCGS.** Sharply struck for this Coolidge-era San Francisco issue with bold obverse and reverse detail for this oft-maligned San Francisco issue. LIBERTY is bold and completely separated from the border. The date is complete, and even the vertical split in the bison's front leg is visible.

Given the hard nickel alloy and the worn state of the dies employed to strike many mid-1920s era nickels, the attributes of the present coin are impressive. Satin luster gleams from every angle, while attractive champagne-gold color mellows the grayish-pearlescent surfaces. Buffalo nickel specialists will appreciate this Gem, not only as a high-grade example of a conditionally rare date but as a technically high-quality piece as well. Population: 27 in 65, 1 finer (10/15).

Ex: Charlotte ANA (Robert Korver, 3/2007), lot 295; Philadelphia Signature (Heritage, 8/2012), lot 5054.

From The Leon Hendrickson Collection. NGC ID# 22S4, PCGS# 3956

**1926-S Nickel, Beautifully Toned MS63
Pleasing Example of This Key Issue**

- 3069 1926-S MS63 PCGS.** The 1926-S is the undisputed key to the regular issue Buffalo nickels. Only 970,000 pieces were struck and it is an issue that is genuinely rare in all grades, right down to Good-VG. Like most Uncirculated examples, this piece shows slight softness of high-point detail. However, the surfaces are bright and satiny with pale aqua over each side and golden-rose patina around the devices. As often seen on this key, the dies were overused, creating pronounced die flow lines at the margins of each side. In spite of the grade, there are no observable abrasions, the grade apparently is derived from the slight striking softness. NGC ID# 22S7, PCGS# 3959
-

**1927-D Buffalo Nickel, MS65
Five Pieces Finer at PCGS**

- 3070 1927-D MS65 PCGS.** The 1927-D is an important condition rarity in a series replete with many challenges in higher grades. Nearly 6 million of these Denver nickels were coined, yet PCGS and NGC combined have certified fewer than a dozen pieces exceeding the MS65 level. This lovely Gem features pale-champagne toning over frosty nickel-gray surfaces. The strike is a trifle weak at the centers but still above average for the issue. Population: 69 in 65 (5 in 65+), 5 finer (10/15).
From The Leon Hendrickson Collection. NGC ID# 22S9, PCGS# 3961
-

**1927-D Nickel, MS65
Excellent Eye Appeal**

- 3071 1927-D MS65 PCGS. CAC.** Denver issues from the 1920s are often seen with varying degrees of striking weakness in the centers, and this example of the 1927-D is a typical piece in that regard, showing mild softness on the hair above the braid and on the bison's shoulder. The preservation and corresponding eye appeal, however, are excellent, with smooth, satiny luster shining through iridescent golden-gray and lavender-blue toning. Population: 68 in 65 (5 in 65+), 5 finer (10/15). NGC ID# 22S9, PCGS# 3961
-

**1929 Buffalo Nickel, MS67
None Finer at Either Service**

- 3072 1929 MS67 PCGS.** The 1929 nickel is never fully struck, and often notably weak at the centers. This satin-smooth Superb Gem ranks somewhere between sharp and normal for the strike, but it is off the charts for exceptional eye appeal. Golden-tan accents enliven the steely-blue patina on both sides. Mark-free surfaces show minor doubling on the date. No examples have received a finer grade from PCGS or NGC. PCGS population: 8 in 67, 0 finer (10/15). NGC ID# 22SE, PCGS# 3966

**1929-D Nickel, MS66+
Sharp Strike and Exceptional Preservation**

- 3073 1929-D MS66+ PCGS. CAC.** Green-gold and blue tints give this high-end Denver nickel great eye appeal. Strongly swirling luster and an above-average reverse strike confirm the PCGS Plus designation. Based on the combined PCGS and NGC populations, this exceptional example will be hard to surpass with just two pieces certified numerically finer. PCGS Population: 4 in 66+, 1 finer (10/15).
Ex: Long Beach Signature (Heritage, 6/2012), lot 3379.
From The Leon Hendrickson Collection. NGC ID# 22SF, PCGS# 3967

**1930-S Nickel, Marvelous MS67
Low-Mintage Depression-Era Issue**

- 3074 1930-S MS67 PCGS.** The 1930-S nickel was largely withheld from release at the time of its manufacture, because little demand existed for new coinage struck during the Great Depression. Placed into storage, the nickels were still on hand in 1934 when the economy showed signs of recovery. Upon release, the low-mintage coins (5.4 million pieces) were hoarded by speculators and dealers, making the issue more available than its mintage suggests. Today, even full Gems are readily available, yet higher-grade coins are scarce to rare.

This marvelous Superb Gem displays a rich-lilac sheen over nickel-gold surfaces — well-balanced front-to-back — while the strike is measurably stronger than usually seen for the issue. Both sides display glowing mint luster and impeccable preservation with outstanding eye appeal. The coin is an excellent fit for the finest Buffalo nickel or type collection. Population: 4 in 67, 0 finer (6/12).

Ex: Central States Signature (Heritage, 4/2009), lot 2156; Philadelphia Signature (Heritage, 8/2012), lot 5060.

From The Leon Hendrickson Collection. NGC ID# 22SJ, PCGS# 3970

1937-D Buffalo Nickel, MS64
FS-901, Three-Legged

3075 1937-D Three-Legged, FS-901, MS64 NGC. This famous polished die variety characteristically exhibits moderate die erosion, as a late die state is what prompted the inadvertent polishing away of the bison's forward leg. This piece exhibits the usual die erosion in the recesses and has satiny golden luster. Well-struck with minimal abrasions. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

1914 Buffalo Nickel, PR67
Outstanding Matte Proof Type Coin

3076 1914 PR67 PCGS. The textured surfaces, flat rims, and needle-sharp strike all confirm the matte proof format, but the brilliant satin luster is surprisingly lively for the finish. Silver luster radiates from the lightly toned surfaces, with almond-gold coloration adding just the right amount of visual impact to the amazingly sharp surfaces. A Superb Gem proof in every respect. Population: 87 in 67 (6 in 67+), 11 finer (10/15). NGC ID# 278T, PCGS# 3991

1914 Buffalo Nickel, Superb Gem
Attractive, Finely Textured Matte Proof

3077 1914 PR67 PCGS. CAC. The 1914 proof five cent is the date most frequently encountered among the 1913 to 1916 proof nickels. PCGS population data indicate that it can be located with patience and searching through the Premium Gem level of preservation, but the population decreases significantly in PR67 and above. Soft champagne coloration bathes both sides of the present Superb Gem, each of which is sharply struck and nicely preserved. Housed in a green label holder with CAC endorsement.
Ex: New York Signature (Heritage, 12/2011), lot 3309.
From The Leon Hendrickson Collection. NGC ID# 278T, PCGS# 3991

1915 Buffalo Nickel, PR67
Sharp Matte Proof

3078 1915 PR67 PCGS. Ice-blue and tan-gold toning adorn this razor-sharp Superb Gem. The surfaces are void of contact or carbon, though we note a few small areas of deep-tan toning beneath the bison. True matte proofs were only issued through 1916, and with a sparse mintage of 1,050 pieces the 1915 is less-available than other dates in the short proof series. Encapsulated in an old green label holder. Population: 67 in 67 (9 in 67+), 2 finer (10/15).
Ex: New York Signature (Heritage, 12/2011), lot 3310.
From The Leon Hendrickson Collection. NGC ID# 278U, PCGS# 3992

**1936 Buffalo Nickel, Satin Finish PR68
Beautifully Toned, Conditionally Rare Type One**

- 3079 1936 Type One — Satin Finish PR68 PCGS. CAC.** The Type One or Satin Finish pieces of 1936 were the first widely distributed proof Buffalo nickels in two decades. Unfortunately, contemporary collectors still preferred the brilliant finish proofs, and complaints caused the Mint to switch to that style later in the year. Present-day collectors appreciate the quality of the Satin finish examples, which are more challenging to locate than their Type Two counterparts. This richly toned piece ranks among the finest survivors. Exquisitely detailed devices emerge from shining, satiny fields. Pale ice-blue patina graces the centers, while deeper gold and peach shadings prevail near the rims. CAC endorsed — a virtually flawless and undeniably appealing Superb Gem proof. PCGS has graded only one finer example — a situation that has not changed in many years (10/15).

From The Leon Hendrickson Collection. NGC ID# 278X, PCGS# 3994

**1936 Nickel, Gleaming PR67+
Brilliant Finish**

- 3080 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC.** An early strike from highly polished dies, this brilliant proof 1936 Buffalo nickel is so bright it produces a blinding flash when tilted beneath a light. The strike is bold, and the surfaces are devoid of distractions. The Type Two proof 1936 nickel is occasionally seen in this grade, but finer representatives are rare with only eight such pieces certified by PCGS (10/15). NGC ID# 278Y, PCGS# 3995

**1937 Buffalo Nickel, Brilliantly Toned PR68
Fresh-From-Mint Preservation**

- 3081 1937 PR68 PCGS. CAC.** A proof mintage of 5,769 Buffalo nickels was well-received in 1937, the second year of modern proof coinage, and the last proof date for this popular design. In spite of the relatively small mintage, the 1937 is still the most available proof Buffalo nickel, as many examples were saved by collectors at the time of issue. Even so, the date is very scarce at the PR68 level. PCGS has certified only two dozen coins in PR68, with a single example finer (10/15). The present coin is a spectacular example, with brightly mirrored fields that illuminate spectacular multicolored iridescent toning. Radiant ice-blue tones yield to vibrant gold highlights and violet undertones. The design elements are fully brought up, and no flaws are visible to the naked eye. The outstanding visual appeal is attested by the CAC endorsement.

Ex: Central States Signature (Heritage, 4/2010), lot 2044; FUN Signature (Heritage, 1/2012), lot 5368.

From The Leon Hendrickson Collection. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1942-D/D Jefferson Nickel, MS62
D Over Horizontal D, FS-501

- 3082 1942-D D Over Horizontal D, FS-501, MS62 PCGS.** The remnants of an undertype D in a horizontal position are visible beneath the primary mintmark, identifying the rare *Cherrypickers* variety. This attractive MS62 example offers well-detailed design elements, with full steps on Monticello, and lustrous surfaces that show a scattering of minor contact marks. Population (for the variety): 4 in 62, 13 finer (10/15). NGC ID# 22TL, PCGS# 38495 Base PCGS# 4015

1950-D Nickel, MS67+ Full Steps
Registry Set Jefferson Key

- 3083 1950-D MS67+ Full Steps PCGS.** As the 1950-D was once hoarded by the roll full, it is surprising that so few examples survive in Superb Gem condition. This Plus-designated Full Steps representative showcases a full strike with frosty luster and rich multicolor toning. Close study finds the surfaces virtually pristine. Population: 18 in 67 (2 in 67+) Full Steps, 0 finer (10/15). NGC ID# 22UF, PCGS# 84042

1955-D Nickel, MS65 Full Steps
Registry-Grade Example

- 3084 1955-D MS65 Full Steps PCGS.** This Denver issue is scarce in Full Steps grades and is rare in this category at the Gem level. This piece is boldly struck with satiny luster and pleasant champagne toning. There are no singular abrasions, although a loupe reveals a few trivial handling marks that limit the grade. A full numerical step finer than the piece in the current highest-rated Registry Set. Population: 5 in 65, 1 finer (10/15). NGC ID# 22UW, PCGS# 84057

EARLY HALF DIMES

1795 Half Dime, V-4, LM-10, AU53
Lovely Type Coin

- 3085 1795 V-4, LM-10, R.3, AU53 NGC.** The final die marriage for the year, the LM-10 variety is preferred by type collectors, especially in its later die state with a bold cud above star 9 and TY of LIBERTY. Rose-gold and blue accents accompany slate-gray toning on this example, with silver luster shining through on both sides. Abrasions are limited to several delicate lines near stars 14 and 15 and across the portrait — evident when viewed with a lens — plus a few other light lines below the eagle's beak. Sharp definition remains on the central elements and elsewhere except at the left-hand stars, which are characteristically weaker than those on the right. An attractive AU coin with generous eye appeal. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 Half Dime, Choice XF
LIKERTY, V-1, LM-1

- 3086 1796 LIKERTY, V-1, LM-1, R.3, XF45 PCGS. CAC. Diverse aquamarine, peach-gold, tan-brown, navy-blue, lavender, and gunmetal toning enrich this attractive Choice XF Draped Bust, Small Eagle half dime. Luster emerges from design elements, and the only apparent abrasions are minor and located near the eagle's beak and claws. A charming representative of the two-year type. The LIKERTY variety obtains its name from defective upper and lower crossbars on the B in LIBERTY. The repunched Y in LIBERTY, perhaps of greater numismatic consequence, is rarely the subject of commentary. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

1800 Half Dime, XF40
V-2, LM-3, LIBEKTY

- 3087 1800 LIBEKTY, V-2, LM-3, R.4, XF40 PCGS. Gunmetal-gray and blue toning yields to pale gold at the margins on the obverse, while the reverse is somewhat lighter with golden highlights over silver-lilac shades. The R in LIBERTY is widely open. Die buckle at BUS of PLURIBUS extends from the top of the shield to field star 12. A scarce and popular *Guide Book* variety. Population (all 1800 varieties): 7 in 40, 23 finer (10/15). NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

1803 Half Dime, Near-Mint
Large 8, V-1, LM-2

- 3088 1803 Large 8, V-1, LM-2, R.4, AU58 PCGS. Ocean-blue and magenta toning adorns this coruscating near-Mint Heraldic Eagle dime. The strike is superior on the major devices, with minor blending limited to the shoulder curls and the R in PLURIBUS. A loupe reveals only inconsequential contact. Among the three 1803 die marriages, LM-2 is intermediate in rarity between the scarce LM-3 and the very scarce LM-1. As of (10/15), PCGS has certified only a single VF30 example as LM-2, while NGC has graded four pieces as LM-2 with the finest as AU55. Most third party service examples remain in unattributed holders. NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

SEATED HALF DIMES

1853 Arrows Half Dime, MS67 High-End Type Coin

- 3089 1853 Arrows MS67 PCGS.** The 1853 is the most plentiful of the With Arrows half dimes, benefiting from a mintage of more than 13 million coins. The issue is available in grades through MS64, but becomes scarce in Gem and finer condition. For the collector seeking only the finest, a very limited number of Superb Gems are known, and are rarely seen. This is just such a coin, displaying sharp design elements and rich, satiny luster. As expected for the grade, there are no significant abrasions, and the eye appeal is superb. The obverse shows a pale lilac-gray center with sun-gold, olive, and russet appearing around the periphery. The reverse is more boldly colored with irregular crimson and russet toning and a few bright silver patches shining through. Population: 9 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 233Y, PCGS# 4356

1860 Transitional Half Dime, Multicolor MS66 Well-Preserved Judd-267 Example

- 3090 1860 Transitional MS66 PCGS. CAC. Judd-267, Pollock-315, R.4.** This transitional issue could be described as "Stars Obverse, Legend Omitted Reverse," as the back side only displays the HALF DIME denomination within a wreath. These coins were struck during the transition of moving the legend UNITED STATES OF AMERICA to the obverse. This lovely Premium Gem shows multicolor patina on each side, with good preservation and a bold strike, save for weakness on the lower reverse which seems to be common on this very scarce issue. Population: 8 in 66 (1 in 66+), 9 finer (10/15). NGC ID# 2346, PCGS# 4373

1860-O Half Dime, MS67 ★ Condition Census

- 3091 1860-O MS67 ★ NGC.** The 1860-O is the final half dime bearing the New Orleans mintmark. Federal control of the mint was lost the following year with the outbreak of the Civil War, and operations were not resumed until 1879, several years after the half dime was discontinued in 1873. This Star-designated Superb Gem is tied with a handful of pieces for the finest known. The obverse displays vivid multicolor toning around the margins and champagne-gold in the center; the reverse is near-brilliant overall but with occasional dabs of color around the periphery. The upper-left portion of the wreath and Liberty's head show trivial weakness. Census: 2 in 67 (2 in 67 ★), 0 finer (9/15). NGC ID# 2348, PCGS# 4378

PROOF SEATED HALF DIME

1852 Half Dime, Richly Toned PR65
One of Perhaps 10 Proofs Minted

3092 1852 PR65 PCGS. CAC. This carefully preserved, richly toned Gem comes from an estimated mintage of a mere 10 proofs. The coins were struck several years prior to Mint Director Snowden's push to popularize proof coinage and make them more widely available to collectors. In 1852, proofs were still produced on an "as-needed" basis, whenever requested by a collector.

Dense, obviously original sea-green and copper-red toning dominates both sides, but iridescent accents of gold and purple-rose are also noteworthy. The design details are razor-sharp, and bright reflectivity becomes evident beneath the deep patina when the piece is rotated under a lamp. A few wispy die striations occur on the obverse and reverse alike (creating the brightness in the fields), but the pleasing surfaces are free from bothersome contact marks. The proof 1852 half dime is a rare coin in any grade. This piece is among the finest known in addition to being the only Gem proof certified by PCGS. NGC has graded two coins at PR65, with one finer. PCGS has also encapsulated a single proof specimen as PR66 (10/15).

Ex: FUN Signature (Heritage, 1/2007), lot 854. NGC ID# 235K, PCGS# 4429

EARLY DIMES

1797 JR-1 Dime, AU50
16 Stars Obverse, Sharp Detail

3093 1797 16 Stars, JR-1, R.4, AU50 PCGS. Variety JR-1 has a 16 star obverse and a Pointed 9 in the date. The additional star represents Tennessee's entry into the Union and was only used to strike a limited number of coins in 1797, making it a single-year type. This middle die state example features a sizeable die break at the lower obverse from the rim below star 2 to the rim in front of Liberty's bust. The Small Eagle reverse was last used in 1797, when 25,261 dimes were reportedly struck at the Mint. That figure likely includes an unknown number of coins dated 1796. Around 200 or so examples are believed extant in all grades.

This pleasing AU representative displays even steel and violet-gray patina with splashes of bluish-green coloration. Liberty's hair strands are razor-sharp, as are the eagle's wing and breast feathers despite a touch of friction. Several stars are recut and show inconsequential softness. The overall appeal is unquestionable. Population: 5 in 50, 21 finer (10/15). NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

1800 JR-1 Dime, MS62
Very Rare in Mint State

3094 1800 JR-1, R.4, MS62 PCGS. The dimes dated 1800 are underrated and seldom appear in high grades regardless of variety (two die marriages known). Both share the same obverse, with LI and RT closely spaced. The reverse of the JR-1 shows small, narrow A's. Both variants are described in the new *Bust Dime variety Identification Guide* as very scarce to rare. The reported mintage for the issue is 21,760 coins, and Mint State examples are very rare. This piece exhibits deep gray-gold patina with a faint reddish undertone. Satiny luster flows over surfaces that show strongly defined relief elements. A diagonal mark angling upward from Liberty's neck helps account for the grade, but much eye appeal is present. For both varieties, Population: 4 in 62, 4 finer (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 3131. NGC ID# 236H, PCGS# 38754 Base PCGS# 4470

1802 JR-4 Dime, VF35
Choice Surfaces, Evenly Toned

3095 1802 JR-4, R.4, VF35 PCGS. Sharply defined except at the diagnostically weak centers, this JR-4 example shows very few marks aside from a solitary rim bump above star 9. Pleasing taupe-gray toning blankets both sides of the coin. Just 10,975 pieces were struck, and while the JR-4 ranks among the most available die pairs for the year, it is scarce nonetheless in all grades. Population: 1 in 35, 27 finer (10/15). NGC ID# 236K, PCGS# 38761 Base PCGS# 4472

SEATED DIMES

1838 Large Stars Dime, MS67
F-107, No Drapery

3096 1838 No Drapery, Large Stars, F-107, R.4, MS67 NGC. Stars 5, 12, and 13 are repunched. This apple-green and gunmetal-gray Superb Gem is well struck except for the dentils. The fields exhibit only trivial imperfections. A lustrous and beautiful representative of the Stars, No Drapery subtype, which was coined for only three years. PCGS# 537654 Base PCGS# 4568

**1839-O/O No Drapery Dime, Toned MS67+
Sharply Struck Fortin-104a, Top 100 Variety**

- 3097** 1839-O/O No Drapery, Large O, F-104a, FS-501, High R.4, MS67+ NGC. A Fortin Top 100 Variety. The color plate coin for Fortin-104a, formerly in the Eugene H. Gardner Collection. Star 8 is noticeably repunched, and a spectacular, bisecting die crack runs rim-to-rim from the I in UNITED, through DIME, and through the C in AMERICA. The mintmark is boldly repunched below the primary Large O.

Orange-russet and violet patina visits the highly lustrous silver-gray surfaces of this magnificent Superb Gem. The devices are sharply struck, significantly better than typically seen on this issue, including Liberty's head, the shield, and the leaves, elements usually found weak. Impeccable preservation adds to the coin's wonderful eye appeal. Clearly in the Condition Census for the 1839-O, and perhaps unsurpassable in terms of eye appeal. Census (all varieties): 4 in 67 (2 in 67+), 2 finer (10/15).

Ex: Bowers and Merena (8/1999), lot 1314; Eugene H. Gardner Collection Part III (Heritage, 5/2015 as MS67 NGC without the Plus designation), lot 98221. PCGS# 537685 Base PCGS# 4572

**1846 Seated Dime, AU53
Rare This Sharp**

- 3098** 1846 F-101, R.4, AU53 PCGS. With a small 31,300-coin mintage, the 1846 stands out as a key issue among 1840s Seated dimes. This issue experienced heavy circulation, and most survivors are located in VF or lower grades. This AU representative is conditionally rare, and only three low-end Mint State pieces are certified. This representative is well-detailed with steel-gray patina that shows occasional olive overtones; an evenly struck example with little wear. Population: 4 in 53, 8 finer (10/15). PCGS# 537837 Base PCGS# 4588

**1852-O Seated Dime, MS64
Better New Orleans Issue**

- 3099** 1852-O F-101, R.4, MS64 PCGS. A scarce issue that likely experienced moderate melting after the weight reduction of silver coins in 1853. This 1852-O dime is tied for the finest of 16 Mint State pieces at PCGS (10/15). The strike is bold, and the satiny surfaces display smooth, olive-gold patina. There are no bothersome abrasions. Population: 5 in 64, 0 finer (10/15). PCGS# 537938 Base PCGS# 4598

**1859 Stars Obverse Dime, Superb Gem
Exquisitely Preserved Surfaces**

- 3100** 1859 F-106, R.4, MS67 NGC. One of the last Stars Obverse dime issues, the 1859 saw a sizable six-figure mintage (429,200 coins) but is a distinct rarity at the Superb Gem level. This well-defined and profoundly lustrous example has obverse toning in cerulean at the margins and peach on the interior, the latter color forming the reverse's border-toning with a fade to silver. Census: 19 in 67 (2 in 67 ★), 1 finer (10/15).

Ex: Central States Signature (Heritage, 4/2012), lot 3778. NGC ID# 2394, PCGS# 538137 Base PCGS# 4619

**1866-S Dime, MS66
Tied for Finest Certified**

3101 1866-S F-101, R.4, MS66 NGC. Fortin-101 is identified by a sharp downward-sloping date, a vertical die crack running from Liberty's head down through the shield, and a so-called small, weak mintmark. It is, however, clearly visible despite the nomenclature.

This issue (135,000 coins struck) is very rare in Uncirculated condition. Approximately 20 pieces survive in all Mint State grade levels. This example, which has been off the market for 15 years, is tied with the Bob Simpson coin for finest certified. However, this piece is arguably more eye-appealing.

A veil of light golden toning covers this lustrous Premium Gem. The devices are well-struck with a hint of softness on Liberty's head and the bowknot. The mintmark is clearly defined, unlike many examples from the issue. Near-pristine surfaces are devoid of any mentionable marks. An impeccable S-mint representative.

Ex: Lindesmith Collection (Bowers and Merena, 3/2000), lot 381; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 11231. PCGS# 538215 Base PCGS# 4644

**1871 Dime, MS66
Among the Finest Survivors**

3102 1871 MS66 PCGS. CAC. The variety is attributed by a level date and a die crack that extends from the bottoms of the ribbons to the right (facing) wreath. Pearl-gray iridescence occasionally cedes to cobalt-blue and olive-green toning, the latter color palette showing more presence on the reverse. This softly frosted, well-struck Premium Gem has undisturbed fields and impressive eye appeal. More than 900,000 coins were minted, yet this example is tied for finest with just six others at PCGS (10/15).

Ex: Denver Signature (Heritage, 8/2006), lot 877. NGC ID# 23A4, PCGS# 4653

**1874 Arrows Dime, MS67
Attractive Peripheral Toning**

3103 1874 Arrows MS67 NGC. Several cuds are evident along the obverse rim from 9 to 11 o'clock. This magnificent Superb Gem's chief attribute is the beautiful rainbow toning that surrounds the peripheries, leaving the satiny centers brilliant and framing the well-struck design elements. Census: 9 in 67 (3 in 67 ★), 2 finer (10/15). NGC ID# 23BK, PCGS# 4668

1881 Seated Dime, MS67+
Lovely Toning, Exceptional Surfaces

- 3104 1881 F-101a, R.4, MS67+ NGC. A Condition Census example of this late-series Seated Liberty dime. The strike is bold, producing a partial wire rim on both sides. Rich ocean-blue, mint-green, and lavender hues encompass each side with frosty underlying luster. The 1881 had a small mintage of 24,000 pieces and is sought-after in all grades. Census: 6 in 67 (2 in 67+), 1 finer (10/15). PCGS# 538646 Base PCGS# 4689

1887 Dime, MS68 ★
Tied for Finest Certified

- 3105 1887 MS68 ★ NGC. The 1887 Seated Liberty dime is an available date in most grades, with a reported mintage of more than 11 million coins. Of course, examples in MS68 with the Star designation are extremely rare. The present coin is delightfully toned in shades of gold and violet, with most of the color on the obverse. All the design details are sharply impressed. Census: 2 in 68 (2 in 68 ★), 0 finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1680; Central States Signature (Heritage, 4-5/2009), lot 155; Long Beach Signature (Heritage, 9/2010), lot 3711. NGC ID# 23B5, PCGS# 4698

PROOF SEATED DIMES

1853 Arrows Dime, PR66+ The Finest of Five Traced Examples From the Kaufman and Gardner Collections

3106 1853 Arrows PR66+ PCGS. CAC. F-101. This is the finest certified 1853 proof Arrows dime, previously from the Kaufman and Gardner collections. While the number and timing of proof strikes has long been debated, it is generally agreed just five Arrows and two No Arrows proof dimes were manufactured. The current roster has not changed significantly in rank or known examples over the past fifteen or so years (see below).

All genuine proofs show a diagnostic die lump above Liberty's right breast, and a smaller, less noticeable one near the right elbow. Proofs always display die clashing and spikelike artifacts beneath Liberty's chin — apparently, an unfinished area of the die.

Earlier literature has suggested that the 1853 proofs are unintentional or “accidental” pieces struck from dies that were resurfaced and polished to remove clash marks. We disagree, as die resurfacing would almost certainly remove the shallow relief elements that are bold on known proofs. Gerry Fortin makes a valid observation that the Fortin-120 obverse is of special interest. The date position is the same as the proofs, and the die lump above Liberty's breast and the one on the elbow are present, as is the unfinished die area beneath Liberty's chin. The date position is the same as the proofs — in fact, all diagnostics appear the same, except for the presence of die clashing. Might the proofs have been struck late in the year from the Fortin-120 die pair after it clashed, and that these dies were later prepared for proofs with a careful but non-effacing polishing? If so, Fortin-101 may be a late die state of the Fortin-120 dies.

Each side of this Premium Gem proof dime exhibits boldly struck design elements and deeply mirrored fields, along with a melange of medium-intensity champagne toning splashed with whispers of aqua-blue, brown, and violet. The obverse shows slightly lighter hues than the reverse. This well-cared-for specimen displays pleasing overall eye appeal, appropriately recognized by CAC.

1853 Arrows Proof Dime Roster

1. PR66+ PCGS. Kaufman Collection / ANA Signature (Heritage, 8/2007), lot 1784; Greensboro Collection, Part 1 / ANA National Money Show (Heritage, 10/2012), lot 3951; Eugene H. Gardner Collection, Part 1 (Heritage, 6/2014 as PR66 NGC), lot 30290; Houston Money Show (Heritage, 12/2014), lot 3519. **The present coin.**

2. PR65 PCGS. John Jay Pittman Collection (David Akers, 10/1997), lot 615; Bob Simpson; unknown intermediaries; FUN Signature (Heritage, 1/2015), lot 4072; Regency Auction XIV (Legend, 10/2015), lot 245.

3. PR65 NGC. Superior (10/2000), lot 4345. The cataloger implies that this is the Pittman coin when he states that it is the finer of two known proofs, identifying the Norweb coin as the other one. However, the plate clearly shows an entirely different coin from either of those pieces.

4. PR63 NGC. Hollinbeck Coin Co. (6/1953), lot 1997; Norweb Collection (Bowers 10/1987), lot 484; Lovejoy Collection (Stack's, 10/1990), lot 270.

5. Choice Proof. Kamal Ahwash (8/1981); unknown; Stack's (3/1996), lot 276. NGC ID# 23CE, PCGS# 4742

1861 Dime, PR66 Cameo
Rare With Field-Motif Contrast

- 3107** 1861 PR66 Cameo PCGS. F-101, Type Two, R.4. Razor-sharp motifs deliver modest contrast against the deeply reflective fields of this Premium Gem proof Cameo, while the preservation is equally impressive. Peripheral marlin-blue toning frames softer lavender centers. This attractive Civil War-era proof is among the finest Cameos at PCGS. Population: 3 in 66 (1 in 66+) Cameo, 0 finer (10/15). NGC ID# 23CK, PCGS# 84754

1874 Arrows Dime, PR66
Olive-Gold and Lavender-Orange Patina

- 3108** 1874 Arrows, F-101, R.3, PR66 NGC. A noticeable die defect above the center point on Liberty's neckline readily identifies the proof die pair. This representative is boldly struck throughout with deeply mirrored fields and seemingly flawless surfaces. Olive-gold and lavender-orange hues intermingle over each side, delivering a high degree of eye appeal. A thread-like strike-through is noted between the dentils and the left edge of the rock, and another connects the bottom edges of the IT in UNITED. One of 700 proofs minted. Census: 15 in 66, 2 finer (10/15). PCGS# 539034 Base PCGS# 4770

BARBER DIMES

1893-S Dime, Spectacular MS66
Semiprooflike Fields

- 3109** 1893-S MS66 PCGS. Ex: Lily Nicole Collection. Another spectacular coin from the now second-finest PCGS Registry Set of Barber dimes, this 1893-S displays notably reflective fields that accentuate the bold, frosty design elements. The coin is largely untuned, save for a few tiny areas of amber-gold color in the recesses, and the eye-appeal seems to increase the longer one studies the surfaces. The 1893-S is a challenging date in Gem condition, and finer pieces, such as the present coin, are extremely rare. Population: 7 in 66, 1 finer (10/15).
 Ex: Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3899. NGC ID# 23DS, PCGS# 4802

1895-S Dime, MS65+
Major Series Condition Rarity

- 3110** 1895-S MS65+ PCGS. CAC. Ex: Lily Nicole Collection. The 1895-S boasts the highest mintage of the three 1895 Barber dime issues (more than 1.1 million coins), but is actually the rarest in Gem or finer condition. This Plus-designated MS65 example shows sharp design elements amid satiny shades of lavender-gray and pale champagne luster. A few minute ticks define the grade, but are not discernable to the unaided eye. Population: 7 in 65+, 2 finer (10/15).
 Ex: Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3905. NGC ID# 23DX, PCGS# 4808

1896-S Dime, MS66
None Numerically Finer
Ex: Duckor

- 3111 1896-S MS66 PCGS.** Ex: Lily Nicole Collection. A frosty, glowing Premium Gem, this 1896-S dime also boasts sharp design definition and shows warm cream-gold toning with small areas of deeper amber and russet color. A single tick above Liberty's eye is the only discernable surface flaw. The 1896-S is slightly underappreciated in comparison to its New Orleans counterpart, as both issues have comparable mintage of 575,056 and 610,000 pieces, respectively, but the 1896-O is the more highly acclaimed issue. Population: 12 in 66 (1 in 66+), 0 finer (10/15).
 Ex: Duckor Collection / FUN Signature (Heritage, 1/2006), lot 983; Long Beach Signature (Heritage, 5/2009), lot 469; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3907. NGC ID# 23E2, PCGS# 4811

1897-S Dime, Sharp MS66
Impressive Technical Quality

- 3112 1897-S MS66 PCGS.** Ex: Lily Nicole Collection. This is a fully struck Gem that is mostly brilliant, but with a faint blush of light golden toning on each side. Highly lustrous with exceptional quality for this conditionally rare date and mint. Close examination will locate a few tiny ticks, but the surfaces are far better than one normally encounters, even for this lofty grade level. A great collector coin to put away and long enjoy. Population: 7 in 66, 1 finer (10/15).
 Ex: Central States Signature (Heritage, 4/2009), lot 199; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3911. NGC ID# 23E5, PCGS# 4814

1898-S Dime, Multihued MS66
Underrated Series Issue

- 3113 1898-S MS66 PCGS. CAC.** Ex: Lily Nicole Collection. Variegated autumn-gold and forest-green toning blankets this intricately struck and lustrous high-grade Barber dime. The fields are pristine, and the portrait displays only minuscule marks. Although commonplace in well-circulated grades, the 1898-S is scarce in Mint State, and decidedly rare as a Premium Gem. Population: 7 in 66, 1 finer (10/15).
 Ex: Summer FUN Signature (Heritage, 7/2011), lot 3436; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3915. NGC ID# 23E8, PCGS# 4817

1909 Barber Dime, MS67
Tied With Two Others for Finest

- 3114 1909 MS67 PCGS.** Ex: Lily Nicole Collection. This is a stunning Superb Gem with frosty silver luster and subtle ice-blue and champagne surfaces. Faint striations are visible on Liberty's cheek, from roller marks left over from the initial planchet preparation. Most of the design details are sharp, with only trivial weakness detectable on the hair by Liberty's forehead, and the lower-right part of the wreath. The 1909 Barber dime becomes a notable condition rarity in MS66 and finer grades, with this piece the only individual MS67 coin we have ever offered. Population: 3 in 67, 0 finer (2/15).
 Ex: Duckor Collection / FUN Signature (Heritage, 1/2006), lot 1022; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3956. NGC ID# 23FB, PCGS# 4850

PROOF BARBER DIME

1898 Dime, Stunning PR68 Deep Cameo
One of the Six Finest Known

3115 1898 PR68 Deep Cameo PCGS. CAC. The 1898, sporting a production of 735 pieces, is one of the more common proofs in the Barber dime series. Even Deep/Ultra Cameos can be acquired with patient searching. That said, Deep/Ultra Cameos in the lofty grade of MS68 are significant condition rarities. Indeed, PCGS and NGC combined report only six examples at this level and none finer.

The deep mirrored fields of the present offering yield stunning contrast with the frosty motifs. Razor-sharp definition is apparent on the design elements, further enhancing the coin's magnificent eye appeal. A minute mark beneath the R in AMERICA and another on the wreath to the right of and in line with the bottom of the E in DIME are mentioned only as identification markers. Population: 2 in 68 Deep Cameo, 0 finer (10/15). NGC ID# 23GB, PCGS# 94882

MERCURY DIMES

1920-S Dime, MS65 Full Bands
Ex: Shapiro

3116 1920-S MS65 Full Bands PCGS. Ex: Larry Shapiro. Unlike most 1920-S dimes, this piece shows no fading of the final digit 0 into the rim. Lange notes that specimens having both full bands and a sharp date are rare. This example has frosty mint luster that radiates from both sides. Perusal with a loupe reveals a few ticks on the neck and fasces, a couple of small toning spots on the obverse, and a handful of similar areas on the reverse. The details are full in the center but a bit soft through STATES. Population: 33 in 65 (1 in 65+) Full Bands, 12 finer (10/15).

Ex: FUN Signature (Heritage, 1/2006), lot 1880; FUN Signature (Heritage, 7/2009), lot 398. NGC ID# 23HD, PCGS# 4933

1921-D Dime, MS65 Full Bands
Seldom Seen This Fine

3117 1921-D MS65 Full Bands PCGS. The key-date status of the 1921-D Mercury dime accentuates demand for high-end Full Bands examples. This Gem is boldly struck and essentially brilliant, showing smooth, satiny luster that is devoid of significant abrasions. After the 1916-D, the 1921-D has the lowest mintage in the series: 1.08 million pieces. Population: 64 in 65 Full Bands, 23 finer (10/15). NGC ID# 23HF, PCGS# 4937

1939-D Mercury Dime, MS69 Full Bands
None Certified Finer

3118 1939-D MS69 Full Bands PCGS. Vivid shades of burnt-orange, greenish-gold, and magenta toning blanket the impeccably preserved surfaces of this virtually perfect coin. The design elements are sharply detailed throughout, with Full Bands definition on the fasces. Vibrant mint luster shines through the patina and eye appeal is incredible. Population: 20 in 69 Full Bands, 0 finer (10/15). NGC ID# 23JS, PCGS# 5019

**1943 Dime, MS68 Full Bands
Tied for Finest at Both Services**

3119 1943 MS68 Full Bands PCGS. With the wartime economy in full swing, the Philadelphia Mint manufactured 191 million Mercury dimes in 1943. Tens of millions of coins entered the channels of commerce, where they circulated extensively. The period also saw coin collecting gain in popularity, and so many 1943 Mercury dimes were set aside for numismatic purposes. Examples are easily obtainable through MS67 with or without Full Bands. The only challenging coins are those in MS68 with a Full Bands designation, and they are extremely rare. PCGS notes three such grading events and NGC reports one. Neither firm has seen a finer submission (10/15).

This superlative Mercury dime displays fully brilliant surfaces awash in glistening mint frost. The central bands are completely separated, and the diagonal bands are well-rounded. Each side is void of imperfections, unsurprising given the seemingly impossible grade. Our Auction Archives show merely six MS68 Full Bands appearances since 2003, highlighting the importance of this offering for serious Registry specialists. NGC ID# 23K9, PCGS# 5045

**1945 Mercury Dime, MS65 Full Bands
Scarce This Sharply Struck**

3120 1945 MS65 Full Bands PCGS. Although the 1945 Mercury dime is immensely plentiful overall, its availability does not span the Full Bands category. Barely more than 100 Full Bands representatives are reported by PCGS in all grades, contrasting to many thousands of non-Full Bands coins. At the Gem level, Full Bands 1945 dimes are highly sought-after and exceedingly scarce, and finer pieces are rare. This coin displays exemplary surface quality and might have garnered an even finer grade were it not for a couple of faint lines that appear on Liberty's cheek under close study. The strike is superb for the issue, including bold Full Bands. A hint of champagne toning warms each side, giving this piece outstanding eye appeal. Population: 38 in 65 Full Bands, 17 finer (10/15). NGC ID# 5A98, PCGS# 5057

1945-S Micro S Dime, MS67 Full Bands

3121 1945-S Micro S, FS-512, MS67 Full Bands PCGS. Although moderately available in the absolute sense, Full Bands examples of the Micro S dime are scarcely seen in Superb Gem condition. This brilliant, satiny representative is sharply defined and displays unabraded surfaces. Die polish lines in the obverse fields should not be mistaken for abrasions. Population: 34 in 67 (2 in 67+) Full Bands, 3 finer (10/15). NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

1936 Mercury Dime, PR68
The Sole Finest at PCGS
Housed in an Old Green Label Holder

3122 1936 PR68 PCGS. The 1936 is the debut issue in the seven-coin proof Mercury dime series and is also the rarest in high grade. This magnificent Superb Gem is not only the single finest at PCGS, but it is also encapsulated in an old green label holder. PCGS discontinued this particular holder type in 1995, meaning that this remarkable coin has been the unrivaled, single finest at PCGS for at least two decades. Two additional PR68 coins (one PR68 ★) are listed on the NGC Census. The Star-designated piece last realized \$15,275 in lot 4004 of the ANA Signature sale (Heritage, 8/2015). The other NGC coin last appeared in one of our auctions a decade ago in lot 2090 of the Dallas Signature sale (Heritage, 11/2005), where it garnered \$20,125. This old-time PCGS coin may well out perform both of the NGC specimens.

The strike is fully rendered on this piece, and the fields are deeply mirrored. Iridescent hues emerge from the peripheries, intruding upon near-brilliant centers. Close study with a loupe fails to reveal any perceptible flaws. Arguably one of the single most important proof Mercury dimes known. NGC ID# 27DG, PCGS# 5071

1938 Mercury Dime, PR68
Attractively Toned, None Finer at PCGS

3123 1938 PR68 PCGS. Fully struck and reflective with a sharp knife rim around both sides. This Registry-grade proof 1938 dime is among the finest at PCGS and displays lovely toning that includes light champagne centers with sun-gold and violet peripheries. After the 1936, the 1938 is the rarest issue in the proof series at the PR68 level. Population: 12 in 68 (1 in 68+), 0 finer (10/15). NGC ID# 27DJ, PCGS# 5073

1938 Mercury Dime, PR68
Registry Quality, None Finer at PCGS

3124 1938 PR68 PCGS. The mirrored fields appear concave, channeling the glassy reflectivity toward Liberty's reflective portrait. The reverse is vibrantly mirrored and pristine. The icy-silver surfaces are untuned except at the rims, which add a glimpse of almond-gold toning. Population: 12 in 68 (1 in 68+), 0 finer (10/15). NGC ID# 27DJ, PCGS# 5073

TWENTY CENT PIECES

1875-CC Twenty Cent Piece, MS65
Only Collectible Carson City Issue

3125 1875-CC MS65 NGC. The variety showing the date shifted left in relation to the shield point and Brunner and Frost's "High Close CC" reverse. This lovely Gem Carson City twenty cent piece displays typical weakness at the lower left of the obverse and corresponding point of the reverse. Both sides display pristine surfaces, satiny luster, and appealing iridescent toning in shades of rose and olive. The 1875-CC is the only collectible Carson City Mint twenty cent issue, and extremely popular as such. Only perhaps a dozen examples are certified finer at both services combined, discounting likely duplicates. Census: 36 in 65 (1 in 65+, 1 in 65 ★), 6 finer (10/15).

Ex: Long Beach Signature (Heritage, 2/2011), lot 3482. NGC ID# 23R6, PCGS# 5297

**1876 Twenty Cent, Toned MS66+
A Low-Mintage, Conditionally Rare Issue**

3126 1876 MS66+ PCGS. BF-2, R.2. The 1876 is the scarcest and lowest mintage of the regular-issue circulation-strike twenty cent pieces. Two die pairs were employed to accomplish the 14,400-piece production, although many coins may have been unreleased and later melted. The variety is attributed by the date sloping down and positioned about equally distant between the rock and the dentils, and by two raised lumps in the gown over the 6 in the date with a diagonal die line above the lumps.

Bluish-green, peach-gold, and russet patina drape the frosty fields and highlight the mostly grayish-white central motifs. The design elements display a notably sharp strike for the denomination, with both sides showing exemplary preservation. Very few examples exist in a finer grade. Population: 2 in 66+, 3 finer (9/15). NGC ID# 23R8, PCGS# 5299

EARLY QUARTERS

**1796 B-1 Draped Bust Quarter, Fair 2
Much-Desired, One-Year Type**

3127 1796 B-1, R.4, Fair 2 NGC. Just 6,146 quarters were struck in 1796, and today examples in any grade are the subject of avid collector demand. If there is such a thing as a "problem-free" Fair 2 coin, this smoothly worn example is it. The rims have become one with the stars and legends, yet the date remains nearly entirely visible and the outline of the central devices are ghostlike but identifiable. Iridescent rainbow tones drape both sides of this still-attractive, timeworn specimen. Amazingly, NGC has certified nine coins in this grade and PCGS another 15 pieces. NGC ID# 23RA, PCGS# 38919 Base PCGS# 5310

1804 B-1 Quarter, VG10

3128 1804 B-1, R.3, VG10 PCGS. Tompkins Die State 1/1. The 1804 is a well-known low-mintage key. The absence of clash marks makes it possible that the present quarter was among the first Heraldic Eagle quarters struck. A cream-gray and golden-brown example. Marks are surprisingly few, though we note a line through the first S in STATES. The legends are sharp aside from E PLU and portions of AMERICA. The reverse displays lacquer remnants in protected areas. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

**1805 B-2 Quarter, Choice AU
Substantial Luster**

3129 1805 B-2, R.2, AU55 PCGS. Tompkins Die State 2/2. Die clashing is visible at the neck and chin junction, and among the field stars on the reverse side. Pale reddish-gold translucence covers both sides of this lightly toned and lustrous Draped Bust quarter. Marks are sparsely distributed and minimal, although the obverse field displays faint hair-thin lines and an area near the I in LIBERTY shows slight granularity. Strong definition on Liberty's hair strands and drapery folds represent the sharp central strike, although most of the obverse stars are rounded as seen on even high Mint State pieces. Population (all varieties): 19 in 55, 36 finer (10/15). NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313

BUST QUARTERS

1818/5 Capped Bust Quarter, MS64+ Popular B-1 Overdate

- 3130** 1818/5 B-1, R.2, MS64+ PCGS. CAC. This late die state example has a heavy vertical die crack on the reverse, as well as other cracks, clash marks, and flow lines. Following the War of 1812 and the January 1816 fire that destroyed important equipment at the Philadelphia Mint, coinage production finally returned to normal by 1818. The copper cents of 1816 and 1817, and the half dollars dated 1817 were the only coins made during those two years. Quarter dollars and half eagles reappeared in 1818. This Choice Mint State piece has frosty antique-silver luster and lovely gold toning. The design motifs are bold. An exceptionally attractive Capped Bust quarter. Population: 2 in 64 (1 in 64+), 1 finer (9/15). NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

1824/2 B-1 Quarter, Near-Mint

- 3131** 1824/2 B-1, R.3, AU58 NGC. Rich cobalt-blue and apple-green toning blankets this briefly circulated better date Bust quarter. The borders exhibit luster, and the strike is sharp except on the claws. The fields exhibit only incidental contact. The sole 1824-dated marriage, and an underappreciated scarcity overshadowed by the rare 1823 and 1827 dates. Census: 4 in 58, 3 finer (10/15). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

1838 Capped Bust Quarter, B-1, MS64 Only One Finer Coin at PCGS

- 3132** 1838 B-1, R.1, MS64 PCGS. A substantial mintage of 366,000 Capped Bust quarters was accomplished in 1838, with a single die variety known for the date. This attractive Choice example exhibits well-detailed design elements and dramatic clash marks below the ear. The well-preserved surfaces are blanketed in shades of lavender-gray toning. Population: 1 in 64, 1 finer (10/15). NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

SEATED QUARTERS

1842 Quarter, MS64 Condition Census, Prooflike Fields

- 3133** 1842 Large Date MS64 PCGS. Briggs 2-B. All business strike 1842 Seated Quarters are of the Large Date variety. This issue (88,000 pieces produced) is one of several unsung rarities in the early Seated quarter series, and survivors are scarce to rare in all grades. Briggs 2-B is the rarer of the two known die marriages, and Mint State representatives, the present near-Gem included, are usually seen with a fully prooflike finish. Both sides of this coin are untuned with glassy fields and sharply struck devices. There are expectantly few distractions for the assigned grade. A Condition Census example that belongs in an advanced Seated quarter collection. Population: 4 in 64, 0 finer (10/15). Ex: Long Beach Bullet (Heritage, 6/2002), lot 539. NGC ID# 23SM, PCGS# 5401

**1842-O Small Date Quarter, AU53
Among the Finer-Known Examples**

3134 1842-O Small Date AU53 NGC. Briggs 1-A. Early die state. The Small Date 1842-O quarter shows a flat horizontal flag on the top of the 1 in the date, with the mintmark high and to the left of the juncture of the olive branch and fletchings. Stars 9-13 are all recut, star 12 showing the effect most heavily.

The New Orleans Mint made a healthy 769,000 examples of the 1842-O quarter in both Small Date and Large Date variants, but the former is far rarer than the latter grade-for-grade from Good to Uncirculated. Larry Briggs wrote in 2007 that the issue is rare at all levels of preservation and virtually nonexistent above Very Fine, with only two or three “real” Uncirculated coins existing. NGC shows one Mint State example, an MS63 piece, while PCGS shows a single Mint State coin, in MS61 (10/15).

The present AU53 NGC coin is the sole example in that grade, with an AU55 and the previously mentioned MS63 finer at that service (10/15). Deep multicolored toning covers each side of this important rarity. This piece was struck early in the life of the dies and shows none of the later damage on both sides that Briggs outlines in his series reference. The strike is remarkably sharp, showing centrals that are full or nearly so on all stars, and bold detailing on Liberty’s face, rock, and shield. The eagle’s feathers are all bold, as are the fletchings, claws, and shield stripes. A few small abrasions appear on each side, the most obvious a pair of milling marks on Liberty’s left (facing) arm. As one of the finest available of this very rare variety, the present coin presents an important bidding opportunity for Seated quarter specialists.

Ex: *Houston Signature* (Heritage, 11/2012), lot 3507. NGC ID# 23SN, PCGS# 5403

**1844-O Quarter, Impressive MS66 Prooflike
Finest Certified, Sole Prooflike
Ex: Walrath, Pittman**

3135 1844-O MS66 Prooflike NGC. Briggs 1-A. With a sizeable original delivery of 740,000 pieces, the 1844-O is a readily obtainable in grades up to and including About Uncirculated. Thereafter, this New Orleans issue is challenging, with the present Premium Gem Prooflike example in a class of its own. Sharply impressed, every star center, hair feature, and feather detail rises boldly above the mirrored fields. Mottled steel-gray, blue, and copper-gold patination provide memorable eye appeal. A tiny mark on Liberty’s cheek is noted, as is recutting on the crossbars of both 4s in the date. A thick horizontal line in the dentils below 1 may be the errant flag of a misplaced 1. This is the sole prooflike example certified by NGC or PCGS, as well as the highest-graded 1844-O quarter by either service. Census: 1 in 66PL, 0 finer (10/15).

Ex: *ANA Signature* (Heritage, 7/2005), lot 6006. NGC ID# 23SU, PCGS# 5407

**1854-O Huge O Seated Quarter, XF45
Rarely Seen so Fine
Attractive and Problem-Free**

3136 1854-O Huge O, Briggs 1-A, FS-501, XF45 NGC. This iconic Seated quarter issue is seldom seen in the finer circulated grades, and Mint State pieces are unknown. The present example is appealing and modestly circulated — among the finer-known representatives of the issue. The “Huge O” is believed to be the result of an engraver entering the mintmark by hand into a working die that was mistakenly shipped without one. Census: 1 in 45, 4 finer (10/15).

From *The Empire State Collection*. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1856 Quarter, MS66
None Certified Finer**

- 3137 1856 MS66 PCGS.** Rich russet-red and navy-blue toning embraces the margins of this lustrous and nearly immaculate No Motto quarter. Well-struck and desirable. The die variety is Briggs-unlisted, but nonetheless interesting for its faint tail feathers and many spindly obverse cracks. Unimprovable at either leading service. Population: 11 in 66, 0 finer (10/15). NGC ID# 23TB, PCGS# 5438

**1857 Seated Liberty Quarter, MS66+
Conditionally Rare in Finer Grades**

- 3138 1857 MS66+ PCGS. CAC. Briggs 2-B.** This high-end Premium Gem exhibits sharply detailed design elements and partially prooflike fields under vivid shades of cerulean-blue, golden-brown, and gray toning. The surfaces are well-preserved and eye appeal is outstanding. Population: 39 in 66 (5 in 66+), 8 finer (10/15). NGC ID# 23TE, PCGS# 5442

**1866-S Seated Quarter, MS62
Extremely Rare in Mint State**

- 3139 1866-S MS62 PCGS. Briggs 1-A.** Ex: Eliasberg. Dubbed a Condition Census coin in the Eliasberg catalog, this Mint State 1866-S Seated quarter is indeed among only a couple of handfuls of Uncirculated examples known. There is no evidence of wear and faint lines in the moderately reflective fields are all that limit the grade. The strike is sharp and each side displays light champagne toning. Housed in a green label holder. Population: 3 in 62, 2 finer (10/15).
Ex: "New York Collector" (Frossard, 3/1895); J.M. Clapp; John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1487. NGC ID# 23UC, PCGS# 5469

**1867-S Seated Liberty Quarter, MS64
Only One Finer at PCGS**

- 3140 1867-S MS64 PCGS.** From a mintage of just 48,000 pieces, the 1867-S Seated Liberty quarter is an elusive issue in all grades, and Mint State examples are rare. The present coin is an attractive Choice specimen, with just a touch of softness on Liberty's bodice and some stars. The lower obverse dentils show evidence of heavy die polishing, a feature always seen on this issue, according to Larry Briggs. The well-preserved surfaces are blanketed in shades of golden-brown, lavender, and gray patina, with patches of amber on the reverse. Slightly subdued mint luster shines through the toning. Population: 2 in 64, 1 finer (10/15). NGC ID# 23UE, PCGS# 5471

**1870 Quarter, Well-Preserved MS66
Interesting Briggs 1-A Die Marriage**

- 3141 1870 MS66 PCGS. Briggs 1-A.** Gold and rose patina prevails against accents of smoke-gray on this well-preserved Premium Gem 1870 quarter. The only mentionable post-Mint impairments are a few marks on Liberty's chin, neck, and lower hair. The Briggs 1-A die pairing shows the right-side stars recut and heavy die rust on the figure of Liberty, along with extensive die-polishing lines in the fields (which are *not* but are sometimes *mistaken for* hairlines from cleaning). More recutting shows on the reverse on several letters in the legend, and more die-polishing is evident. An interesting high-grade example of this small mintage, put at 86,400 circulation strikes. Population: 4 in 66, 0 finer (10/15). NGC ID# 23UK, PCGS# 5476

**1873 No Arrows, Open 3 Quarter, MS66
Elusive and Beautifully Toned
Ex: LaRiviere / Gardner, Tied for Finest Certified**

- 3142 1873 Open 3, No Arrows, MS66 PCGS. Briggs 1-A.** This variety shows the entire reverse legend recut. Pale blue, mint, and violet tones invigorate the obverse, while the reverse shows richer crimson, gold, blue, and orange patina, and generous luster runs throughout both sides amid stunning eye appeal and excellent preservation. A coin that is basically mark-free.

Mint State examples of this issue are available but rare. The Arrows coinage that was introduced later in the year was struck in an amount many times that of the Open 3 and Closed 3 No Arrows quarters. Population: 4 in 66, 0 finer (10/15).

Ex: Lucien LaRiviere Collection (*Bowers and Merena*, 5/2001), lot 1466, where the cataloger termed it "possibly the finest known of the date" (population 1 at the time); Eugene H. Gardner Collection, Part III (*Heritage*, 5/2015), lot 98356. NGC ID# 23UV, PCGS# 5485

PROOF SEATED QUARTERS

1843 Seated Liberty Quarter, PR64 Seven Examples Traced Only One Certified Finer

3143 1843 PR64 NGC. Briggs 4-E. All pre-1858 proofs are rare, but the 1843 proof quarters are especially elusive. PCGS CoinFacts estimates six to eight examples survive in all grades. Our roster accounts for seven distinct specimens, including one impaired example and another in the Smithsonian Institution. The present coin combines high technical quality, intense eye appeal, and absolute rarity in one extremely attractive package. Prior to its appearance in the Gardner Collection, Part III, it had been off the market for 16 years. It may be just as long before a comparable specimen again becomes available.

The central design elements of this spectacular Choice proof are sharply detailed, but the stars on the left are a little flat. The rims are square and the edges flat. Vivid shades of golden-brown, lavender, and blue toning blanket the well-preserved surfaces, and the fields are deeply reflective throughout. Exemplary eye appeal prevails throughout.

Roster of 1843 Proof Quarters

- 1. PR65 PCGS (formerly PR66 NGC).** ANA Convention Auction (Numismatic Gallery, 8/1946), lot 442 (unplated); John Jay Pittman Collection (David Akers, 5/1998), lot 1309; ANA Signature (Heritage, 7/2008), lot 1808, where it realized \$74,750; Central States Signature (Heritage, 4/2013), lot 4218; FUN Signature (Heritage, 1/2015), lot 4098.
- 2. PR64 NGC.** Dr. Christian A. Allenburger Collection (B. Max Mehl, 3/1948), lot 1015; Floyd T. Starr Collection (Stack's, 10/1992), lot 403; Rarities Sale (Bowers and Merena, 8/1998), lot 155; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98374. **The present coin.**
- 3. PR64 PCGS.** Thomas L. Smith Estate (Stack's, 6/1957), lot 529; FUN Signature (Heritage, 1/2009), lot 3763; ANA Signature (Heritage, 8/2009), lot 1085; Central States Signature (Heritage, 4/2014), lot 5581.
- 4. PR64 NGC.** Judge Joseph F. Sawicki (5/1948); John Jay Pittman Collection (David Akers, 10/1997), lot 832 (part of an 1843 proof set); Denver Signature (Heritage, 8/2006), lot 5187; Central States Signature (Heritage, 4/2009), lot 2351.
- 5. Brilliant Proof.** Possibly President John Tyler in 1843; unknown intermediaries; purchased privately by Richard B. Winsor circa 1880; Richard B. Winsor Collection (Chapman Brothers, 12/1895), lot 1067; Fernand David Collection (J. Schulman, 3/1930), lot 112; Stoddard Collection; "Colonel" E.H.R. Green; Will W. Neil Collection (B. Max Mehl 6/1947), lot 2292; Amon G. Carter, Jr. Family Collection (Stack's, 1/1984), lot 630 (part of an 1843 proof set).
- 6. PR53 NGC.** Baltimore Auction (Stack's Bowers, 3/2012), lot 3022.
- 7. Proof.** Smithsonian Institution.

Additional Appearances

- A. Proof.** Matthew Stickney Collection (S.H. & H. Chapman, 6/1907), part of a silver and minor proof set.
- B. Proof.** Davis-Graves (Stack's, 4/1954), lot 354, impaired, possibly the same as number 6 above. NGC ID# 23W6, PCGS# 5537

1856 Seated Quarter, PR65
Gleaming Mirrors, Rich Coloration
Tied for Finest at PCGS

3144 1856 PR65 PCGS. Briggs 10-H. The Briggs reference describes the 1856 proof issue as follows, "Proofs of this year are quite rare and are identified by a large die bulge on the reverse that extends from above the right wing to 'L' of 'DOL.'" The diagnostic bulge is evident on this coin when viewed in light, but perhaps a more visible confirmation of the proof dies are several raised, angled die lines in the obverse shield, under the R of LIBERTY. We have seen these lines before on all 1856 proof quarters viewed.

The smooth, deep mirrors display full reflectivity when viewed at the proper angle. Wonderful shades of purple, blue, and sea-green hug the rims, with translucent orange-gold toning covering the centers. This Gem proof is tied for finest-certified by PCGS. It is estimated that fewer than 30 examples exist in proof format. Population: 3 in 65, 0 finer (10/15). NGC ID# 23WH, PCGS# 5552

1865 Seated Quarter, PR68
Tied for Finest Known

3145 1865 PR68 NGC. Briggs 3-B. All 1865 proof quarters are of the Briggs 3-B variety. The obverse proof die exhibits rust in the field to the left of the rock, and the base of 1 in the date is thinner than on the business strikes. This 1865 proof quarter was struck during the last year of the Civil War. It was not only the circulation-strike mintages that suffered while the conflict raged. Even proof emissions were lower — in the case of 1865, only 500 proof coins plus a meager complement of 58,800 pieces for purported circulation. This is in contrast to 1,000 proofs plus more than 800,000 business strikes for the 1860 quarters, struck the year before the war began.

Auburn toning blankets Liberty, contrasting with the surrounding charcoal surfaces. There is a light finger mark in the right field. The reverse is an even sea-green throughout, and there are no abrasions of note on either side. The strike is needle-sharp and the star centers, so often a problem in the Liberty Seated quarter series, are completely delineated.

Ex: Bill Nagle (8/2006); Eugene H. Gardner, Part III (Heritage, 5/2015), lot 98383. NGC ID# 23WT, PCGS# 5561

1869 Quarter Dollar, PR67 ★ Cameo
Briggs 2-B, Doubled Die Obverse
Ex: Newman, Gardner

3146 1869 PR67 ★ Cameo NGC. Briggs 2-B. Ex: Eric P. Newman Collection. Gene Gardner acquired a number of proof Seated quarters from the Eric P. Newman Collection, many of which had a characteristic “look” imparted by years of storage in Newman’s carefully constructed cabinets. The present coin is no exception, with colorful rims surrounding brilliant centers. Its incredible eye appeal is virtually on par with its higher-graded counterparts. A pair of raised diagonal marks above Liberty’s head are Mint-made, possibly the start of a planchet lamination. The strike is full throughout both sides. Plated on the NGC Coin Explorer webpage. NGC reports three examples in PR67 Cameo, of which this is the sole example to also bear the Star designation. There is simply nothing comparable at PCGS.

Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33196; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98385. NGC ID# 23X2, PCGS# 85568

1886 Seated Quarter, PR68
Nearly Flawless Key Date Alternative

3147 1886 PR68 NGC. The 1886 enjoys the second-lowest circulation-strike mintage in the entire Seated Liberty series (5,000 coins), and the limited supply is insufficient to satisfy modern-day demand. Proofs (886 pieces struck) often serve as more accessible alternatives as these had proportionately higher survival rates. This immaculate Superb Gem is nearly flawless and ranks among the finest non-Cameos certified. The only apparent marks are two minuscule ticks on Liberty’s cheek, and they are imperceptible without magnification. Splendid blue and lavender patina colors each side. The eye appeal is outstanding. Census: 6 in 68, 1 finer (10/15). NGC ID# 23XJ, PCGS# 5587

BARBER QUARTERS

1894-O Quarter, Originally Toned MS67 Tied for Finest Graded

- 3148 1894-O MS67 NGC.** The 1894-O is scarce in Mint State through near-Gem condition, after which it is quite rare. This coin is the sole finest at NGC; PCGS reports 10 in MS66 (one in MS66+) and none finer (10/15). Cobalt-blue and soft lavender toning gravitates to the borders of this magnificent representative, framing luminous golden-tan centers. The lustrous surfaces exhibit well-struck design features save for the typically seen softness on the eagle's claws and the arrow feathers. Both sides are impeccably preserved. A few minute marks on Liberty's chin are mentioned solely for identification purposes.
Ex: *Goldberg Auctions* (6/2000), lot 715; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98398. NGC ID# 23Y2, PCGS# 5608

1898 Quarter, Frosty MS67+ Superb Barber Type Coin

- 3149 1898 MS67+ NGC.** The 1898 Barber quarter is a plentiful issue in the context of the series, but at the Superb Gem grade level it becomes a significant rarity. This Plus-designated representative generates a wealth of eye appeal with frosty luster, pristine surfaces, and rich toning. The obverse displays irregular lavender, champagne, and marlin-blue hues, while the reverse is cast in lighter golden color. The eagle's talons and right (facing) wing junction are impressively sharp. Census: 6 in 67 (1 in 67+, 2 in 67+★), 4 finer (10/15). NGC ID# 23YD, PCGS# 5619

1901-S Quarter, Good 6 Outstanding Collector Coin

- 3150 1901-S Good 6 PCGS Secure.** The L and Y in LIBERTY are mostly visible, but wear is slightly too extensive to achieve a VG grade. The reverse rim is a trifle weak at 8 o'clock but is strong elsewhere. Battleship-gray color blankets the relief elements and deeper gunmetal-gray in the fields delivers a pleasing circulation-cameo effect. NGC ID# 23YR, PCGS# 5630

1903-O Barber Quarter, MS66 Condition Census

- 3151 1903-O MS66 PCGS.** The 1903-O is a scarce New Orleans issue in the Barber quarter series, and the high-grade certified population has remained impressively low over the past several years. Low intensity multicolored toning with aqua, gold, and light gray colors envelops the surfaces of this Premium Gem example, showing just a few minute marks on Liberty's cheek and neck. The design features are sharply impressed with particularly strong definition on the shield. Population: 6 in 66, 1 finer (10/15).
Ex: *Central States Signature* (Heritage, 4/2006), lot 1556; *The Joseph C. Thomas Collection / Central States Signature* (Heritage, 4/2009), lot 473. NGC ID# 23YW, PCGS# 5635

1908 Barber Quarter, MS67
Among the Finest at Both Services

- 3152 1908 MS67 NGC. CAC.** The 1908 claims an unremarkable mintage exceeding 4.2 million coins, and attention is usually directed toward its low-mintage S-mint counterpart. This top-graded Superb Gem, however, is sure to catch the eyes of discerning Registry Set collectors. Delicately toned in golden-gray and pale-blue hues, the vibrant surfaces are devoid of any readily detectable imperfections. Minor strike incompleteness occurs over the left obverse stars, talons, and fletchings, but the overall appeal is unaffected. Census: 4 in 67, 0 finer (10/15). NGC ID# 23ZC, PCGS# 5649

PROOF BARBER QUARTERS

1907 Barber Quarter, PR67
Beautiful One-Sided Cameo

- 3153 1907 PR67 PCGS. CAC.** This Superb Gem proof is fully struck and displays deep, seemingly flawless surfaces. The obverse showcases full cameo contrast with hints of lavender-gold around the rims, although the reverse is a little too deeply toned in lilac and mint-green to allow for a Cameo designation. CAC-approved in an old green label holder. Population: 11 in 67, 2 finer (10/15). NGC ID# 242N, PCGS# 5693

1907 Barber Quarter, PR68
Unusual Cameo Specimen

- 3154 1907 PR68 Cameo NGC. CAC.** By the early 1900s, Cameo contrast on proof coins was a thing of the past, as officials at the new third Philadelphia Mint facility suppressed the appearance of frosted proof coinage. While today's collectors covet Cameo and Deep Cameo proofs, Mint officials found them impractical. This amazing Superb Gem features excellent field-to-device contrast. The obverse has swirls of gold and iridescent toning, while the reverse is almost entirely untoned, save for delicate peripheral iridescence and a bluish slate-gray hue in the fields. Census: 3 in 68 Cameo (1 in 68 ★ Cameo), 1 finer (10/15). NGC ID# 242N, PCGS# 85693

1908 Quarter, PR67 Cameo
Tied for Finest at PCGS

- 3155 1908 PR67 Cameo PCGS.** High-contrast proofs were the exception in 1908, not the rule. This Superb Gem Cameo Barber quarter is tied with three others as the finest of just 15 Cameos at PCGS (10/15). The fields are fully mirrored, and the design elements show satiny luster. Each side is cast in a warm golden glow. The eagle's right (facing) talons are weak, but the remaining design elements show sharp definition. NGC ID# 242P, PCGS# 85694

1915 Barber Quarter, PR66+
Last Classic-Era Proof Quarter

- 3156 1915 PR66+ PCGS.** Proof coinage was suspended for the quarter denomination after 1915, when a meager mintage of only 450 pieces was accomplished. Vivid shades of gray, greenish-gold, and cerulean-blue toning blanket the surfaces of this sharply detailed Premium Gem, with well-preserved reflective fields under the patina. Population: 13 in 66 (2 in 66+), 16 finer (10/15). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

1916 Quarter, AU50 Well-Detailed and Accessible

- 3157 1916 AU50 PCGS.** Struck late in 1916, only 52,000 pieces were produced of this first-year issue, and most slipped quietly into circulation alongside the first of the Type One 1917 quarters. The few remaining Mint State examples were later hoarded by collectors, but most circulating pieces were subjected to extensive wear before being sifted by the numismatic market. This is a seldom seen AU representative, showing uniform lavender-gray patina with occasional champagne undertones. A couple of minor ticks on Liberty's neck are the only mentionable marks, and the devices exhibit just light wear over the high points. NGC ID# 43XR, PCGS# 5704

1918 Quarter, MS66 Full Head Sharp Throughout

- 3158 1918 MS66 Full Head PCGS.** Although one of the more frequently seen pre-1925 Type Two issues with a Full Head, the 1918 Standing Liberty quarter is nonetheless scarce in high grade with such a designation. This Premium Gem Full Head example displays satiny champagne-gray luster with occasional small olive overtones. Light clash marks in the obverse recesses and slight blurring of the reverse stars denote a late die state, but this coin is nonetheless fully struck through the border regions and interior high points. Population: 50 in 66 (2 in 66+) Full Head, 14 finer (10/15). NGC ID# 2437, PCGS# 5721

1918-S Quarter, MS66 Full Head Prominent Strike Rarity

- 3159 1918-S MS66 Full Head PCGS.** The 1918-S is a problematic issue for the collector of high-end Standing Liberty quarters, as it is found with an array of striking deficiencies. Chief among them is considerable weakness in the central regions, often appearing dished out; but a flat date and weak temple on Liberty's head further hinder the acquisition of a sharp Premium Gem. A significant number of technically Full Head coins display unsightly weakness in the centers. The San Francisco Mint's difficulty with producing sharp strikes was becoming increasingly apparent among its quarter dollar coinage in 1918 and would peak in 1927.
- This frosty '18-S quarter is boldly and evenly struck, devoid of bothersome abrasions and surprisingly well-defined in the centers. Dusky olive-gold toning around the borders frames faint iridescent hues in the centers, delivering outstanding eye appeal. Population: 13 in 66 (3 in 66+) Full Head, 1 finer (10/15). NGC ID# 2439, PCGS# 5725

1919-D Quarter, Elusive MS65

- 3160 1919-D MS65 PCGS.** This is a lustrous Gem example of this semikey Denver issue, beautifully preserved with light olive-gold color. The center of the reverse has a small lamination, as struck. An impressive coin and from an issue that is arguably underappreciated without full head details. Population: 50 in 65 (1 in 65+), 27 finer (10/15). NGC ID# 243C, PCGS# 5730

1924-D Quarter, MS66 Full Head
Rare This Well-Preserved
Distinctively Toned

3161 1924-D MS66 Full Head PCGS. In comparison to recognized strike rarities such as the 1926-D, 1927-S, and 1918/7-S, the 1924-D Standing Liberty quarter appears moderately plentiful. But in the context of the series, this Denver issue is challenging to locate in Full Head grades, particularly so at the Premium Gem level. Characteristically, the '24-D is usually seen with a dished-out head — similar to that for which the 1926-D is known — explaining the challenge of acquiring Full Head pieces in high grade.

This sharp Premium Gem defies the norm in terms of both strike quality and preservation. Liberty's head, the shield rivets, the stars, and the eagle's feathers contribute to the overall crisp definition. Only the top portion of the date numerals lack pleasing detail. Champagne undertones are visited by splashes of violet and sea-green on each side, offering a pleasant departure from the typically seen brilliant or light golden patinas. Population: 19 in 66 (1 in 66+) Full Head, 3 finer (10/15). NGC ID# 243M, PCGS# 5749

1928-D Quarter, Bold MS66 Full Head
Post-1924 Full Head Rarity

3162 1928-D MS66 Full Head PCGS. The 1928-D is underrated in Full Head grades. The issue is scarcer than the 1929-D, 1923-S, and even the 1916, and is almost as elusive in this category as the 1919-D and -S. The present Premium Gem is far finer than most Full Head examples, and just a handful of Superb Gems are superior. The Gardner MS66 Full Head — Gardner, Part III (Heritage, 5/2015), lot 98437 — was the last Premium Gem example we offered, realizing \$17,625. This example is comparably sharp and equally well-preserved with satin luster and traces of warm golden toning. A finer Full Head example has not appeared in our auctions since 2003, making the current offering highly important to the Standing Liberty quarter specialist. Housed in a green label holder. Population: 18 in 66 (2 in 66+) Full Head, 3 finer (10/15). NGC ID# 243Y, PCGS# 5769

WASHINGTON QUARTERS

1932-D Quarter, MS65+ Three Coins Certified Finer

- 3163 1932-D MS65+ PCGS. CAC.** Of the two key dates in the Washington quarter series, the 1932-D is the less often seen in high grade. Gems are genuinely scarce, and finer pieces are prohibitively rare. We offered one of the three known Premium Gems in lot 3936 of the Long Beach Signature sale (Heritage, 6/2015), where it realized \$82,250. This Plus-designated MS65 coin is virtually as fine from a technical standpoint and compares well on grounds of eye appeal. Although more affordable by definition, Plus-graded Gem 1932-D quarters are every bit as rare as their MS66-graded counterparts. This CAC-approved piece is boldly struck with soft champagne toning that yields deeper amber hues over the upper obverse. Population: 82 in 65 (3 in 65+), 2 finer (10/15). NGC ID# 2448, PCGS# 5791

1939 Washington Quarter, MS68 Top-Tier Registry Coin

- 3164 1939 MS68 PCGS.** The 1939 Washington quarter is one of only a few issues in the silver series that can be acquired in MS68, and such a coin is a highlight to any Registry Set. This satiny piece is vibrantly lustrous, cast in pastel hues with a dominance of champagne-gold in the centers. The strike is bold and the surfaces present flawless. Population: 10 in 68, 0 finer (10/15). NGC ID# 44KU, PCGS# 5808

1946-S Washington Quarter, MS68 None Numerically Finer at NGC

- 3165 1946-S MS68 NGC.** Vivid shades of sea-green and magenta toning blanket the virtually pristine surfaces of this incredible MS 68 example. The design elements are well-detailed and vibrant mint luster shines through the patina. Eye appeal is tremendous. Census: 4 in 68 (1 in 68 ★), 0 finer (10/15). NGC ID# 245G, PCGS# 5832

1952-S Washington Quarter, MS68 Lovely Registry-Grade Example

- 3166 1952-S MS68 PCGS.** Ex: Larry Shapiro. A rich circle of gold-orange and reddish-gold colors borders the peripheral areas of this well-struck, exquisitely preserved Superb Gem, with virtually no contact marks or other distractions to be seen. The underlying luster is satiny throughout and gleams through the natural colorations. Splendid eye appeal and unsurpassable in grade at either service. Population: 5 in 68, 0 finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2003), lot 6923; The Del Rio Collection, Part Two / Pittsburgh Signature (Heritage, 8/2004), lot 6130. NGC ID# 3TEV, PCGS# 5851

PROOF WASHINGTON QUARTERS

1936 Quarter, PR67
Tied for Finest Certified

- 3167 1936 PR67 NGC.** This first (and scarcest) proof Washington quarter issue is typically without contrast and fully mirrored on the devices as well as throughout the fields. The present lightly patinated example fits the mold, with an absence of mint frost and rim-to-rim reflective surfaces. A faint blush of russet toning does little to hide the silver-mirrored flash, but confirms the originality of this Superb Gem proof. Census: 25 in 67 (1 in 67 ★), 0 finer (10/15). NGC ID# 27HN, PCGS# 5975

1942 Quarter, PR68
Registry Set Quality

- 3168 1942 PR68 NGC.** A conditionally rare example, among the finer-known proof 1942 Washington quarters. The strike is bold, and the fields are highly reflective. Most of each side displays dusky cream-gold toning, but the upper and lower obverse rims exhibit a tinge of deep amber and crimson. Census: 23 in 68 (3 in 68 ★), 1 finer (10/15). NGC ID# 27HV, PCGS# 5981

EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VG10
Classic First-Year Issue

- 3169 1794 O-101a, T-7, High R.3, VG10 NGC.** This is an evenly worn, original example of this first-year half dollar issue, showing consistent olive and gunmetal-gray toning that lightens to golden-gray over the relief elements. The borders are complete and the date is clear. Some crisscrossing adjustment marks are present on the obverse portrait. This late die state variant of O-101 is heavily cracked through the F in OF and from the rim to the left of the first S in STATES. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, Choice VF
O-101a, Flowing Hair Key

- 3170 1794 O-101a, T-7, High R.3, VF35 PCGS.** Designated as O-101 by PCGS, but the delicate die crack is apparent from the leaf tip to the second S in STATES, as are the bold cracks from the leaf pair near OF. Rarer than its 1795 successor, the 1794 is the first half dollar date struck by the U.S. Mint. The present problem-free representative offers forest-green borders. The centers display pastel powder-blue and wheat-gold shades. Smooth despite a few inconsequential hair-thin marks on the portrait. 11 die marriages are known for the 1794, but a majority of survivors are the Tompkins-7 variety. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

**1795 2 Leaves Half Dollar, XF45
Scarce O-105a Variety**

- 3171** 1795 2 Leaves, O-105a, T-25, R.4, XF45 PCGS. Tompkins Die State 3/3. The berries are arranged 10 left by seven right, and star 1 touches the lower curl. The late die state shows considerable signs of erosion and numerous peripheral cracks, including one from the rim down through the B in LIBERTY. Bright silver interiors blend with golden and violet-gray elements near the legends. High-point rub leaves most of the design detail intact, and light scattered marks are undistracting. A pleasing example of this scarce R.4 variety. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

**1801 O-101 Draped Bust Half Dollar
Choice VF, Scarce Early Issue**

- 3172** 1801 O-101, T-2, R.3, VF35 NGC. The two reverse dies for this scarce first year issue are distinguished by the position of the first A in AMERICA in relation to the wing feathers, as well as the presence or lack of a large 'tail' on the R. O-101, which has the tail, is somewhat less scarce. The variety also features two teardrop-shaped die lumps near the arrowheads. This is a nicely defined example without consequential marks, toned a moderate dove-gray aside from deep-russet freckles on the lower left portion of the reverse. Ex: *St. Louis Central States Signature* (Heritage, 5/2005), lot 7103. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1803 Half Dollar, AU50
O-101, Large 3, Small Reverse Stars**

- 3173** 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, AU50 NGC. Gold toning accompanies subtle iridescence across the partially lustrous surfaces of this Large 3 Draped Bust half. The small size of the field stars above the eagle differentiate the O-101 variety from the similar O-103, which has larger field stars but shares the same obverse die. This example shows high point wear plus minor abrasions expected for the grade. Softness at the upper-right shield corner is typical for the variety. Census (all 1803 varieties): 16 in 50, 53 finer (10/15). NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

**1805 Half Dollar, O-112
Sharp Strike, Choice AU**

- 3174** 1805 O-112, T-2, R.2, AU55 NGC. A partly lustrous and bright, nearly untuned Choice AU example of this conditionally challenging early silver type. A few light marks near dot the obverse, but attractive definition remains overall. The familiar die state with a "double collar" clashmark below the chin and an arc-shaped crack through STATES, although the cud that defines the latest die state has yet to form and the rims remain full. Ex: *Long Beach Signature* (Heritage, 9/2009), lot 725. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

**1806 Half Dollar, O-105a, AU53
Condition Census Knob 6, Large Stars Example**

- 3175** 1806 Knob 6, Large Stars, O-105a, T-5, R.2, AU53 PCGS. A late state of the dies — although not the latest — with peripheral die cracks on the obverse and strong die clashing on the reverse. A retained cud above LIB of LIBERTY identifies the latest die state for the variety, which is not present on the current coin. Mint luster remains around the stars as well as within the recesses of Liberty's hair and throughout protected areas of the reverse. Pleasing gunmetal-gray, teal, and rose-gold toning covers both sides. The strike is sharp except for the usual weakness at the field stars and at OF. A Condition Census coin based on the latest listing from Steve Herrman and Steve Tompkins. NGC ID# 24EJ, PCGS# 39305 Base PCGS# 6074

BUST HALF DOLLARS

1808 Capped Bust Half Dollar, MS65+ O-109a, Advanced Die State

- 3176** 1808 O-109a, R.3, MS65+ PCGS. CAC. A remarkably attractive and lustrous representative of the John Reich Capped Bust design, a conditionally rare example of the two-year type. The design was restyled in 1809 with a similar but somewhat more sedate portrait and eagle, a curious action by the Mint in the eyes of many Bust half collectors.

The high-end Gem surfaces display the intended design to its full advantage, with a needle-sharp strike and a trace of rainbow iridescence at the margins. Lovely golden-ivory toning deepens to deeper blue, russet, and bronzelike shades that glow with satiny luster. The O-109a variety shows extensive die cracks on both the obverse and reverse, none of which impair the strike, but each crack conveys considerable interest to the die state specialist. The eye appeal and technical quality are outstanding. Steve Herrman ranks the present coin fourth in his Condition Census for the variety according to his Autumn, 2015 listing. NGC ID# 24EP, PCGS# 39375 Base PCGS# 6090

1812 O-105a Half Dollar, Large MS64

- 3177** 1812 Large 8, O-105a, R.2, MS64 PCGS. Struck from a late state of the dies, with an impressive series of peripheral obverse die cracks that allow prompt attribution. Jade-green and plum-red toning endows this lustrous and nicely struck Choice Bust half dollar. Liberty's cap and drapery folds display full detail. The fields are beautifully preserved, and the portrait shows only a few small marks. A desirable addition to the advanced collection. NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

1814 Half Dollar, O-105, Peripherally Toned MS65

- 3178** 1814 O-105, R.2, MS65 PCGS. This variety is attributed by three heavy bars from stripes of the shield boldly clashmarked at Liberty's ear, a broad 8 in the date and the second 1 low, the left side of E centered under the D in UNITED, and a pronounced stem to the upper berry. This is an early die state despite extensive clash marks on both sides. Later states, known as the Single Leaf (O-105a), have the reverse die lapped, removing the leaf just above the upper berry which now appears to lack a stem.

Peripheral gold-orange, electric-blue, and purple toning is somewhat deeper and more extensive on the reverse of this Gem. The design elements are sharply struck and pleasing, frosty-silver luster emanates from minimally marked surfaces. High Condition Census for the O-105 variety. Population for the issue (all varieties): 9 in 65, 3 finer (10/15). NGC ID# 24F3, PCGS# 39480 Base PCGS# 6105

**1815/2 Half Dollar, VF35
O-101, Album-Toned Example**

- 3179 1815/2 O-101, R.2, VF35 PCGS.** A generation of collectors saved Bust halves in coin boards and albums, many of them popularized by Wayte Raymond. The sulfur-infused cardboard tended to impart varying degrees of concentric, colorful toning over time. The 1815/2 issue is popular not only for its low mintage (just 47,150 pieces struck) but also from an historical perspective. The War of 1812 forced the Mint to temporarily suspend operations. Later in 1815, order was restored and 1812 dies were overdated to produce a minimal production of half dollars. The day after the coins were delivered, the Mint burned and no more half dollars were struck until 1817. This Choice VF coin is attractive and nicely detailed for the grade, with a shallow-but-noticeable rim bump near star 5. Multiple areas of die clashing appear on both sides. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

**1818/7 Bust Half, MS63
O-101a, Large 8, Colorfully Toned**

- 3180 1818/7 Large 8, O-101a, R.1, MS63 PCGS.** One of the eagerly sought overdates of the Capped Bust series, both for its desirable pre-1820 mintage and for the boldness of the overdate. This piece has the "look" of careful preservation in an old-time collection. Full luster remains beneath teal-blue, wheat-gold, and reddish-gray toning over smooth, Select Uncirculated surfaces. The late die state is confirmed at the denomination on the reverse, where a long, curving die crack intersects with double die clashing. The coin ties for fourth in Steve Herrman's latest Condition Census for the O-101a. A sharply struck example with great eye appeal. Note: the PCGS holder indicates a Small 8 variety, but the coin is a Large 8. Population (all 1818/7 Large 8 varieties): 9 in 63, 7 finer (10/15). NGC ID# 8VJ6, PCGS# 39541 Base PCGS# 6115

**1818 O-107 Half Dollar, MS64
Sharp, Lustrous, and Unmarked**

- 3181 1818 O-107, R.1, MS64 PCGS.** A coruscating cream-gray half dollar with hints of blue and autumn-brown toning across the margins. Exceptionally free from marks, although each side has a few small charcoal freckles. The available O-107 is frequently attributed by the diagonal line inside the base of the T in LIBERTY and a similar line within the left arm of Y. Two small lines run diagonally into the field from the eagle's beak. Tied at the low end of the Condition Census coin for the variety based on Steve Herrman's current report (10/15). NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

**1826 Half Dollar, O-101a, MS66+★
Ex: 'Col.' Green, Eric P. Newman**

- 3182 1826 O-101a, R.2, MS66+★ NGC. CAC.** Ex: "Col." E.H.R. Green, Eric P. Newman. Both sides of this high-end Premium Gem display a central core of silver and golden-brown patina, framed by a vivid ring of violet toning. The dramatic toning gives the coin an attractive cameo effect. The design elements are sharply detailed and vibrant mint luster enhances the terrific eye appeal. As of (10/15), the single finest example certified as O-101 or O-101a at either service. We enjoyed and share NGC's reflections on this coin:

"This coin presents an example of how careful preservation can elevate the commonplace to something extraordinary. This die marriage is common across all grades through the lower range of Mint State in both prime and "a" die states. The Green-Newman coin, however, is worlds apart from examples normally seen. Boldly struck throughout, with just a touch of erosion at its peripheries, this delightful half dollar possesses dazzlingly frosty luster and simply breathtaking toning. These desirable features are combined with especially clean surfaces that will please both the series specialist and advanced type collector."

Ex: "Colonel" E.H.R. Green; Green Estate; Eric P. Newman; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection (Heritage, 11/2013), lot 33454. NGC ID# 24FM, PCGS# 39667 Base PCGS# 6143

**1826 Half Dollar, MS64+
Condition Census O-104**

- 3183 1826 O-104, R.3, MS64+ PCGS.** A boldly struck and coruscating example bathed in blended jade-green and dove-gray toning. Exceptionally free from marks, and among the finest survivors of the variety. Liberty's profile is strike doubled. A middle die state between O-104 and O-104a with a die crack near 50 C and the arrowheads, but without the crack along the base of ERICA. NGC ID# 24FM, PCGS# 39670 Base PCGS# 6143

**1833 Half Dollar, O-108 Variety
Sharp and Original Gem Example**

- 3184 1833 O-108, R.1, MS65 NGC.** With regular silver dollar production suspended until 1840, half dollars were the denomination of choice for banks and depositors during the 1830s. In 1833, the Mint struck more than 5.2 million halves, and the issue remains moderately plentiful in the lower Mint State grades for collectors. Above the MS64 level, it becomes conditionally scarce. This Gem example is unusually well-struck — apparently from fresh dies — with no evidence of die fatigue or cracks. The stars and denticles are crisp, as are the central devices. Satiny luster shines through pale lavender-gray and blue-gold toning, while the underlying surfaces are free of all but a few trivial marks on Liberty's cheek. As a date, NGC reports just nine numerically finer half dollars among all varieties. Census: 32 in 65, 9 finer (10/15). NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

1835 Half Dollar, O-103, MS65
Delicately Toned, Original Surfaces

3185 1835 O-103, R.2, MS65 PCGS. The 1835 is the final half dollar issue that was produced in its entirety on a screw press. Steam power was introduced at the Mint in late March 1836, and the first half dollars struck using steam power were coined in November 1836. Half dollar production in 1835 amounted to more than 5.3 million coins, which accounts for this issue's moderate availability today, encouraging much popularity among type collectors.

Several parallel, diagonal die lines appear within the recesses of the shield. These die lines are diagnostic of the O-103 variety, which employs a leftover 1834 reverse die. The coin has a distinctive, satiny look that characterizes many of the half dollars coined in the 1834 to 1836 period. Luminous fields reveal mottled golden-gray, amber, and pale blue toning on each side, while the underlying surfaces are devoid of major distractions. A few of the finer hair curls on the obverse are a trifle soft, as is the eagle's left (facing) wing on the reverse, but the strike is actually pleasing for the issue. Tied for finest in the Condition Census for the variety, based on the Autumn, 2015 Steve Herrman report.

Ex: Jason Carter (11/2001); *The Eugene H. Gardner Collection III* (Heritage, 5/2015), lot 98457. NGC ID# 24FZ, PCGS# 39929 Base PCGS# 6168

REEDED EDGE HALF DOLLAR

1836 Reeded Edge Half, GR-1, MS64
A Condition Census Example

3186 1836 Reeded Edge, GR-1, R.2, MS64 PCGS. The Thonnelier steam press was installed at the Philadelphia Mint in 1836, and used to coin a few copper medalets early in the year. The modified-design Capped Bust, Reeded Edge half dollars were among the first regular-issue coins struck with the new technology. This Choice Mint State half dollar ranks high on the list of known survivors from a limited mintage of slightly more than 1,200 coins. Both sides have mottled gold and iridescent toning over satiny, well-preserved surfaces. A lovely near-Gem example, this piece is exceeded by only three finer submissions at both services. Population: 6 in 64 (1 in 64+), 1 finer (10/15). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLARS

1842-O Small Date Half, WB-101, XF45
Deep Original Patina, Reverse of 1839

- 3187** 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, XF45 PCGS. The Small Date, Small Letters half dollar is a rare variety by any standard and one of the top rarities of the entire New Orleans Seated coinage series. Just 203,000 pieces were struck and remarkably few pieces survive in XF or finer grades. This example shows a few small marks plus a pair of small, rectangular planchet defects — one below the knee, and the other above. Rich, gunmetal-gray toning covers both sides of this Choice XF example, with sharp definition remaining on the stars, Liberty's hair strands, and the eagle's neck feathers. Population: 6 in 45, 8 finer (10/15). PCGS# 572015 Base PCGS# 6238

1854-O Arrows Half Dollar, MS65
Naturally Patinated, Eye-Appealing

- 3188** 1854-O Arrows, WB-101, Die Pair 34, R.3, MS65 NGC. This naturally patinated near-Gem half was produced from the 34th of 58 die pairs identified in Bill Bugert's comprehensive 2013 monograph. More than 5.2 million pieces were struck in 1854 by the New Orleans Mint, so it is possible more die pairs remain to be discovered. The mintmark is nearly centered between the feather tip and the F of HALF, narrowing the number of possible die combinations considerably. Russet-red toning accents surround the devices of this pearlescent-silver example. The strike is sharp on Liberty's head, but less so on the star centers and on the eagle's left leg. Census (all varieties): 15 in 65, 10 finer (10/15). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

1855-O Arrows Half Dollar
Brilliant and Frosty Gem, Obverse Unlisted

- 3189** 1855-O Arrows, WB-101, MS65 NGC. Unlisted Die Pair. An incredibly appealing and essentially untoned silver-white Gem example of this highly desirable New Orleans minor silver issue, boldly impressed with surprisingly strong detail on Liberty's hair and the obverse stars. Though a few tiny luster grazes visit the fields, these are well within the bounds of the grade assigned. Despite nearly 3.7 million halves struck for the issue, the vast majority of the mintage encountered heavy circulation, and Gems are exceedingly elusive. Struck from an unlisted die pair, with the obverse not matching any of those shown in the Bugert reference, paired with Reverse D. Census (all varieties): 20 in 65, 6 finer (10/15). PCGS# 572090 Base PCGS# 6283

1855-S Arrows Half Dollar, AU50
Untoned, Mint Luster Remains

- 3190** 1855-S Arrows, WB-101, Die Pair 3, R.5, AU50 NGC. A bright, silver-white example of this rare San Francisco issue, minted to an extent of just 129,950 pieces. Some speckles of cloudy-gray color accompany light pitting in the left reverse field and near the denomination. Sharp definition remains on the raised devices, with high point wear noted in accordance with the assigned grade. A very scarce coin in this condition, seldom available any finer. Census (all varieties): 2 in 50, 14 finer (10/15). PCGS# 572091 Base PCGS# 6284

**1856/1856-O WB-102 Seated Half
Lustrous, Vibrant Premium Gem
Boldly Repunched Date, FS-301**

- 3191 1856/1856-O FS-301, WB-102, Die Pair 9, R.2, MS66 PCGS.** A somewhat unsung repunched date among Seated halves, but no less spectacular than other standout doubled date varieties that make the Seated series so popular among collectors and half dollar specialists. The date was originally punched into the working die at an upward angle, then corrected to be more level, with the underdigits clearly visible below the 1 and above the 56 of the date. The variety is less-scarce but more prominently doubled when struck from an early state of the dies such as this example.

The present coin is a strong candidate for finest-known not only of the dramatically repunched date variety, but of the entire issue. It is a vibrant Premium Gem coin, with variegated toning at the obverse margin and abundant silver luster on both sides. The coin is boldly struck except for the star centers 12 and 13. Tied for finest of the issue for all varieties, with just six coins listed at PCGS and NGC at MS66 — a remarkably low number from an original mintage of more than 2.6 million pieces. PCGS population (all varieties): 3 in 66, 0 finer (10/15).

Ex: *David Lawrence* (8/2000); *The Eugene H. Gardner Collection Part III* (Heritage, 5/2015), lot 98474. NGC ID# 24HP, PCGS# 413722 Base PCGS# 6288

CONFEDERATE STATES OF AMERICA

**1861 Scott Confederate Restrike, AU Details
One of 500 Pieces Struck in 1879**

- 3192 1861 Scott Restrike — Improperly Cleaned — NCS. AU Details. Breen-8002.** The well-known and opportunistic coin dealer J.W. Scott purchased the original reverse die for the Confederate half dollar in 1879 from fellow dealer Ebenezer Locke Mason, who in turn had acquired the die from Dr. B.F. Taylor, Chief Coiner of the New Orleans Mint. Scott proceeded to plane off the reverse of 500 authentic 1861-dated federal half dollars and produced the popular restrikes of the famous Confederate issue. The present example may have been a pocket piece, based on the smoothness of the surfaces (as if polished) and faint hairlines from cleaning. Pleasing gunmetal-blue toning remains at the obverse border, while the centers are bright silver. The reverse is reflective with pale gold accents and grayish-blue shades around the raised Confederate motifs. Considerable eye appeal remains despite the net grade. It is thought no more than 150 of the restrikes survive.

SEATED HALF DOLLARS

**1870-S WB-101 Half Dollar, MS64
Rare in Choice Mint State**

- 3193 1870-S Very Small S, WB-101, Die Pair 2, R.3, MS64 NGC. CAC.** Strong Mintmark. Despite a mintage topping 1 million pieces, the number of 1870-S half dollar survivors in Mint State is exceedingly small. NGC and PCGS combined have awarded the MS64 grade to only five examples, with three Gems finer (10/15). Light tan toning appears on this near-Gem displaying mattelike luster along with scattered flyspecks. The strike is sharp overall with a few minor areas of incompleteness noted. NGC ID# 6467, PCGS# 572191 Base PCGS# 6329

**1873 Arrows Half, MS65+
WB-106, Semiprooflike Fields**

- 3194** 1873 Large Arrows, WB-106, MS65+ NGC. All With Arrows 1873 half dollars were struck with the Open 3 logotype in the date, but pieces are known with both large and small arrows to either side of the date. The Large Arrows variant is historically more plentiful, but its availability declines significantly in Gem condition. This semiprooflike example displays shades of rose-gold and violet toning in the central regions with deeper aquamarine around the peripheries. The strike is sharp. Trivial stacking marks on the high points of Liberty identify the grade. Census of all With Arrows varieties: 6 in 65 (1 in 65+), 3 finer (10/15). NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

**1879 WB-102 Half Dollar, Toned MS67
Eye-Catching Luminescence**

- 3195** 1879 Closed Bud, WB-102, MS67 NGC. The 1879 Seated half dollar is the first of the low-mintage Philadelphia issues from the tail-end of the series. Only 4,800 pieces were struck, although enough Mint State representatives were saved at the time of issue that the date is moderately collectible today. This outstanding MS67 coin is one of only a small number of pieces that are worthy of the Superb Gem grade level. Both sides display an attractive combination of vibrant luster and semiprooflike mirroring, with blended mint-gold, ocean-blue, and lavender-gold hues blanketing each side. The strike is sharp, and a few small marks on Liberty's legs are the only surface abrasions of note. Census: 11 in 67 (3 in 67 ★), 1 finer (10/15). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**1881 WB-102 Seated Half, MS66
Only 10,000 Coins Struck**

- 3196** 1881 Closed Bud, WB-102, MS66 PCGS. The Bland-Allison Act of 1878 mandated that silver bullion be used to coin vast quantities of Morgan dollars, and half dollar output was minimal from 1879 to 1890. Only 10,000 Seated halves were struck in 1881, but many of the low-mintage coins were preserved in mint condition by mindful collectors. Violet-gray patina reveals green and blue hues when held under an appropriate light source. The devices are typically sharp, particularly on Liberty's head and sandal, and marks are hidden beneath the toning. Population: 14 in 66 (1 in 66+), 3 finer (10/15). NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

PROOF SEATED HALF DOLLARS

1859 Half Dollar, PR64
Richly Toned

- 3197 1859 PR64 PCGS.** The reported mintage of 800 proof half dollars in 1859 likely counts an unknown number of coins melted at year's end. PCGS estimates 300 specimens survive. This Choice proof is richly toned in dusky violet, blue, and green patina. The fields become noticeably deep and reflective when tilted under a lamp, producing a moderate degree of contrast against the predictably full design elements. Two tiny contact marks occur under the eagle's beak. Population: 37 in 64, 13 finer (10/15). NGC ID# 27TJ, PCGS# 6413

1873 WB-102 No Arrows Half, PR66 Cameo
Pinwheel Toning, Just One Finer at PCGS

- 3198 1873 No Arrows, Closed 3 PR66 Cameo PCGS. WB-102.** A gorgeous Premium Gem proof, attractively toned at the obverse margin in swirling circles of steel-blue and violet, surrounding a brilliant-silver porthole where the coin is without toning to showcase the frost-white figure of Liberty. The reverse is more entirely toned in the same lovely shades, and both sides display glassy-deep mirrors. The obverse is strongly contrasted, while the contrast on the reverse is slightly minimized by the toning. The surfaces are remarkably untroubled, with a small cluster of lint marks beneath the bottom arrow shaft visible with a glass but of no real significance. The 1873 No Arrows proofs all show the Closed 3 date logotype. Population: 3 in 66 Cameo, 1 finer (10/15). NGC ID# 27U8, PCGS# 86431

1881 Seated Half, PR68
Sole Finest Graded

- 3199 1881 PR68 NGC. WB-101.** Seated half dollars were struck to the extent of only a few thousand pieces per year between 1879 and 1890, and the low mintages did not escape the attention of contemporary collectors. In his June 1880 house organ, *Mason's Coin Collectors' Herald*, coin dealer Ebenezer L. Mason mentioned the "speculative excitement" related to the 1879 issues. Late-date Seated coinage has been popular ever since, and the present coin represents the *ne plus ultra* of the era, a low-mintage coin in the highest level of preservation. Blue-green rims and fields surround sepia-toned centers, while a sharp strike completely delineates the inner star lines. The surfaces are virtually perfect, as expected for an example of this lofty technical grade. This is the sole highest-graded proof at NGC. The finest-graded at PCGS are two coins in PR67. Ex: Purchased by Eugene Gardner from Pinnacle Rarities (9/2006); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98512. NGC ID# 27UG, PCGS# 6442

1891 Half Dollar, PR67
Beautifully Toned Final-Year Example

- 3200 1891 PR67 NGC.** Medium toning competes against deeply mirrored fields on this beautiful final-year proof half dollar from the Seated Liberty series, one of only 600 pieces struck. Pale aqua and mint central toning cedes to light rose around the rims, and the proof strike is, as one would expect, razor-sharp. NGC has encapsulated just four proofs in this remarkable grade with a single submission finer. The finest coin at PCGS is a comparable Superb Gem example (5/15). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

1894-S Barber Half, MS66 Outstanding Condition Census Coin Ex: Duckor / Akers

- 3201 1894-S MS66 PCGS.** Ex: Duckor/Akers. The 1894-S Barber half dollar is one of the most elusive dates in the entire series in MS65 or finer grades. In the Thaine Price catalog, David Akers wrote of the date:

"I consider it to be one of the series' most underrated issues since it has never been widely publicized or even recognized as a rarity yet it bears favorable comparison to almost any other issue in the series."

Dr. Duckor acquired this example in August 1995, prior to the appearance of several major collections. The Hugon Collection coin was MS66 PCGS, earlier coming from the San Francisco Mint through the Clapp and Eliasberg collections. The Friend Collection also had an MS66 PCGS example. The Gem Uncirculated Price coin came from the Emery-Nichols Collection, and earlier from the Chapman brothers in 1903. The Norweb, Pryor, Queller, and Byers collection specimens are each in lower Mint State grades. The Duckor specimen is boldly defined and just shy of a full strike. Both sides show a few trivial marks consistent with the grade, mostly masked by deep steel-blue, golden-grown, and iridescent toning that blankets satiny luster on each side.

Ex: *David Akers* (8/1995); *ANA Signature* (Heritage, 8/2010), lot 3181; *FUN Signature* (Heritage, 1/2011), lot 5572; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98518. NGC ID# 24LR, PCGS# 6470

1896-S Half Dollar, MS65 Upper-End for the Grade

- 3202 1896-S MS65 PCGS.** This Gem Barber half is almost devoid of abrasions, with soft, satiny luster illuminating a thin blanket of light golden toning which allows occasional glimpses of deeper olive and russet around the peripheries. A few faint roller marks on Liberty's cheek are Mint-made and do not affect the grade. The eagle's talons are sharp, but some minor weakness shows on the upper-right corner of the shield. Population: 10 in 65, 5 finer (10/15). NGC ID# 24LX, PCGS# 6476

1901-O Half Dollar, MS64 Natural Golden-Olive Patina

- 3203 1901-O MS64 PCGS. CAC.** The 1901-O Barber half dollar is a better date, commanding a premium in the upper circulated and Mint State grades. This Choice example displays satiny luster over golden-gray surfaces with overtones of olive and amber-red in portions of the fields. Well-struck on the obverse but weak over the central portion of the eagle on the reverse. Population: 10 in 64 (2 in 64+), 7 finer (10/15). NGC ID# 24MD, PCGS# 6490

1903-O Half Dollar, Elusive MS65

- 3204 1903-O MS65 PCGS.** The 1903-O Barber half issue is scarce in Mint State and rare as a Gem, despite a mintage of more than 2 million pieces. Golden-brown and teal colors appear on large portions of both sides, accented by a few splashes of plum. Pleasing satin luster adds to the eye appeal. Population: 8 in 65 (2 in 65+), 5 finer (10/15). NGC ID# 24MK, PCGS# 6496

1910-S Barber Half, Vibrant MS65

3205 1910-S MS65 PCGS. CAC. Although the artistic excellence of the Barber half dollar is widely considered to be lacking among admirers of classical sculpture, few will deny the visual appeal of piece with Gem-quality surfaces and vibrant luster. This 1910-S is a magnificent example, particularly for this conditionally rare San Francisco issue. The strike is well-executed, and the surfaces display frosty gold-tinted luster that is virtually unabraded. Population: 9 in 65, 20 finer (10/15). NGC ID# 24NC, PCGS# 6520

PROOF BARBER HALF DOLLARS

**1906 Barber Half Dollar, PR68 ★
Among the Finest Certified**

3206 1906 PR68 ★ NGC. This midseries proof Barber half issue has a mintage of only 675 specimens, and few survivors can rival either the impressive preservation or the astonishing aesthetic appeal of this vibrant representative. The strike is spectacular, and the fields remain impressively mirrored through a layer of light patina. Aqua, green-gold, ruby, and orange shadings embrace each side. Even the most plentiful proof Barber half dollar issues become major rarities on the top side of the Superb Gem grade level, and the 1906 is certainly no exception. This coin will be a cornerstone in a high-end date set of proof Barber halves. Census: 5 in 68 (1 in 68 ★, 1 in 68+★), 0 finer (10/15).
Ex: ANA Signature (Heritage, 7/2008), lot 1710; Eugene Gardner; Gardner Collection, Part III (Heritage, 5/2015), lot 98547. NGC ID# 24PA, PCGS# 6553

**1907 Half Dollar, PR68 Cameo
Single Finest Cameo**

3207 1907 PR68 Cameo NGC. The 1907 is a scarce proof issue with 575 coins produced. Most survivors reside in non-Cameo grades. Due to the process by which proof dies were prepared during this period, very few examples were ever struck with distinct field-device contrast. In all grades, NGC reports only 16 Cameos. The present piece is not only the sole finest of these, but is also a full grade point finer than any non-Cameo certified by NGC (10/15). Sparkling mint brilliance is seen on each side with no trace of color present. The fields display bottomless pools of mirrored reflectivity, which give the coin a "black" appearance in those areas of negative space on both obverse and reverse. The devices are bright and frosted, aglow against the deep mirroring of the fields. Exceptional quality, ideal for type representation.
Ex: FUN Signature (Heritage, 1/2005), lot 4287. NGC ID# 24PB, PCGS# 86554

1913 Barber Half, PR67
Intensely Vivid Coloration

3208 1913 PR67 PCGS. CAC. A glittering, dynamic proof half dollar with a dual personality. The obverse offers glassy-smooth fields and a frosted portrait, blanketed in golden tones with lilac, violet, and blue accents with nearly flawless surfaces. The reverse presents a flamboyant display of vivid coloration, imbued with cobalt-blue and fuchsia-pink with magenta highlights. The thickly frosted eagle and deep-mirrored fields yield to the all-encompassing toning. Both sides are razor-sharp in strike. Just 627 proofs were struck of this scarce Philadelphia date, of which this coin is one of the most memorable. Housed in a green label holder, CAC endorsed. Population: 14 in 67, 0 finer (10/15). NGC ID# 24PH, PCGS# 6560

1915 Half Dollar, PR68
Tied for Finest Certified

3209 1915 PR68 NGC. The low circulation-strike mintage of just 138,000 pieces combines with the second-lowest proof mintage (at 450 pieces vs. 380 proof coins struck in 1914) to put this Superb Gem in elite company among all Barber half proofs. Moreover, Cameo examples are rarely seen in any condition, making high-end non-Cameos the finest most collectors will have the opportunity to acquire.

This high-end Superb Gem is among the finest at NGC, while the top-rated coin at PCGS is a single PR67+ coin. Both sides exhibit impeccably struck and preserved surfaces, accented by subtle contrast between the satiny devices and the deep, reflective fields. A mere hint of light golden hue visits the essentially untoned surfaces. An ideal coin for Registry purposes, tied for numerically finest. Census: 7 in 68 (1 in 68 ★), 0 finer (10/15). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

1929-D Walking Liberty Half Dollar, MS66 Extremely Rare in Finer Grades

- 3210 1929-D MS66 PCGS.** From a smallish mintage of just over 1 million pieces, the 1929-D Walking Liberty half dollar is a scarce issue in MS66 condition and finer examples are extremely rare. This spectacular Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on the wreath hand and eagle's leg, and well-preserved lustrous surfaces. Population: 65 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 24RC, PCGS# 6589

1929-S Half Dollar, MS66 Only One Coin Finer at PCGS

- 3211 1929-S MS66 PCGS.** As a result of the moderate availability of lower-grade pieces, the scarcity of Premium Gem 1929-S half dollars is often overlooked. This frosty example showcases beautifully preserved surfaces and above-average design sharpness, including partial thumb separation. Champagne-toned luster exhibits a few olive overtones around portions of the obverse periphery. Population: 48 in 66 (1 in 66+), 1 finer (10/15). NGC ID# 24RD, PCGS# 6590

1935 Half Dollar, Vividly Toned MS67+ Only One Coin Finer at PCGS

- 3212 1935 MS67+ PCGS. CAC.** Although the 1935 Walking Liberty half dollar claims a large mintage of more than 9 million pieces, few examples have achieved the Superb Gem level. This high-end MS67 representative exhibits rich, variegated patina on both sides in shades of yellow, gold, orange, mint-green, violet, red, and blue. The reverse is even more colorful. This offering should generate spirited bidding among toning enthusiasts. Population: 48 in 67 (3 in 67+), 1 finer (10/15).
Ex: New York Signature (Heritage, 11/2013), lot 3641. NGC ID# 24RJ, PCGS# 6595

1936-D Half Dollar, Highly Lustrous MS67+

- 3213 1936-D MS67+ PCGS. CAC.** A sliver of peripheral orange- and reddish-gold toning frames the silver-white surfaces of this high-end Superb Gem. Intense luster emanates from both sides, each of which exhibits well-struck design elements. Liberty's branch hand shows partial definition, as do the eagle's leg feathers. Those on its breast are quite sharp. A few minuscule marks are within the parameters of the grade designation. Population: 35 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

1940-S Half Dollar, MS67 None Certified Finer at Either Service

- 3214 1940-S MS67 NGC.** Pale, peach-gold toning deepens slightly at the borders and confirms the originality of this lustrous, satin-silver half dollar. The eagle is particularly sharp on the reverse, while only slight weakness exists on the central obverse portrait. The unavoidable tiny ticks are visible at the high points of Liberty's branch hand and leg, and some small scuffs are hidden in the eagle's wing feathers. Fewer than two dozen examples exist at this Superb Gem level — PCGS and NGC combined — with none finer at either service. Census: 11 in 67, 0 finer (10/15). NGC ID# 24S2, PCGS# 6610

**1946-D Half Dollar, MS67+
Sharp Strike, Lightly Toned**

3215 1946-D MS67+ PCGS. CAC. Faint autumn-brown and jade-green toning encompass this lustrous and sharply struck high-end Superb Gem half dollar. Smooth save for a couple of small marks on the throat and on the elbow of Liberty's outstretched arm. Housed in a prior generation holder. Population: 77 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 24SK, PCGS# 6628

PROOF WALKING LIBERTY HALF DOLLAR

**1936 Walking Liberty Half, PR66+
Lowest-Mintage Proof Issue**

3216 1936 PR66+ PCGS. CAC. A brilliant, deeply reflective proof with a razor-sharp strike and faint tawny-gold overtones that briefly visit the mostly silver fields and devices. The reverse is brilliant and particularly well-struck. The attractive surfaces earned both the PCGS Plus designation and CAC endorsement for quality and eye appeal. Few Plus-graded Premium Gem or finer examples exist of this inaugural Walking Liberty proof issue. Population: 10 in 66+, 37 finer (9/15). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLARS

**1952-S Half Dollar, Incredible MS67 Full Bell Lines
Among the Four Finest Known**

3217 1952-S MS67 Full Bell Lines PCGS. This 1952-S Franklin half with Full Bell Lines designation displays generous luster that runs over both sides, but its calling card is the incredibly vivid, multicolor patina. The strike and subsequent preservation are both equally nice, and a pair of faint scrapes on the lower bell area do not significantly interrupt the progress of the sharp bell lines. This issue can be located with Full Bell Lines through Gem, but the population declines markedly in Premium Gem. PCGS and NGC report a meager four examples MS67 and none finer. Population: 3 in 67 Full Bell Lines, 0 finer (9/15). NGC ID# 24T5, PCGS# 86663

**1961 Franklin Half, MS66 Full Bell Lines
Outstanding Registry Set Candidate**

- 3218 1961 MS66 Full Bell Lines PCGS.** The 1961 Franklin half dollar is fairly challenging in high grade with full bell lines, and it is particularly rare with such in Premium Gem condition. This piece is numerically equal to the coin in the current highest-rated PCGS Registry Set (although one PCGS coin has been certified with a plus designation) and its acquisition is of high importance for a competitive ranking. Both sides are carefully preserved and display bold striking sharpness. Touches of olive, amber, and russet occasionally appear over iridescent lavender-gold and ice-blue surfaces. Population: 10 in 66 (1 in 66+) Full Bell Lines, 0 finer (10/15). NGC ID# 24TN, PCGS# 86680

**1962 Franklin Half, MS66 Full Bell Lines
Excessively Rare in this Grade**

- 3219 1962 MS66 Full Bell Lines PCGS.** Perhaps the second-rarest Franklin half dollar in Premium Gem with Full Bell Lines. This silver-white example is essentially untoned with blazing mint luster. A few small areas of whitish water residue hide near the rim and a glass reveals a pair of tiny marks — one beneath A in STATES, and another near U of UNITED — but these are the only flaws, and they are nearly invisible when viewed in hand. PCGS does not grant the MS66 Full Bell Lines grade often, and no examples are finer at either service. Population: 10 in 66 Full Bell Lines, 0 finer (9/15). NGC ID# 24TR, PCGS# 86682

**1962-D Franklin Half, MS66 Full Bell Lines
Tied for Finest Certified**

- 3220 1962-D MS66 Full Bell Lines PCGS.** A seldom-seen issue in Premium Gem with Full Bell Lines. Half a dozen dates in the early 1960s share a common rarity with the Full Bell Lines designation, including the 1960-D, 1961, 1961-D, 1962, 1962-D, and the 1963. This 1962-D is brilliant-white with frosty luster. Abrasions are limited to a few tiny ticks, while the motifs show a sharp strike throughout both sides. Population: 20 in 66 (1 in 66+) Full Bell Lines, 0 finer (9/15). NGC ID# 24TS, PCGS# 86683

PROOF FRANKLIN HALF DOLLARS

**1950 Franklin Half Dollar, PR64 Deep Cameo
High Quality Series Key**

- 3221 1950 PR64 Deep Cameo PCGS.** A host of production, storage, and packaging problems limit the number of Deep or Ultra Cameo proofs available for the 1950 Franklin halves, creating one of the great condition rarities of 20th century coinage. This near-Gem example is untuned with glassy, deep mirrors and nicely frosted devices for strong white-on-black contrast. A few delicate lines appear with magnification, but the overall quality is excellent for the issue and the grade. PCGS reports just three finer coins in Deep Cameo proof format. Population: 4 in 64 Deep Cameo, 3 finer (10/15). NGC ID# 27VA, PCGS# 96691 Base PCGS# 96690

EARLY DOLLARS

**1795 Flowing Hair Dollar, AU50 ★
B-4, BB-14, Popular 'Hidden Star' Variety**

- 3222** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, AU50 ★ NGC. Bowers Die State I. The B-4, BB-14 variety is often found with high rims, which serve to protect the central motifs from wear and provide a pleasing frame for well-centered examples. This representative is an early strike, with a few die lumps located near stars 10 and 11 by the rim plus a small lump beneath the chin. The variety is readily identified by the position of star 13, tucked far beneath the bust truncation — the only Flowing Hair dollar with such a distinctive “hidden star” alignment.

While the BB-14 is somewhat available in lower circulated grades, XF coins are elusive and AU coins are very scarce. Full Mint State coins are rare. This AU50 example earns the NGC Star designation for its exceptional, natural patina and sharp strike. A few light abrasions — most notably, some hidden adjustment marks in the well-defined hair strands and a long, thin scrape across the eagle’s breast and wing — are well disguised in the original old-silver coloration that deepens at the margins. The overall surface quality and the eye appeal are outstanding. Census (for the variety): 4 in 50 (1 in 50 ★), 4 finer (10/15). NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

**1795 Flowing Hair Dollar, XF40
Three Leaves, B-7, BB-18**

- 3223** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, XF40 NGC. Bowers Die State I. Lilac-blue, olive-green, and golden-brown toning embraces both sides, with the latter shade more prevalent on the reverse. There are no noteworthy abrasions, and luster shimmers from letters, stars, and wreath. The eagle’s breast and the hair near the ear show wear appropriate for the XF level. Moderate adjustment marks (as coined) are relegated to the lower half of the eagle. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF25
Silver Plug, B-7, BB-18**

- 3224** 1795 Flowing Hair, Three Leaves, Silver Plug, B-7, BB-18, R.3, VF25 PCGS. Bowers Die State I. At the early U.S. Mint, silver dollar planchets had to fall within a narrow weight standard. Overweight flans were filed, accounting for the adjustment marks seen on many examples. Underweight planchets were either melted or brought up to standard by placing a small silver plug atop the planchet just prior to the strike. According to third party census data, BB-21, BB-18, and BB-31 are the most available 1795 varieties with a silver plug, although examples of BB-11, BB-13, BB-14, and BB-27 have also been certified as such. The silver plug is evident on the present piece by a faint circular outline on the central reverse. The wheat-gold fields and steel-gray devices are unabraded aside from a faded line below the L in LIBERTY. Minor flan flaws are noted behind Liberty’s head and through the N in UNITED. NGC ID# 24WZ, PCGS# 39993 Base PCGS# 6854

**1795 B-1, BB-21 Flowing Hair Dollar, AU53
Brilliant With Traces of Mint Luster**

3225 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU53 PCGS.

One has to wonder how much circulation this bright-silver, early dollar actually experienced. With slight rub on the high points, it is clearly a circulated coin but it still offers excellent detail and appeal. Hair details display good delineation of the curls with light wear on the high points above Liberty's forehead and on the point of the bust truncation. The fields are amazingly free of abrasions. The reverse surfaces are equally clean, and the eagle's breast is nearly rounded, lacking feather detail only where high-point friction is evident. The wings display good feather detail and, perhaps most satisfying, the eagle's talons gripping the rock are more prominent than on many early dollars, a characteristic of the B-1 variety.

Two Mint-made issues are obvious. Several light adjustment marks angle across the obverse, most obvious on the portrait. A planchet defect — another Mint-related flaw — appears beneath the 5 in the date. These are natural results of the minting process but occasionally shunned by collectors. Still, this is an intriguing early dollar with many positive attributes and overall condition approaching Choice AU. Population (all Two Leaves varieties): 17 in 53, 56 finer (10/15). NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 B-14, BB-51 Off-Center Draped Bust Dollar, VF20

3226 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF20 PCGS.

The bust was positioned off-center left for the B-14, BB-51 Draped Bust variety, struck with the dies slightly misaligned southeast where the dentilation narrows. Battleship-gray toning in the fields yields to lighter silver-gray patina on the raised devices for a pleasing two-tone effect. A small rim bump beneath the 5 of the date is the sole imperfection, since there are no adjustment marks or other meaningful abrasions. Remarkable eye appeal, detail, and quality at this grade level. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1797 Draped Bust Dollar, AU58
B-1, BB-73, Terminal Die State**

3227 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, AU58 PCGS.

CAC. Bowers Die State VI. The B-1, BB-73 dollar was struck from the latest state of the obverse die (with the B-2, BB-72 die pair its predecessor), and went through a progression of die states until its demise striking this coin and others like it. Late die state enthusiasts will find a seemingly unending melange of die cracks, clash marks, bulges, and other evidence of shattered dies in a terminal state. Despite the obvious weak points where the die is failing, other areas of this coin are remarkably well-struck and brightly lustrous. Some areas of heavy, charcoal-gray toning stand in stark contrast to the overall brilliant, silver-white surfaces that show very little wear. An interesting early dollar, a companion to the Baldenhofer-Ostheimer listed as sixth in David Bowers' list of notable specimens that was struck from the same Die State VI. CAC approval confirms the eye appeal and strong interest commanded by this near-Mint dollar. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1802/1 Dollar, AU58
B-3, BB-234, Wide Date

- 3228** 1802/1 Wide Date, B-3, BB-234, R.3, AU58 NGC. Bowers-Borckardt Die State III. Only 41,650 Draped Bust dollars were struck in 1802, with seven die varieties known for the date. A small die lump between stars 8 and 9 and Liberty's forehead identifies this coin as a representative of the BB-234 variety. This piece is well-preserved with only the slightest trace of actual wear evident on the devices. The die was lapped prior to striking, and some detail was lost in the process, including some of the arrow shafts and much of cloud 6. Both sides exhibit pleasing pinkish-gray patina, with no mentionable distractions. Census (all 1802/1 varieties included): 17 in 58, 9 finer (10/15).

Ex: *Pittsburgh Signature* (Heritage, 10/2011), lot 3847; *FUN Signature* (Heritage, 1/2012), lot 3296. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

1802 Dollar, B-6, BB-241, AU50
Sharp and Attractive

- 3229** 1802 Narrow Date, B-6, BB-241, R.1, AU50 NGC. Bowers Die State III. The obverse shows signs of die lapping, especially at the left-most curls behind the shoulder where where one of the curls is detached from the rest of the hair. The T in LIBERTY is footless at the right. Silver luster remains beneath light olive-gray toning on the obverse, and deeper slate-gray patina on the reverse. A few light lines appear near the date and across the portrait, visible with a strong lens. Sharp definition remains across the portrait, eagle, shield, and stars. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

GOBRECHT DOLLARS

1836 Gobrecht Dollar, Fine Details
Judd-60, Die Alignment I

- 3230** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Edge Repaired — PCGS Genuine. Proof, Fine Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). There is no angling die clash mark above the eagle's wing, but we cannot state definitively about its absence because of the heavy wear. The Edge Repaired disclaimer is somewhat of a mystery. Yes, we see slight filing over the denticles, most easily seen at 2 o'clock on the reverse; but if there is a problem on the edge itself we are not able to discern where. Deep blue-gray toning covers each side, and the only noticeable mark is located in the lower obverse field above the foot of Liberty. Even wear overall and actually a nice, lower-grade Gobrecht dollar. NGC ID# BLWV, PCGS# 11225

1839 Original Gobrecht Dollar, AU Details
Judd-104, Die Alignment IV
Very Early Die State

3231 1839 Name Omitted, Judd-104 Original, Pollock-116, R.3 — Artificial Toning, Cleaned — NGC Details. AU. Silver. Reeded Edge. Die Alignment IV (medal turn, the head Liberty is opposite the F in OF). Original 1839 dollars were produced in late December 1839 and 300 pieces were struck, according to the Mint Report for 1839. Current estimates are around 100 pieces extant of the Originals. No observable die cracks are seen on the peripheral reverse legends on this piece. That itself qualifies this dollar as a rarity. State A Originals as classified by Craig Sholley, John Dannreuther, and Saul Teichman have hints of die clashing on the obverse. This piece may have been struck even before the State A coins. On this dollar, there is light clashing below the elbow as well as opposite the knee, and down the leg to star 13. On the reverse, very light clashing is seen behind and along the right wing feathers and there are some indistinct ripples in the right field between the wing and letters/pellet. The early state of this Starless Reverse indicates this die was used just after the Judd-84 (1838) pattern dollars were struck.

This is the third finest Judd-104 located in this early die state. The finest was a PR50 PCGS we sold in our 2012 FUN Sale, a coin that brought \$23,000. Second finest was a PR45 sold in the 2014 Chicago Sale by Stack's Bowers, a coin that went for \$25,850.

The surfaces are muted, undoubtedly from the light cleaning and subsequent retoning, and each side displays even dark gray patina. The fields are non-reflective, as expected from 1839 Originals. The strike details are strong and there is only slight evidence of high-point friction.

SEATED DOLLARS

1855 Seated Dollar, Sharp AU50
CAC Gold Label
In an Old Green Label Holder

3232 1855 AU50 PCGS. Gold CAC. The 1855 Seated dollar is seldom seen in any grade, due in part to its marginal 26,000-coin mintage. CAC awarded this About Uncirculated example a gold label, drawing immediate attention to the virtually unworn devices and semiprooflike fields. The interiors are brilliant, but the peripheries display attractive violet and blue toning. Housed in an old green label holder. The combination of visual appeal and technical merit is captivating. Population: 19 in 50, 61 finer (10/15). NGC ID# 24YU, PCGS# 6943

**1864 Seated Dollar, MS65+
Fully Struck and Prooflike
Among the Finest Survivors**

3233 1864 MS65+ PCGS. CAC. Two prevailing factors influenced the demand for and circulation of silver dollars in 1864. The Civil War arguably had the most direct effect on the widespread hoarding of gold and silver coins up and down the East Coast. There, Gresham's law held true, with federal coinage replaced by a plethora of circulating mediums including fractional currency, private tokens, and postage stamps. On the other hand, the amount of domestically mined silver ore grew rapidly during the war years, increasing the ratio of silver to gold and reducing the gold value of silver. This resulted in an overall upward trend in the number of silver dollars coined at Philadelphia between 1862 and 1865.

Four deliveries of silver dollars occurred in 1864, amounting to 30,700 coins. The deliveries were dated January 13 (5,700), April 30 (2,000), May 17 (8,500), and July 29 (14,500). While these deliveries imply demand, the coins failed to circulate domestically. Instead, they were exported overseas. The *Annual Mint Director's Report* asked in that year: "In a time of peace, shall we have a share of the gold and silver of our own mines, for our currency and use, or must it be carried off to the plethoric vaults of European banks capitalists? This latter is precisely the direction all the silver has taken thus far ..."

Perhaps 300 to 600 1864 Seated dollars survive, though PCGS and NGC report nearly 261 submissions in all grades. A little over 10% of those grading events, or 31 submissions, are in Mint State. At PCGS, eight are in MS65 and one is in MS66. The eight MS65 examples include two certified as MS65+. When the Plus-designation is considered, this example is tied for the second finest at that service. The top coins at NGC include eight in MS65, none with additional designations (10/15).

This sharply detailed and brilliant Gem exhibits vibrant luster and delicate splashes of champagne toning over each side. The highly appealing surfaces display reflective fields and frosted devices. A few scattered field marks may aid the identification of this piece in past and future auction appearances. The connoisseur will recognize the importance of this offering and bid accordingly. NGC ID# 24Z7, PCGS# 6954

PROOF SEATED DOLLARS

1856 Seated Dollar, PR65
Tied for the Finest at PCGS

3234 1856 PR65 PCGS. Proof Seated dollars are the most popular coins in the entire series of silver proofs, a situation that remains unchanged since the time of issue. While mintages for the proof dollars were higher than the subordinate denominations, demand was and still is proportionately higher. The PCGS website suggests a surviving population of 50 to 75 coins in all grades, with this coin among the few finest certified.

The present coin is a gorgeous Gem proof that exhibits excellent contrast between the mirrored fields and frosty devices. A few faint hairlines and contact marks hide beneath the appealing gold, lilac, and blue toning intermingled on both sides, including small nicks below CA of AMERICA, useful for pedigree tracking. Counted among the finest known examples with fully original toning and exceptional eye appeal. The fields are covered with faint die striations. Population: 3 in 65, 0 finer (10/15). NGC ID# 252A, PCGS# 6999

1868 Dollar, PR63 Cameo
Pleasing Champagne Color

3235 1868 PR63 Cameo PCGS. A rather small percentage of surviving proof 1868 Seated dollars resides in Cameo grades, making this golden-toned Select example appealing beyond its visual merit. The strike is boldly rendered and field-device contrast is outstanding. A few stray hairlines in the fields and a scattering of tiny russet specks on the reverse account for the grade. Population: 2 in 63 Cameo, 31 finer (9/15). NGC ID# 252P, PCGS# 87016

1869 Seated Liberty Dollar, PR64+
Rare Deep Cameo Example

3236 1869 PR64+ Deep Cameo PCGS. Only 600 proof Seated Liberty dollars were struck in 1869, all for inclusion in the proof sets. The sets were delivered at different times throughout the year, and three different die combinations are known. This coin was struck using the same reverse die used on proofs in the following year, with some incomplete detail in the scroll due to lapping. Only a handful of survivors have been certified above the PR64 level.

The present coin is a high-end Choice specimen with richly frosted design elements that contrast profoundly with the deeply mirrored fields. Sharply detailed on the obverse, the reverse shows some minor incompleteness, due to die polishing, and some parallel striations in the lower portion that soften the detail on the eagle's left (facing) leg. The well-preserved surfaces show highlights of pale gold toning and eye appeal is terrific. Population: 7 in 64 (3 in 64+) Deep Cameo, 11 finer (10/15). NGC ID# 252R, PCGS# 97017

1871 Seated Dollar, PR66 Cameo
Excellent Type Set Acquisition

- 3237** 1871 PR66 Cameo PCGS. CAC. Deeply frosted grayish-gold devices on each side of this high-end proof type coin contrast well against the reflective fields, offering primarily pinkish-gold coloration with accents of ice-blue closer to the rims. A total of 960 proofs were reportedly struck this year, but this piece is definitely among the upper echelons of survivors, both in terms of preservation and contrast. A loupe reveals no mentionable marks among the light patina, and the strike is full, or essentially so, throughout both sides. This Cameo Premium Gem is one of only three such at PCGS, and none are finer (10/15). An excellent candidate for a fine type set. NGC ID# 252T, PCGS# 87019
-

TRADE DOLLARS

1875-S/CC Trade Dollar, MS64
High-End FS-501 with Single Chop Mark

- 3238** 1875-S/CC Chop Mark, Type One Reverse, FS-501, MS64 PCGS. Large S. A deep chopmark at 8 o'clock on the reverse affects the obverse border near 10 o'clock. This otherwise carefully preserved near-Gem has booming luster and light tan-gold patina. The design elements are well-struck aside from Liberty's hair and the D in DOLLAR. Although two 1875-S/CC varieties are known, FS-501 is the most obvious since most of the second C in the original mintmark is intact. PCGS has a Registry Set devoted to chopmarked Trade Dollars, and the 1875-S/CC is a key to this specialized series.
Ex: Long Beach Signature (Heritage, 6/2004), lot 6127. PCGS# 518792 Base PCGS# 87040
-

PROOF TRADE DOLLARS

1876 Trade Dollar, PR65 Cameo
Type One Obverse, Type Two Reverse

- 3239 1876 PR65 Cameo PCGS.** Type One Obverse. Type Two Reverse. The flashy fields and icy motifs are generally brilliant, but the obverse margin displays attractive peach-gold patina, and the reverse exhibits blushes of steel-gray near the eagle's neck and left (facing) wingtip. A couple of lint marks (as coined) near star 3 and above Liberty's head provide further identifiers. A well struck Gem. The proof mintage of 1,150 pieces was higher than the prior three years of the type, due to sales of proof sets at the Mint booth of the Centennial Exposition in Philadelphia. Population: 10 in 65 (1 in 65+) Cameo, 3 finer (10/15). NGC ID# 27YM, PCGS# 87056

1878 Trade Dollar, PR66
Subtle Field-Device Contrast

- 3240 1878 PR66 PCGS. CAC.** Business-strike coinage of Trade dollars was suspended at the Philadelphia Mint in 1878, but 900 proof examples were struck to satisfy collector demand. The issue enjoys a fairly high survival rate, but most examples seen are in the PR60 to PR63 range. The 1878 is elusive in PR66 condition, and finer grades are prohibitively rare. This Premium Gem proof boasts spectacular surfaces and preservation complementing sharp design elements and deeply mirrored fields under vivid shades of lavender-gray, emerald-green, and cobalt-blue toning. The eye appeal is outstanding. Population: 8 in 66, 1 finer (10/15).
Ex: Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98593. NGC ID# 27YP, PCGS# 7058

**1881 Trade Dollar, PR65
Dramatic Old-Time Toning**

- 3241 1881 PR65 PCGS.** A lovely example of the proof-only 1881 Trade dollar. Beginning in 1878 with the introduction of the Morgan silver dollars, all Philadelphia Mint Trade dollars were struck only in proof format through the end of the series. This piece displays exquisite flame-gold toning with splashes of russet, violet, and cerulean-blue. A needle-sharp strike defines the star centers, legends, and central motifs. A few delicate lines are microscopic and well-disguised by the lavish toning. NGC ID# 27YT, PCGS# 7061

**1881 Proof-Only Trade Dollar, PR66+
Late-Series Representative**

- 3242 1881 PR66+ PCGS.** Its demise hastened by the Bland-Allison Act of 1878 and the introduction of the Morgan silver dollar, production of the controversial Trade dollars was reduced to limited proof mintages from 1879 through 1883 (plus a few clandestine proofs struck in 1884 and 1885). The 1881 mintage of just 960 pieces was the target of speculators as well as collectors.

This high-end Premium Gem example was sharply struck and well-preserved. Golden-tan and pale blue toning visits the mirrored surfaces in an irregular pattern that bespeaks originality, while enough untuned silver area remains for flashy eye appeal. The glassy surfaces show only a few delicate lines under magnification. Just three coins are ranked numerically finer at PCGS. Population: 9 in 66 (2 in 66+), 3 finer (10/15). NGC ID# 27YT, PCGS# 7061

MORGAN DOLLARS

**1878 8TF Morgan, MS64 Deep Mirror Prooflike
Attractive Border Toning**

- 3243 1878 8TF Broken R&B, VAM-21, MS64 Deep Mirror Prooflike NGC.** Minute die doubling on many obverse design elements is perhaps the most intriguing aspect of VAM-21, although broken bases on the R and B in PLURIBUS are helpful attribution aids. This Choice example is a rare deeply mirrored representative with modest cameo contrast and sharply struck, frosty devices. Save for tinges of amber-gold and ocean-blue toning around the peripheries, the minimally abraded surfaces are brilliant. NGC ID# 253H, PCGS# 133822 Base PCGS# 7072

**1878 Morgan Dollar, MS65+
7/8 Tail Feathers, VAM-38**

- 3244 1878 7/8TF Strong, VAM-38, MS65+ PCGS. CAC.** Five tail feather ends show beneath the primary devices and the lettering on LIBERTY and E PLURIBUS UNUM is strongly doubled, identifying the VAM-38 variety. This high-end Gem exhibits well-detailed design elements and well-preserved brilliant surfaces with vibrant mint luster throughout. PCGS has certified 11 numerically finer examples (10/15). NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

**1878-S Morgan Dollar, MS67
Smooth and Fully Struck First-Year Issue**

- 3245 1878-S MS67 PCGS.** Our consignor has an unfailing eye for exceptional quality, and this first-year Morgan dollar will be challenging to surpass for either eye appeal or technical merit. The full strike and the problem-free, untuned surfaces radiate frosty silver luster. The fields and Liberty's cheek are smooth and attractive, with a tiny nick on the chin and a few minor scuffs on the neck point the only signs of contact. Population: 35 in 67 (2 in 67+), 1 finer (10/15). NGC ID# 253R, PCGS# 7082

1879 Dollar, MS65+ Prooflike
Beautifully Preserved and Colorful

- 3246 1879 MS65+ Prooflike PCGS. CAC.** A breathtaking high-end Gem example of this early Philadelphia issue with seldom-seen prooflike mirroring. A blanket of warm golden toning encompasses the interiors, ceding to violet and ocean-blue around the borders. The strike is bold, and a few trivial marks in the left obverse field are well-hidden by the patina. Population: 19 in 65 (1 in 65+) Prooflike, 2 finer (10/15). NGC ID# 253S, PCGS# 7085

1879-CC Silver Dollar, Frosty MS64+
Better Carson City Morgan

- 3247 1879-CC MS64+ PCGS. CAC.** The rather small GSA disbursement of 4,123 1879-CC dollars accounts for a significant number of the Uncirculated representatives known today. The '79-CC is the second-scarcest Carson City Morgan in Mint State after the key-date 1889-CC. The mintage for this year, 756,000 coins, was also less than half of the silver dollar production of 1878 in Carson City, which included more than 2.2 million Morgans and 97,000 Trade dollars.

Available 1879-CC Morgans are mostly clustered in MS64 and lower grades, with Gems scarce. This Plus-designated Choice example is vibrantly lustrous and frosty with traces of champagne toning. There are a few trivial grazes on Liberty's cheek that limit the grade, but the overall appearance is exceptional for a non-Gem. The strike is sharp. The collector opportunity represented by this coin is immense. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS62
Ex: GSA Hoard

- 3248 1879-CC GSA MS62 NGC.** Normal Mintmark. Few 1879-CC dollars were part of the GSA government holdings, when just 4,123 coins were released that were in storage from the original low mintage of 756,000 pieces. This example is brilliant and frosty on the raised elements, with numerous high point abrasions from coin-to-coin contact. Partial prooflikeness remains in the lightly marked fields. Band-certified MS62 by NGC in the original black GSA holder, no box or papers. A key to the Carson City short set. NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

1880/79-CC Morgan Dollar, MS66
VAM-4, Reverse of 1878

- 3249 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66 PCGS. CAC.** A Top 100 Variety. This Reverse of 1878 Carson City VAM prominently shows the remnants of a 79 beneath the 80 in the date. VAM-4 is widely popular as one of the more obvious overdates in the Morgan dollar series. This Premium Gem example boasts frosty luster and well-struck design elements. Areas of midnight-blue and deep lavender toning appear around the peripheries with champagne-gold in the centers. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

1880-S Dollar, Brilliant MS68
Immaculate Semiprooflike Surfaces

- 3250 1880-S MS68 PCGS. CAC.** Large S. The 1880-S is obtainable even in this high grade, but its availability should not diminish the impressive nature of this blazing, untuned example. The design detail is razor-sharp aside from the extreme centers, where faint roller marks are visible. Each side is virtually immaculate with marked semiprooflike reflectivity and contrast. Housed in a green label holder with a CAC approval sticker. PCGS shows merely five finer grading events (10/15). NGC ID# 2544, PCGS# 7118

**1882-O Silver Dollar, Remarkable MS66
Beautifully Toned, Uncommonly Radiant**

- 3251 1882-O MS66 PCGS.** Dave Bowers, in *A Guide Book of Morgan Silver Dollars*, fourth edition, notes that the 1882-O Morgan was “produced with relatively little care,” and usually has “dull and insipid” luster. This Premium Gem stands in stark contrast to norms for the issue, showcasing a strike and luster combination reminiscent of the 1882-S, which is widely regarded as one of the most eye-appealing issues in the entire series. This vibrant and frosty 1882-O is strong for the MS66 grade and yields soft champagne toning over the reverse and central obverse with incredible ice-blue, mint-green, sun-gold, plum, and forest-green hues around the obverse margins. Population: 46 in 66 (3 in 66+), 6 finer (9/15). NGC ID# 254C, PCGS# 7136

**1883-S Silver Dollar, MS64+
Rarely Encountered Finer**

- 3252 1883-S MS64+ PCGS.** The Mint State population of the 1883-S Morgan dollar drops of precipitously above MS64. This Plus-designated coin will appeal to a wealth of collectors who find a rare Gem to be out of reach. This piece is well-preserved and satiny with warm orange-gold and lavender interiors that cede to sea-green and blue borders. Slight strike weakness is seen on the eagle's breast and the hair above Liberty's ear. PCGS lists 18 finer representatives (10/15). NGC ID# 254K, PCGS# 7148

**1884-S Dollar, MS60
Eye-Appealing for the Grade**

- 3253 1884-S MS60 ANACS.** An undeniably Mint State example of this conditionally better San Francisco issue. The strike is bold, and semiprooflike mirroring in the fields accentuates the eye appeal. Shades of amber-gold, champagne, lavender, and ocean-blue blanket portions of each side, masking a few light, scattered abrasions. NGC ID# 254P, PCGS# 7156

**1886-S Silver Dollar, MS66
Challenging So Fine**

- 3254 1886-S MS66 PCGS.** The Premium Gem grade level is the point at which the 1886-S Morgan dollar becomes genuinely scarce, and pieces finer than this are extremely rare. The present MS66 coin is brilliant, radiantly illuminated in satiny luster and semiprooflike fields. The design elements are boldly rendered, and the preservation is excellent. Population: 44 in 66 (2 in 66+), 4 finer (10/15). NGC ID# 254X, PCGS# 7170

**1887/6-O Silver Dollar, Frosty MS64+
VAM-3, Top 100 Variety**

- 3255 1887/6-O VAM-3 MS64+ PCGS. CAC.** A Top 100 Variety. Vibrant, original luster enlivens each side of this brilliant near-Gem, revealing only a few trivial surface grazes on Liberty's cheek. The strike is soft on the eagle's breast and the hair above Liberty's ear, but the overall eye appeal is unaffected. This *Guide Book*-listed VAM is seldom seen so well-preserved. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

1889-CC Morgan Dollar, AU55
Key Carson City Issue

3256 1889-CC AU55 PCGS. From a mintage of 350,000 pieces, the 1889-CC is the most elusive Morgan dollar from the famous Carson City Mint. Much of the reported mintage was released into circulation at the time of issue and contemporary collectors showed little interest in branch mint issues, so few were saved for numismatic purposes. In the context of the series, Mint State specimens are difficult to locate and highly sought-after, making them quite expensive when they are encountered.

This attractive Choice AU specimen is a good balance of quality and value. The design elements show just a touch of friction on the highest points, like the hair above the ear. The surfaces are lightly abraded, with pleasant highlights of golden-brown and much prooflike reflectivity in sheltered areas. Altogether, eye appeal is quite strong for this important Morgan dollar key. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, Beautiful AU58
Attractively Toned and Reflective

3257 1889-CC AU58 PCGS. This near-Mint 1889-CC Morgan showcases eye appeal superior to most lower-end Uncirculated examples, which is significant when one recognizes the absolute rarity of Mint State 1889-CC dollars. Within the AU level, this magnificent piece is undoubtedly among the finest. Semiprooflike fields frame sharp design elements that exhibit only a brush of friction over the eagle's breast and the hair above Liberty's ear. This "slider" displays warm champagne interiors that cede to vivid amber, violet, and ocean-blue toning around the peripheries. A few small, scattered ticks are not bothersome to the unaided eye. An outstanding example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

1891-O Silver Dollar, MS65
Exceptional Preservation

- 3258 1891-O MS65 PCGS.** A high-mintage issue available in Uncirculated grades, but rarely in the present quality. This essentially brilliant Gem offers dynamic luster and exceptionally smooth surfaces. The strike is good by New Orleans standards, although the centers show minor blending. Encapsulated in an old green label holder, and virtually unobtainable any finer. NGC ID# 255J, PCGS# 7208

Gem 1892-CC Dollar

- 3259 1892-CC MS65 PCGS. VAM-4B.** The mintmark is repunched, and both sides display multiple sets of clash marks. This lustrous and brilliant example shows selected softness at the centers but the remainder of the strike is bold. The cheek is smooth and the reverse field appears pristine. The 1892-CC was absent from the GSA auctions and is scarce as a Gem. NGC ID# 255M, PCGS# 7214

1892-S Morgan, Partially Lustrous AU55

- 3260 1892-S AU55 PCGS.** After the famously rare 1893-S, the 1892-S is the scarcest Morgan dollar at the Mint State level. This is a sharply detailed AU example for the budget-conscious collector. The fields retain areas of luster beneath golden-gray toning overall. There are no bothersome abrasions, and the design elements show little evidence of wear. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55
Elusive Issue in High Grade

- 3261 1892-S AU55 PCGS.** The 1892-S Morgan dollar is a challenging issue in high grade, as few high-quality examples were saved by contemporary collectors and only a small number were found in the Treasury hoard of the 1960s. This Choice AU specimen shows just a trace of high-point wear and the lightly abraded surfaces retain much original mint luster. NGC ID# 255P, PCGS# 7218

1893-CC Morgan, Well-Struck MS61

- 3262 1893-CC MS61 NGC.** Satiny luster illuminates near-brilliant surfaces on each side of this Mint State 1893-CC Morgan. Grade-limiting abrasions are light and evenly dispersed over each side, posing little distraction for the MS61 level. Although not fully struck in the central regions, the eagle's breast and the hair above Liberty's ear show above-average definition. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS62
Above-Average Central Detail

- 3263 1893-CC MS62 NGC.** In addition to being the final silver dollar struck at the Carson City Mint, the 1893-CC is also one of the more conditionally elusive dates in the CC-mint short set. This piece shows scattered abrasions, as indicated by the grade, but gas vibrant cartwheel luster and near-brilliant surfaces. The central devices are noticeably sharper than usual for the issue. NGC ID# 255S, PCGS# 7222

**1893-O Morgan, Lustrous MS62
Better O-Mint Issue**

- 3264 1893-O MS62 PCGS.** This semikey New Orleans issue boasts a mintage of 300,000 pieces, one of the smaller production totals of the entire series. Luster is frosty and vibrant on this brilliant example, and the fields are faintly reflective. Slight weakness on the eagle's breast and the hair above Liberty's ear is characteristic for the issue. Abrasions on Liberty's cheek prevent a finer grade. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63
Unusually Vibrant Luster**

- 3265 1893-O MS63 PCGS.** In addition to conditional scarcity, the 1893-O Morgan dollar is also elusive with attractive luster. New Orleans issues from this period often have a satiny or "greasy" appearance in contrast to the vibrant, frosty luster seen on Carson City pieces. This Select 1893-O is above-average in that respect and shows soft champagne toning over each side. A few minor marks on Liberty's cheek limit the grade but blend almost seamlessly into the luster. Some strike weakness occurs on the eagle's breast and the hair above Liberty's ear. NGC ID# 255T, PCGS# 7224

**1893-S Silver Dollar, VF20
Problem-Free Surfaces**

- 3266 1893-S VF20 PCGS.** Blue-tinged battleship-gray surfaces are problem-free on this midgrade 1893-S dollar, showing pleasing detail for the grade and smooth, evenly worn devices. Even among circulated Morgan dollar collections, the visual appeal of the 1893-S — along with that of several other key dates — is important to the perceived quality of the entire set. This piece will serve its owner well in that regard. NGC ID# 255U, PCGS# 7226

**1894-O Dollar, MS64+
Eye-Appealing Condition Rarity**

- 3267 1894-O MS64+ PCGS. CAC.** The 1894-O Morgan dollar is a poorly produced issue, and most survivors are softly struck with insipid mint luster. Excessive abrasions are often a problem, as well. Despite the rarity of high-quality examples, the 1894-O was largely unpopular among collectors, and the coins released from the Treasury Department at various times over the years caused little excitement. The 1894-O is still an underrated issue in high grade and it becomes a prime condition rarity in grades above the MS64 level.

This high-end Choice specimen exhibits a better-than-average strike, and the well-preserved surfaces radiate vibrant mint luster on both sides. The surfaces are mostly brilliant with hints of golden-tan and turquoise toning peripherally. Eye appeal is strong. PCGS has graded 11 finer examples (10/15). NGC ID# 255W, PCGS# 7230

1894-S Silver Dollar, MS65
Semiprooflike Fields

- 3268 1894-S MS65 PCGS. CAC.** Gem examples of this better San Francisco issue are seldom seen. This representative is especially appealing due to well-struck design elements and near-prooflike fields. Traces of light golden toning appear on each side, although the coin presents as brilliant. PCGS grades 15 examples finer (10/15). NGC ID# 255X, PCGS# 7232

1895-O Silver Dollar, AU58
Elusive in Finer Grades

- 3269 1895-O AU58 PCGS.** Uncirculated examples of this better New Orleans issue are scarce at any level. This is a mostly lustrous near-Mint example with essentially complete detail and relatively smooth surfaces. Traces of golden toning accent each side and attest to the originality of the luster. Quite pleasing for the issue. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, Semiprooflike AU58

- 3270 1895-O AU58 PCGS.** Semiprooflike fields and a lack of immediately obvious wear give this near-Mint 1895-O Morgan dollar the eye appeal of a lower-end Uncirculated example. There are remarkably few abrasions for the grade, and traces of pale champagne toning prevent full brilliance. This New Orleans issue had a small mintage of 450,000 pieces and is recognized as a semikey date in all grades. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Substantial Remaining Luster

- 3271 1895-O AU58 PCGS.** Flashes of vibrant luster in the fields confirm the near-Mint grade of this faintly toned champagne-silver 1895-O. A trace of rub on the eagle's breast and the hair above Liberty's ear precludes a Mint State designation, although most of the weakness in those regions is due to a deficient strike — something for which the 1895-O is well-known. NGC ID# 255Y, PCGS# 7236

1895-S Silver Dollar, MS61
Vibrant Cartwheel Luster

- 3272 1895-S MS61 PCGS.** The 1890s produced a significant number of the key and semikey dates in the Morgan dollar series, among them, the 1895-S. This San Francisco issue had a small 400,000-coin mintage, and only small quantities of Mint State pieces survived circulation and the Pittman Act of 1918. This piece is brilliant and lustrous, showing some of the typical strike softness on the hair above Liberty's ear. A few shallow marks on the cheek prevent a finer designation. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS61
Pleasing for the Grade

- 3273 1895-S MS61 NGC.** In the Morgan dollar series, mintages dropping below 1 million coins are unusually low. The 1895-S had a production of 400,000 coins and is a recognized semikey in all grades. This Mint State example displays satiny, champagne-tinged luster and moderately well-struck design elements. Light, scattered abrasions limit the grade but pose minimal distraction. NGC ID# 255Z, PCGS# 7238

**1896-S Morgan Dollar, MS64+
Scarce Any Finer**

- 3274 1896-S MS64+ PCGS. CAC. VAM-2, Repunched 6.** No large quantity of 1896-S dollars emerged from the treasury vaults, and aside from a few hundred coins rescued from the Redfield hoard, no trace of the greater part of the 5 million-piece mintage remains. Melting under the terms of the Pittman Act is suspected. Gem or finer coins are notably scarce (and expensive). This high-end near-Gem example is well-struck and well-preserved, with mottled blue and peach-gold toning on the obverse and a trace of reddish-gold border toning on the reverse. The 6 in the date is repunched — the primary marker for VAM-2 — and the mintmark shows minor doubling. NGC ID# 2564, PCGS# 7244

**1900 VAM-24 Dollar, MS66
Doubled Die Reverse, Top 100**

- 3275 1900 Doubled Wing, VAM-24, MS66 PCGS. A Top 100 Variety.** Designated on the insert as VAM-11, but actually the more recently discovered VAM-24. Both varieties share the same die doubled reverse, but VAM-24 has an "alligator" doubled eye and a slightly different date position. The present nicely struck and lustrous Premium Gem exhibits sea-green and autumn-brown toning with a window of brilliance on the central reverse. VAM-24 Population: 2 in 66, 0 finer (10/15). NGC ID# 256E, PCGS# 133954 Base PCGS# 7264

**1901 Doubled Die Reverse, AU55
Popular 'Shifted Eagle' Variety**

- 3276 1901 Doubled Die Reverse, VAM-3, AU55 PCGS. Ex: Jeffrey M. Cohen. A Top 100 Variety.** This "Shifted Eagle" variety displays prominent doubling on the tailfeathers, the arrows, and the lower edge of the wings. Occasional whispers of gold-tan color visit both sides of this Choice AU Morgan, which displays luster in the protected areas. The surfaces are quite clean for a lightly circulated coin. Population for the variety: 46 in 55, 20 finer (10/15). NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

**1904-S Silver Dollar, MS63
Better San Francisco Issue**

- 3277 1904-S MS63 PCGS.** The 1904-S is a better 20th century issue in the Morgan dollar series, commanding a premium over the common date even in circulated grades. This Select example offers satiny luster and minimally abraded surfaces beneath a blanket of champagne-gray toning that yields deeper amber and sea-green hues around the borders. The central high points are a trifle soft, as expected. NGC ID# 256W, PCGS# 7294

1904-S Dollar, Semiprooflike MS64

- 3278 1904-S MS64 NGC.** Semiprooflike fields heighten the eye appeal of this Choice 1904-S dollar, complementing well-struck design elements and relatively clean surfaces. Traces of light champagne toning emerge from the peripheries. The 1904-S is one of the most elusive 20th century issues in the series, particularly above MS64. NGC ID# 256W, PCGS# 7294

1921-D Morgan Dollar, Rainbow-Toned MS67
Beautiful Condition Census Coin

- 3279** 1921-D MS67 PCGS. CAC. Significant numbers of Uncirculated 1921-D Morgan dollars survive from a mintage in excess of 20 million pieces, but the vast majority are in lower grades. This was the first silver dollar coinage at the Denver Mint, and pieces that were not released into circulation were stored in 1,000-coin bags, wherein they accumulated heavy abrasions. This remarkable coin is one of fewer than two dozen Superb Gems known. Vibrant, frosty luster cartwheels undisturbed around each side, illuminating transitional multicolor hues that encompass the entire coin. Slivers of silver emerge upon closer examination, and the only noticeable strike softness is seen on the eagle's breast, as usual. Population: 10 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

1878 7TF Reverse of 1878, PR66
Condition Census Rarity

- 3280** 1878 7TF Reverse of 1878 PR66 PCGS. CAC. The 7 Tailfeather Morgan dollar is one of the key issues in the proof series, with a limited mintage of only 200 pieces struck as estimated by Van Allen and Mallis. The *Guide Book* reports a mintage of 250 pieces, but that count includes an estimated 50 proofs of the so-called Reverse of 1879 with a rounded eagle's breast and a slanted top arrow feather. Collectors seeking any 7 Tailfeathers dollar in high proof grade will find it considerably more difficult than locating an 1895 proof silver dollar.

This Premium Gem example is delightfully toned, with the obverse and reverse a study in contrasts. The obverse displays streaks and mottling of purplish-rose and cobalt-blue toning while the reverse is a more evenly patinated gray-rose. The surfaces are problem-free throughout, impressively struck and impeccably preserved. Certainly a Condition Census example, with PCGS reporting just two finer proofs, while NGC lists a single finer specimen. Population: 3 in 66, 2 finer (10/15). NGC ID# 2573, PCGS# 7312

1879 Morgan Dollar, PR65 Cameo
Attractively Toned

- 3281 1879 PR65 Cameo PCGS.** With Deep Cameos virtually uncollectible, this Gem Cameo proof 1879 Morgan dollar is among the finer pieces typically available to enthusiasts. Forest-green, crimson, and russet hues accent the obverse periphery around a lavender-gray interior, while the reverse shows uniform sun-gold toning. Field-device contrast is pleasing and the design elements are well-struck. Population: 14 in 65 Cameo, 25 finer (10/15). NGC ID# 27Z2, PCGS# 87314

1887 Dollar, PR65
Deep Original Toning

- 3282 1887 PR65 PCGS.** The 1887 is one of the more challenging proof Morgan dollar issues to locate in high grades, partly due to a diminished mintage of only 710 pieces (down from a peak of 1,100 coins in 1882). The typical example is well-struck, and this coin is a prime example in that regard. A lack of marks or obtrusive hairlines in the mirrored fields also contributes to the overall appeal, while golden-gray toning deepens toward the margins on each side, yielding to tinges of blue around the peripheries. Population: 29 in 65, 18 finer (10/15). NGC ID# 27ZG, PCGS# 7322

1888 Morgan Dollar, PR66 Cameo
Superb Peripheral Color

- 3283 1888 PR66 Cameo PCGS.** Complementing superb eye appeal and magnificent toning, this Morgan dollar is just about perfectly preserved. The devices are heavily frosted and show stark contrast against the deeply mirrored fields. An impressive array of colors delivers the appearance of what is sometimes referred to as "target toning." The center of the "target" though is a wide circle of brilliance that is surrounded by magnificent bands of russet, blue, and near-brilliant in the margins. The only negative comment we have about this spectacular coin is the softness of strike seen over Liberty's ear and over the eagle's breast feathers. Population: 4 in 66 Cameo, 0 finer (10/15). NGC ID# 27ZH, PCGS# 87323

**1893 Morgan Dollar, PR67
Deep Original Proof Set Toning**

3284 1893 PR67 NGC. Like the quarter and half dollar from this year, the silver dollar also had a mintage of only 792 proofs. On the obverse, this Superb Gem displays a centrally located untoned area that extends upward in a U shape, taking on a pale reddish hue. Elsewhere the obverse is deep blue. The reverse also has a central area of brilliance about the size of a nickel and the remainder of that side is also deep blue. The surfaces are seemingly flawless and moderate contrast occurs between the fields and devices on each side. Central striking softness is present, as seen on most 1893 dollars. Census: 18 in 67 (1 in 67+), 8 finer (10/15). NGC ID# 27ZN, PCGS# 7328

PEACE DOLLARS

**1921 Peace Dollar, MS66
High Relief Design**

3285 1921 Peace MS66 PCGS. High Relief. This spectacular Premium Gem displays much more detail in Liberty's hair than the typical example of this issue. The high relief of the design usually caused some flatness in this area. The well-preserved surfaces radiate vibrant mint luster, with attractive hints of pale gold toning. PCGS has graded seven numerically finer examples (10/15). NGC ID# 2U4E, PCGS# 7356

**1925 Peace Dollar, MS67+
Exceptional for Type and for Issue**

3286 1925 MS67+ NGC. CAC. Rainbow iridescence covers both sides of this lightly-yet-colorfully toned Peace dollar. Exceptionally unmarked surfaces glow with golden luster beneath the pleasing and attractive patina. The strike is remarkably sharp for the issue. Faint remnants of a partial fingerprint at the lower obverse is the only post-Mint mark to mention, and it is of little notice amid the colorful hues that grace both sides of this high-end Superb Gem. CAC endorsed and among the finest 1925 Peace dollars extant. Census: 2 in 67+, 1 in 67 ★, 1 finer (10/15). NGC ID# 257L, PCGS# 7365

**1927 Peace Dollar, MS66
Tied for Finest Certified**

3287 1927 MS66 PCGS. The 1927 boasts a mintage of 848,000 pieces, the second-lowest in the series behind the 1928. Mint State examples are nonetheless available through MS64, but there is a significant drop at the Gem level; in MS66, the 1927 Peace dollar is a great rarity. This Satiny Premium Gem is among the finest certified by either service. An exact strike sharply defines the central devices, and the surfaces are devoid of bothersome abrasions. An array of pastel hues encompasses each side, allowing vibrant cartwheel luster to roll uninterrupted over the surfaces. The last MS66 PCGS coin we offered was in lot 4124 of the Long Beach Signature sale (Heritage, 9/2015), which realized \$22,325. This attractively toned example should spark comparably strong collector interest. Population: 14 in 66, 0 finer (10/15). NGC ID# 257S, PCGS# 7370

**1934-S Peace Dollar, MS65+
Eye-Appealing and Frosty**

- 3288 1934-S MS65+ PCGS.** Traces of champagne toning emerge from thick, frosty luster on each side of this high-end Gem 1934-S dollar. The hair curls over Liberty's ear are a trifle soft, but the overall strike is above-average for the issue. A few truly faint grazes on Liberty's cheek appear to be all that limit the grade. PCGS reports 28 finer representatives, although we doubt more than a few trump this piece in terms of eye appeal (10/15). NGC ID# 257Z, PCGS# 7377

**1935 Dollar, Frosty MS66+
Above-Average Strike**

- 3289 1935 MS66+ PCGS. CAC.** Both sides of this untuned high-end Premium Gem dollar are awash with intense mint luster. The design features are better struck than ordinarily seen on this issue, including relatively strong definition in the hair at Liberty's ear. Impeccably preserved surfaces further contribute to the coin's lovely eye appeal. PCGS reports no examples finer (10/15). NGC ID# 2582, PCGS# 7378

GOLD DOLLARS

**1850-D Gold Dollar, AU55
Scarce D-Mint Series Key**

- 3290 1850-D AU55 PCGS. Variety 2-C.** The low mintage of 8,382 pieces combined with the general rarity of branch mint gold from the 1850s make this Dahlonega dollar one of the key issues in the series. As few as 125 to 175 pieces are estimated to survive, many in low circulated grades or with impaired surfaces. This Choice About Uncirculated piece displays gleaming greenish-gold color with substantial mint luster remaining. The centers show typical strike weakness, although the peripheries are reasonably sharp and the date is bold. A few light lines and small abrasions are non-distracting at the assigned grade. Population: 13 in 55, 16 finer (10/15). NGC ID# 25BH, PCGS# 7511

**1850-D Gold Dollar, MS62
Underrated Branch Mint Issue**

- 3291 1850-D MS62 NGC. Variety 2-C.** The 1850-D gold dollar claims a low-mintage of 8,382 pieces and few, if any, examples were saved by contemporary collectors. As a result, the issue is scarce-to-rare in all grades today, but has always been underrated and undervalued, outside of series specialists. The surviving population numbers between 125 and 175 examples in all grades and Mint State specimens are rare.

This pleasing MS62 representative offers well-detailed design elements, with a touch of the always seen softness on the obverse. The reverse devices are sharper, with some interesting clash marks in the upper field. The lustrous surfaces are minimally marked for the grade and the overall presentation is quite attractive. Census: 7 in 62, 6 finer (10/15). NGC ID# 25BH, PCGS# 7511

**1851-D Gold Dollar, MS62
Mint State Dahlonega Type Coin**

- 3292 1851-D MS62 NGC. Variety 3-E.** The Dahlonega Mint struck 3,147 gold dollars in February 1851, and in June an additional 6,735 pieces were delivered for a total mintage of 9,882 coins. The more common of the two known die marriages, Winter suggests that coins of the 3-E variety may have been those examples produced in June. This issue is similar in overall rarity to the lower mintage 1858-D, and both are tied for tenth rarest honors among D-mint gold dollars. This ranking means that the '51-D is actually among the more frequently offered dollars from this branch mint. The surfaces of this piece are both well-produced and, for the grade, well-preserved. There are no outwardly distracting planchet defects, and the strike is bold, if not sharp, in all areas. Rich green-gold undertones peer through equally original orange-gold shadings, and there is a blush of pale powder-blue color on the obverse portrait. A well-concealed strike through (as produced) at the top rear of Liberty's head is mentioned for pedigree purposes. Census: 22 in 62, 10 finer (10/15).
Ex: Ashland City Collection / FUN Signature (Heritage, 1/2003), lot 4617; The Charleston Collection / FUN Signature (Heritage, 6/2008), lot 1769. NGC ID# 25BM, PCGS# 7515

**1853 Gold Dollar, Fully Struck MS66
Ideal Type One Representative**

- 3293 1853 MS66 PCGS.** By 1853, the gold dollar had taken the place of the widely hoarded silver dollars and half dollars, which traded at a premium. However, the passage of the Coinage Act of 1853 reduced and stimulated the weight and circulation of subsidiary silver, minimizing the demand for gold dollars. Thus, thousands of the 4 million gold dollars minted in 1853 sat idle in Treasury vaults. Examples are available through Gem condition, and the issue only poses a challenge in MS66 and higher. This fully struck, lemon-gold Premium Gem has frosty luster over unabraded surfaces. Struck from slightly rotated dies. Population: 41 in 66 (3 in 66+), 11 finer (10/15). NGC ID# 25BU, PCGS# 7521

**1855-C Gold Dollar, AU55
Scarcer Variety 1**

- 3294 1855-C AU55 NGC. Variety 1.** This is the rarer of the two known 1855-C gold dollar varieties, showing the date positioned a trifle further left. This issue is typically seen with a soft, incomplete portrait on the obverse, and even minor wear can make the coin appear well-circulated to the novice. This Choice AU representative shows little actual friction and retains hints of luster in the recesses. Weakness on the central reverse is characteristic of this die pairing. A pleasing green-gold example. Census: 34 in 55, 53 finer (10/15). NGC ID# 25C5, PCGS# 7533

**1856-S Gold Dollar, MS62
Scarce Final Type Two Issue**

3295 1856-S Type Two MS62 PCGS. The 1856-S gold dollar was the final Type Two issue, with a small mintage of just 24,600 pieces. The 1856-S is something of an anomaly, as the other mints had all switched over to the Type Three dies after 1855. Few examples were saved by contemporary collectors and the 1856-S is a scarce issue in all grades today.

The present coin is an attractive MS62 specimen, with well-detailed design elements and some interesting clash marks on the reverse. The mintmark is dramatically repunched. The obverse shows an extensive network of spidery die cracks from the edges through the central devices. The lustrous orange-gold surfaces are lightly marked for the grade. Population: 9 in 62, 9 finer (10/15). NGC ID# 25C8, PCGS# 7536

**1857-C Gold Dollar, MS61
A Charlotte Condition Rarity**

3296 1857-C MS61 NGC. Variety 1. While 300-400 pieces may be extant of the 1857-C in all grades, in mint condition it is extremely rare. Almost all examples are seen with mint-made planchet problems, identified by Doug Winter as having "an irregular almost 'wavy' look ... with what appear to be 'strips' of roughness around the head of Liberty." These attributes are seen on this piece, and yet beyond these planchet problems this piece shows no mentionable surface flaws normally seen on a lower Mint State gold coin. Bright, even yellow-gold color is noted, along with the normally seen softness in the centers. Census: 5 in 61, 4 finer (10/15). NGC ID# 25CE, PCGS# 7545

**1871 Gold Dollar, MS65
Lustrous and Appealing**

3297 1871 MS65 PCGS. Radiant cartwheel mint luster reveals lilac and magenta highlights over the rich, orange-gold surfaces of this splendid gold dollar. The fields combine both frosty and prooflike areas for strong eye appeal. Only minor softness is visible at the centers, as always for the 1871 issue. A lovely Gem example, conditionally scarce at the current grade level or finer. Population: 10 in 65, 14 finer (10/15). NGC ID# 25D8, PCGS# 7571

**1881 Gold Dollar, Exemplary MS68
Only One Coin Finer at PCGS**

3298 1881 MS68 PCGS. Although the 1889 trumps it several times over in terms of absolute availability, the 1881 gold dollar holds out as the most readily obtainable date in MS68 — what is for most collectors the ultimate type coin grade. The unusually high survival rate — especially for an issue with a small 7,620-coin mintage — was secured at the time of issue when dealers and speculators hoarded Mint State examples of the low-mintage, late-series gold dollars. The limited commercial use of the denomination during this period contributed to its discontinuance after 1889.

This representative showcases immaculate, frosty luster with orange, mint, and lilac-gold hues intermingled over each side. The strike is bold, and the eye appeal is arguably unsurpassed. Population: 43 in 68 (4 in 68+), 1 finer (10/15). NGC ID# 25DK, PCGS# 7582

**1881 Gold Dollar, MS67 Prooflike
Fantastic Visual Appeal**

3299 1881 MS67 Prooflike NGC. The proof mintage for this issue consisted of only 87 coins, with the estimated number of surviving examples ranging between 40 and 50. This adds considerable appeal to prooflike business strikes, such as the present Superb Gem. Rich yellow-gold color and flashy surfaces are among the attributes that define this coin's eye appeal. A few tiny splashes of orange appear on the obverse. Both sides reveal as-made strike-throughs, but they are small. Census: 4 in 67 (2 in 67 ★) Prooflike, 1 finer (10/15). NGC ID# 25DK, PCGS# 77582

**1889 Gold Dollar, MS67+
Final-Year Type Coin**

3300 1889 MS67+ PCGS. As a Superb Gem example of the available final-year issue, this remarkable 1889 gold dollar is ideal for type purposes. Frosty wheat-gold luster illuminates the bold design definition, while close study of the surfaces fails to reveal distractions. The reverse motifs exhibit the typical Longacre doubling. PCGS lists six finer representatives (10/15). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLE

**1837 Quarter Eagle, MS62
Variety 16, Pleasing for the Grade**

3301 1837 MS62 NGC. Breen-6145, Variety 16, R.2. A lustrous example that has a good strike save for minor blending on the center of the shield. A small mark beneath Liberty's chin is the only noticeable abrasion. The 1837 is a low-mintage date (45,080 pieces), since commercial need was largely met by a much more significant 1836 production. Census: 16 in 62 (1 in 62 ★), 6 finer (10/15). Ex: Long Beach Signature (Heritage, 9/2008), lot 3238. NGC ID# 25FX, PCGS# 7695

LIBERTY QUARTER EAGLES

1852 Liberty Quarter Eagle, MS66
Only One Finer Coin at PCGS

- 3302 1852 MS66 PCGS. A remarkable Premium Gem example, with well-detailed design elements that show just a touch of softness on the eagle's left (facing) leg. The impeccably preserved peach-gold surfaces radiate vibrant mint luster on both sides and eye appeal is terrific. Population: 3 in 66, 1 finer (10/15). NGC ID# 25HR, PCGS# 7763

1855-C Quarter Eagle, AU58
Scarce Charlotte Issue

- 3303 1855-C AU58 NGC. Variety 1. Faint high-point rub slightly subdues the green-gold luster of this near-Mint 1855-C quarter eagle, but there is no loss of detail to otherwise expose its brief stint in circulation. Weakness on the eagle's legs and talons is consistent with that of the upper obverse stars, both products of strike deficiency, as is a common characteristic on this issue. The 1855-C is a scarcer issue with perhaps 85 to 105 pieces extant in all grades from a mintage of just 3,677 coins. Census: 16 in 58 (1 in 58+), 16 finer (9/15). NGC ID# 25J5, PCGS# 7775

PROOF LIBERTY QUARTER EAGLES

1898 Quarter Eagle, PR67 Ultra Cameo
Outstanding Visual Appeal and Technical Quality

- 3304 1898 PR67 Ultra Cameo NGC. The 1898 proof Liberty quarter eagle claims a relatively generous mintage of 165 pieces and a number of high-quality specimen were saved by contemporary collectors. As a result, the surviving population numbers about 100 examples in all grades today. However, few survivors can match the amazing technical quality and extraordinary eye appeal of the present coin. This piece exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the richly frosted devices to create an intense cameo effect. The delightful yellow-gold surfaces are impeccably preserved and overall eye appeal is terrific. Census: 11 in 67 Ultra Cameo (3 in 67 ★ Ultra Cameo), 12 finer (10/15). NGC ID# 288M, PCGS# 97924

**1901 Liberty Quarter Eagle, PR64
Elusive Cameo Example**

- 3305 1901 PR64 Cameo NGC.** An attractive Choice specimen from a generous proof mintage of 223 pieces, this coin exhibits deeply reflective fields that contrast boldly with the sharply detailed design elements and lightly marked yellow-gold surfaces with outstanding eye appeal. Census: 23 in 64 Cameo, 19 finer (10/15). NGC ID# 288R, PCGS# 87927

**1901 Quarter Eagle, PR62 Deep Cameo
The Highest Proof Mintage in the Series**

- 3306 1901 PR62 Deep Cameo PCGS. CAC.** The 1901 proof Liberty Head quarter eagle, with the highest proof mintage in the series (223 pieces), is a readily available issue. The deep mirrors of this PR62 Deep Cameo accentuate its sharply struck design elements. A few light hairlines limit the numerical grade. Population: 2 in 62 Deep Cameo, 29 finer (10/15). NGC ID# 288R, PCGS# 97927

INDIAN QUARTER EAGLES

**1908 Indian Quarter Eagle, MS66
Exemplary First-Year Type Coin**

- 3307 1908 MS66 PCGS.** Ex: The Shrike Set. Not the example offered in our September 2011 auction containing *The Shrike Set of \$2 1/2 Indians*, but from the same source and clearly a coin chosen with the same care as that collection's first-year Premium Gem. The 1908 was saved in quantity for its novelty value, though few coins have survived so well as this MS66 piece. Gold-orange interiors have a peach overtone that fades out toward the lighter centers. Each side is well-detailed, and only a few tiny luster grazes and other small disturbances preclude an even finer technical designation. PCGS has certified only two Superb Gems finer (10/15).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4772.
From The Leon Hendrickson Collection. NGC ID# 288Y, PCGS# 7939

**1909 Quarter Eagle, MS66
Sharp Detail, Vivid Orange-Gold Luster**

- 3308 1909 MS66 PCGS.** Premium Gem, the preservation level of this magnificent coin, is the finest grade in which the 1909 quarter eagle can be acquired and is also a tremendously difficult grade tier to access. The novelty to the public of Pratt's new design had subsided by the end of 1908, with the result that the 1909 issue was not nearly as well-saved in high grade. This plummet in collector interest at the time of issue is blatantly apparent in the fantastic drop off of the modern-day Premium Gem population between the 1908 and 1909 issues.

The sharpness of strike stands out on this example. The headdress feathers show excellent detail, as does the eagle's plumage, including that of the shoulder. The surfaces are exceptionally lustrous, showing attractive apricot-gold patina laced with whispers of mint-green. An inoffensive hair-thin mark to the left of the Indian's neck is noted solely for accuracy. Population: 19 in 66, 0 finer (10/15).

1911-D Quarter Eagle, Outstanding MS64
High-Quality Surfaces, Series Key

- 3309 1911-D Strong D MS64 PCGS. CAC.** Due to the scarcity and high cost of a Gem example (often selling for more than \$50,000), Choice representatives of the 1911-D quarter eagle are usually the finest accessible by most collectors. This piece is an ideal representative for the collector seeking a high-quality example without breaking the bank. Close scrutiny with a loupe fails to reveal any obtrusive abrasions, giving this piece the overall eye appeal and, arguably, the technical quality seen on many Plus-designated MS64 coins. Peach and orange-gold hues intermingle throughout yellow-gold luster on each side, while the surface texture is slightly more satin than granular — unusual for this Denver key. The last CAC-approved MS64 PCGS coin we offered was in lot 4163 of the Dallas Signature sale (Heritage, 3/2013), which realized \$24,675. We anticipate comparable interest in this piece. PCGS lists 25 finer representatives (10/15).
From The Leon Hendrickson Collection. NGC ID# 7KR7, PCGS# 7943

1912 Indian Quarter Eagle, MS66
Superb Quality and Eye Appeal
Extremely Rare This Fine

- 3310 1912 MS66 PCGS.** There are a handful of issues in the Indian quarter eagle series that remain marginally available in MS66, but most dates are major condition rarities at this level. The 1912 is most assuredly in the latter category. This issue boasts a mintage exceeding 600,000 pieces but is only available through MS64. Gems are scarcely seen, and pieces as fine as the current MS66 coin are extremely rare — these remarkable few coins are the finest known of the issue.

Thick mint luster shimmers over both sides of this MS66 coin, each of which showcases a lovely mixture of deep reddish-gold and lilac patina. The design elements are sharply struck, including almost complete definition on the lowest feather in the headdress. While most examples of the 1912 reveal noticeable abrasions, this coin displays remarkably clean surfaces. Population: 5 in 66, 0 finer (10/15).

Ex: The George Marin Collection / Pittsburgh Signature (Heritage, 10/2011), lot 4795.

From The Leon Hendrickson Collection. NGC ID# 7KR8, PCGS# 7944

1914 Indian Quarter Eagle, MS65
Lower-Mintage Better Date

3311 1914 MS65 PCGS. CAC. Collectors less familiar with the series might group the 1914 Indian Head quarter eagle with the 1913 and 1912 issues, but such a move would be in the wrong direction. The 1914 has more in common with the 1914-D and the 1911-D.

While the 1912 saw a production of more than 600,000 coins and the 1913's was 722,000 pieces, the 1914 mintage of 240,000 examples was the second-lowest of the series. In Gem condition the 1914 is downright rare. Considering the numbers certified at NGC and PCGS in Gem and finer grades, the 1914 appears second only to the 1914-D, with the key 1911-D in third place in total Gems graded.

While this coin's MS65 grade is a combination of factors, they all work out, in essence, to *eye appeal*. No marks are visible without a loupe, and under magnification the few marks present are away from the focal areas, as expected. The color is wonderful antique-gold, with mattelike surfaces and good luster. The strike is sharp, well-defined on the headdress feathers and the eagle's plumage. PCGS has certified only three numerically finer examples, with three more at NGC (10/15).

Ex: ANA Signature (Heritage, 7-8/2008), lot 1913.

From The Leon Hendrickson Collection. NGC ID# 7KRA, PCGS# 7946

1914-D Two and a Half, Frosty MS65
Among the Finest at PCGS

3312 1914-D MS65 PCGS. David Akers called the 1914-D "the premier rarity in the Indian Quarter Eagle series in grades at or above MS-65." In support of this assessment, the finest of seven coins in the Smithsonian Institution falls short of the Gem level at MS64, per Garrett and Guth. For perspective, the 1914-D is nearly as scarce in MS65 as most other dates in the series are in MS66. Pursuers of this popular collection usually acquire this date in MS63 or MS64, not so much because of the high cost of purchasing a Gem, but because of the difficulty associated with winning such a coin at auction. Here is a seldom seen opportunity to reach for one of the finest-known examples of this condition rarity. The piece shows bold design elements and frosty wheat-gold luster. A careful search for imperfections turns up only a few faint, scattered ticks and a small alloy spot in star 6. Population: 49 in 65, 0 finer (10/15). NGC ID# 2899, PCGS# 7947

**1914-D Indian Quarter Eagle, MS65
Underrated Issue in Gem Condition**

- 3313 1914-D MS65 PCGS.** The 1914-D quarter eagle in Gem condition is an extremely rare and still quite underrated issue in the series. The date is one that Michael Fuljenz ranks in the first-place spot in Gem condition, even besting the 1911-D, and the third rarest series issue overall. The present Gem PCGS specimen has much to commend itself. Splendid, swirling mint luster radiates from surfaces that are fully frosted throughout. The fields are remarkably clean for the reduced relief type. The strike is sharp overall, with the sole exception of the lowest headdress feather. The coloration is a nice, original medium copper-gold, and contact marks above the minuscule range are simply a nonissue. Population: 49 in 65, 0 finer (10/15).
From The Leon Hendrickson Collection. NGC ID# 2899, PCGS# 7947

**1925-D Quarter Eagle, MS66
Among the Finest at PCGS**

- 3314 1925-D MS66 PCGS.** Ex: Donald A. Kutz. This Premium Gem is among fewer than three dozen Premium Gems that are the finest-certified 1925-D quarter eagles that PCGS (10/15). An excellent Set Registry coin, this piece offers brilliant and frosty yellow-gold luster with subtle rose toning in the recesses, especially on the reverse. Population: 35 in 66 (1 in 66+), 0 finer (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 6237.
From The Leon Hendrickson Collection. NGC ID# 7KRD, PCGS# 7949

**1926 Indian Quarter Eagle, MS66
Strong Registry Set Candidate**

- 3315 1926 MS66 PCGS.** It is uncommon to locate this or any other date in the Indian quarter eagle series in such a superior state of preservation. The incuse design lends itself to abrasions in the fields, which are exposed rather than recessed as on other coins. As a result, even comparatively available issues such as the 1926 are elusive in grades above Gem. The delightful Premium Gem in the present lot is just such a coin. It has strong mint frost and attractive golden-rose and mint-green coloration interspersed with traces of lilac on both sides. The design features are sharply defined, including the Indian's hair and headdress feathers and the eagle's shoulder and leg plumage. Neither NGC nor PCGS has certified a numerically finer representative (10/15).
Ex: Central States Signature (Heritage, 5/2004), lot 9322; ANA Sale (Heritage Auctions, 7/2008), lot 1915; FUN Signature (Heritage, 1/2012), lot 4796.
From The Leon Hendrickson Collection. NGC ID# 7KRE, PCGS# 7950

PROOF INDIAN QUARTER EAGLE

1915 Quarter Eagle, Magnificent PR67 Tied for Finest of This Final Matte Proof Issue

3316 1915 PR67 PCGS. "This is the final year of Proofs issued for this series. Collector demand had fallen in most years, and Proof gold coinage was halted in 1916 for regular-issue gold denominations." So Garrett and Guth begin their entry for the proof 1915 quarter eagle in their *Encyclopedia of U.S. Gold Coins*. More at length on this theme, they write:

"Long considered to be the key date to the Proof series, the 1915 issue has earned its reputation as a rarity with few offerings and constant demand. ... [T]he 1915 quarter eagle Proof has always commanded attention, with a tiny mintage of just 100 pieces. Also, being the final year of issue, precious few of these coins remain in gem grades to satisfy collector demand."

Perhaps only 60 to 75 pieces are extant in all grades. This Superb Gem, one of just four coins so-certified by PCGS with none finer (10/15), is among the most remarkable representatives known. Both sides are exquisitely preserved and display rich orange-gold color. The texture is granular, in accordance with the notes by Garrett and Guth, who state: "The 1915 Indian Head quarter eagles were struck in the identical finish as the 1914 issue, employing the darker and coarser finish to the coins." With its sharp strike and great all-around eye appeal, this absolutely incredible coin deserves a place in the finest of classic gold cabinets.

Ex: FUN Signature (Heritage, 1/2011), lot 5056; Chicago Signature (Heritage, 8/2011), lot 7478; Philadelphia Signature (Heritage, 8/2012), lot 5320.

From The Leon Hendrickson Collection. NGC ID# 289P, PCGS# 7964

THREE DOLLAR GOLD PIECES

1863 Three Dollar, MS62
Only 5,000 Coins Struck

- 3317 1863 MS62 NGC. Three dollar gold pieces from the 1860s are significantly scarcer than the later, lower-mintage pieces from the series. Examples from the Civil War years are especially scarce, because few coins were saved — either numismatically or otherwise. Pieces that were hoarded eventually made their way into post-war circulation. This exceptionally lustrous, frosty example is one of the relatively few 1863 three dollar pieces that survive in Mint State. Sharply struck from clashed dies, light abrasions are noted, yet the plentiful eye appeal exceeds its technical grade. Census: 16 in 62, 23 finer (10/15). NGC ID# 7K5R, PCGS# 7984

1865 Three Dollar, XF45
Choice Surfaces and Color

- 3318 1865 XF45 PCGS. A brief mintage of just 1,140 pieces plus 25 proofs was little more than an afterthought at the Mint during 1865. The dies were barely used when coinage of three dollar gold pieces ceased for the year. Gleaming areas of prooflike surface remain near protective raised devices of this lightly circulated example, while the high points of the design and minor abrasions are softened by wear. With very few Mint State examples that exist — and many so-called AU coins that show signs of handling or overly bright surfaces — this original XF coin with wonderful orange-gold color and Choice surfaces offers an excellent opportunity for the three dollar gold specialist. Population: 7 in 45, 55 finer (10/15). NGC ID# 7K5S, PCGS# 7986

1873 Closed 3 Gold Three Dollar, AU55
Scarce in All Grades, Exceptional Color

- 3319 1873 Closed 3 AU55 PCGS. According to official records, only 25 three dollar gold pieces were struck in 1873, all proofs. Yet, a small population of circulation-strike Closed 3 coins is known today, mostly in AU grades. The number of pieces originally struck has been estimated at anywhere from 100 to 1,000 coins, and it has been reasoned that the coinage might have occurred early in the year, as suggested by the Closed 3 logotype in the date. PCGS and NGC combined report 120 grading events for this issue, which allows for the extant population of gradable pieces to be, theoretically, as low as 80 to 100 coins, depending on how many resubmissions are reflected in the official data.

This old-time example showcases a rich medley of apricot, violet, and orange-gold colors over each side with smooth surfaces and well-detailed motifs. Hints of prooflike mirroring remain in the protected regions of the fields. Housed in a green label holder. Population: 15 in 55, 32 finer (10/15). NGC ID# 25MW, PCGS# 7995

1874 Three Dollar Gold, MS65
Conditionally Rare
In an Old Green Label Holder

3320 1874 MS65 PCGS. CAC. The 1874 gold three dollar piece is a widely recognized type coin, but often overlooked is this issue's conditional rarity at the Gem level. In stark contrast to lower grades, PCGS and NGC record just 34 MS65 or finer representatives combined, including possible resubmissions. Compared to the several hundred Gem or better 1878 coins certified, high-end 1874 three dollar gold pieces begin to appear underappreciated.

This shimmering, frosty example displays warm straw-gold luster and largely unabraded surfaces. The wreath bowknot is soft, as usual, but the remaining design elements are well-defined. CAC-endorsed in an old green label holder. Population: 15 in 65, 4 finer (9/15). NGC ID# 7KDE, PCGS# 7998

1886 Three Dollar Gold, MS61
Only 1,000 Pieces Struck

3321 1886 MS61 NGC. The 1886 three dollar gold piece claims a mintage of just 1,000 pieces, making it an elusive issue in all Mint State grades. The present coin is an attractive MS61 specimen, with pleasing yellow-gold surfaces that show a scattering of minor contact marks on both sides and considerable prooflike reflectivity in sheltered areas. Census: 20 in 61, 20 finer (10/15). NGC ID# 25N9, PCGS# 8008

1887 Gold Three Dollar, MS64 Prooflike
Reflective Type Coin

3322 1887 MS64 Prooflike NGC. CAC. This modest cameo is tied with one other for the finest of 11 Prooflike pieces certified by NGC (10/15). The wreath bow is weakly defined, but the remainder of the coin is sharp. Rich straw-gold color blankets each side. A low 6,000-coin mintage in 1887 prompted hoarding by dealers and well-informed collectors, making this issue collectible in Mint State today. NGC ID# 25NA, PCGS# 78009

1888 Three Dollar Gold, MS64+

3323 1888 MS64+ PCGS. CAC. A meager mintage of 5,000 three dollar gold pieces was struck in 1888 and the denomination was retired after the following year. This high-end Choice example offers well-detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Visual appeal is quite strong. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

1800 Half Eagle, AU Details BD-5, Late Die State

- 3324 1800 BD-5, High R.3 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State e/c. Light wear is apparent on Liberty's forehead, curls, cap, and drapery. The straw-gold surfaces are mildly luminous but are free from any noteworthy abrasions. The strike is crisp except on at the center of the shield. A late die state with clash marks from the shield near the ear, and a crack from the shield border to the arrowheads, both unmentioned in the Bass-Dannreuther standard reference. The 1800 is a better date with three very scarce varieties (B-2, B-4, and B-5) and two very rare marriages (B-1 and B-3). PCGS# 45595 Base PCGS# 8082

1803/2 Five Dollar, BD-3, AU Details Collectible Die Marriage

- 3325 1803/2 BD-3, R.4 — Improperly Cleaned — NCS. AU Details. Bass-Dannreuther Die State e/b. BD-3 combines the "Imperfect T" 1803/2 obverse with the famous reverse that shows the T in UNITED repunched. This tail die was later used for five additional marriages. The present coin is evenly struck but displays remnants of adjustment marks along the left obverse border. Little true wear is present, although hairlines throughout the bright, yellow-gold surfaces preclude a numeric grade. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1812 Half Eagle, BD-1, Unc Details Eye-Catching Luster

- 3326 1812 BD-1, R.3 — Scratched — ANACS. Unc Details, Net AU55. Bass-Dannreuther Die State a/a. BD-1 is by far the more available of the two 1812 half eagles, frequently encountered in type collectors' cabinets. This piece is devoid of wear and possesses intense, vibrant luster. The design elements are sharply defined, although light scratches on the eagle and in the left obverse field preclude a numeric designation. Bright, straw-gold surfaces yield hints of deeper amber color in the peripheries. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

1823 Half Eagle, BD-1, AU58 Scarce Type Coin

- 3327 1823 BD-1, High R.4, AU58 NGC. Bass-Dannreuther Die State a/a. The Capped Bust to Left half eagle series was produced from 1813 through 1834, and suffered disproportionately high rates of melting due to the fact that the coins contained more bullion value than face value. As a consequence, survivors of this type are scarce for all dates and varieties. The 1823 is one of the more "fortunate" issues in that regard, however, as a relatively large number of 80 to 100 pieces are believed to be extant. This near-Mint representative is boldly struck, especially in the centers, with only the obverse stars and the eagle's talons showing a bit of incompleteness. Slight wear is noted on Liberty's lower hair curls, and a few wispy pin scratches occur in the obverse and reverse fields. Census: 6 in 58, 11 finer (9/15). PCGS# 519932 Base PCGS# 8131

1834 With Motto Half Eagle, XF45

Rare BD-2 Die Marriage

Crosslet 4 Obverse

3328 1834 With Motto, Crosslet 4, BD-2, R.5, XF45 PCGS. Bass-Dannreuther Die State b/b. BD-2 is one of the two collectible 1834 half eagle varieties, although both are in and of themselves rare. The other, BD-1, represents the Plain 4 logotype, making BD-2 the only Crosslet 4 variety that is usually obtainable. The other two varieties for this issue are prohibitively rare (BD-3) and unique (BD-4). Perhaps 45 to 55 examples of BD-2 are extant, with many having been cleaned or otherwise damaged.

This Choice XF BD-2 example is evenly struck and well-centered, showing the reverse rotated slightly clockwise. Wear is light, and medium green-gold patina is seen on each side in place of original mint luster. A few minor contact marks do not detract, and the eye appeal is quite pleasing for the issue. NGC ID# 25RP, PCGS# 519956 Base PCGS# 8161

CLASSIC HALF EAGLES

1834 Classic Head Half Eagle, AU58

Elusive Crosslet 4, McCloskey 5-D Variety

3329 1834 Crosslet 4 AU58 PCGS. Breen-6503, McCloskey 5-D, R.4. The weight specifications were changed on all U.S. gold coins in 1834 because the intrinsic value of the old-tenor gold pieces was greater than their face value, leading to widespread hoarding and melting. The Classic Head design was introduced to make the new coins easily recognizable and a substantial mintage of 657,460 half eagles of the new design were struck. Nine die varieties are known for the date and type, eight with a Plain 4 and one with a Crosslet 4 in the date, like the present coin. The Crosslet 4 variety is much scarcer than the Plain 4 type.

This attractive near-Mint specimen shows just a trace of wear on the high points of the well-detailed design elements and the lightly abraded antique-gold surfaces display a mix of satiny mint luster and semiprooflike reflectivity in sheltered areas. Population: 9 in 58, 8 finer (10/15). NGC ID# 25RU, PCGS# 8172

**1836 Classic Head Five, MS61
Second Head, Large Date, McCloskey 2-B**

3330 1836 MS61 PCGS. Second Head, Large Date, Breen-6509, McCloskey 2-B, R.4.

From a substantial mintage of 553,147 pieces, this impressive MS61 example displays lustrous orange-gold surfaces with a scattering of minor contact marks and a bisecting die crack from the rim above star 8, through the bust and the final digit in the date. The design elements were strongly impressed, but the reverse shows some incomplete detail, due to lapping. Population: 26 in 61, 65 finer (10/15). NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

**1844-D Half Eagle, Sharp MS61
Scarce Mint State Dahlonega Type Coin**

3331 1844-D MS61 PCGS. Variety 11-G. This is a delightful Dahlonega five, characterized by razor-sharp detail on each star, the hair curls around Liberty's face, and the eagle's neck and talons. Hints of honey-gold toning accent the peripheral recesses, while the remainder of the surfaces yield warm yellow-gold color. Light chatter defines the grade. The Georgia mint struck 88,982 pieces, but Doug Winter estimates only 10 to 12 true Mint State examples survive. Population: 10 in 61, 11 finer (10/15). NGC ID# 25T9, PCGS# 8221

**1858 Half Eagle, MS63
Upper-End for the Grade**

3332 1858 MS63 PCGS. The 1858 half eagle had a minimal mintage of 15,136 pieces, and Mint State survivors are rare. This Select example is near the upper end of the Uncirculated population. The design elements are boldly executed, and the satiny fields display soft wheat-gold luster. Faint lines in the luster limit the grade in the absence of any singularly obvious abrasions. Population: 2 in 63, 6 finer (10/15). NGC ID# 28BY, PCGS# 8276

**1859-S Five Dollar, AU53
Outstanding Color**

3333 1859-S AU53 NGC. Fewer than 100 1859-S half eagles are believed extant from a mintage of 13,220 pieces — scarcer than most Charlotte and Dahlonega issues from this period. Mint State examples are extremely rare. This AU representative displays rich bronze-gold patina with hints of coppery-red in the crevices. The design elements are sharply detailed with little wear. Census: 4 in 53, 17 finer (10/15). NGC ID# 25VE, PCGS# 8283

**1866-S Five Dollar Gold, XF40
No Motto Variant**

3334 1866-S No Motto XF40 PCGS. Both the No Motto and With Motto variants of the 1866-S half eagle are of almost equal scarcity, even though the low 9,000-piece No Motto mintage is almost two-thirds less than the With Motto companion issue. This example shows semiprooflike surfaces, now lightly abraded, and pleasing medium-gold color with a greenish tinge. Sharp details on the motifs remain despite the designated 20 points of wear. A sharp coin for the assigned grade, housed in a green label holder. Population: 4 in 40, 12 finer (10/15). NGC ID# 25W2, PCGS# 8300

**1866 With Motto Five, MS61
Extremely Rare in Mint State**

3335 1866 MS61 NGC. Half eagle coinage at Philadelphia in 1866 amounted to only 6,700 pieces, all of the With Motto type. Fewer than 100 representatives are thought to survive in all grades, only a handful of which grade Mint State. This is one of those rare few. The NGC *Census* records five other Uncirculated coins, including one MS60, two MS61, and a piece each in MS62 and MS63; PCGS lists just two Mint State coins, grading MS61 and MS62, respectively (10/15). This example is sharp with partially reflective fields and rich honey-gold color. Scattered abrasions define the grade but none pose individual distraction. Far finer than the Smithsonian coin — a polished AU example, per Garrett and Guth. NGC ID# 25VZ, PCGS# 8311

**1872-S Liberty Five, AU58
Sole Finest at PCGS**

3336 1872-S AU58 PCGS. The 1872-S half eagle is scarce and underrated in AU condition. This near-Mint example is the single finest at PCGS, and a trio of MS61 coins is the only higher-grade representation at NGC (10/15). The design is boldly displayed, and the satiny fields retain hints of wheat-gold luster in the protected regions. A few minor ticks are not unusual for the grade. NGC ID# 25WH, PCGS# 8327

**1874-CC Half Eagle, Partially Lustrous AU58
Scarce in All Grades**

3337 1874-CC AU58 PCGS. Variety 1-C. The 1874-CC half eagle is scarce. Most of the 21,198-coin mintage was lost to circulation. The typically seen survivor grades in the VF to XF range — including the Smithsonian coin, which is also polished, per Garrett and Guth — and a moderate number of pieces are known as low as VG. Remarkably few 1874-CC half eagles survive in AU grades, and Mint State pieces are prohibitively rare. A pair of MS62 PCGS coins are the finest known.

This attractive representative is among the finest most collectors will be able to acquire. Barely a brush of wear is observed over the high points of the devices, and the fields remain softly lustrous with original orange-gold patina. The surfaces are devoid of the typically seen contact marks, and the corresponding eye appeal is exceptional. A finer example of this Carson City half eagle is almost unobtainable. Population: 8 in 58, 2 finer (10/15). NGC ID# 25WP, PCGS# 8334

**1891-CC Half Eagle, MS63 Prooflike
The Finest Prooflike Certified**

- 3338 1891-CC MS63 Prooflike NGC. Variety 1-A.** The 1891-CC is a popular Carson City issue because of its wide availability in AU and Uncirculated grades. But this coin offers something special. The fields display remarkable depth of reflectivity and are well-matched in appearance from side to side. The surfaces display distinctive reddish-gold color and, of course there are a number of small to medium-sized abrasions scattered throughout which account for the grade. Only four Prooflike 1891-CC half eagles have been certified by NGC, and this is the finest (10/15). NGC ID# 4U9V, PCGS# 78378

**1904 Liberty Five, MS66+
Glowing Luster**

- 3339 1904 MS66+ PCGS.** A conditional rarity, among the finer-known 1904 Liberty half eagles. This Plus-designated Premium Gem exhibits bold design elements amid vibrant, frosty luster that enlivens each side in deep orange-gold hues. As the grade suggests, the surfaces are free of any mentionable imperfections. Population: 17 in 66 (1 in 66+), 5 finer (10/15). NGC ID# 25Z6, PCGS# 8409

PROOF LIBERTY HALF EAGLE

**1902 Half Eagle, PR63
Deeply Mirrored Proof Type Coin**

- 3340 1902 PR63 PCGS.** Beginning in 1902, proof half eagles began to be struck without any obvious cameo contrast, as is seen on this Select example. Coinage amounted to 162 pieces and likely fewer than 75 examples survive in all grades today. PCGS and NGC combined list 67 representatives, including possible resubmissions. This piece is sharply struck and deeply mirrored with bright yellow-gold color. Scattered hairlines limit the grade but are undetectable to the naked eye. Population: 7 in 63, 11 finer (9/15). NGC ID# 28D8, PCGS# 8497

INDIAN HALF EAGLES

**1908 Indian Head Five, MS65
Sharp, Frosty Type Coin**

- 3341 1908 Indian MS65 PCGS.** Representing the debut issue of Bela Lyon Pratt's distinctive sunken relief design, the 1908 Indian half eagle is often chosen for type collections. The impressive mintage of more than 570,000 pieces, a number of which were saved as novelties, results in ample specimens available through the near-Gem level. Gems are much scarcer, however, but nice examples can be located with patience and searching. Coins grading finer are elusive; PCGS and NGC combined have seen 42 such pieces (10/15).

The present Gem offering displays softly frosted surfaces with a light layer of reddish patina over the otherwise yellow-gold color. The lowest feather of the headdress is almost fully struck, and there is only the slightest trace of coin-to-coin contact. All in all, a very pleasing example.

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4955.

From The Leon Hendrickson Collection. NGC ID# 28DE, PCGS# 8510

1908-S Indian Half Eagle, MS65
The Bass Collection Example

3342 1908-S MS65 PCGS Secure. Ex: Bass. The cataloger of the Bass Collection sale described this remarkable Gem as “A blazer, with all the attributes of a finer grade. ... While a handful of gem specimens of this date exist, the example offered here must certainly be among the finest known at the assigned grade.” The Bass sale offered this piece as a PCGS-certified MS65 and it realized \$16,100, a substantial sum for the period. We anticipate proportionately impressive bidder attention for this offering, now featuring the Bass 1908-S five in a PCGS Secure holder.

Pedigree identifiers include a tiny planchet indent above the left stand of the second U in PLURIBUS on the reverse; and on the obverse, tiny areas of deeper color than the prevailing orange-gold appear at the top of star 5 closest to the rim, and at the top right flags of T and Y in LIBERTY. The strike is boldly executed, and the luster is beautifully radiant — characteristics of the 1908-S that make it one of the most consistently eye-appealing issues in the series. Although examples of this low-mintage date (82,000 pieces struck) appear from time to time in Gem grade, the opportunity to obtain the Bass example is fleeting. Population: 49 in 65 (1 in 65+), 20 finer (10/15).

Ex: *Quality Sales Corporation* (9/1971), lot 1086; *Harry W. Bass, Jr.; Bass Collection* (Bowers and Merena, 10/1999), lot 1294; *Central States Signature* (Heritage, 4/2012), lot 5283.

1909 Indian Five, Beautiful MS66
Ex: Jim O’Neal, Among the Finest Known

3343 1909 MS66 PCGS. The year 1909 is important as the only year that Indian half eagles were coined at four different mints. Considered among the common dates in the series, the 1909 is seen only slightly less often than the 1909-D, and it is often chosen for type collections. Even as a common date, Gems are rare and Premium Gems, such as the piece offered here, are very rare. In *Indian Gold Coins of the 20th Century*, Michael Fuljenz writes: “This will prove to be an easy date for most collectors to locate with the exception of perfectionists who seek a coin better than MS65. In this case, the 1909 will be a very elusive member of the Indian Half Eagle set.”

The bold strike, exceptional surfaces, and soft, frosty mint luster on this piece create an incredible aesthetic presentation. A minuscule diagonal mark on the cheek is a convenient identifier to track the provenance of this important half eagle. Both sides have a lovely blend of light yellow, pale blue, and vibrant rose-gold hues. Population: 8 in 66 (1 in 66+), 0 finer (10/15).

Ex: *Superior* (1/2004), lot 907, which realized \$18,400; *The Jim O’Neal Collection of \$5 Indians* (Heritage, 1/2011), lot 5136, which realized \$24,150; *New York Signature* (Heritage, 12/2011), lot 4623, which realized \$23,000.

1909-O Half Eagle, AU Details
New Orleans Key

- 3344 1909-O — Improperly Cleaned — NGC Details. AU.** Barely a trace of true wear is discernible on this key New Orleans issue, although cleaning is evident on each side. The surfaces show a few scattered marks and bright yellow-gold luster. The 1909-O is the only issue in the Indian Head half eagle series that consistently surpasses the 1929 in terms of value in Mint State. NGC ID# 25ZK, PCGS# 8515

New Orleans Mint

1909-O Half Eagle, Well-Detailed AU53
Singular Indian Head New Orleans Issue

- 3345 1909-O AU53 PCGS.** The 1909-O Indian half eagle was 15 years removed from the last half eagle issue struck at the New Orleans Mint and 30 years from the last double eagle issue. Prior to 1909, the most recent O-mint gold coins struck were a little less than 87,000 eagles in 1906, the same year that the new Denver Mint began operations. Correlation between a decline in New Orleans gold production and the opening of the Denver Mint can be easily seen. In 1909, the Southern branch was shut down, and coinage operations for the region were transferred to the Denver facility.

The 1909-D half eagle is the sole final-date gold piece from the New Orleans Mint and, with a mintage of only 34,200 coins, is also a major key date in the Indian Head series. This About Uncirculated representative is well-detailed with remnants of luster in the recesses. The mintmark is clear, and a small tick near IN GOD is the only mentionable surface flaw. NGC ID# 25ZK, PCGS# 8515

1909-O Five Dollar, Choice AU
New Orleans' Final Gold Piece

3346 1909-O AU55 NGC. The 1909-O is the most famous issue in the Indian half eagle series, and has long been an object of desire among collectors of 20th century gold. The close of the New Orleans Mint in April 1909 likely boosted this issue's popularity among collectors, as it was immediately apparent that it would be the only example of Pratt's Indian Head design struck with the long-familiar O mintmark. Moreover, the mintage amounted to a paltry 34,200 coins, most of which was dispersed into circulation before collector recognition sparked. This dramatically reduced the number of high-grade survivors and such pieces are scarcely offered today.

This Choice AU example shows brief circulation and retains hints of luster in the recesses amid medium bronze-gold patina. Although portions of the fields show faint roller marks — the product of inadequate die pressure — the design elements are remarkably well-defined. A highlight addition to a carefully assembled Indian half eagle collection. NGC ID# 25ZK, PCGS# 8515

1909-O Indian Half Eagle, AU58
Key New Orleans Issue

3347 1909-O AU58 PCGS. CAC. Variety 1. It is one of the ironies of coin collecting that the 1909-O half eagle, one of the keys to the Indian Head series, was struck in the same year that collecting U.S. coins by mintmark got a serious boost in the form of the 1909-S VDB cent. Although Augustus Heaton had published his seminal work on mint marks in 1893, it would take the speculative fever and hefty profits that some collectors made on 1909-S VDB cents for the new style of collecting to really gain a firm foothold in the numismatic community. Two other difficulties stood in the way of collectors putting back examples of the 1909-O half eagle. Its face value was too high for most collectors to afford to stash away coins at the time, even if they were aware of the low mintage of 34,200 pieces. And the mintmark was weakly struck on most specimens, even though a minority showed a bold mintmark. This piece shows a complete, well-formed O to the left of the fascies on the lower reverse. Significant luster remains, as one would expect from the grade. The surfaces are a bit choppy, and the overall strike details are well brought up for this often troublesome issue. Population: 94 in 58, 74 finer (9/15). NGC ID# 25ZK, PCGS# 8515

1909-O Indian Half Eagle, MS62
Remarkable Preservation for This 20th Century Rarity

3348 1909-O MS62 PCGS Secure. CAC. The 1909-O half eagle is distinctive in several ways: it is the final gold issue produced at the New Orleans Mint, it is the sole O-mint Indian Head type coin, and it has the lowest circulation-strike mintage (34,200 pieces) of any date in the Indian half eagle series with a proportionately low survival rate in high grade. About Uncirculated examples are scarce, and Mint State representative through MS62 are extremely challenging. Pieces grading finer than this are genuine rarities, and Gem-quality coins are virtually uncollectible.

In addition to its rarity in Mint State, the 1909-O five dollar is inherently difficult to locate with what most numismatists would consider pleasing eye appeal. Doug Winter (2006) attributes this to the fact that "most have been cleaned and otherwise poorly handled." Mike Fuljenz (2010) seconds this assessment: "The luster on this issue is below average with a frosty, somewhat dull texture most often seen. ... Almost every known example has been cleaned or dipped at one time and no longer display natural coloration." Consequently, any original high-grade example is always in demand.

This is a remarkably well-preserved coin. The surfaces display softly luminous mint frost, a feature that is notably lacking on most 1909-O fives. The strike is also notably strong, especially for the issue, with complete detail on the bottom feather in the headdress and a strong, fully rounded mintmark. The luster is blatantly original, showing coppery-orange overtones atop yellow-gold surfaces — as Fuljenz writes: "On the small number of naturally toned pieces, the hues range from green-gold to orange-gold." Because of the luster and uniformly strong strike seen on this coin, the CAC endorsement is obviously well-deserved. The only limitations on the grade are a few medium-sized abrasions in the reverse fields. Population: 29 in 62, 18 finer (10/15).

Ex: Philadelphia Signature (Heritage, 8/2012), lot 5374.

From The Leon Hendrickson Collection. NGC ID# 25ZK, PCGS# 8515

1909-S Half Eagle, MS62
Elusive in Mint State

- 3349 1909-S MS62 PCGS.** Despite a mintage approaching 300,000 pieces, the 1909-S Indian Head five dollar is an elusive issue in all Mint State grades and is virtually unobtainable in Gem. Pumpkin-gold patination bathes the lustrous surfaces of this accessible MS62 example. The design elements are well-impressed save for the typically seen softness on the eagle's shoulder. A few unobtrusive marks limit the grade. Finer pieces are seldom seen.
From The Leon Hendrickson Collection. NGC ID# 25ZL, PCGS# 8516

1910 Indian Head Five, MS65
Rare, Among the Finest at PCGS

- 3350 1910 MS65 PCGS.** By the standards of the Indian half eagle series, the 1910 five dollar is an available date in MS65. "Available," in context, means "minor condition rarity," and just three pieces, all NGC-certified, rate finer than this Gem in the entire combined certified population (10/15); thus, this is an important piece for the Registry collector. Rich yellow-orange luster is the defining characteristic of this beautiful example, well-defined everywhere but the lowest pendant and carefully preserved. Just a few small marks clustered over the eagle's back preclude an even finer designation. Population: 26 in 65 (3 in 65+), 0 finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2011), lot 4354.
From The Leon Hendrickson Collection. NGC ID# 28DK, PCGS# 8517

1910-D Half Eagle, MS64+
Distinctive Color

3351 1910-D MS64+ PCGS. CAC. As impressive as the preservation is on this high-end near-Gem 1910-D half eagle, its true standout attribute is its color. Wheat and apricot shadings predominate, but touches of silver-green at the right reverse margin and elsewhere at the borders on each side give this coin an added dose of eye appeal. Upon further study, traces of rose-gold appear in the recesses. The strike is decent overall, if a touch soft on the necklace, and only grazes in that area, between UNITED and STATES, and above the word IN on the reverse preclude full Gem status. As it is, this coin comes remarkably close to the next finer grade tier. Population: 54 in 64 (7 in 64+), 12 finer (10/15).

Ex: Central States Signature (Heritage, 4/2012), lot 5285.
From The Leon Hendrickson Collection. NGC ID# 28DL, PCGS# 8518

1910-S Five Dollar, MS64
Exceptionally Clean Surfaces

3352 1910-S MS64 PCGS. CAC. As is reflected by PCGS and NGC population data, nearly all of the available Mint State 1910-S half eagles are concentrated in the MS60 to MS62 grade range. Select and Choice examples become scarce, and higher-grade specimens are extremely rare. Mike Fuljenz opines in his *Indian Gold Coins of the 20th Century* that most pieces are “noticeably marked,” helping to explain why the typical 1910-S is in low grades.

The present near-Gem offering is exceptional in that it reveals no mentionable contact marks on its well-preserved surfaces. Pleasing luster glows through the peach-gold patina imbued with mint-green accents, and all design elements are sharply struck, including crispness on the eagle’s shoulder feathers and the mintmark. Population: 21 in 64, 5 finer (10/15).

Ex: FUN Signature (Heritage, 1/2012), lot 4930.
From The Leon Hendrickson Collection. NGC ID# 28DN, PCGS# 8519

**1911 Half Eagle, MS65
Conditionally Scarce**

- 3353 1911 MS65 PCGS. CAC.** Thanks to a mintage of 915,000 pieces, the 1911 half eagle enjoys a reputation as one of the more accessible dates in the series. This may be true in circulated condition and Mint State grades through MS64, but Gems are borderline condition rarities and finer examples virtually nonexistent. This MS65 piece offers a pleasing mixture of orange and straw-gold colors. Fully struck with softly frosted luster, it is an impressively preserved and elegantly appealing survivor. One of less than two dozen Gems with CAC approval. Population: 61 in 65 (2 in 65+), 1 finer (10/15).
Ex: Chicago Signature (Heritage, 8/2011), lot 7578; FUN Signature (Heritage, 1/2012), lot 4933.
From The Leon Hendrickson Collection. NGC ID# 28DP, PCGS# 8520

**1911-D Five-Dollar, AU58
Low-Mintage Denver Issue**

- 3354 1911-D AU58 PCGS.** As one of the scarcest dates in the series in Mint State, the 1911-D Indian half eagle is heavily sought in the much more collectible upper AU levels. This nearly Uncirculated example fits the description of the coin at the top of many collectors' want lists. The motifs show sharp detail, and the surfaces exhibit trivial friction. Light, scattered abrasions are as expected for the grade, and the yellow-gold patina generates pleasing eye appeal. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, MS62
Second-Rarest Indian Five in Mint State**

- 3355 1911-D MS62 PCGS.** The 1911-D Indian half eagle is a well-known key date in the series, boasting a low mintage of 72,500 pieces. Yet, Uncirculated representatives remain underappreciated. In terms of Mint State examples certified, the 1911-D is the second-rarest issue in the Bela Lyon Pratt series, trailing only the key-date 1909-O. The auction appearance rate of the 1911-D is also the second-lowest in the series, even lower than the 1929. Yet, prices realized are often lower than might be expected.
- This piece grades about in the middle of the Mint State population, but exhibits fewer bothersome abrasions than most MS62s. Bronze-gold surfaces display satiny luster with subtle olive overtones in the fields. The mintmark is bold and the devices are equally sharp. A collector-grade Mint State example of this conditionally scarce Denver issue. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, MS63

Rarely Seen This Fine

One of Three Coins CAC-Approved in This Grade

- 3356 1911-D MS63 PCGS. CAC.** Contrary to the quarter eagle series wherein the 1911-D is the only clear key date, the Indian half eagle collection is riddled with challenging issues, particularly in Mint State. Among these, the 1911-D stands out with a low mintage of 72,500 coins. This Denver delivery is the second-lowest production total in the series behind the 1909-O, and Uncirculated survivors are genuinely scarce in all grades. When found, such a coin typically grades MS61 or MS62 with unappealing abrasions. Select examples, such as the magnificent piece here offered, have a long history of high collector demand and proportionately strong bidder competition at auction.

This delightful representative displays pleasantly well-preserved surfaces, devoid of obtrusive abrasions, with mattelike wheat-gold luster. The mintmark is bold, and the strike is well-executed save for the lowest necklace ornament. This piece is one of only three at this grade level with the CAC sticker. Population: 33 in 63, 20 finer (10/15).

Ex: FUN Signature (Heritage, 1/2012), lot 4934.

From The Leon Hendrickson Collection. NGC ID# 28DR, PCGS# 8521

1912 Five-Dollar Indian, Satiny MS65

None Finer at PCGS

- 3357 1912 MS65 PCGS.** The 1912 Indian half eagle is among the more common issues in the series, making the present Gem an ideal candidate for type purposes. Mike Fuljenz in *Indian Gold Coins of the 20th Century* ranks the 1912 in Gem condition as 19 among 24 issues. Make no mistake, however: While the 1912 is an available issue overall, Gems are rare. PCGS has certified only 53 submissions at this grade level — not necessarily all separate coins — and none finer (10/15). The yellow-orange luster on this piece is strong and swirling. The strike is well-defined overall, despite minor flatness at the central and lower obverse. Several ticks on and to the left of the portrait's face contribute to the grade on this coin, which is housed in a green-label holder.

Ex: The George Marin Collection / Pittsburgh Signature (Heritage, 10/2011), lot 4962.

From The Leon Hendrickson Collection. NGC ID# 28DS, PCGS# 8523

1912-S Half Eagle, MS62

Challenging Issue in High Grade

- 3358 1912-S MS62 PCGS. CAC.** The 1912-S Indian half eagle is very scarce in lower Mint State grades and is one of the most challenging issues of the series in high grade. This attractive MS62 example offers the budget-restricted collector an affordable entry into the Uncirculated spectrum. Each side exhibits well-detailed design elements and lustrous green-gold surfaces with peach highlights. Population: 96 in 62 (3 in 62+), 34 finer (10/15).

From The Leon Hendrickson Collection. NGC ID# 65KD, PCGS# 8524

**1913 Indian Head Five, MS65
Only One Coin Finer at PCGS**

3359 1913 MS65 PCGS. The 1913 half eagle is an obtainable date from a mintage of more than 900,000 pieces, even at the near-Gem level. The population drops precipitously in MS65, however, and finer examples are extremely rare. Dazzling luster issues from the greenish-gold surfaces of this Gem, and a well directed strike imparts sharp definition to the design features, including the Indian's hair and bonnet feathers and the eagle's shoulder and leg plumage. This piece might grade even higher were it not for a tiny milling mark located on each side. Population: 53 in 65, 1 finer (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 4935; Central States Signature (Heritage, 4/2012), lot 5286.
From The Leon Hendrickson Collection. NGC ID# 28DT, PCGS# 8525

**1913-S Five Dollar, Richly Lustrous MS64
Conditional Key to the Series**

3360 1913-S MS64 PCGS Secure. While the 1913-S half eagle is relatively available in the circulated and lower Mint State grades, it becomes very scarce, almost non-existent above the MS63 level. This lovely near-Gem example displays the average strike and shapeless mintmark that characterize the issue, but the luster is above par, and the satiny surfaces exude vivid orange-gold patina. Interestingly, either a skilled mint employee polished the dies that struck this coin or the reverse motifs were not fully hubbed into the die because the recessed areas bordering the eagle's head and leading wing are flat with a smooth, shiny appearance. A wonderful example that readily justifies its near-Gem designation. Population: 16 in 64, 2 finer (10/15).
Ex: Santa Clara Signature (Heritage, 11/2001), lot 6449; Central States Signature (Heritage, 5/2004), lot 9689; FUN Signature (Heritage, 1/2012), lot 4936.
From The Leon Hendrickson Collection. NGC ID# 25ZP, PCGS# 8526

**1914 Indian Half Eagle, MS65
Rarely Encountered So Fine**

- 3361 1914 MS65 PCGS. CAC.** With a mintage of 247,000 pieces, the 1914 half eagle is encountered fairly regularly in the market, but almost always in low grades. Near-Gems can be located with relatively little trouble, but the certified population drops significantly at the MS65 level, where the issue becomes genuinely rare. Higher-grade examples are virtually unobtainable; PCGS and NGC combined have certified a mere two specimens better than MS65.

This Gem offering displays bright yellow-gold color imbued with faint dabs of lilac. The design features reveal some localized softness, not an unexpected attribute for the issue. Close examination exhibits no noticeable abrasions. Population: 31 in 65, 1 finer (10/15).

Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4966.

From The Leon Hendrickson Collection. NGC ID# 28DU, PCGS# 8527

**1914-D Half Eagle, MS64+
Condition Rarity in Finer Grades**

- 3362 1914-D MS64+ PCGS. CAC.** This Plus-designated near-Gem could find a ready home in almost any collection of Indian Head half eagles, even sets that contain otherwise Gem-only coins. This issue is a great condition rarity at the MS65 grade level, and to the naked eye this piece is comparable to a full Gem in terms of eye appeal. Softly glowing luster appears over mattelike apricot-gold surfaces, which show few abrasions on either side. PCGS reports 19 finer representatives (10/15).

Ex: Long Beach Signature (Heritage, 5/2012), lot 5095.

From The Leon Hendrickson Collection. NGC ID# 28DV, PCGS# 8528

**1914-S Five Dollar, MS62
Seldom Seen Finer**

- 3363 1914-S MS62 NGC.** The 1914-S half eagle is a semikey issue in Uncirculated grades, far scarcer than its mintage of 263,000 coins might suggest, and is almost uncollectible in Choice or Gem condition. Most Mint State pieces are clustered in the MS61 to MS62 grade range, and even Select examples are far out of reach for most collectors. This accessible MS62 representative displays a satisfactory strike and vibrant yellow-gold luster. Each side is moderately abraded, as the grade suggests.

1914-S Half Eagle, MS63
Uncommonly Well-Preserved

- 3364 1914-S MS63 PCGS.** Collectors of Uncirculated Indian half eagles often find the 1914-S to be one of the most frustrating issues to obtain in pleasing condition. Mint State pieces are seen with mild regularity, but almost every such offering is of a heavily abraded and unsightly coin, grading no finer than MS62. The pursuit of a Select example is genuinely challenging, and anything finer is far too rare for most collectors to acquire. This MS63 representative is refreshingly attractive and well-preserved. The surfaces display satiny orange-gold luster and reveal only light, scattered abrasions under close study. The lower headdress feather is a trifle weak, but the eye appeal is unaffected. Population: 50 in 63, 8 finer (10/15). From *The Leon Hendrickson Collection*. NGC ID# 28DW, PCGS# 8529

1915 Indian Half Eagle, MS65+
None Certified Finer

- 3365 1915 MS65+ PCGS.** The 1915 Indian half eagle is a reasonably available date in most grades, from a mintage of 588,000 pieces. Examples in MS65 condition are very scarce, and curiously the issue is unknown in any higher numerical grade.
- The present coin is a high-end Gem, one of the two finest certified. It exhibits sharply detailed design elements, including the often troublesome areas of the lower headdress feathers and the eagle's shoulder feathers. The surfaces show only minor signs of contact, with vivid orange-gold color. Mint luster is frosty and vibrant, and eye appeal is outstanding. Population: 51 in 65 (5 in 65+), 0 finer (10/15).
- Ex: *Long Beach Signature* (Heritage, 6/2011), lot 4723; *FUN Signature* (Heritage, 1/2012), lot 4939.
- From *The Leon Hendrickson Collection*. NGC ID# 28DX, PCGS# 8530

1915-S Indian Half Eagle, MS64
Underrated Better Date
Strong Registry Set Contender

3366 1915-S MS64 PCGS. CAC. The relatively low-mintage 1915-S half eagle (164,000 pieces) is elusive in all grades, particularly so in Mint State, where PCGS and NGC combined report approximately 350 submissions — but likely far fewer separate coins. Those two services combined have seen just 23 near-Gems, and a solitary piece finer, in MS65 (10/15).

This representative hails from the Jim O'Neal Collection auctioned in 2007. O'Neal later bought a second MS64 PCGS example that had the CAC green label; that piece brought \$54,625 in our FUN Signature (Heritage, 1/2011), lot 5154. When we were cataloging that coin, we wrote:

"The 1915-S is one of the rarest and most important issues in the Indian Head five dollar series. While the 1914-S issue is more difficult to locate in MS64 or higher grades, the 1915-S is rarer in all grades. Even nice circulated coins can be difficult to find, but it is in Mint State where the '15-S becomes an extreme challenge. Low-grade Uncirculated coins through MS62 are scarce, MS63 pieces are rare, MS64 are very rare, and Gem or better pieces are virtually unobtainable. PCGS and NGC combined have certified only 34 MS63 examples and 18 near-Gems. A solitary MS65 has been graded by NGC. This situation has led David Akers to write in his May 19, 1998 catalog of The Dr. Thaine B. Price Collection that 'the 1915-S Half Eagle is one of the premier rarities among all Twentieth Century United States gold coins.'

"The question arises as to why the 1915-S is such a rarity, as the mintage of 164,000 pieces was not really all that small. Evidently, like most San Francisco issues, they were largely put into circulation at or around the time of issue. Relatively few were apparently saved as mementos or passed along as family heirlooms."

An important analysis in that later O'Neal catalog bears close scrutiny, revealing as it does that *the 1915-S half eagle is perhaps the single most undervalued of all Indian Head gold coins*, in terms of surviving PCGS population versus PCGS price. Both sides of this MS64 PCGS example are awash with potent luster and thick mint frost, displaying a rich blend of apricot-gold and mint-green. The sharp strike has brought up the design features throughout both sides, including the Indian's hair, the feathers in the headdress, the eagle's plumage, and the all-important mintmark. The only mentionable contact mark is a small diagonal tick running inward from star 4. Population: 10 in 64 (1 in 64+), 0 finer (10/15).

Ex: Jim O'Neal Collection of Indian Half Eagles/Long Beach Signature (Heritage, 9/2007), lot 3526, which realized \$34,500, FUN Signature (Heritage, 1/2012), lot 4940.

From The Leon Hendrickson Collection. NGC ID# 25ZR, PCGS# 8531

1916-S Indian Head Five, MS63
Beautiful Coloration

3367 1916-S MS63 PCGS. A remarkably attractive, original example of this final San Francisco half eagle. Light, scattered abrasions are virtually forgotten in the shadow of deep violet, mint, olive, and apricot-gold hues, which are illuminated by frosty mint luster. The 1916-S is the final Indian half eagle issue that experienced any significant circulation, as the 1929 remained largely in storage vaults until the gold confiscation of the mid-1930s. The 1916-S is infrequently seen finer than MS63, and Gems are rare. This exceptionally attractive representative should not be passed by.

1916-S Half Eagle, MS65
Final San Francisco Indian Five

3368 1916-S MS65 PCGS. CAC. The 1916-S is the final Indian Head half eagle produced at the San Francisco Mint. And as the only date of this denomination to be minted in 1916, it is an essential issue for collectors who are trying to complete year sets. No more Indian Head fives were struck until 1929, the last year of issue.

Gem examples of the 1916-S, such as the one being offered in this lot, are rare, and finer specimens are infrequently seen. Excellent luster issues from peach-gold surfaces displaying whispers of apricot and light green, and an exacting strike delivers strong detail to the design features, including the feathers of the headdress and all of the eagle's plumage. The mintmark is bold but lacks definition, as is usually the case. Both sides are devoid of significant marks, further enhancing the coin's eye appeal. Population: 11 in 65 (1 in 65+), 3 finer (10/15).

From The Leon Hendrickson Collection. NGC ID# 28DY, PCGS# 8532

1929 Half Eagle, MS64
Fuljenz: 'Popular and Rare'

3369 1929 MS64 PCGS. In *Indian Gold Coins of the 20th Century*, Mike Fuljenz devotes slightly more time to discussing the 1929 half eagle's rarity than for that of most other issues in the series. He writes:

"The 1929 Half Eagle is an issue that did not see much—if any—circulation and it is almost never seen below the AU58 to MS60 range. It is scarce in the lower Uncirculated grades and very scarce in MS63. MS64 examples are popular and rare, despite the current PCGS/NGC population figures which appear to be highly inflated. MS-65's are very rare."

The 1929 owes its scarcity to the government gold confiscation of the mid-1930s, which destroyed almost the entire 662,000-coin mintage. Although not as rare as some of the double eagle issues of this period, the 1929 has, in the absolute sense, the lowest surviving population of any date in the half eagle series, and it is arguably the most sought-after Indian five in high grade save for perhaps the 1909-O.

This piece displays satin honey-gold luster that emits a soft glow over each side. The central design elements are boldly defined and, as is characteristic of genuine examples of this issue, there is a faintly incuse line in the planchet around the reverse periphery near the rim. A few light, scattered abrasions preclude a full Gem grade but are not out of line for the MS64 level. The last MS64 PCGS example we offered was in lot 4308 of the FUN Signature sale (Heritage, 1/2015), which realized \$51,700. The present coin is visually comparable to that example and is worthy of a proportionately strong bid. PCGS lists nine Gems finer, possibly including a couple of resubmissions or crossovers (10/15).

From *The Leon Hendrickson Collection*. NGC ID# 28E2, PCGS# 8533

PROOF INDIAN HALF EAGLES

1909 Indian Half Eagle, PR66+
Only 78 Examples Struck
One Finer Coin at PCGS

3370 1909 PR66+ PCGS. CAC. After the first year of the matte finish proved so unpopular with collectors, the Mint switched to what we know today as the "Roman Finish" style of proofing for gold coins. This method did not involve treating the planchets, as with the previous matte finish. Rather, proofs were struck on unprepared planchets. The striking pressure imparted a natural brightness to the limited production runs of proof gold. In the case of the 1909 only 78 proofs were struck, and of that number it is estimated that perhaps 30 or so pieces are extant today in all grades.

The surfaces are bright and show a surprising green-gold tint, rather than expected yellow-gold. Just around the margins on each side there is a light, but still noticeable accent of reddish patina. All design elements show razor-sharp definition, as expected of a proof. The surfaces are unmarked as far as we can see, with one exception: A shallow, irregularly shaped planchet flake is seen in the reverse field just above the eagle's tail feathers. This identifier greatly simplifies tracing the pedigree of this important coin. A few finer pieces are known, but not many. Numismatists have slowly begun to realize the absolute rarity of this two-year proofing process and the knowledgeable collector will bid accordingly. Population: 8 in 66 (5 in 66+), 1 finer (10/15).

Ex: John H. Clapp Collection, directly from the Mint, December 1909; Louis E. Eliasberg, Sr.; *The United States Gold Coin Collection* (Bowers and Ruddy, 10/1982), lot 621; Raj Collection (*Stack's*, 8/2011), lot 7697, Summer FUN Signature (*Heritage*, 7/2012), lot 4974.

1911 Indian Half Eagle, PR67
Rare Matte Proof
Only One Finer Coin at PCGS

3371 1911 PR67 PCGS Secure. CAC. Only 139 proof Indian half eagles were struck in 1911, and many of these probably went unsold and were melted after the end of the year. The Mint experimented with many proof finishes in the early years of the 20th century. The artistic, European flavor of proof coins of this era is much appreciated by collectors today, but it did not find favor with contemporary numismatists. In 1911, the Mint abandoned the Roman Proof finish used in the previous two years, and returned to the darker Matte Proof format. The coins exhibit a finely grained surface texture and exquisite sharpness of detail. Unfortunately, collectors continued to reject these innovations, as they preferred the old brilliant finish. The Mint finally abandoned gold proofs altogether after 1915.

Although the various proof finishes of this period were not widely popular the coins did appear on the secondary market at an early date. An early auction appearance of the 1911 proof half eagle was in lot 154 of the B.W. Smith Collection (B. Max Mehl, 5/1915):

“1911 New type with large Indian head; Rev. standing eagle. The entire design incused (stamped in). Sand blast proof.”

The 1911 has grown steadily more popular over the years, and recent auction sales include the similarly graded PR67 PCGS example in lot 3531 of the Boston Signature (Heritage, 8/2010) that realized \$80,500.

The present coin is a magnificent Superb Gem, with the typically well-struck design elements of this issue. The orange-gold matte surfaces are slightly granular and show no surface flaws whatsoever. The connoisseur of matte coinage will find this coin's appearance irresistible. Population: 5 in 67, 1 finer (10/15).

From *The Leon Hendrickson Collection*. NGC ID# 28E5, PCGS# 8542

1914 Half Eagle, PR66
Second-Rarest Indian Proof
Only Three Finer Coins at PCGS

3372 1914 PR66 PCGS. CAC. The Philadelphia Mint adjusted the finish used on proof gold coins several times after 1907, because of collector dissatisfaction with the appearance of the coins. American collectors continued to prefer the brilliant finish used on proofs of earlier years to the dull matte, or sandblast finish used on the newer issues. This was a significant problem, because the new designs for U.S. gold coinage, with basined fields on the eagle and double eagle and sunken devices on the smaller denominations, were not suitable for polished surfaces. The Mint tried to adjust the finish one last time in 1914, using a sandblast finish with coarser surface granules than in 1912 and 1913. An optimistic mintage of 125 proofs was accomplished, but sales apparently fell far short of that total, and many of the coins were melted after the end of the year. Today, the 1914 proof Indian half eagle is the second rarest date of the series.

The elusive nature of the 1914 proof was recognized at an early date, as B. Max Mehl called the issue "scarce" in his catalog of the Dr. G.F.E. Wilharm Collection in 1921, only seven years after the coins were issued. Mike Fuljenz estimates a surviving population of only about 30 coins in all grades today. PCGS and NGC have combined to certify a total of 57 examples, including an unknown number of resubmissions and crossovers (10/15). The record price realized at auction belongs to the PR68 NGC piece in the Tacasyl Collection (Bonhams, 9/2013), which brought \$93,600.

The present coin is a delightful Premium Gem, with razor-sharp definition on all design elements and impeccably preserved orange-gold surfaces. The distinctive matte luster is unbroken by "shiny" areas, or alloy spots, and eye appeal is extraordinary. Population: 4 in 66, 3 finer (10/15).

From The Leon Hendrickson Collection. NGC ID# 28E8, PCGS# 8545

EARLY EAGLES

1797 Ten Dollar, AU Details BD-2, Heraldic Eagle

- 3373** 1797 Large Eagle, BD-2, High R.4 — Mount Removed — NGC Details. AU. Bass-Dannreuther Die State b/b. This briefly circulated early eagle was formerly mounted to jewelry at 3 and 9 o'clock on the reverse. The AME in AMERICA and the ED in UNITED are re-engraved, and the nearby field is granular. The surfaces have been cleaned and are moderately bright. Nonetheless, a well-defined example of the first Heraldic Eagle ten dollar die variety. NGC ID# 25ZY, PCGS# 45717 Base PCGS# 8559

1801 Ten Dollar, AU Sharpness BD-2, Die Lines in Cap

- 3374** 1801 BD-2, R.2 — Cleaning — PCGS Genuine. AU Details. This desirable early eagle shows only a hint of wear on Liberty's shoulder. The lemon-gold surfaces are moderately glossy and display faint hairlines, but no other abrasions can be reported. The high points of the portrait a couple of left-side obverse stars show light adjustment marks, as coined. The usually encountered die state with a series of vertical die lines in Liberty's cap. These are not clash marks from the shield, and their origin is unknown. Perhaps a small ribbed metal object (such as a screw) was inadvertently struck into the die, reminiscent of the Spiked Chin 1804 half cent. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Ten Dollar, BD-2, Semiprooflike AU58 Early Die State Without Lines in Cap

- 3375** 1801 BD-2, R.2, AU58 NGC. Bass-Dannreuther Die State b/b. This near-Mint 1801, BD-2 eagle is in the same peculiar die state as the New Orleans Collection Gem we offered in lot 5395 of the Central States Signature sale (Heritage, 4/2015). Both sides are clashed, but the reverse is not yet lapped, and the often-seen vertical spines in Liberty's cap — characteristic of most BD-2 representatives — have not yet appeared. The die state progression consists of a scarce perfect state, followed by this clashed stage; the reverse is then lapped, and it is about this time that the unusual vertical spines appear in Liberty's cap.

This nearly Uncirculated example is suitable for type representation, showing an even, well-centered strike with bright yellow-gold luster overall and semiprooflike mirroring in the protected regions of the fields. There is slight incompleteness on several obverse stars and the tip of the eagle's left (facing) wing, but the interior motifs are razor-sharp and appealing. Just a trace of friction over the obverse portrait's high points precludes a Mint State designation. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1841 Ten Dollar, AU58 Elusive Early Liberty Head Type Coin

- 3376 1841 AU58 PCGS.** Although scarce in AU and better grades, the 1841 eagle is nonetheless one of the more readily obtainable Philadelphia issues from the 1840s. This near-Mint example shows a bold strike and sharp detail, with remnants of luster in the protected regions of the fields. Bright yellow-gold surfaces are uniformly abraded, as is expected for the issue and grade. Population: 10 in 58, 6 finer (10/15). NGC ID# 262H, PCGS# 8582

1852-O Ten Dollar, AU55 Very Scarce New Orleans Issue

- 3377 1852-O AU55 NGC. Variety 1.** Challenging in any grade, the 1852-O eagle exists only in small numbers despite the mintage of 18,000 pieces. This Choice AU example retains evidence of its one-time prooflike surfaces, but only in protected areas at the margins. Orange-gold accents enhance the medium-gold surfaces, now lightly abraded, with sharp definition still visible on the motifs. A curved scrape is noted above the date near the bust truncation. Census: 26 in 55, 10 finer (10/15). NGC ID# 263D, PCGS# 8609

3378 No Lot.

1860-O Ten Dollar, Unc Details Surprisingly Attractive

- 3379 1860-O — Improperly Cleaned — NGC Details. Unc. Variety 1.** What is notable about the 1860-O eagle is not so much its 11,000-coin mintage — about average for the period — but its scant survival in Mint State. NGC and PCGS combined list nine Uncirculated submissions, the finest being a single MS63 NGC coin. The Smithsonian Institution lacks an example of this date in circulation-strike format. This piece shows faint hairlines under magnification but is nonetheless unworn with semiprooflike fields and pleasing visual merit. The central devices are boldly rendered, and the surfaces yield bright yellow-gold patina. NGC ID# 2645, PCGS# 98631

1862 Eagle, Bright AU55 Rarely Encountered Finer

- 3380 1862 AU55 PCGS.** With a small mintage of 10,960 pieces, the 1862 eagle is scarce in all grades. Higher-end AU representatives typically represent the finest obtainable, as Mint State coins are extremely rare. This Choice AU example is sharply detailed and shows bright yellow-gold surfaces with remnants of luster in the protected regions. Trivial surface chatter comes with the grade but is hardly obtrusive. Population: 28 in 55, 8 finer (10/15). NGC ID# 2649, PCGS# 8635

1865-S Ten Dollar, VF20 865 Over Inverted 186

- 3381 1865-S 865 Over Inverted 186 VF20 NGC.** Although rare in all grades, the 1865-S Inverted 186 eagle is more collectible than its Normal Date counterpart. The '65-S ten had a mintage of 16,700 coins; survivors include perhaps 25 to 35 Normal Date coins and 40 to 60 of the Inverted 186 pieces. This midgrade circulated example displays medium olive-gold patina and relatively smooth surfaces. Wear is even and consistent with the grade. An underrated No Motto rarity. NGC ID# 28ED, PCGS# 8643

**1869-S Ten Dollar, AU53
Scarce, Low-Mintage Issue**

- 3382 1869-S AU53 NGC.** In all grades, only 60 to 75 examples of the 1869-S eagle are thought to survive from a mintage of 6,430 pieces. These are evenly dispersed throughout the XF and AU grades, but Mint State pieces are prohibitively rare. This About Uncirculated example retains partial luster in the fields amid medium yellow-gold patina. The coin is well-struck, and high-point wear is minimal. Census: 5 in 53, 13 finer (10/15). NGC ID# 264S, PCGS# 8656

**1870-S Liberty Eagle, AU53
Scarce San Francisco Issue**

- 3383 1870-S AU53 NGC.** The 1870-S eagle is one of several famous rarities of this date and mint, boasting a mintage of only 8,000 coins and a total survival of fewer than 100 pieces in all grades. The typical example grades VF or XF, and only a single Mint State piece is certified. This About Uncirculated representative is well-detailed with bright yellow-gold luster. Mild surface chatter is consistent with the grade. Census: 5 in 53, 10 finer (10/15). NGC ID# 53FU, PCGS# 8659

**1871 Liberty Ten, AU55
Elusive, Low-Mintage Issue**

- 3384 1871 AU55 NGC.** Only 1,790 Liberty eagles were struck in 1871, making the issue scarce-to-rare in all grades today. Most examples seen are in the XF or lower grade range. This attractive, lightly worn Choice AU specimen offers lightly abraded yellow-gold surfaces that show prooflike reflectivity in sheltered areas. Census: 15 in 55, 10 finer (10/15). NGC ID# 264W, PCGS# 8660

**1874-CC Eagle, XF45
Challenging Any Finer**

- 3385 1874-CC XF45 NGC. Variety 1-A.** One of the few collectible eagles from the 1870's Carson City Mint. Current estimates suggest about 400 coins survive from an original mintage of just 16,767 pieces. Many survivors are impaired or well-circulated, with Choice XF or finer coins challenging to find. This bright, yellow-gold example shows frequent, tiny abrasions but no serious marks. Traces of original mint luster remain near the raised elements. Census: 36 in 45, 60 finer (10/15). NGC ID# 54UF, PCGS# 8670

**1876-S Ten Dollar Gold, AU55
Choice Surfaces, Underrated Issue**

- 3386 1876-S AU55 NGC.** It is a numismatic puzzlement that of the three Mints producing ten dollar gold in 1876, the 1876-S is valued at approximately one-third that of the other two issues, even though each shows a comparable number of grading events in AU50 or finer grades. PCGS suggests only 80 to 100 pieces of the 1876-S are known in all grades. Neither the 1876-CC nor the 1876-S show any Mint State examples, while the number of 1876-CC grading events outnumbers that of the 1876-S nearly two-to-one. An argument can be made that the 1876-S issue is the most undervalued eagle in the entire Liberty Head series. This example shows remnants of prooflike at the margins and around the central elements, with light abrasions across the green-gold surfaces. Nice definition and luster remain. Census: 8 in 55, 1 finer (10/15). NGC ID# 265E, PCGS# 8676

**1877 Ten Dollar, AU58 Prooflike
Only 797 Pieces Struck
Rare in All Grades**

3387 1877 AU58 Prooflike NGC. The 1877 eagle is a standout rarity in the series, boasting a scant mintage of 797 pieces. Only the 1875 and 1876 Philadelphia issues have lower mintages in the entire Liberty Head type. The 1877 is believed to be extant in numbers of only 50 to 65 coins, which reveals the certified population total of 68 pieces to be slightly inflated by resubmissions. Three low-end Mint State coins are recorded at PCGS, while the finest NGC pieces are a pair of AU58 Prooflike examples, of which the present coin is one (10/15). This piece is boldly struck and has bright yellow-gold surfaces. Light chatter in the fields is consistent with the grade but allows significant reflectivity to emerge when tilted in-hand. NGC ID# 265F, PCGS# 78677

**1877-S Liberty Eagle, AU55
Seldom Encountered Any Finer**

3388 1877-S AU55 PCGS. CAC. The 1877-S Liberty eagle claims a low mintage of 17,000 pieces and few were saved for numismatic purposes. This attractive Choice AU specimen shows just a touch of high-point wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Population: 3 in 55, 7 finer (10/15). NGC ID# 265H, PCGS# 8679

**1890-CC Eagle, Frosty MS61
Elusive in Mint State**

3389 1890-CC MS61 PCGS. Variety 1-A. Outstanding, original luster sets each side of this Mint State 1890-CC ten aglow in frosty wheat-gold hues, accentuating the sharply defined motifs. In the absence of individually significant abrasions, light surface chatter on the obverse defines the grade. This issue is seldom seen in Uncirculated condition, and most such pieces exhibit unsightly abrasions. NGC ID# 266S, PCGS# 8718

**1897 Liberty Eagle, MS65
Seldom Encountered Any Finer**

3390 1897 MS65 NGC. The 1897 eagle is readily available in the MS60 to MS63 grade range, but the certified population declines significantly in MS64 and this date becomes a condition rarity at the Gem level. This example is boldly struck, with frosty luster in shades of rose and green-gold. A few small alloy spots are noted, one on the reverse near the olive leaves and two on the obverse near star 13 and on Liberty's cheek. Census: 22 in 65 (1 in 65+), 6 finer (10/15). NGC ID# 26CH, PCGS# 8737

**1901 Liberty Eagle, MS66+
Radiant 20th Century Type Coin**

- 3391 1901 MS66+ PCGS. CAC.** The 1901 eagle is an obvious favorite among 20th century type collectors and is readily available through MS65. Premium Gems, such as this glittering showpiece, are seldom seen, and anything finer is a grand rarity. This Plus-designated example displays razor-sharp detail and frosty, vibrant luster. Yellow-gold luster yields peach, rose, and lilac hues over the interiors. Population: 33 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 7LHF, PCGS# 8747

**1903-S Ten Dollar, MS66
Radiant Luster and Appealing Rarity**

- 3392 1903-S MS66 NGC.** The availability spigot for the 1903-S cuts off its flow at the Gem grade level, and finer examples of this date are notable rarities. This Premium Gem is vibrantly lustrous and razor-sharp with partially prooflike fields and rich orange and straw-gold colors. Close study reveals a few trivial ticks, none out of line for the grade. Few Liberty eagles of any date are seen so well preserved save for perhaps the 1901-S, which boasts a mintage approaching 3 million pieces. Census: 38 in 66, 6 finer (10/15). NGC ID# 267X, PCGS# 8754

**1905 Ten Dollar, MS65
Beautiful Color and Thick Mint Luster**

- 3393 1905 MS65 PCGS.** This sharply defined Gem displays spectacular mint luster. Most of each side is reddish-gold, but the center of the obverse has pronounced lilac patina. The 1905 is curiously rare in Gem and finer grades, despite a mintage exceeding 200,000 pieces. Population: 19 in 65, 10 finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2012), lot 5012. NGC ID# 7LD3, PCGS# 8757

**1906-O Ten Dollar, MS63
Noteworthy Final New Orleans Eagle**

- 3394 1906-O MS63 PCGS. Variety 1.** As the final New Orleans issue of the denomination, the 1906-O is considerably scarcer in Select Uncirculated condition than the preceding O-Mint dates from the 1900s. This lustrous and frosty example displays greenish-gold patina with intermittent orange accents and a razor-sharp strike. Minor abrasions are shallow in nature and widely distributed, while the eye appeal is considerable. Population: 41 in 63, 17 finer (10/15). NGC ID# 53FB, PCGS# 8761

INDIAN EAGLES

**1907 Indian Eagle, MS65
First-Year, No Motto Variant**

- 3395 1907 No Motto MS65 NGC.** A delightful Gem example of the short-lived No Motto design, with well-detailed design elements that show just the slightest softness on Liberty's hair and the eagle's shoulder. The well-preserved orange-gold surfaces radiate vibrant mint luster on both sides and eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

1908-D Motto Ten Dollar, MS65
Rich and Lustrous, Orange-Gold Patina

3396 1908-D Motto MS65 PCGS. Despite a mintage exceeding 800,000 pieces, the 1908-D Motto ten is a rare coin in high Uncirculated grades. The issue is noted for admirable production quality and eye appeal, yet few Gems survive because bagmarks that accompany most Mint State examples. Fewer than 40 Gem or finer coins exist based on current population data.

Thankfully, bagmarks are nonexistent on this lustrous Gem — as are any other post-Mint marks of note. The strike is exceptionally sharp, and the finely granular surfaces radiate vibrant orange-gold color with lilac and magenta highlights. We seldom have the opportunity to offer an MS65 example of the issue — especially of obviously high technical and visual quality, traits that are suggestive of an even higher grade. Population: 13 in 65, 9 finer (10/15). NGC ID# 28GK, PCGS# 8860

1909 Ten Dollar, MS64
Conditionally Scarce Philadelphia Date

3397 1909 MS64 PCGS. The 1909 Indian eagle claims a relatively small mintage of 184,789 coins, and the date is one of the more challenging Philadelphia issues to acquire in high grade. This impressive Choice example displays sharp definition on all design elements, and the well-preserved yellow-gold surfaces are radiantly lustrous. Examples are very scarce in MS64 and rare any finer. PCGS shows 29 higher-graded submissions (10/15). NGC ID# 28GM, PCGS# 8862

1911-D Indian Eagle, MS61
Condition Rarity in Finer Grades

3398 1911-D MS61 NGC. The 1911-D Indian eagle claims a small mintage of just 30,100 pieces, making the issue elusive in all grades. Even in lower Uncirculated grades, the 1911-D is difficult to locate, and it is the leading condition rarity of the series in high grade. This pleasing Mint State example exhibits sharply detailed obverse design elements, but a touch of softness shows on the eagle's shoulder and leg feathers. The bright orange-gold surfaces show a scattering of minor contact marks and vibrant mint luster radiates from both sides. Census: 65 in 61, 78 finer (10/15). NGC ID# 28GU, PCGS# 8869

1911-S Indian Eagle, MS62
Just 51,000 Pieces Struck

- 3399 1911-S MS62 PCGS.** A desirable branch-mint issue that remains reasonably scarce despite a modest number of European repatriates over the past few decades. This sharply struck example displays attractive and lustrous wheat-gold color. A few tiny nicks on the upper right obverse rim require magnification, but overall the finely grained surfaces show few of the normal, scattered abrasions. A frosty and pleasing San Francisco ten for the assigned grade. NGC ID# 28GV, PCGS# 8870

1926 Indian Ten, Frosty MS66
Among the Finest Certified

- 3401 1926 MS66 PCGS.** About on par with the 1932, the 1926 Indian eagle is a favorite for type representation. However, in Premium Gem condition, the similarity ends — at this level, the 1926 is a scarce-to-rare issue while the 1932 is still affordable. The present example is boldly rendered with frosty wheat-gold luster and unabraded surfaces. A vibrant cartwheel effect contributes to the immense eye appeal that gives this piece significant collector importance. Population: 16 in 66 (3 in 66+), 0 finer (10/15). NGC ID# 28H9, PCGS# 8882

1912-S Ten Dollar Indian, MS64
Challenging Issue in High Grade

- 3400 1912-S MS64 PCGS.** From a mintage of 300,000 pieces, the 1912-S Indian eagle is an underrated issue, seldom encountered in high grade, with a sharp strike. In fact, the 1912-S is one of the most poorly struck issues of the entire series. This attractive Choice example displays a better-than-average strike, but Liberty's hair and the eagle's shoulder show a touch of the usual softness. The light orange-gold surfaces display unusually vibrant mint luster and only a few minor signs of contact are evident. Overall visual appeal is outstanding. Population: 75 in 64 (22 in 64+), 13 finer (10/15). NGC ID# 269G, PCGS# 8872

LIBERTY DOUBLE EAGLES

1851-O Double Eagle, XF45
Well-Detailed O-Mint Twenty

- 3402 1851-O XF45 PCGS. Variety 3.** A bright yellow-gold example of this collectible New Orleans double eagle, showing strong detail for the grade, despite die lapping on the obverse that weakens the stars. The reverse shows a few scattered marks consistent with an XF-graded gold piece, the obverse is pleasantly smooth save for a couple of minor ticks on Liberty's neck. NGC ID# 268J, PCGS# 8905

1852-O Twenty Dollar, AU55
Type One New Orleans Issue

- 3403 1852-O AU55 NGC. **Variety 1.** Often identified as the the second most available New Orleans double eagle from the 1850s, this issue is available but scarce at the AU level. Still, more than 200 pieces are believed known of the 1852-O in AU condition, making it moderately available for the collector of Type One twenties. Nice luster remains across lightly abraded medium-gold surfaces, and the fields display a confirmed semiprooflikeness. A strong strike for the issue displays the devices to full advantage, and the only significant mark is at the dentils beneath N of TWENTY, where a border disturbance may be of Mint origin. NGC ID# 268L, PCGS# 8907

1857-S Double Eagle, Lustrous AU53
Ex: S.S. Central America

- 3404 1857-S AU53 PCGS. CAC. **Variety 20E.** Ex: S.S. Central America, SSCA 4609. Broken A in STATES. A boldly struck, lustrous AU example with a seemingly Mint State reverse and just a brush of friction over the obverse high points. The surfaces are smooth and display warm straw-gold color. Accompanied by a leatherette "book" presentation box inscribed on the cover: "America's Greatest Treasure Ship / The S.S. Central America / Ship of Gold / 1857." Includes a certificate of authenticity and a booklet giving a brief history of the famous sidewheel steamer. The presentation box and exterior shell are in excellent condition. NGC ID# 2696, PCGS# 8922

From a nineteenth-century engraving titled "Victims of the Central America."

1858-O Double Eagle, AU58
Original Color, Clean Surfaces

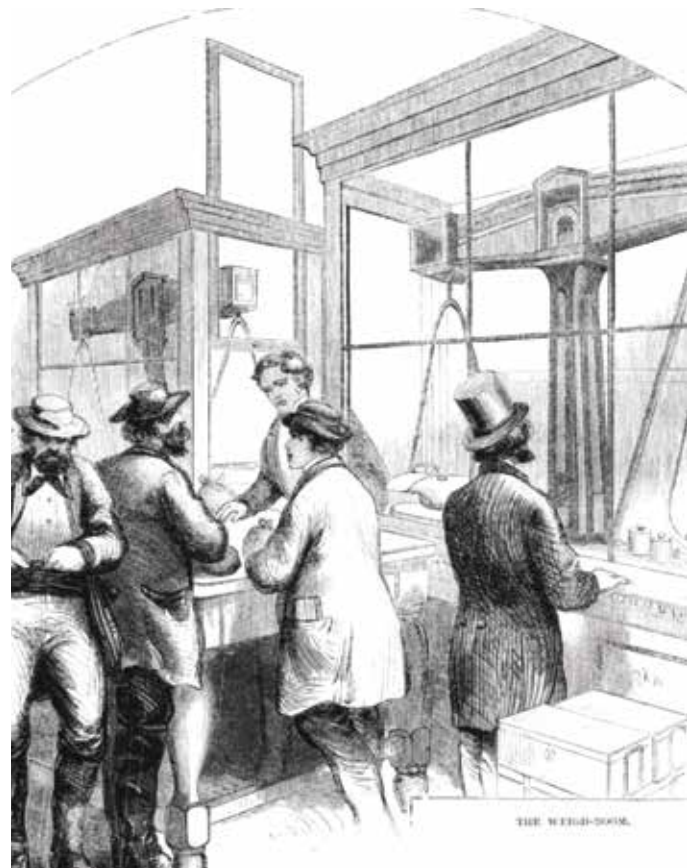

- 3405 1858-O AU58 NGC. Variety 3.** A die lump appears within the E of AMERICA. Among New Orleans double eagles from the 1850s, the 1858-O is comparable to the 1857-O in terms of scarcity. The Southern facility manufactured 35,250 twenty dollar gold coins in 1858, of which Doug Winter estimates 225 to 275 pieces survive. The vast majority of those show signs of extensive circulation. AU examples are very scarce, and comparable near-Mint coins are rare. Mint State representatives are extremely rare with only five or six known.

Original 1858-O double eagles exhibit medium green to orange-gold coloration, as seen on this surprisingly lustrous example. The date is known for its poor strike, but this No Motto twenty is well-struck on the hair curls and feathers. The date and mintmark are bold. Stars 4 through 13 exhibit full radials and centers. Light wispy marks adorn each side, though none of them are overly deep or detracting. Liberty's cheek is notably free of abrasions. Likely among the finest coins from this elusive date in existence. Census: 22 in 58 (1 in 58 ★), 4 finer (10/15). NGC ID# 2698, PCGS# 8924

1860 Twenty Dollar, MS61
Elusive Mint State Example

- 3406 1860 MS61 PCGS. CAC.** In stark contrast to the 1861, which is an available type coin, the 1860 double eagle is scarce in Mint State. This piece displays well-defined motifs and frosty, yellow-gold luster. Scattered abrasions preclude a finer grade, but none are individually bothersome. Population: 26 in 61, 21 finer (10/15). NGC ID# 269D, PCGS# 8929

1862-S Double Eagle, MS61
Repunched Date, Condition Rarity

3407 1862-S MS61 NGC. Breen-7214, Repunched Date. The 86 in the date shows clear repunching within the loops. Doug Winter believes less than 10% of surviving 1862-S double eagles feature repunching, while the *Gold Encyclopedia* adds that about half of the 127 coins found on the *S.S. Republic* were of this variety. The hoarding of gold and silver in the East at the outset of the Civil War resulted in the suspension of specie payments at the close of 1861. Consequently, the Philadelphia Mint reduced double eagle production by 97% between 1861 and 1862. However, Western commerce remained relatively unchanged, and gold continued to circulate heavily. San Francisco Mint officials increased twenty dollar output to 854,171 coins in 1862. Examples survive mainly in VF and XF condition. All Mint State coins are rare.

This Type One issue generally comes softly struck. The obverse of this MS61 coin features full radial lines on stars 6 through 13 and good detail on the hair curls. Pleasing green and rose-gold surfaces exhibit frosty luster over each side with an expected number of scattered bagmarks. Census: 18 in 61, 9 finer (9/15). NGC ID# 269N, PCGS# 8938

1867 Double Eagle, MS62
Semiprooflike Type Two Example

3408 1867 MS62 NGC. A majority of the 251,015 double eagles struck at the Philadelphia Mint in 1867 were exported overseas, where they either circulated or were melted and recoinced. Consequently, Uncirculated representatives of this Type Two issue are all scarce, particularly at the MS62 grade level. The number of Mint State survivors probably reflects the repatriation of an international hoard of roughly 200 pieces during the 1960s, according to Garrett and Guth's *Gold Encyclopedia*.

Moderately semiprooflike, the rich-gold surfaces display bold definition on the stars, and the hair strands are well-defined. Frosty luster rolls over each side, with bagmarks scattered most prominently in the left obverse field. A coin that will prove exceedingly difficult to upgrade. Census: 39 in 62, 3 finer (9/15). NGC ID# 269Z, PCGS# 8951

**1867-S Twenty Dollar, AU58
Rare in Finer Condition**

- 3409 1867-S AU58 PCGS.** While several earlier double eagle issues from the San Francisco Mint survived in quantity among sunken treasures, the 1867-S came too late to share in that benefit. This issue is rare in Mint State, and high-end About Uncirculated examples are in proportionately high demand. This piece shows lustrous honey-gold surfaces with trivial wear over the design elements and light, scattered abrasions. Population: 61 in 58, 18 finer (10/15). NGC ID# 26A2, PCGS# 8952

**1868-S Twenty Dollar, AU58
Substantial Luster Remains**

- 3410 1868-S AU58 NGC.** The rarity of the 1868-S double eagle in Mint State makes this lustrous near-Mint example especially appealing to budget-conscious collectors. Unlapped dies produce bold motifs on each side, and yellow-gold luster is abundant in the fields. Trivial friction over the high points of the devices precludes a Mint State designation. NGC lists 39 Uncirculated coins finer, likely including some resubmissions (10/15). NGC ID# 26A4, PCGS# 8954

**1868-S Double Eagle, MS61
Extremely Rare Any Finer**

- 3411 1868-S MS61 PCGS.** With a mintage of 837,500 coins, the 1868-S is readily available in circulated grades but in Mint State it is unexpectedly rare. PCGS and NGC show a mere 68 Uncirculated grading events combined, doubtless including several resubmissions and crossovers. CoinFacts estimates that only 20 distinct examples survive in Mint State.

Light yellow-gold surfaces of this example display vibrant mint luster, illuminating well-struck relief elements on each side. Stars 4 through 7 show incomplete centers. A faint alloy spot occurs between star 6 and the coronet. Field grazes are relatively minor for the grade, and a couple of small marks on the cheek likely preclude an even higher technical assessment. An eye-appealing condition rarity. Population: 14 in 61, 2 finer (9/15). NGC ID# 26A4, PCGS# 8954

1870-S Twenty Dollar, MS61
Seldom Seen in High Grades

3412 1870-S MS61 PCGS. Like its S-mint contemporaries, the 1870-S double eagle was both a workhorse of Western commercial trade and the subject of widespread exportation, accounting for its high attrition rate. CoinFacts estimates that about 0.5% of the nearly 1 million twenty dollar gold coins struck in California in 1870 survive in all grades. Merely 125 Mint State coins are believed extant, mostly in MS60 and MS61 condition. The quasi-legendary Saddle Ridge Hoard contained 16 1870-S double eagles. Three coins graded MS62, and they are among the finest known.

This brightly lustrous Uncirculated example has light straw-gold coloration with occasional accents of rose. The stars are sharply defined with full centers, while incompleteness over Liberty's hair curls is a common trait among coins from this issue. The bagmarks are generally small and shallow in nature rather than deep and overly obtrusive, though the cheek shows a few pedigree-identifying abrasions. Population: 41 in 61, 12 finer (10/15). NGC ID# 26A9, PCGS# 8959

1870-S Double Eagle, MS61
Shimmering Mint Luster
Scarce in Mint State

3413 1870-S MS61 PCGS. San Francisco issues of 1870 are famous for the extreme rarity of the silver dollar, the half dime, and the three dollar gold piece — the latter two being unique. Other S-mint issues from this year range from scarce to plentiful. With a mintage approaching 1 million coins, the double eagle is one of the more often seen 1870-S issues, but the vigilant collector will realize that the vast majority of pieces on the market are circulated. Mint State examples are seldom seen and almost always exhibit unsightly abrasions. This piece is well-struck with shimmering rose-gold luster that delivers exceptional eye appeal. Scattered abrasions are present but none pose singular distraction. Population: 40 in 61, 9 finer (9/15). NGC ID# 26A9, PCGS# 8959

1870-S Double Eagle, MS62
Rare, Almost Unknown Finer

3414 1870-S MS62 PCGS. Uncirculated 1870-S double eagles are scarce, drawing significant interest at auction. Still, almost all such pieces grade only MS61. In more than two decades of records, our Permanent Auction Archives list 46 appearances of a Mint State 1870-S, and only six of those offerings were for coins grading finer than MS61. Moreover, the present piece only the fifth individual MS62 we have handled and it is the first such coin in a PCGS holder. The last MS62 representative we offered was in lot 4578 of the Central States Signature sale (Heritage, 4/2013), where an NGC coin garnered \$28,200.

This PCGS representative may surpass that level, showing bright yellow-gold luster and well-defined relief elements. Scattered abrasions limit the grade but are not as severe as seen on most Mint State coins. Eye appeal is pleasing for the grade. The rarity of this issue in MS62 seems to be somewhat greater than even the small certified population suggests. Population: 9 in 62 (1 in 62+), 1 finer (10/15). NGC ID# 26A9, PCGS# 8959

1871-S Double Eagle, MS64
Tied with One Other for Finest Known

3415 1871-S MS64 NGC. FS-301. Micro S. San Francisco Mint records report the receipt of 10 obverse dies and eight reverse dies in December 1870, preparatory to the 1871 double eagle coinage. Several varieties should exist, although we are unaware of any detailed study that would likely key on the date position in relation to the border, bust, and designer's initials on the obverse, and the mintmark size and location on the reverse. On this piece, the J in J.B.L. is slightly right of center over the 8. A slightly curved die line extends into the hair from the bottom right serif of the T in LIBERTY. The micro S mintmark is close to the eagle's tailfeathers, and is centered above the right upright of the N in TWENTY. The reverse has a prominent, nearly straight die line through 10 dentils over TAT in STATES. The *Cherrypickers' Guide* lists this as a misplaced date with the top of a digit in the denticles below the date. This magical misplaced date certainly deserves further study.

The San Francisco Mint was the premier agency producing double eagles throughout the Type Two design from 1866 to 1876. In 1871, the California facility struck 928,000 double eagles, and more than 2,000 of those coins have been graded by NGC and PCGS. Of that population, less than one-tenth have earned a Mint State designation, and almost all such coins are heavily abraded; pieces grading finer than MS62 are extremely rare, and just two representatives (one NGC and one PCGS) are designated MS64 (10/15). The late David Akers once wrote that he had never seen a true Gem (MS65 or better), and his observation holds true today.

This Choice Mint State piece has light hairlines with a small scrape near star 11 on the obverse and trivial field marks on the reverse. The surfaces are brilliant and highly lustrous with lovely lemon toning near the borders. The nearly full strike is clearly above-average for this issue. NGC ID# 26AC, PCGS# 8962

**1872-CC Double Eagle, AU Details
Low-Mintage Carson City Issue**

- 3416 1872-CC — Improperly Cleaned — NGC Details. AU. Variety 1-B.** Ex: Granite Lady Hoard. The very scarce Wide CC variety, although any 1872-CC is desirable. A scant 26,900 pieces were struck, and none were set aside by numismatists until decades later. The issue is less rare than its '70-CC and '71-CC predecessors, but it poses a greater challenge than the comparatively plentiful 1874-CC through 1877-CC issues. This caramel-gold representative is inoffensively abraded and displays many pockets of bright luster. The obverse is slightly glossy from a long-ago wipe. NGC ID# 26AE, PCGS# 8964

**1872-S Double Eagle, MS61
Elusive in Mint Condition**

- 3417 1872-S MS61 PCGS. Micro S.** Of the three 1872 double eagle issues, S-mint coins slightly edge out the Philadelphia products in terms of mint condition availability. That is somewhat misleading, however, as 1872-S double eagles are still very scarce in MS60 and MS61, and they are downright rare in higher grades. Khaki and orange-gold hues color this Uncirculated Type Two twenty dollar gold piece. Bagmarks are peppered over each side, but the only abrasion worth mentioning occurs below the bust tip left of the 1. Well-struck and highly lustrous. Population: 41 in 61, 11 finer (10/15). NGC ID# 26AF, PCGS# 8965

**1872-S Liberty Twenty, MS63
Sole Finest at PCGS**

- 3418 1872-S MS63 PCGS. Short S.** The 1872-S double eagle is a fairly plentiful issue in the VF to AU grade range, benefiting from a generous mintage of 780,000 coins, but its availability dramatically drops across the Mint State threshold. Most of the Uncirculated coins known are heavily abraded, grading only in the MS60 to MS61 range, with many tracing their origin to overseas hoards where they waited out the gold confiscation of the mid-1930s. At the MS62 grade level, the 1872-S becomes a notable condition rarity, and finer pieces are extremely rare. This Select example is the sole finest certified at PCGS (10/15). By contrast, the Smithsonian coin grades just XF45, per Jeff Garrett and Ron Guth.

This piece showcases distinct eye appeal with frosty straw-gold luster and sharply defined relief elements. Inspection with a lens reveals minor, scattered ticks, but none are out of line for the grade, and the overall preservation is far and away superior to almost all other examples of this issue. NGC ID# 26AF, PCGS# 8965

**1873-CC Double Eagle, XF40
Rare Variety 2-B**

- 3419 1873-CC XF40 NGC. Variety 2-B.** Ex: Granite Lady Hoard. This previously unrecorded die marriage pairs the misplaced-digit obverse of 1873 with the rare narrow mintmark reverse of 1874. This lightly circulated '73-CC double eagle displays medium yellow-gold patina with hints of luster in the protected areas. The surfaces are relatively smooth save for a few stray abrasions on Liberty's cheek and a pair of unobtrusive ticks — one on the obverse near star 5 and the other on the eagle's left (facing) wing. NGC ID# 26AJ, PCGS# 8968

**1874-S Liberty Twenty, MS62
Small Squat S Variant**

- 3420 1874-S MS62 PCGS. Small Squat S.** At least three different mintmark styles were used on 1874-S twenties. The Block S and Broad S are approximately equal in scarcity, but the present mintmark size is rare for the issue, and likely from a single holdover reverse die. This apricot-gold double eagle has good luster and the expected number of obverse abrasions. None are noticeable aside from a narrow scratch between the first two stars. Population: 62 in 62, 4 finer (10/15). NGC ID# 26AR, PCGS# 8972

**1875-S Double Eagle, Frosty Near-Gem
Condition Rarity, Few Are Finer**

- 3421 1875-S MS64 PCGS.** Readily available in lower Mint State grades, the 1875-S was struck in large quantities and used extensively for export. Many overseas coins have since returned, but typically they grade between AU50 and MS62. Select Uncirculated examples are very scarce, and coins any finer are truly rare.

This frosty, near-Gem twenty is smooth and attractive with sharply struck motifs and no marks of concern. The reverse is essentially without abrasions, while the deeply frosted obverse shows but a handful of minor luster grazes and a few tiny scrapes, some that may be of Mint origin — one small, possible strike-through near the ear, and a few sequential smaller ones hidden in the hair needing magnification to view. The rich, medium-gold color shows greenish highlights amid bright, cartwheel luster. PCGS and NGC have each graded only a single coin in finer numeric grade. PCGS Population: 8 in 64 (3 in 64+), 1 finer (10/15). PCGS Population: 8 in 64 (3 in 64+), 1 finer (10/15). NGC ID# 26AU, PCGS# 8975

1876 Double Eagle, MS63
Lustrous, Conditionally Scarce Example

- 3424 1876 MS63 PCGS.** Light Motto (two longer rays at far left of the glory). The fields are satiny and nearly unabraded on the obverse, while the reverse displays semiprooflike flash across the sharp and reflective surfaces. An underrated Philadelphia date — we show remarkably few MS63 examples in our auction archives and only four MS64 pieces, with none finer. The current coin approaches Choice quality, with tempting honey-gold patina and lustrous, smooth appeal throughout. Housed in an old green label holder. Population: 42 in 63 (2 in 63+), 12 finer (10/15). NGC ID# 26AV, PCGS# 8976

1877-S Liberty Twenty, MS62+
Lustrous Type Three Example

- 3425 1877-S MS62+ PCGS.** A dramatic drop in grading service populations occurs at the Select Uncirculated level for the 1877-S twenty. The addition of the PCGS Plus designation moves the present coin significantly closer to the rare MS63 grade. Light abrasions are scattered across the portrait, yet the surfaces are otherwise smooth and attractive on this frosty, sun-gold example. A sharp strike adds to the appeal. Population: 7 in 62+, 32 finer (9/15). NGC ID# 254B, PCGS# 8984

1878-CC Twenty Dollar, VF30
Rare Variety 3-A

- 3426 1878-CC VF30 PCGS. Variety 3-A.** This 1878-CC double eagle pairs the usual Wide CC reverse with a previously undocumented obverse, showing a date placement that differs minutely from both of the other obverse dies of this year. Honey-gold surfaces reveal hints of prooflike mirroring in the fields, and the devices exhibit light, even wear. A problem-free example of this Type Three Carson City double eagle. NGC ID# 254B, PCGS# 8986

1878-CC Twenty Dollar, XF45
Partially Lustrous Fields

- 3427 1878-CC XF45 NGC. Variety 1-A.** Ex: Granite Lady Hoard. With a low mintage of 13,180 pieces, the 1878-CC double eagle is elusive in AU or better grades, making this Choice XF example appealing to the budget-conscious collector. Hints of luster remain in the protected regions of the fields, and the surfaces are moderately smooth. This die pair is distinctive for a long die scratch on Liberty's neck and a checklike die gouge below the mintmark on the reverse. NGC ID# 254B, PCGS# 8986

1882-CC Double Eagle, Orange-Gold AU58

- 3428 1882-CC AU58 NGC. Variety 1-B.** The second C in the CC mintmark is slightly higher than the first, and a die crack encircles all of the letter tops on the reverse periphery. Rich luster emanates from this orange-gold near-Mint example, showing scattered ticks and marks among good eye appeal. A couple of copper-colored alloy spots appear on the reverse. The 1882-CC twenties saw a production of only 39,140 pieces. NGC ID# 26BF, PCGS# 8997

1883-S Double Eagle, MS63
Exceptional Quality

- 3429 1883-S MS63 NGC. CAC.** Small Squat S. A mix of green and rose-gold hues color surfaces that showcase a rich overlay of frosty luster, giving this Select double eagle the wonderful eye appeal for which CAC has awarded a green sticker. The motifs are fully brought up. Scattered bagmarks are largely unobtrusive, and a minor streak of struck-in grease occurs in the right reverse field under the eagle's wing. This highly appealing and blatantly original Type Three twenty would be exceedingly difficult to upgrade given that NGC reports merely five submissions finer. CAC has only stickered five MS63 coins and one MS64 (10/15). NGC ID# 26BJ, PCGS# 9000

1884-CC Liberty Double Eagle, AU58
Vibrant Color, Widespread Luster

- 3430** 1884-CC AU58 PCGS. CAC. Variety 1-A. Rich, medium gold color and nearly full mint luster provide the eye appeal for this CAC-endorsed Carson City twenty. The near-Mint grade is defined by small abrasions and marks in the lower-left field and tiny ticks on the portrait, but only slight wear is evident on the sharply struck devices. A popular choice for Carson City type. NGC ID# 26J4, PCGS# 9001

1884-CC Twenty Dollar, AU58
Popular Carson City Issue

- 3431** 1884-CC AU58 NGC. CAC. Variety 1-A. An original Borderline Uncirculated example with nearly complete mint luster and appealing, orange-gold color. The obverse field has its share of moderate marks, but the portrait and the reverse are unexpectedly smooth. The '90-CC is the most available Carson City twenty in the AU58 grade, yet the scarcer '84-CC trades for close to the same price. CAC endorsed.
Ex: Long Beach Signature (Heritage, 9/2007), lot 3865, which realized \$2,530. NGC ID# 26J4, PCGS# 9001

1884-CC Liberty Twenty, MS60
Popular Type Three Issue

- 3432** 1884-CC MS60 PCGS. Variety 1-A. From a relatively generous mintage of 81,139 pieces, the 1884-CC Liberty double eagle is an available issue in circulated grades. Although there was little interest in branch mint issues at the time, a number of nicer examples have survived and lower Mint State specimens can be located with a little patience. The 1884-CC a popular choice with mintmark type collectors seeking a Type Three double eagle for their collections. This impressive Mint State example offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26J4, PCGS# 9001
-

1889-CC Twenty Dollar, AU53
Semiprooflike Fields, Clean Surfaces

3433 1889-CC AU53 NGC. Variety 1-A. After a four-year slumber, the Carson City Mint resumed coinage in 1889 primarily to strike silver dollars. But 30,945 double eagles were issued that year from the facility, approximately 4% of the production of its San Francisco counterpart. Half eagles and eagles were not coined until 1890. The present 1889-CC twenty displays substantial luster, especially on the reverse. The straw-gold surfaces exhibit scattered small marks, none of which merit further discussion. NGC ID# 26BV, PCGS# 9011

1889-S Twenty Dollar, MS65
Exceptional S-Mint Type Coin

3434 1889-S MS65 NGC. The 1889-S was unknown in Gem condition until recently, after the discovery of the Saddle Ridge Hoard in February 2013. Of the 353 1889-S twenties found in that fascinating grouping, 12 Gems have been certified by both of the major services combined (nine and three, NGC and PCGS). There is no pedigree identifier on the NGC insert, but it is our assumption this is a Saddle Ridge coin due both to its lofty grade and bright, glistening appearance — both characteristic of the Saddle Ridge provenance. This is a magnificent twenty that actually looks even finer than the stated grade, exhibiting smooth, virtually unblemished surfaces. Mint luster rolls across each side and is noticeably frosted. The strike is sharp in all areas. This would make a nearly unimprovable example of the Type Three design. NGC ID# 26BW, PCGS# 9012

**1890-S Twenty Dollar, MS65+
Former Finest-Known Example**

**1893-CC Double Eagle, MS62
Attractive, Final-Year Carson City Issue**

3435 1890-S MS65+ PCGS. Nearly 100 1890-S double eagles were unearthed as part of the amazing Saddle Ridge Hoard, including two MS66 coins (one with the Plus designation, one without) that were certified by PCGS. Those exceptional examples surpassed the present Gem coin that had previously laid claim to the top spot in the population (by virtue of its Plus-graded status).

While the Saddle Ridge Hoard coins are without doubt impressive, this remarkable coin retains the qualities that for many years set the bar high for technical merit and original appeal. Rich honey-gold patina embraces both sides of the coin, which are for all purposes unmarked and radiantly lustrous. The strike is complete, bolstered by fields that gleam with semiprooflikeness. It remains as the finest non-Saddle Ridge example. Population (non-Saddle Ridge): 3 in 65 (1 in 65+), 0 finer (10/15). NGC ID# 26BZ, PCGS# 9015

3436 1893-CC MS62 PCGS. Variety 2-A. A scant 18,402 pieces were struck for the 1893-CC twenty, with the mintage likely limited by the year's transition of the Carson City Mint to assay office status. The 1893-CC is obtainable in Mint State, but most survivors are notably bagmarked, and virtually no high-grade Mint State coins exist.

The present example displays sharp eye appeal and relatively few marks. Liberty's cheek is particularly smooth. The yellow-gold surfaces flash strong cartwheel luster and the strike is sharp, especially so on the stars and eagle. PCGS has certified only 21 pieces in a higher numeric grade — interestingly, all are at the MS63 level with none finer (10/15). The lack of abrasions on the current coin is suggestive of an even higher grade.

Ex: *Long Beach Signature (Heritage, 2/2012)*, lot 5049. NGC ID# 26C9, PCGS# 9023

**1899 Liberty Twenty, MS65
Scarce This Well-Preserved**

- 3437 1899 MS65 PCGS.** Most collectors settle for an MS63 or MS64 example of the 1899 double eagle, but for the ambitious enthusiast, this Gem is a conditionally scarce and beautifully preserved specimen. PCGS lists only two dozen examples in this and finer grades. This sharp representative is frosty and lustrous with green-gold hues that warm in the central regions. A few trivial grazes on the cheek are not out of line for the grade. Population: 23 in 65, 1 finer (10/15). NGC ID# 26CM, PCGS# 9035

**1904 Liberty Twenty, MS65 ★ Prooflike
Impressive Reflectivity**

- 3438 1904 MS65 ★ Prooflike NGC.** When we last sold this coin in June 2010, it was the single highest-graded 1904 double eagle combining both the NGC Prooflike and Star designations. More than five years later, the coin retains its status. The 1904 is plentiful in lower Uncirculated grades, but only rarely is a well-preserved Gem coin accorded prooflike recognition. The flashy, sun-gold fields of this coin are amazingly smooth and reflective, while the strike is sharp throughout — including the tucks and curls of the hairbun. The eye appeal appears unimprovable. Census: 10 in 65 (1 in 65 ★) Prooflike, 2 finer (10/15).
Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 1755; ANA Signature (Heritage, 3/2010), lot 2707; Long Beach Signature (Heritage, 6/2010), lot 1907. NGC ID# 26CY, PCGS# 79045

**1905 Double Eagle, MS62
Pleasing Example, Low-Mintage Issue**

- 3439 1905 MS62 NGC.** Only 58,919 business strike double eagles were struck at the Philadelphia Mint in 1905. Presumably, Treasury vaults were still clogged with examples of the nearly 11.4 million pieces coined the prior year, including those made at San Francisco. The present 1905 is less abraded than most others at the MS62 level, although the luster is slightly muted across the open obverse field. NGC has certified only 21 pieces finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2004), lot 7964; Summer FUN Signature (Heritage, 7/2009), lot 2227. NGC ID# 26D2, PCGS# 9047

**1906-S Double Eagle, MS65+
Only One Finer Coin at PCGS**

- 3440 1906-S MS65+ PCGS. CAC.** Despite the reported mintage of more than 2 million pieces, the 1906-S Liberty double eagle is a prime condition rarity at the MS65 grade level, and finer examples are virtually unobtainable. High-grade examples are seldom offered and Heritage has never handled a finer example of this issue.
The coin offered here is a spectacular high-end Gem, with well-detailed design elements and vibrant frosty mint luster on both sides. The well-preserved orange-gold surfaces show attractive highlights of rose and eye appeal is terrific. This coin should find a home in a fine collection or Registry Set. Population: 3 in 65 (1 in 65+), 1 finer (10/15). NGC ID# 26F6, PCGS# 9051

HIGH RELIEF DOUBLE EAGLES

MCMVII High Relief Twenty Wire Rim

- 3441 1907 High Relief, Wire Rim PCGS Genuine.** A range of budget-conscious collectors will find this lightly impaired Wire Rim example to be a still-pleasing entry into the High Relief double eagle issue, by far one of the most sought-after gold issues in all of American numismatics. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned, with tooling and repairs of minor surface damage. No particularly unsightly imperfections remain, and the piece displays generally smooth, straw-gold patina.

MCMVII High Relief Twenty Dollar Wire Rim, Unc Details

- 3442 1907 High Relief, Wire Rim — Improperly Cleaned — NGC Details. Unc.** This sharply rendered High Relief twenty provides an opportunity to affordably acquire an example of what is arguably the most beautiful design in all of numismatics. Bright yellow-gold surfaces show minimal abrasions, and they are largely confined to the left obverse field. A wire rim is evident around most of the obverse and the lower reverse border.

1907 Saint-Gaudens Double Eagle, MS62 High Relief, Wire Rim Variant

- 3443 1907 High Relief, Wire Rim MS62 NGC. CAC.** The High Relief Saint-Gaudens double eagle is known in two distinct varieties, the Flat Rim and Wire Rim types. The Wire Rim type has a thin fin of gold around the edge of the coin, caused by metal that was extruded through the tiny gap between the collar and the die during the striking process. Because this feature made it difficult to stack the coins, the Mint regarded the fin as a defect and made strenuous efforts to eradicate it. By adjusting the milling and dimensions of the planchets slightly, the offending rim was effectively eliminated on coins struck later in the production run. Today, collectors find the Wire Rim to be an interesting and attractive feature, rather than a defect.

The present coin represents the Wire Rim variety, with sharply detailed central design elements and lustrous orange-gold surfaces that show a few scattered, minor contact marks. Attractive highlights of rose visit selected areas.. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS63
Bright, Sparkling Surfaces

- 3444** 1907 High Relief, Wire Rim MS63 PCGS. Augustus Saint-Gaudens had his reservations about President Roosevelt's gold coinage project, a.k.a. his "pet project." He once told Roosevelt he had been "scared blue" by the thought of it. His stomach cancer and contentious working relationship with Chief Engraver Charles Barber were major obstacles to overcome. However, the famed sculptor first contemplated improving circulation American coinage 20 years prior, and saying "no" to the president hardly seemed like an option. Saint-Gaudens' instincts regarding the daunting nature of the task proved to be correct. The process would end up taking nearly three years, and while Saint-Gaudens did not live to see the final product, his work remains arguably the most impressive design in American numismatics. Even in circulated grades the High Relief twenty is an impressive coin, but in the better grades of Uncirculated it is always magnificent. This bright yellow-gold example has the usual satiny mint luster, and its grade is only limited by a few small marks on the reverse. NGC ID# 26F2, PCGS# 9135

PROOF HIGH RELIEF DOUBLE EAGLE

1907 Saint-Gaudens Double Eagle, PR63
Elusive Proof Issue, High Relief, Wire Rim

- 3445** 1907 High Relief PR63 NGC. The subject of proof High Relief double eagles is a controversial one, as no official record of any proof striking has ever come to light. However, many numismatists believe a small number of proof specimens were produced and have been offered publicly over the years, and NGC certifies coins from one specific die-collar combination as proof strikings. These coins are all high-quality, sharply detailed examples that were struck from the earliest state of the obverse and reverse dies. The most easily recognized feature of these proofs is the edge lettering, as they were struck from the same collar used to strike the rare Ultra High Relief patterns. Both the obverse and reverse dies were used in later states to produce business-strike High Reliefs, but the distinctive collar was only used on proofs.

The present coin is a sharply detailed Select specimen with a pronounced Wire Rim and the distinctive edge lettering from the Ultra High Relief collar. The pleasing orange-gold surfaces show a few minor, scattered contact marks and a lustrous sheen that resembles the satin proof Indian coinage of 1909-1910. The overall presentation is most attractive for this rare and important issue. NGC ID# 28AX, PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS67
Remarkable Type Coin

- 3446 1908 No Motto MS67 PCGS.** Short Rays Obverse. The notion that a coin of this size composed of a metal as soft as gold could survive 107 years unscathed is impressive. However, it is clearly possible, as evidenced by the outstanding quality of the 1908 No Motto twenties that composed the Wells Fargo Hoard. This Superb Gem likely derives from that holding, although there is no mention of it on the holder. Frosty luster swirls over orange and rose-gold surfaces that are nearly pristine. The torch hand, visage, and capitol building display a bold impression. NGC ID# 26F6, PCGS# 9142

1908 No Motto Twenty, Wells Fargo Gold
Radiant Superb Gem

- 3447 1908 No Motto, Wells Fargo Nevada, MS67 PCGS.** Ex: Wells Fargo Nevada Gold. Wonderful rose accents visit the frosty, wheat-gold surfaces of this Superb Gem double eagle from the fantastic Wells Fargo Hoard. Sharply struck and nearly unabraded, the lustrous fields are pristine a only a few tiny ticks are visible on the highest points under magnification. Every window of the Capitol building is crisply defined. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908 With Motto Twenty, MS65+
Conditionally Scarce Philadelphia Issue

- 3448 1908 Motto MS65+ PCGS.** While its No Motto counterpart is widely plentiful, the 1908 With Motto Saint-Gaudens double eagle is only marginally available in low Mint State grades and is genuinely scarce at the Gem level; finer pieces are rarely seen. A minimal coinage of little more than 150,000 pieces was accomplished, setting the stage for continued small mintages from the Philadelphia Mint throughout the early part of the series. Beginning in 1909, the San Francisco branch became, for the most part, the workhorse facility for double eagle production until 1930.

This Plus-graded Gem 1908 With Motto is noticeably well-struck and displays vibrant peach-gold luster over smooth, high-quality surfaces. Eye appeal is exceptional, as the Plus designated suggests. Population: 68 in 65 (1 in 65+), 13 finer (9/15). NGC ID# BNAK, PCGS# 9147

**1909/8 Twenty Dollar, MS63
Only Overdate of the Series**

- 3449** 1909/8 FS-301 MS63 NGC. CAC. The popular FS-301 *Guide Book* variety shows an underlying 8 in the open lower loop of the second 9 in the date. This piece exhibits vibrant orange-gold luster and well-defined relief elements. The fields are largely devoid of abrasions, although light contact on the high points of the devices limits the grade. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909-D Double Eagle, MS64
Rare Any Finer**

- 3450** 1909-D MS64 PCGS. The lustrous yellow-gold surfaces of this near-Gem double eagle exhibit well-struck design elements, including Liberty's fingers, the panes of the Capitol building, and the eagle's plumage. Near-Gem is the highest grade that is likely to be encountered as PCGS and NGC have seen only 32 coins finer (10/15). NGC ID# 26FD, PCGS# 9152

**1913 Twenty Dollar, MS64+
Rarely Encountered Finer**

- 3451** 1913 MS64+ PCGS. CAC. The well-known rarity of Gem 1913 double eagles ranks them well out of reach for most collectors of this popular series. Choice examples are a readily available and far more affordable alternative, but the moderate number of such coins lessens their appeal to collectors who desire uncommon quality. This Plus-graded MS64 coin strikes a balance between the two tiers, combining affordability with superior preservation. The strike is boldly rendered, despite minor metal flow lines around the peripheries. The satiny surfaces exhibit radiant luster in orange and honey-gold hues, and grade-limiting abrasions are light and of little distraction. PCGS reports 13 Gems finer (10/15). NGC ID# 26FN, PCGS# 9161

**1914 Saint-Gaudens Twenty, MS64+
Scarce in Finer Grades**

3452 1914 MS64+ PCGS. The 1914 Saint-Gaudens double had an enticingly low mintage of 95,250 coins and is conditionally scarce in MS65. This high-end Choice example will appeal to a range of cost-concerned enthusiasts. The strike is bold, and the surfaces display vibrant yellow-gold luster. Examination with a loupe finds a pleasant lack of serious abrasions — a truly near-Gem example. NGC ID# 26FS, PCGS# 9164

**1925-S Saint-Gaudens Twenty, AU58
Elusive Issue in High Grade**

3453 1925-S AU58 PCGS. CAC. Despite the large mintage of nearly 3.8 million pieces, the 1925-S Saint-Gaudens double eagle is an elusive issue in all grades today, and a prime condition rarity in high grade. Most examples seen have been repatriated over the years from European holdings. This attractive near-Mint specimen shows just a trace of wear on the high-points of the well-detailed design elements and the lightly marked orange-gold surfaces remain lustrous and appealing.

**1927 Double Eagle, Richly Colored MS67
Among the Finest Type Coins Certified**

3454 1927 MS67 PCGS. For type purposes, a Superb Gem Saint-Gaudens double eagle is virtually essential. Only a few dates in the series are collectible at this lofty tier, among them the 1927. PCGS-certified pieces account for only about a fourth of far less than 100 Superb Gems known of this date, and there are none finer than the MS67 numeric level at either service. This conditionally rare type coin boasts intense, frosty luster in deep orange, peach, and rose-gold hues. The strike is boldly executed, and the surfaces are devoid of distracting abrasions. Population: 18 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 26GG, PCGS# 9186

COMMEMORATIVE SILVER

1900 Lafayette Dollar, MS65 Exceptional Luster and Eye Appeal

- 3455** 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. Although commonly referred to as the “1900” Lafayette dollar, this hefty commemorative was actually struck in late 1899. The 1900 date refers to the occasion on which the Lafayette memorial statue — depicted on the reverse — was erected in Paris. The Lafayette dollar itself is technically dateless. This Gem example delivers impressive cartwheel luster and fully struck motifs. Daubs of sea-green and amber toning appear around the margins, and the only grade-limiting flaws are a few trivial marks on Washington’s cheek. NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, MS65 Uncommonly Radiant Luster

- 3456** 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. The typically seen Lafayette dollar grades in the MS63 to MS64 range. This Gem example boasts vibrant, frosty luster with hints of light golden toning over each side. The strike is sharp, and a few minor marks on Washington’s cheek appear to be all that limit the grade. Finer examples are infrequently encountered. NGC ID# BYKW, PCGS# 9222

1900 DuVall 1-B Lafayette Dollar, MS65+ Light Original Toning

- 3457** 1900 Lafayette Dollar MS65+ PCGS. DuVall 1-B. With a typical grade of About Uncirculated, the appearance of a high-end Gem Lafayette dollar always draws attention. This DuVall 1-B example shows the olive leaf positioned above the gap between 1 and 9 of the date, while the second L of DOLLAR leans left and is higher than the adjacent A. Lightly patinated with speckles and a broader swath of blue and reddish-orange toning that continues to encircle the borders, the interiors of this attractive dollar are silver-gray and frosty bright mint luster. The devices are well-struck for the issue and minimally abraded, with a tiny planchet flaw above the conjoined heads of Washington and Lafayette. Population: 12 in 65+, 98 finer (10/15). NGC ID# BYKW, PCGS# 9222

1900 Lafayette Dollar, MS65+ Scarce DuVall 3-D

- 3458** 1900 Lafayette Dollar MS65+ NGC. DuVall 3-D. Both sides of this high-end Gem Lafayette dollar display rich lavender-gray, olive-green, and crimson-gold hues in concentric bands from the centers. The strike is bold and luster is vibrant. Close study with a lens fails to reveal any mentionable surface flaws. The Lafayette dollar is the only silver dollar in the classic commemorative series, but its popularity also stems from the challenge of locating a high-grade example with pleasing eye appeal. NGC ID# BYKW, PCGS# 9222

1893 Columbian Half Dollar, MS67 Very Rare Any Finer

- 3459** 1893 Columbian MS67 NGC. CAC. A spectacular Superb Gem representative of this iconic silver commemorative, with well-detailed design elements and impeccably preserved lustrous surfaces under shades of violet and gray toning. Eye appeal is outstanding. Census: 36 in 67 (1 in 67+, 6 in 67 ★), 2 finer (10/15). NGC ID# BYGG, PCGS# 9297

**1893 Columbian Half Dollar, MS67
Among the Finest at PCGS**

- 3460 1893 Columbian MS67 PCGS. CAC.** A rare Superb Gem example of this otherwise available 19th century commemorative, showing bold design definition and immaculate, satiny luster. The obverse shows warm amber-gold and lavender hues over the interior and sky-blue and gold around the peripheries. The reverse displays similar colors in a more blended array. Population: 22 in 67 (2 in 67+), 0 finer (10/15). NGC ID# BYGG, PCGS# 9297

**1926 Sesquicentennial Half, MS66
None Certified Finer**

- 3461 1926 Sesquicentennial MS66 NGC.** 150 years of American independence was celebrated by the 1926 Sesquicentennial half dollar, designed by John R. Sinnock. An extravagant mintage of more than 1 million pieces was struck, but nearly 85% were subsequently melted as unsold for a more moderate net distribution of 141,260 pieces. This lustrous Premium Gem displays tawny iridescent toning on both sides, with a few tiny marks from the original planchet as well as a small abrasion near Y of LIBERTY. Neither PCGS nor NGC have certified a numerically finer example. Census: 21 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (10/15). NGC ID# BYJ4, PCGS# 9374

**1937-D Texas Half Dollar, MS68
Among the Few Finest Known**

- 3462 1937-D Texas MS68 NGC.** The 1937-D is among the lower-distribution issues in the Texas Centennial half dollar series, coming in at 6,605 pieces, including assay coins. This remarkable MS68 representative is a grand condition rarity and is tied for the finest known. Frosty mint luster glows beneath faint pastel toning on each side, illuminating well-struck motifs. When viewed beneath a loupe, the superb preservation is especially impressive. Census: 6 in 68 (1 in 68 ★), 0 finer (10/15). NGC ID# BYJJ, PCGS# 9391

**1947-D Booker T. Washington Half Dollar
Impeccable Superb Gem**

- 3463 1947-D Booker T. Washington MS67 PCGS. CAC.** The 1947-D Booker T. Washington half dollar saw a net distribution of 6,000 coins, and this Superb Gem is one of only eight in this top grade at PCGS (10/15). Satiny, lightly toned surfaces show fiery-orange accents near the rims on each side, and the profile on the obverse is notably free of marks. A Registry-quality example with CAC endorsement. NGC ID# BYJW, PCGS# 9409

COMMEMORATIVE GOLD

**1903 Louisiana Purchase Gold Dollar
Elusive in Superb Gem Condition**

- 3464 1903 Louisiana Purchase, Jefferson, MS67 PCGS. CAC.** The Louisiana Purchase issues, which revived an abolished denomination and displayed the nation's first gold commemorative designs, were minted to the maximum quantity permitted by the authorizing law, and the distributors had high hopes for sales; however, the vast majority of pieces struck were later melted. This Superb Gem survivor is boldly impressed throughout, and the strongly lustrous yellow-gold surfaces offer occasional canary accents. Exquisitely preserved with elegant and undeniable visual appeal. CAC endorsed. No examples are reported numerically finer grade by PCGS (10/15).
Ex: *Houston Signature* (Heritage, 11/2007), lot 61382; *Long Beach Signature* (Heritage, 5/2012), lot 4582. NGC ID# BYLD, PCGS# 7443

1922 Grant With Star Gold Dollar, MS67+
Lustrous, With Outstanding Variegated Color

- 3465** 1922 Grant, With Star, MS67+ PCGS. CAC. An identical mintage of 5,000 pieces plus 16 coins for assay were struck and distributed for both the With Star and No Star Grant Memorial gold dollars. While in lower grades the With Star variant is nominally of higher value, at the highest Mint State levels both varieties are equally sought and valued. This wonderfully patinated With Star example shows cherry-red, deep-orange, and canary-yellow shades with lilac overtones. A sharply struck and immaculately preserved Superb Gem, the PCGS Plus designation with CAC endorsement position this piece among the finest known representatives of the issue. Population: 7 in 67+, 1 finer (10/15). NGC ID# BYPS, PCGS# 7459

MODERN BULLION COIN

1986 American Silver Eagle, MS70

- 3466** 1986 Silver Eagle MS70 PCGS. The American Silver Eagle program made its debut in 1986 with a mintage approaching 5.4 million coins. The branch mints at Denver, San Francisco, and West Point were responsible for the coins' production, though their mintmarks were omitted. This technically flawless example has frosty, brilliant surfaces without a single imperfection. The Weinman / Mercanti design is fully rendered. Population: 32 in 70 (10/15). NGC ID# 26J4, PCGS# 9801

TERRITORIAL GOLD

1851 K-6, Humbert Fifty, 887 Thous., AU Details
Reeded Edge, Acceptable Gold Rush Survivor

- 3467** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. — Damaged — NCS. AU Details. K-6, R.4. These heavy octagonal “ingots” took their share of abuse in the California Gold Rush commerce, and to be sure this example shows its share of marks on the exposed surfaces — on both sides, and along the eight-sided rim. The NCS damage designation may refer to many vertical lines visible most prominently at the reverse borders, but also lightly evident on the engine-turned pattern on the central reverse along with several small digs. It is unclear if the vertical lines are planchet adjustments or the result of post-Mint activity.

For the most part, the surfaces show normal dings, small dents, and abrasions. The yellow-gold surfaces retain their appeal and there are no overly large, deep hits. The motifs are complete and the legends readable, although slight weakness at the date and surrounding lettering appears at the obverse exergue. Hard-used in the hard money West Coast economy, this “slug” and others like it are an enduring symbol of the Gold Rush and retain their popularity to this day. Listed on page 385 of the 2016 *Guide Book*.

1852 Assay Office Ten Dollar, MS63
K-12a, Lustrous Surfaces

1853 Assay Office Twenty, MS62
Attractive K-18, 900 THOUS. Survivor

3468 1852 Assay Office Ten Dollar MS63 NGC. K-12a, R.4. The United States Assay Office struck tens, twenties, and fifty dollar gold coins after John Moffat retired in February 1852. There are two distinct varieties of this Assay ten, one with the O in OFFICE located directly below the N in UNITED (seen here) and the other with the O set more to the right and below the I in UNITED. This is a remarkably preserved, high-grade Assay ten. The surfaces display frosted mint luster and the design shows strong high-point definition. The underlying green-gold surfaces display a layer of rich, reddish patina. Only the smallest marks can be found, and a magnifier will be required to locate them. Listed on page 387 of the 2016 *Guide Book*. NGC ID# ANGV, PCGS# 10001

3469 1853 Assay Office Twenty Dollar, 900 Thous., K-18, R.2, MS62 NGC. One of the more obtainable U.S. Assay Office gold pieces of the period, the 1853 twenty dollar was struck to the extent of 2.5 million pieces, although most of the mintage is long-since lost to redemption, melting, or attrition. Struck in the politically charged period before official sanctioning of the San Francisco Mint but after the transition of the Assay Office to Curtis, Perry, and Ward in 1853, the gold pieces served as a crucial stop-gap solution for the rapidly expanding West Coast commerce and its insatiable demand for hard money.

This example is remarkably unabraded and with no serious marks, although two or three tiny rim marks may include an inconsequential bump and at least one small test cut. The attractive surfaces retain soft mint luster and natural greenish-gold patina. The eagle is sharp except at the arrows, which often show blending even on high-grade pieces. The engine-turned reverse is unmarred and fully rendered. This example is missing the crossbars on the A's in AMERICA, an anomaly noted on several other Kagin-18 pieces we have cataloged. Listed on page 388 of the 2016 *Guide Book*. NGC reports just 48 finer examples (10/15). NGC ID# ANHD, PCGS# 10013

1860 K-2, Clark, Gruber & Co Five Dollar, AU58

- 3470** 1860 Clark, Gruber & Co. Five Dollar, K-2, R.4, AU58 NGC. A brilliant and lustrous example of the Clark, Gruber & Co. Colorado five dollar gold piece, with bright yellow-gold color and a few orange accents. The design mimics the federal five dollar gold pieces, but with CLARK & CO. on the coronet and the reverse legend PIKES PEAK GOLD DENVER. The central obverse and reverse are softly struck as usual, but other details are boldly defined. A few insignificant hairlines and abrasions are noted. Listed on page 398 of the 2016 *Guide Book*. Census: 19 in 58, 38 finer (10/15). Ex: *Central States Signature (Heritage, 4/2006)*, lot 4764. NGC ID# ANJZ, PCGS# 10136

1860 Clark, Gruber Twenty Pattern, VF25
Copper Die Trial, K-4a

- 3471** 1860 Clark, Gruber \$20 Copper Die Trial VF25 PCGS. K-4a, R.5. Pikes Peak is depicted as a triangle with trees on this Clark, Gruber 1860 twenty dollar copper die trial. On the issued gold twenty, the mountain is instead shaped like a volcano, and trees are relegated to its base. The present copper die trial shows wear on the motifs but the eagle possesses partial plumage. Both sides display a few faded thin marks made by a curious finder. Encapsulated in a first generation holder. NGC ID# ANLE, PCGS# 10145

PATTERNS

1853 Pattern Cent, Gem Proof
Judd-150, Thin Planchet

- 3472** 1853 One Cent, Thin Planchet, Judd-150, Pollock-178, Low R.7, PR65 PCGS. Ex: Harry W. Bass, Jr. This small cent pattern was struck with a reeded edge in a German silver alloy. A regular obverse quarter eagle die was paired with a wreath reverse that bears the denomination ONE CENT. The German silver alloy was a candidate to replace the large copper cent, but the 1856 Flying Eagle cent was instead issued in copper-nickel. The present coruscating silver-gray Gem has a full strike and mark-free surfaces. The obverse displays a few tiny spots. Ex: *Brinton T. Schorer, 5/1973*; *Harry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999)*, lot 1005. NGC ID# 299J, PCGS# 11626

1863 Postage Currency Ten Cents, PR64
Judd-325, Silver Alloy

- 3473** 1863 Ten Cents, Judd-325, Pollock-390, Low R.6, PR64 PCGS. The obverse design features the heraldic shield with arrows, inside an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY above, and ACT JULY 1862 below. Struck in silver alloy with a plain edge. Examples are known that range from 88% silver to 96.1% silver. Judd-325 Postage Currency patterns are the most frequently encountered pieces from this interesting and well-researched series. Deep iridescence covers each side with russet toning surrounding the devices. Significant reflectivity shines through the toning. NGC ID# 29F5, PCGS# 60482

**1863 Ten Dollar Pattern, PR65 Red and Brown
Judd-350, Pollock-422**

- 3474** 1863 Ten Dollar, Judd-350, Pollock-422, R.6, PR65 Red and Brown PCGS. The designs are the same as the issued 1863 ten dollar piece, except that GOD OUR TRUST is placed on a scroll in the upper reverse field. Struck in copper with a reeded edge, then bronzed at the Mint, to give the coin a finish similar to that seen on 19th century bronze U.S. Mint medals. USPatterns.com quotes George Eckfeldt's journal, "Nov 17th 1863. Struck 20 sets of copper 10 dollar pieces God is our trust." A fully struck mahogany-brown specimen with infrequent minor carbon. Housed in a green label holder. Population: 1 in 65 Red and Brown, 0 finer (10/15). NGC ID# 29G5, PCGS# 70512

**1865 Ten Dollar Pattern, PR64 Red and Brown
Judd-450, Pollock-522**

- 3475** 1865 Ten Dollar, Judd-450, Pollock-522, High R.6, PR64 Red and Brown NGC. This transitional eagle shows the normal obverse and IN GOD WE TRUST on the reverse above the eagle. Struck in copper with a reeded edge. The design was adopted for use in 1866. USPatterns.com notes that over a dozen examples are known. This piece offers rich copper-orange coloration with sea-green and purple accents on each side. The devices are fully struck, and only a few carbon specks appear throughout. Census: 2 in 64 Red and Brown, 0 finer (10/15). NGC ID# 45RM, PCGS# 70637

1880 Goloid Metric Dollar, Judd-1651, PR65

- 3476** 1880 Goloid Metric Dollar, Judd-1651, Pollock-1851, Low R.7, PR65 PCGS. CAC. On the obverse, a head of Liberty faces left wearing a cap inscribed LIBERTY. The top of the cap is ornamented with ears of wheat, cotton leaves, and bolls. E PLURIBUS UNUM is at the top and the date 1880 is below with 13 peripheral stars arranged between. The central reverse expresses the composition of the denomination within a circle of 38 stars. The upper periphery displays the legend UNITED STATES OF AMERICA and the denomination GOLOID METRIC DOLLAR, while the motto DEO EST GLORIA and 100 CENTS are at the lower border. Struck in either silver or goloid alloy with a reeded edge. The fields are nicely mirrored and serve to enhance the irregular, dusky toning seen over each side. NGC ID# 3B56, PCGS# 62036

**1885 Snowden Dollar, PR62, Judd-1747
Lettered Edge Experimental Striking**

- 3477** 1885 Snowden Dollar, Judd-1747, Pollock-1959, Low R.6, PR62 PCGS. The regular issue obverse and reverse of the Morgan silver dollar. Struck in silver with a lettered edge. This pattern was produced with an experimental lettered edge, made by a three-part collar: * * * * E * / PLURIBUS * / UNUM * * * * *. The story of the Snowden dollars is an interesting one, the need for the tripartite collar based in anti-counterfeiting measures. The reason it was not adopted was not from impracticality, but rather because Snowden retired from the Mint and Director Burchard left office shortly thereafter. His successor had neither the "insight, ability or willingness" to follow through with this experimental edge, according to Roger Burdette. This is a nicely mirrored proof whose surfaces are covered with speckled, multicolored toning. This toning makes it difficult to find the few contact marks that account for the grade. NGC ID# 3AJN, PCGS# 62189

End of Session One

SESSION TWO

COLONIALS

- 3478** 1723 Rosa Americana Twopence AU58 NGC. CAC. M. 3-2-E.3, W-1334, R.4. A well struck walnut-brown near-Mint representative. No marks are remotely consequential, and the eye appeal is pleasing. The Rosa Americana series was initially intended for Irish commerce, but was rejected by that island. Examples were then exported to the American colonies, where they were accepted and valued by weight. Listed on page 43 of the 2016 *Guide Book*. Census: 8 in 58, 8 finer (10/15). NGC ID# 2ASZ, PCGS# 128
- 3479** 1723 Hibernia Halfpenny MS65 Red and Brown PCGS. M. 4.34-Gb.3, W-13120, R.2. Peach-red luster illuminates the legends and harp strings. The centers are well struck and the borders show slight incompleteness. Unabraded aside from a minor field mark near the chin. Listed on page 45 of the 2016 *Guide Book*. Population: 8 in 65 Red and Brown, 2 finer (10/15). NGC ID# 2ATD, PCGS# 181

1786 Vermont Baby Head Copper, XF45 RR-9, Strong Details, Full Date

- 3480** 1786 Vermont Copper, Baby Head XF45 NGC. RR-9, Bressett 7-F, W-2040, R.3. Ex: Donald G. Partrick Collection. Arguably the most popular Vermont copper variety of all, the Baby Head coppers were struck at the Harmon Mint in Rupert, Vermont. The dies were prepared by Coley and Van Voorhis in New York (possibly with assistance by James F. Atlee or Abel Buell). The variety is nearly always found in lower grades with fissured and corroded planchets, and weakly struck motifs. This example is far superior to most and a prize as such. Small planchet voids and minor granularity do not detract from the sharp details of this coin. Attractive tan color with scattered orange highlights adds to the glossy appeal. Ex: Murray Altman (3/1976); Donald Groves Partrick Collection (Heritage, 1/2015). NGC ID# 2B58, PCGS# 548
- 3481** 1786 Vermont Copper, Bust Left VF20 NGC. RR-11, Bressett 9-H, W-2050, High R.4. Ex: Craige. Deep gunmetal fields contrast with silver-gray high points. All legends are clear on this early Vermont Bust Left variety. The lower half of the date is off the flan, and Liberty's head is lightly brought up, but the remainder of the design is nicely detailed. Moderately granular and void of relevant marks. Ex: Ted L. Craige; Q. David Bowers Collection; Jon Hanson (3/1988); Donald Groves Partrick; FUN Signature (Heritage, 1/2015), lot 5757. NGC ID# 2B59, PCGS# 551

- 3482** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU50 PCGS. N. 13-X, W-6855, R.2. A readily available variety thanks to the Bank of New York hoard, which yielded many examples of this die marriage. Lime-green accents enliven the medium-brown coloration, with lighter tan-brown patina on the raised elements. Intermittent porosity accompanies die fatigue, most noticeable at the lower obverse around YOUR and BUSINESS. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883
- 3483** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU53 NGC. N. 13-X, W-6855, R.2. An unmarked chocolate-brown example. Well defined aside from softness along portions of the left-side borders. A minor flan imperfection is noted near the sundial gnomon. The vertical die crack at 6 o'clock identifies the familiar 'X' reverse, associated with the Bank of New York holdings of Fugio coppers. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

1787 Fugio Copper, MS63 Brown Newman 8-B, Pointed Rays, Some Red Remains

- 3484** 1787 Fugio Cent, UNITED STATES, Cinquefoils, MS63 Brown PCGS. N. 8-B, W-6740, R.3. Aside from a couple of minor flan flaws, this Select Uncirculated example is exceptionally well-produced and attractive. Copper-red luster remains around many of the devices, complementing the generally smooth, light chocolate-brown surfaces. A well-centered, lustrous example, struck from clashed dies (most obvious within the rings on the reverse). Housed in a green label holder. Population: 42 in 63 (2 in 63+) Brown, 37 finer (10/15). NGC ID# 2B8F, PCGS# 889
- 3485** 1787 Fugio Cent, STATES UNITED, Pointed Rays, Cinquefoils with Eight-Pointed Stars, VF30 PCGS. N. 15-Y, W-6915, R.2. Pleasing reddish-chocolate surfaces are generally smooth and problem-free, with only occasional porosity at the borders. A well-centered example of the Eight-Pointed Stars reverse, with full motifs showing only moderate wear. Listed on page 88 of the 2016 *Guide Book*. NGC ID# 2B8K, PCGS# 898
- 3486** Undated Washington Success Medal, Small Size, Reeded Edge AU55 NGC. Baker-267, W-10875, R.5. The exact purpose of the Washington Success tokens is unknown. Researchers have suggested they are related to Washington's second inauguration, or that they were minted as 19th century gaming tokens. This example is lightly struck at the centers, as usual for the variety. An attractive olive and golden-brown representative. Listed on page 84 of the 2016 *Guide Book*. NGC ID# 2VZB, PCGS# 783

HALF CENTS

1793 Half Cent, XF Details C-1 With Large Rim Break Very Rare Late Die State

- 3487** 1793 C-1, B-1, High R.3 — Corroded — ANACS. XF Details, Net VF20. Manley Die State 3.0, “very rare”, with a rim break over F AME. A deep gunmetal-gray representative with areas of slate on the reverse. The unmarked surfaces are evenly and moderately granular. With the exception of the EN in CENT, all legends are sharp, as are the portrait and wreath. From the first die pair of the half cent denomination. Our EAC grade VG8.
Ex: FUN Signature (Heritage, 1/2003), lot 5117. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

1793 Half Cent, VF Details C-4, Well Defined

- 3488** 1793 C-4, B-4, Low R.3 — Environmental Damage — PCGS Genuine. VF Details. Manley Die State 2.0. Generally golden-brown, although hints of sea-green are also extant. The sharpness approaches XF, but the surfaces are moderately and evenly granular. Free from evident abrasions. The final die marriage of the Bust Left, Liberty Cap type. Our EAC grade VG10. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000
- 3489** 1797 1 Above 1, C-1, B-1, R.2, Fine 15 PCGS Secure. Manley Die State 4.0 to 5.0. Due to advanced buckling on the right obverse field, the ICA in AMERICA is absent, and the RTY in LIBERTY is faint. A deep brown example with hints of golden-brown toning near LIBERTY. C-1 was struck on cut-down Talbot, Allum & Lee tokens, but the present half cent shows no evidence of an undertype. Our EAC grade VG10. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

1797 Half Cent, VF30 1 Above 1, C-1

- 3490** 1797 1 Above 1, C-1, B-1, R.2, VF30 PCGS. Manley Die State 4.0. A late die state with a buckled obverse field. The ICA in AMERICA is faint due to metal flow into the obverse die. A problem-free medium brown representative with few marks and good eye appeal. Most if not all examples of C-1 were struck over cut-down Talbot, Allum and Lee tokens, but the present piece does not exhibit indications of an undertype. Our EAC grade Fine 12. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

1804 Half Cent, XF45 Plain 4, No Stems, C-13 Double Struck, Davy Collection Breen Plate Coin

- 3491** 1804 Plain 4, No Stems, C-13, B-10, R.1 — Double Struck, Second Strike 35% Off Center — XF45 PCGS. Ex: Davy Collection. Manley Die State 2.0. Our EAC grade VF25. A medium brown example with light wear, minimal marks, and moderate granularity near the date. The present mint error is photographed in the Whoops! section, page 480, of the *Breen Half Cent Encyclopedia*. It was part of the most famous holding of half cent errors, the “Davy” Collection. The coin is double struck, described by Bob Grellman in the Goldberg catalog as:

“The first strike was normal and centered on the planchet. The struck half cent then failed to eject completely as a new blank planchet was partially inserted into the press. The result was a strike about 35% off center on the obverse leaving a strong impression of LIB behind the portrait. The reverse has a deep indent from the blank planchet affecting UNIT.”

Ex: Shelly Schultz, ANA (7/1981); Davy Collection; Pre-Long Beach (Ira & Larry Goldberg, 9/2010), lot 176. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

- 3492** 1825 C-2, B-2, R.1, MS63 Brown PCGS. Manley Die State 3.0. Star 12 is repunched, diagnostic for Cohen-2. A charming olive-brown Classic half cent. Satiny and void of verdigris with pleasing surfaces, though we note a couple of wispy field lines near Liberty's chin. Our EAC grade XF45. NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

- 3493** 1833 C-1, B-1, R.1, MS65 Brown PCGS. Manley Die State 2.0. A dusky mahogany-brown and jade-green Gem. The gently coruscating surfaces are without any remotely relevant marks. Intricately struck and exemplary. Our EAC grade MS60. NGC ID# 222Z, PCGS# 35282 Base PCGS# 1162

3494 1833 C-1, B-1, R.1, MS65 Brown NGC. Manley Die State 2.0. Splendid ocean-blue toning endows this highly lustrous and well preserved Gem. A mint-made strike-through above Liberty's lips does not deny the imposing eye appeal. Our EAC grade MS60. NGC ID# 222Z, PCGS# 35282 Base PCGS# 1162

3495 1833 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC. Manley Die State 1.0. Peach-red is prevalent across both sides, although the centers display blushes of steel-blue. Lustrous and precisely struck with pleasing surfaces. A few wispy field marks near the shoulder curl and a small spot below the wreath stem merit passing mention. Our EAC grade MS63. NGC ID# 4FRS, PCGS# 35283 Base PCGS# 1163

3496 1835 C-1, B-1, R.1, MS64 Red and Brown PCGS Secure. Manley Die State 1.0. Orange-red occupies the majority of the obverse and emerges throughout the reverse legends. The reverse field is mostly steel-gray with an area of deeper toning near the CE in CENT. A crisply struck and unmarked Choice half cent. Our EAC grade MS63. NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

1835 Half Cent, MS65 Red and Brown Sharp Cohen-1 Type Coin

3497 1835 C-1, B-1, R.1, MS65 Red and Brown PCGS. Manley Die State 2. Prominent clash marks in the left obverse field and faint metal flow lines around the peripheries denote this later die state. Cohen-1 is a plentiful variety in Mint State, although this Gem Red and Brown example is among the finer-known. The strike is well-executed on the wreath and obverse portrait and extending to the peripheral stars. There is no bothersome carbon spotting, and the lustrous surfaces display a balanced blend of coppery-red and olive-brown hues. Our EAC grade MS63. Population (all varieties included): 23 in 65 Red and Brown, 0 finer (10/15). NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

3498 1854 C-1, B-1, R.1, MS66 Brown NGC. A needle-sharp strike and dynamic cartwheel sheen only begin to describe the charms of this late date half cent. No marks are detected, and carbon is inconsequential. Sea-green and mahogany shades drape both sides. Our EAC grade MS63. NGC ID# 26YY, PCGS# 35330 Base PCGS# 1230

3499 1855 C-1, B-1, R.1, MS64 Red PCGS. A lustrous and lovely pumpkin-gold near-Gem. A lens reveals only trivial contact, and carbon is confined to the field between the ED in UNITED. A shallow strike-through near the C in CENT is of mint origin. Our EAC grade MS64. PCGS# 35335 Base PCGS# 1235

1856 Half Cent, MS64 Red C-1, Radiant Peach Color

3500 1856 C-1, B-2a, R.1, MS64 Red PCGS. A splendid orange-gold near-Gem of the penultimate half cent issue. The strike is good despite minor blending on the upper obverse. Contact is nearly absent, and carbon is confined to a few minute flecks. Although toned or spotted Uncirculated examples are generally available, the 1856 is rare in full Red. Our EAC grade MS65. Population: 11 in 64 (1 in 64+) Red, 2 finer (10/15). NGC ID# 26Z2, PCGS# 35338 Base PCGS# 1238

LARGE CENTS

3501 1793 Chain, AMERICA, S-2, B-2, High R.4 — Damaged, Corroded — ANACS. Fair 2 Details. A collectible example of this scarce introductory type. Although the date is worn smooth, the IBE in LIBERTY is apparent, as is the final letter in both ONE and CENT. The chain is bold, and the portrait is nicely outlined. The brown surfaces are closer to glossy than granular, but a few small pits are scattered, and the portrait is hairlined. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

1793 Chain Cent, Poor 1 AMERICA, S-3

3502 1793 Chain, AMERICA, S-3, B-4, Low R.3, Poor 1 PCGS. UNITED and the chain are clear, as is Liberty's profile. LIBERTY and the date are worn nearly smooth, which makes attribution closer to an art than a science. The mahogany-brown surfaces are moderately granular, and the only mentionable marks are a trio of small rim dings on the lower reverse and a thin field mark near Liberty's mouth. The first and rarest cent type issued by the U.S. Mint. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1793 Chain Cent, Fair 2
AMERICA, S-3**

- 3503** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fair 2 NGC. A collectible example of the first cent type. When held at arm's length, most of LIBERTY, the date, OF AMERICA, and ONE CENT emerge. The chain is clear and the portrait is fully outlined. The deep gunmetal-gray surfaces are evenly microgranular. The sole reportable mark is a minor obverse rim nick at 10:30. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1793 Chain Cent, Fair 2
AMERICA, Periods, S-4**

- 3504** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Fair 2 PCGS. The date and LIBERTY are clear, as are ONE CENT and the fraction. The chain is bold, and the profile and bust truncation are nicely outlined. The reverse peripheral legend is well worn but some letters are apparent, especially the ED in UNITED. The medium brown surfaces are granular but no marks merit mention. Our EAC grade Fair 2. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

- 3505** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 PCGS Genuine. The PCGS number ending in 97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that is granular on the obverse. The reverse is less granular with a few small areas of orange in the recesses. An example of Sheldon-5 with the diagnostic large letters, large date — appealing despite the environmental factors. Our EAC grade Good 6.

- 3506** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Environmental Damage — PCGS Genuine. Fine Details. All legends are clear on this above-average sharpness Wreath cent. The deep walnut-brown surfaces are evenly granular, and a narrow lamination is noted below the bust tip. Our EAC grade Good 5 NGC ID# 223H, PCGS# 35447 Base PCGS# 1347

- 3507** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, AG3 PCGS. The date and the three leaves above are bold, as is most of LIBERTY. The portrait is well outlined. The reverse shows greater wear, though portions of UNITED and AMERICA are readable. The surfaces are glossy with occasional minute pits, and display streaks of golden-brown and chocolate-brown toning. Relevant marks are confined to rim knocks near 4 o'clock on the reverse, and a few lesser rim bruises on the obverse at 6, 9, and 12 o'clock. Our EAC grade AG3. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

**1793 Wreath Cent, VF Details
S-11c, Lettered Edge**

- 3508** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Damage — PCGS Genuine. VF Details. A well-defined Wreath cent with moderately granular medium brown surfaces. Abraded near the R in AMERICA, and a slender mark is concealed in Liberty's trailing curls. The rims are scuffed at 2 and 10 o'clock on the obverse, and at 6, 9, and 12 o'clock on the reverse. Nonetheless an above-average example of the first-year type. Our EAC grade VG8. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

**1794 Liberty Cap Cent, VF30
Head of 1794, S-24**

- 3509** 1794 Head of 1794, S-24, B-8, R.1, VF30 NGC. The fully rounded cheek is diagnostic of the variety, and this specimen is a later die state with both obverse cracks and a bulge obliterating ENT on the reverse. The pleasing tan-brown surfaces exhibit minor granularity and show only trivial contact. Our EAC grade Fine 15. Ex: Stack's (10/1991), lot 510; Phillip Clover Collection (Heritage, 9/2012), lot 3027; Louis J. Alfonso. NGC ID# 223P, PCGS# 35537 Base PCGS# 901374

**1794 S-31 Cent, VF30
Head of 1794**

- 3510** 1794 Head of 1794, S-31, B-13, R.1, VF30 PCGS Secure. A midgrade representative with unmarked deep brown surfaces. The curls near the ear display wear, but the remaining design elements are well defined. The field is slightly wavy above the date and has a dappled texture near the fraction denominator. The Liberty Cap type is very scarce in problem-free condition. Our EAC grade Fine 12. NGC ID# 223P, PCGS# 35558 Base PCGS# 901374

1797 S-120b Cent, AU Details
Gripped Edge, Reverse of 1795

3511 1797 Reverse of 1795, Gripped Edge, S-120b, B-2b, R.2 — Obverse Scratched — NGC Details. AU. A richly detailed and partly lustrous chocolate-brown example. Liberty's cheek and neck display several hair-thin marks, and the reverse is moderately granular near the N in ONE and the EN in CENT. The ephemeral Gripped Edge is seen on two 1797 die marriages; the same two Sheldon varieties for the date (S-120 and S-121) that exhibit the single-leaf termination Reverse of 1795. Both marriages are also available with a plain edge, though the latter variety (S-121a) is very rare. Our EAC grade VF20.

3512 1798/7 S-152, B-13, R.2, VF25 PCGS. The diagonal break in the field below the hair ribbon aids the attribution of this overdated Draped Bust cent. A deep olive-brown example without any noticeable marks, although small unobtrusive spots are scattered and Liberty's throat is pitted. Our EAC grade Fine 15. NGC ID# 2245, PCGS# 35999 Base PCGS# 1440

3513 1799 S-189, B-3, R.2 — Damage — PCGS Genuine. Poor / Fair Details. The famously rare 1799 cent is key to a date set of large cents. This example shows the top half of the date, with the loops of the 9 readily apparent. ONE CENT and OF are also readable, and several other letters emerge at arm's length. The gunmetal-gray surfaces are moderately granular. Several pinscratches across the centers correspond to the PCGS designation. Our EAC grade Poor 1. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

1799 S-189 Cent, AG3
Strong for the Grade

3514 1799 S-189, B-3, R.2, AG3 NGC. A collectible example of this difficult Draped Bust issue, showing virtually Good detail on the obverse but being slightly weak along the right reverse rim. The strike is even and wear is, for the most part, comparably so. OF AMERICA is indistinct, but the remaining legends are clear, and the central devices are boldly outlined. The surfaces are relatively smooth with chocolate-brown patina but show small, scattered ticks. Our EAC grade AG3. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

1799 S-189 Cent, AG3
Stopper to Draped Bust Date Set

3515 1799 S-189, B-3, R.2, AG3 PCGS. A medium brown example of the coveted Draped Bust key date. Most of the date is bold, though the knobs of the 9s are faint. LIBERTY is readable, as is a majority of UNITED STATES OF AMERICA. The denomination and fraction are well worn, but the portrait is clearly outlined. The surfaces are moderately granular and lack mentionable marks. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3516 1802 S-232, B-12, R.1, AU53 PCGS. Breen Die State VI-VII. The fairly sizeable cud over the second T in STATES allows prompt attribution. The T in LIBERTY is punched over a Y, a characteristic shared with S-233. A medium brown cent with glimpses of lighter mahogany toning. Marks are trivial save for wispy field abrasions near the hair ribbon. Our EAC grade VF30. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

3517 1804 S-266b, B-1, R.2 — Environmental Damage — PCGS Genuine. VF Details. Struck from an intermediate state of the dies, with a narrow cud over RTY of LIBERTY but lacking the large cud over MERIC of AMERICA. The obverse of this challenging issue displays deep-ebony color and areas of corrosion with overall granularity. Sharp detail remains on the motifs, and although the exergue is rough, the date is clearly readable. The reverse is untroubled by comparison, with only slight granularity near the borders surrounding pleasingly smooth, deep-chocolate fields and devices. Our EAC grade VG7. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

3518 1804 S-266c, B-1, R.2 — Environmental Damage — NGC Details. VG. Breen Die State IV, with the characteristic cuds over RTY of LIBERTY and MERIC in AMERICA. The 1804 Draped Bust cent is a sought-after issue in all grades and conditions. This well-worn example shows some evidence of corrosion and a number of minor abrasions on the chocolate-brown surfaces, but these defects are not overly distracting. Our EAC grade VG7.

3519 1807/6 Blunt 1, Small 7, S-272, B-2, High R.4, Good 4 PCGS. Small 7. A coveted *Guide Book* variety, the Blunt 1 overdate is much rarer than the S-273 Pointed 1 overdate. This deep brown example has a bold date and fully readable legends. The lightly granular surfaces show few marks, and among those only a reverse rim knock at 1 o'clock merits mention. Our EAC grade Good 4. NGC ID# 224N, PCGS# 36439 Base PCGS# 1525

1814 Plain 4 Cent, AU50
Ex: Jules Reiver, S-295

- 3520** 1814 Plain 4, S-295, B-2, R.1, AU50 PCGS. CAC. Ex: Jules Reiver Collection. Breen Die State IV. The die crack is faintly visible from star 11 to Liberty's hair curl, and there is no crumbling evident at star 11. This is a high grade example with much underlying glossy luster still evident beneath golden-brown and gunmetal surfaces. Well struck overall and only lightly abraded. Our EAC grade XF45.
Ex: Ramont (2/1995), Jules Reiver Collection (Heritage, 1/2006), lot 19663 (as NGC AU55). NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

- 3521** 1818 N-10, R.1, MS64 Brown NGC. CAC. This lovely deep brown type coin displays a small area of lighter mahogany toning near the TES in STATES. The glossy surfaces are minimally abraded. Die cracks about the obverse margin identify N-10; one of the varieties from the Randall Hoard, though less available than the N-13 1820. Our EAC grade AU55. NGC ID# 2253, PCGS# 36628 Base PCGS# 1600

- 3522** 1819 Small Date, N-8, R.1, MS63 Brown PCGS. CAC. This coruscating cent is primarily medium brown, but glimpses of mint red linger near on the obverse in design recesses. A well preserved cent with a few lightly brought up stars. A middle die state with faded dentils near the date. Our EAC grade AU55. PCGS# 36649 Base PCGS# 1606

- 3523** 1820 Large Date, N-13, R.1, MS64 Brown PCGS. CAC. Grellman Die State b, as usually seen with cracks through the date and all stars. Better-defined at centers than margins with considerable faded orange-red in design recesses. Our EAC grade MS62. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

- 3524** 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. Pockets of Red surround stars and letters. The open fields and high points are blended forest-green and steel-blue. Unabraded and lustrous. The L in LIBERTY is triple-punched, one of several diagnostics for N-13. This variety is available in Mint State courtesy of the Randall Hoard, distributed during the second half of the 19th century. Our EAC grade MS60. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

- 3525** 1831 Large Letters, N-1, R.1, MS64 Brown PCGS. Glossy and lustrous tan-brown toning mingles with olive-brown and reddish highlights. A bold die crack at the top of the date extends to the stars on either side, traveling upward through the star points nearest the rim, terminating near star 8 on the right and at star 4 on the left. The I in LIBERTY shows broad recutting. A sharply struck and attractive N-1 example, nearly unmarked and Choice. Our EAC grade AU55. NGC ID# 225M, PCGS# 36970 Base PCGS# 1678

1832 Cent, MS64 Brown
N-2, Medium Letters

- 3526** 1832 Medium Letters, N-2, R.3, MS64 Brown PCGS. CAC. Apple-green toning outlines design elements, but this lustrous Matron Head cent is primarily chocolate-brown. The left-side stars are soft but the major devices are well struck. No marks are remotely consequential. A late die state with flowlined borders, as made. N-2 is scarcest among the three 1832 die marriages. Our EAC grade MS60. NGC ID# 225N, PCGS# 37015 Base PCGS# 1690

1834 N-1 Cent, MS64 Red and Brown
Small 8, Large Stars

- 3527** 1834 Small 8, Large Stars, Medium Letters, N-1, R.1, MS64 Red and Brown PCGS. Noyes Die State B, reverse peripherally cracked. Significantly more red than brown, this Choice N-1 large cent yields a rich coppery-red glow from beneath faint auburn and burgundy overtones. A few stars lack complete definition, but the wreath and portrait are sharp. There are no mentionable abrasions, and carbon is limited to a few scattered, unobtrusive flecks. Our EAC grade MS63. NGC ID# 4CYK, PCGS# 37052 Base PCGS# 1709

- 3528** 1837 Plain Cords, Medium Letters, N-7, N-8, R.1, MS64 Brown PCGS. CAC. The die crack through STATES OF and die lines near AMERICA identify the variety as N-8, the early die state of N-7. A chocolate-brown Choice cent with substantial glimmers of peach-red in protected areas. Unabraded, though the reverse displays a few minor spots. Our EAC grade MS60. NGC ID# 225U, PCGS# 37162 Base PCGS# 1735

- 3529** 1844 N-3, R.2, MS63 Red and Brown PCGS. CAC. Die State b, with clear repunching at the base of 18, and die cracks around the reverse. An attractive blend of steel-blue and copper-gold tones colors each side. Sharply struck with unobtrusive scattered marks. Our EAC grade MS63. Population (all varieties): 5 in 63 Red and Brown, 9 finer (10/15). PCGS# 397726 Base PCGS# 1857

**1847 N-2 Cent, MS63 Brown
Large Over Small 47**

- 3530 1847 Large Over Small 47, N-2, R.3, MS63 Brown PCGS.** A chocolate-brown representative with olive-green undertones. Virtually void of contact, and carbon is limited to a small spot below the wreath ribbon. A popular repunched date *Guide Book* variety. The date was initially entered with a pronounced upward slope, then repunched with a level position. Encapsulated in an old green label holder. Our EAC grade AU55. NGC ID# 226D, PCGS# 37367 Base PCGS# 1880

- 3531 1848 N-35, R.2, MS64 Brown PCGS.** Grellman Die State a. The surfaces are mostly smooth, glossy, and attractive, alternating areas of amber-brown toning with ample reddish-orange undertones. Some weakness at the star centers is counterbalanced by sharp central motifs and considerable eye appeal. Our EAC grade MS63. PCGS# 406528 Base PCGS# 1883

1849 N-8 Cent, MS66 Brown

- 3532 1849 N-8, R.2, MS66 Brown NGC.** Grellman Die State b. Newcomb-8 is a distinctive variety, due to its repunched 9 in the date, lengthy reverse die cracks, and die doubling on UNITED STATES OF. A magnificently preserved Premium Gem. The obverse is medium brown, the reverse is mahogany-brown, and both sides display sea-green undertones. Our EAC grade MS60. PCGS# 405652 Base PCGS# 1886

**1851 N-10 Cent
MS66 Red and Brown
Exceptional Preservation**

- 3533 1851 N-10, R.1, MS66 Red and Brown PCGS.** CAC. Grellman Die State b. Plentiful fire-red outlines the stars and fills the legends. The high points and open fields are olive-brown. Carbon and contact are nearly absent. Crisply struck and lustrous with smooth surfaces and outstanding eye appeal. The date was entered high for N-10, since the first three digits touch the bust. Our EAC grade MS63. NGC ID# 226H, PCGS# 406678 Base PCGS# 1893

- 3534 1853 N-10, R.1, MS64 Red PCGS.** Grellman Die State b. A splendid orange-gold Choice cent. The stars are incomplete, but the remainder of the strike is bold. Abrasions are essentially absent, and flecks are isolated to Liberty's jaw. Our EAC grade MS64. NGC ID# 226K, PCGS# 406005 Base PCGS# 1903

- 3535 1853 N-13, R.1, MS64 Red PCGS.** CAC. Grellman Die State b, the usual for Mint State N-13 examples, many of which come from a hoard of Uncirculated cents that account for the variety's availability. This lustrous, copper-red coin displays nice eye appeal. The strike shows crisp definition on the raised elements except for a few of the star centers and slight softness at the reverse legend. Infrequent, minor carbon flakes dot the surfaces. Our EAC grade MS65. PCGS# 403930 Base PCGS# 1903

- 3536 1853 N-18, R.1, MS65 Red and Brown PCGS.** This piece displays a blend of coppery-red luster and auburn-brown and plum overtones, although the surfaces are weighted toward the latter hues and thus the Brown color designation from NGC. The strike lacks sharpness only on the upper stars, and the surfaces are beautifully free of abrasions. Our EAC grade MS63. NGC ID# 226K, PCGS# 406021 Base PCGS# 1901

- 3537 1856 Slanted 5, N-21, R.2, MS66 Brown NGC.** CAC. Grellman Die State b, late with flowlined fields. Although it is considered an available variety today, the N-21 die combination was unknown to Newcomb before his reference was posthumously published. This example has some claims to Condition Census for the variety. Excellent mint luster and gorgeous blue-brown color accompanies splashes of original frosty mint red. Slight peripheral weakness is a result of die wear as well as strike. Our EAC grade MS62. NGC ID# 226N, PCGS# 406226 Base PCGS# 1922

FLYING EAGLE CENTS

- 3538 1857 MS63 PCGS.** CAC. Smooth surfaces and frosty tan fields surround the sharply struck devices. Hints of reddish-gold luster gleam from beneath the attractive patina. A few tiny carbons on the reverse require a glass — the largest is near E of CENT, as well as a light line that appears above the T. Still, a pleasing Select Uncirculated example, CAC endorsed. NGC ID# 2276, PCGS# 2016

- 3539 1857 MS64 PCGS.** Near-Gem surfaces attractively represent soft bronze-gold, amber, and lilac hues on each side of this Flying Eagle cent type coin. The eagle's head and tailfeathers show above-average sharpness, and eye appeal is excellent. The obverse peripheral legends exhibit minor strike doubling. NGC ID# 2276, PCGS# 2016

- 3540 1857 MS64 PCGS Secure.** The 1857 Flying Eagle cent is always in demand as a first-year type coin. This attractive Choice example offers sharply detailed design elements and lightly marked surfaces with vibrant mint luster throughout. NGC ID# 2276, PCGS# 2016

- 3541 1857 MS64 PCGS.** CAC. An attractive Choice specimen of this popular type issue, with sharply detailed design elements and lustrous copper-red surfaces that have mellowed to light brown in a few areas. NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Attractive Coloration**

- 3542 1857 MS65 PCGS.** A Gem Flying Eagle type coin, this 1857 copper-nickel cent displays satiny, well-preserved luster with hints of amber, violet, and mint-green throughout otherwise bronze-gold surfaces. As is typical of this issue, the eagle's head and tailfeathers are weak, as is the upper portion of the wreath; central definition is sharp, and the bowknot is bold. PCGS lists 19 Premium Gems finer (10/15). NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Sharp, Lustrous Type Coin**

- 3543 1857 MS65 PCGS. CAC.** A boldly struck Gem type coin, this 1857 Flying Eagle cent displays satiny bronze-gold luster and beautifully preserved surfaces. The obverse shows a couple of spindly die cracks, one from the rim to the eagle's head and another along the top of the date and then up toward the eagle's talons from the 7. A few die lines are present in the forward wing feathers. PCGS lists 17 finer examples (10/15). NGC ID# 2276, PCGS# 2016

- 3544 1858 Large Letters MS64+ PCGS. CAC.** High Leaves, Closed E in ONE. A beautiful Choice green-gold cent. The strike is sharp, the luster is vibrant, and both sides show only inconsequential contact. The reverse displays a smattering of pinpoint carbon. NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENT

- 3545 1857 Flying Eagle PR62 Cameo PCGS. Snow-PR3.** Eagle Eye Photo Seal, card included. This proof die variety is identified by a diagonal die line through the N in UNITED. Minor obverse die doubling is also present. This fully struck specimen exhibits obvious contrast between the luminous motifs and the moderately reflective fields. Peach-gold fills design elements though the open fields display ice-blue tints.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3109. NGC ID# 2223, PCGS# 82040

INDIAN CENTS

- 3546 1859 MS64 PCGS Secure.** An attractive Choice specimen from the first year of the Indian design, this coin exhibits sharply detailed design elements and well-preserved surfaces that retain much original mint luster. NGC ID# 227E, PCGS# 2052

- 3547 1860 Pointed Bust, FS-401, MS64 PCGS. CAC.** A lustrous tan-gold near-Gem. Unabraded and attractive with minimal carbon. The strike is good despite minor blending on the shoulder curl. The reverse field has an orange-peel texture, as coined from a long-in-use die. NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

- 3548 1860 MS66 PCGS. CAC.** Semireflective fields illuminate bronze-gold luster on this Premium Gem copper-nickel type coin, while the surfaces are devoid of significant abrasions. The obverse portrait is sharply rendered, and the reverse is weak only on the upper portion of the shield. Population: 45 in 66 (3 in 66+), 9 finer (10/15). NGC ID# 227F, PCGS# 2058

- 3549 1861 MS66 PCGS. CAC.** The glossy luster on this nickel-gold 1861 cent is uniquely appealing, devoid of bothersome abrasions. Mild die erosion is evident in the peripheral fields, but the central devices are nonetheless sharp throughout. Population: 66 in 66 (2 in 66+), 13 finer (9/15). NGC ID# 227G, PCGS# 2061

- 3550 1862 MS65 PCGS.** Sharply detailed in most areas, this impressive Gem shows just a touch of the usual softness on the tips of the headdress feathers. The lustrous copper-red surfaces show only the most insignificant signs of contact, but a small planchet flaw is visible in the lower left obverse field. The 1862 Indian cent is very scarce in finer grades. NGC ID# 227H, PCGS# 2064

1863 Cent, Well-Struck MS66

- 3551 1863 MS66 PCGS. CAC.** Peach-red and jade-green intermingle across this lustrous and mark-free Premium Gem. The strike is precise except on the upper feather tips. A few minuscule obverse flecks preclude perfection. A then-record number of cents were struck in 1863, but failed to circulate due to the Civil War. Population: 55 in 66 (5 in 66+), 0 finer (10/15). NGC ID# 229D, PCGS# 2067

- 3552 1866 MS65 Brown PCGS. CAC.** A glistening, partially glossy Gem example of this conditionally elusive Indian cent issue. Rich coppery-orange luster emerges from beneath auburn-brown overtones on each side, giving the obverse a lovely peripheral halo and the reverse a full Red and Brown appearance. The lower obverse and upper reverse border dentils are a trifle soft, but the interior motifs are sharp. Light clash marks appear in the left obverse field. Population: 19 in 65 Brown, 1 finer (10/15). NGC ID# 227P, PCGS# 2085

- 3553 1867 MS65 Red and Brown PCGS. CAC.** Original woodgrain patina features steel-blue and violet centers with amber-gold color around the edges. Minor indistinctness over the feather tips, ribbon, and lower curls leaves the overall appeal of this marvelously preserved Gem cent with CAC approval unaffected. Population: 64 in 65 Red and Brown, 1 finer (10/15). NGC ID# 227R, PCGS# 2089

**1873 Open 3 Indian Cent, MS65 Red
Seldom Seen This Well-Preserved**

3554 1873 Open 3 MS65 Red PCGS. The more frequently seen Open 3 variety, this Gem Red 1873 Indian cent displays well-preserved copper-bronze surfaces with satiny luster and well-struck central motifs. The left-hand obverse border legend is not fully brought up. A few trivial specks do not detract. Population: 21 in 65 Red, 5 finer (10/15). NGC ID# 227Y, PCGS# 2108

3555 1873 Closed 3 MS64 Red PCGS. An attractive Choice specimen of the popular Closed 3 variant, with lightly marked original red surfaces. Vibrant mint luster is radiated from both sides and the design elements are sharply struck. Population: 18 in 64 (1 in 64+) Red, 20 finer (10/15). NGC ID# 227X, PCGS# 2111

3556 1876 MS65+ Red and Brown PCGS. CAC. A rose-red and olive Gem. Lustrous and essentially mark-free with "webbing" clash marks between the lower headdress feathers. The strike is sharp despite minor softness on STATES. A much better date. NGC ID# 2283, PCGS# 2125

3557 1877 VF20 Brown NGC. The 1877 Indian cent is the low-mintage key to the series. This specimen shows considerable wear, but it retains some detail in the letters of LIBERTY and only minor abrasions are evident. NGC ID# 2284, PCGS# 2127

3558 1877 VF35 Brown NGC. Old-time auburn-brown surfaces give this midgrade 1877 Indian cent pleasing eye appeal to accompany well-detailed motifs. No bothersome marks are observed. In cardboard coin folders, this key date is often the last hole filled. NGC ID# 2284, PCGS# 2127

3559 1877 AU50 NGC. Shallow N. A walnut-brown example of the famously scarce 1877 cent. The official mintage of 852,500 pieces is the lowest Philadelphia production of the series. All legends are sharp and no marks are consequential. NGC ID# 2284, PCGS# 2127

3560 1877 — Altered Color — NGC Details. Unc. The orange-gold and steel-blue surfaces are recolored, but this key-date cent is well struck and free from marks. Shallow N in ONE, as usually seen on business strikes of the low mintage issue. NGC ID# 2284, PCGS# 2127

**1893 Indian Cent, MS66+ Red
Radiant, Glowing Luster**

3561 1893 MS66+ Red PCGS. CAC. Intense, frosty luster sets this Plus-designated Superb Gem aglow in rich bronze-gold, lilac, and coppery-orange hues. The upper headdress feathers show moderate weakness, but the remaining design elements are boldly rendered. Neither side exhibits bothersome abrasions or carbon spotting. Population: 29 in 66 (2 in 66+) Red, 1 finer (10/15). NGC ID# 228M, PCGS# 2186

3562 1895 MS66 Red PCGS. CAC. Orange-gold luster emanates from the well-preserved surfaces of this Premium Gem. The design elements are sharply struck, including the four diamonds. This piece displays great overall eye appeal. Population: 50 in 66 (5 in 66+) Red, 4 finer (10/15). NGC ID# 228P, PCGS# 2192

**1897 Indian Cent, MS66 Red
Few Certified Any Finer**

3563 1897 MS66 Red PCGS. An outstanding Premium Gem cent, with vibrant peach-red color and blaze-orange accents. The sheer magnitude of the mintage — more than 50 million pieces were produced — gave little reason for any large quantity of Mint State coins to be saved, and as a result MS66 Red or finer coins are rare. This boldly struck example exudes eye appeal and surface quality, with only incidental microscopic flecks and fantastic mint luster. Population: 18 in 66 (1 in 66+) Red, 3 finer (10/15). NGC ID# 342W, PCGS# 2198

3564 1901 MS66 Red PCGS. CAC. Remarkably smooth, frosted surfaces confirm the Premium Gem grade of this vibrantly lustrous, copper-red Indian Head cent. The strike is razor-sharp on the obverse, while the reverse shows slight blending at the upper-right shield and wreath tip. One or two tiny marks and carbon flecks to not detract from the vibrant appeal. CAC endorsed. Population: 65 in 66 (7 in 66+) Red, 4 finer (10/15). NGC ID# 228W, PCGS# 2210

3565 1904 MS66+ Red PCGS. Both sides of this high-end Premium Gem Indian cent are awash with copper-gold luster. The design elements are sharply impressed, including the four diamonds and the Indian's feather tips. A couple of minute marks on the cheek may preclude an even finer grade. Population: 67 in 66 (2 in 66+) Red, 6 finer (9/15). NGC ID# 228Z, PCGS# 2219

3566 1908-S MS65 Red and Brown PCGS. CAC. The original red surfaces of this impressive Gem have mellowed to light brown in a few areas, but no mentionable distractions are evident. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded eight numerically finer examples (10/15). NGC ID# 2296, PCGS# 2233

- 3567 1908-S MS64+ Red PCGS. CAC.** The original red surfaces of this high-end Choice specimen show few signs of contact and radiate vibrant mint luster. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 2296, PCGS# 2234
- 3568 1909 MS66 Red PCGS.** Vibrant mint luster and impeccably preserved original red surfaces are the calling cards of this delightful Premium Gem. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded 10 numerically finer examples (10/15). NGC ID# 2297, PCGS# 2237
- 3569 1909-S MS63 Brown PCGS. CAC.** An attractive Select example of this low-mintage key, with lightly marked olive-brown surfaces that show traces of original red in selected areas. The design elements are well-detailed. PCGS has graded 70 numerically finer examples (10/15). NGC ID# 2298, PCGS# 2238
- 3570 1909-S MS64 Brown PCGS. CAC.** Beautifully preserved, although a trifle soft on the high points of the portrait and the wreath bow. This key-date Indian cent displays soft bronze-gold luster emerging from tan-brown overtones, giving each side a glowing chestnut-gold hue. Population: 61 in 64 Brown, 9 finer (10/15). NGC ID# 2298, PCGS# 2238

PROOF INDIAN CENTS

- 3571 1876 PR65 Red and Brown PCGS. CAC.** A razor-sharp, reflective Gem proof, this 1876 Indian cent boasts far more red than brown color. Fiery orange-red hues emerge from beneath subtle burgundy accents, delivering a degree of eye appeal that causes a couple of minute specks to go largely unnoticed. Population: 53 in 65 (1 in 65+) Red and Brown, 14 finer (10/15). NGC ID# 229V, PCGS# 2316
- 3572 1878 PR65 Red Cameo PCGS.** Strong contrast between reflective fields and frosted central motifs is rare on proof Indian cents, and especially so when the surfaces display vibrant red color. Copper-orange borders on this Gem cameo proof deepen to deep, flame-orange toning near the frosted centers. A few carbon flecks are random and infrequent. Population: 10 in 65 Cameo, 7 finer (10/15). NGC ID# 4YVB, PCGS# 82323

1882 Indian Cent, PR67 Brown Tremendous Coloration

- 3573 1882 PR67 Brown PCGS. CAC.** An incredible Superb Gem proof, this 1882 Indian cent boasts fluid auburn surfaces with glowing lavender and ice-blue mists over the deeply reflective fields. The strike is bold, and the preservation is impressive. A pair of microscopic flyspecks near the final A in AMERICA are the only carbon present. Population: 18 in 67 Brown, 0 finer (10/15). NGC ID# 22A3, PCGS# 2333
- 3574 1885 PR65 Red PCGS.** A razor-sharp specimen that has a lustrous rose-red and apricot-gold obverse. The satiny reverse is brick-red and olive-gold. A lens reveals infrequent pinpoint flecks. Housed in a first generation holder. NGC ID# 22A6, PCGS# 2344
- 3575 1892 PR66 Red and Brown PCGS.** The original red surfaces of this spectacular Premium Gem have mellowed to light brown and crimson in a few places, but no mentionable signs of contact are evident. The design elements are sharply detailed and the fields are deeply reflective. Population: 27 in 66 Red and Brown, 1 finer (10/15). NGC ID# 22AE, PCGS# 2364

- 3576 1895 PR66 Red and Brown PCGS.** A few hints of lilac and light brown patina visit the impeccably preserved, mostly red surfaces of this spectacular Premium Gem. The design elements exhibit razor-sharp definition and the fields are brightly reflective. Population: 17 in 66 Red and Brown, 0 finer (10/15). NGC ID# 22AH, PCGS# 2373

1895 Cent, PR67 Red and Brown None Graded Higher

- 3577 1895 PR67 Red and Brown NGC.** A total of 880 proof Indian Head cents were issued in silver-minor proof sets alongside the famous 1895 proof dollars. An additional 1,182 examples were distributed in minor proof sets, bringing the total mintage to 2,062 proofs. Copper-red tones dominate this Superb Gem specimen. Amber-gold elements in the fields likely preclude a full Red designation. Razor-sharp, as one might expect of a proof strike, and free from noticeable contact. Census: 1 in 67 Red and Brown, 0 finer (10/15). NGC ID# 22AH, PCGS# 2373
- 3578 1899 PR66 Red PCGS.** A lovely olive-gold specimen that offers flashy fields and a precise strike. One fleck is noted between the TE in STATES. The high points display a hint of lilac coloration. Housed in a green label holder. NGC ID# 22AM, PCGS# 2386
- 3579 1900 PR66+ Red NGC.** Rich coppery-red color adorns each side of this deeply mirrored Premium Gem proof type coin, showing bold motifs and unmarked surfaces. A few trivial flyspecks are not distracting, and a dash of cherry-red toning appears near the U in UNITED and another is near the lower-left reverse rim. Census: 12 in 66 (2 in 66+) Red, 5 finer (10/15). NGC ID# 22AN, PCGS# 2389

LINCOLN CENTS

- 3580 1909-S VDB MS64 Brown PCGS.** Soft, glowing luster emerges from beneath chestnut-brown toning on each side of this Choice Lincoln cent key. There are no significant abrasions, although a few scattered specks are observed. Well-struck and pleasing for the grade. NGC ID# BYKW, PCGS# 2426
- 3581 1909-S VDB MS65 Red and Brown NGC.** The original red surfaces of this impressive Gem have mellowed to light brown in some areas, but the design elements are well-detailed and the designer's initials are bold. The 1909-S VDB Lincoln cent is the celebrated key to the series. NGC ID# 22B2, PCGS# 2427
- 3582 1910 MS66+ Red PCGS. CAC.** Glowing amber-gold surfaces exhibit bold design definition on the hair, beard, and wheat stalks. The obverse is seemingly pristine, and there are but a few tiny grazes near the N in CENTS. A couple of carbon specks, barely visible to the naked eye, are unimportant. Unimprovable eye appeal. NGC ID# 22B5, PCGS# 2437
- 3583 1910 MS66+ Red PCGS. CAC.** A sharply detailed Plus-graded Premium Gem, with vibrant mint luster and virtually pristine original red surfaces. Eye appeal is terrific. PCGS has graded 31 numerically finer examples (10/15). NGC ID# 22B5, PCGS# 2437

3584 1911-D MS66 Red and Brown NGC. CAC. Cherry-red, apple-green, and olive-brown shades enrich this lustrous and unmarked Premium Gem. A well struck and desirable example of the early and low mintage branch mint issue. NGC ID# 23G6, PCGS# 2445

3585 1911-D MS65 Red PCGS. CAC. A few tiny carbon flecks aside, this Gem 1911-D is remarkably pleasing and problem-free. The reddish-pink surfaces show bright mint luster across surfaces that are sharply defined for this strike-challenged issue. CAC endorsed with exceptional quality for the inaugural Denver Lincoln cent. PCGS reports just 33 coins in numerically finer grades (10/15). NGC ID# 22B8, PCGS# 2446

3586 1912-D MS65 Red NGC. Satiny luster displays soft coppery-orange patina on each side of this Gem full Red example, with a small splash of deeper plum color visible on the obverse portrait. No detracting abrasions are present, although indications of die fatigue are seen in the border recesses. Census: 35 in 65 Red, 6 finer (10/15). NGC ID# 22BB, PCGS# 2455

3587 1912-D MS65+ Red PCGS. This high-end Gem exhibits razor-sharp definition on all design elements and the blazing original red surfaces show no mentionable distractions. PCGS has graded 20 numerically finer examples (10/15). NGC ID# 22BB, PCGS# 2455

1913-S Lincoln Cent, MS65 Red Prohibitively Rare Any Finer

3588 1913-S MS65 Red PCGS. Like many San Francisco issues from the early part of the series, the 1913-S Lincoln cent is elusive in Gem Red condition. This piece is well-struck despite minor die erosion in the fields and displays soft golden-orange luster. A few olive-colored flecks do not pose significant distraction. Population: 49 in 65 Red, 2 finer (10/15). NGC ID# 22BF, PCGS# 2467

1914-D Cent, MS64 Red and Brown In-Demand Denver Issue

3589 1914-D MS64 Red and Brown PCGS. The 1914-D is one of the no-question key dates in the Lincoln cent series with a small mintage of just under 1.2 million coins. This attractive Choice example displays amber-gold and rich copper-orange tones with brown elements over the high points, in the right obverse field, and toward the lower reverse. PCGS shows 50 finer Red and Brown submissions (10/15). NGC ID# 22BH, PCGS# 2472

3590 1915 MS66 Red PCGS. An intricately struck and lustrous peach-red cent. Only minuscule contact is apparent, and the infrequent pinpoint flecks are also of little consequence. Population: 89 in 66 (2 in 66+) Red, 12 finer (10/15). NGC ID# 22BK, PCGS# 2479

3591 1917-S MS64 Red PCGS. CAC. This lovely Choice example shows bright, sun-red surfaces with some faint variegated darker color. CAC endorsed and nicely struck, with a couple of tiny marks on the denomination noted for accuracy. Population: 64 in 64 (1 in 64+) Red, 18 finer (10/15). NGC ID# 22BU, PCGS# 2503

3592 1918 MS66+ Red PCGS. This high-end Premium Gem boasts blazing original red surfaces with no mentionable flaws and sharply detailed design elements throughout. PCGS has graded 31 numerically finer examples (10/15). NGC ID# 22BV, PCGS# 2506

1922 No D Cent, AU55 Strong Reverse

3593 1922 No D, Strong Reverse, FS-401, AU55 NGC. Die Pair 2, with the strong reverse and the second 2 in the date sharp. This example displays medium chocolate-brown patina overall, with an area of deeper burgundy also visible around the C in CENT. Light wear confirms the grade, but the major design elements are well-detailed. A popular *Guide Book* variety. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

3594 1924-S MS63 Red PCGS. Just a few minor contact marks and traces of light brown patina are evident on the original red surfaces of this attractive Select example. The design elements are sharply detailed throughout. Population: 20 in 63 Red, 94 finer (10/15). NGC ID# 22CE, PCGS# 2557

3595 1929 MS67 Red PCGS. This glittering Premium Gem 1929 Lincoln is among the finest in a PCGS holder, ideal for Registry purposes. Metal flow lines in the peripheral fields accentuate the luster of the pristine, coppery-orange surfaces. Well-struck with a couple of trivial specks on the reverse. Population: 58 in 67 (3 in 67+) Red, 0 finer (9/15). NGC ID# 22CU, PCGS# 2596

1932 Cent, MS67 Red Among the Finest Certified

3596 1932 MS67 Red PCGS. A Registry-grade Superb Gem, tied for the finest at both services. The frosty surfaces display unabraded coppery-gold luster that is virtually devoid of carbon spotting. The strike is bold, and the eye appeal is comparably excellent. Population: 30 in 67 Red, 0 finer (10/15). NGC ID# 85ZB, PCGS# 2623

**1932 Cent, MS67 Red
Rich, Frosty Luster**

3597 1932 MS67 Red PCGS. CAC. A beautifully preserved, frosty example of this conditionally scarce Lincoln cent issue, showing rich coppery-orange luster and well-struck design elements. Mild die erosion in the fields helps produce the luminous appearance. This Registry-grade coin is among the finest seen by either leading service. Population: 30 in 67 Red, 0 finer (10/15). NGC ID# 85ZB, PCGS# 2623

3598 1935-S MS66+ Red PCGS. CAC. The availability of this San Francisco issue declines sharply above the MS66 grade level, making this Plus-designated coin suitable for Registry consideration. The strike is well-executed, and the coppery-orange surfaces exhibit only a couple of tiny carbon specks. PCGS lists 14 Red coins finer (10/15). NGC ID# 22DD, PCGS# 2647

3599 1935-S MS66+ Red PCGS. CAC. A peach-red Premium Gem that boasts dynamic luster and a mark-free appearance. The surfaces display hints of lilac, and the strike is good despite blending atop the O in ONE. NGC ID# 22DD, PCGS# 2647

**1936 Cent, MS64 Red and Brown
Doubled Die Obverse**

3600 1936 Doubled Die Obverse, Type-1, FS-101, MS64 Red and Brown PCGS. CAC. This is a significant doubled die variety that is "extremely rare in Mint State," as stated in the *Cherrypickers'* reference. There are three major doubled die obverses known for the 1936 cent, although FS-101 shows the strongest spread; it is this variety which corresponds to the *Guide Book* listing. The present example showcases lovely olive-green, amber, and rich violet toning over much of each side, backlit by fiery-orange luster that emerges in glowing halos around the central relief elements; no true brown color is observed. The strike is bold, and abrasions are trivial. Population: 4 in 64 Red and Brown, 1 finer (10/15). NGC ID# 22DE, PCGS# 82649

3601 1938-S MS67+ Red PCGS. CAC. A high-end Superb Gem, with well-detailed design elements and blazing original red surfaces that show no visible flaws. Tremendous eye appeal and technical quality. PCGS has graded no coins in higher numeric grades (10/15). NGC ID# 22DN, PCGS# 2674

3602 1942-D MS67+ Red PCGS. The original red surfaces of this high-end Superb Gem are impeccably preserved, with vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is tremendous. PCGS has graded only two numerically finer examples (10/15). NGC ID# 22E2, PCGS# 2707

3603 1942-D MS67+ Red PCGS. CAC. The original red surfaces of this high-end Superb Gem are impeccably preserved, with vibrant mint luster on both sides. The design elements are well-detailed and eye appeal is terrific. PCGS has graded only two numerically finer examples (10/15). NGC ID# 22E2, PCGS# 2707

3604 1942-S MS67+ Red PCGS. This high-end Superb Gem displays original red surfaces with no visible flaws and outstanding eye appeal. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded just two numerically finer examples (10/15). NGC ID# 22E3, PCGS# 2710

3605 1944-D MS67+ Red PCGS. CAC. A high-end Superb Gem Lincoln cent, with sharply detailed design elements and blazing original red surfaces that are impeccably preserved. PCGS has graded only two numerically finer examples (10/15). NGC ID# 22EC, PCGS# 2725

3606 1944-D/S FS-512, MS66 Red PCGS. A well-detailed Premium Gem, with vibrant mint luster and well-preserved original red surfaces. The remnants of an undertype S are evident beneath the primary mintmark, identifying the popular *Cherrypickers* variety. Population: 6 in 66 Red, 0 finer (10/15). NGC ID# 2734, PCGS# 37837

3607 1946 MS67 Red PCGS. This glittering Registry coin is tied for the finest certified by either service. Vibrant, frosty surfaces display glowing coppery-orange hues with deeper cherry-red over the right obverse margin. A peppering of microscopic specks are discernible only with 10x magnification. Population: 26 in 67 Red, 0 finer (10/15). NGC ID# 22EK, PCGS# 2743

3608 1946 MS67 Red PCGS. A sharply detailed Superb Gem Lincoln cent, with impeccably preserved original red surfaces and vibrant mint luster on both sides. Terrific eye appeal and Registry Set quality. Population: 26 in 67 Red, 0 finer (10/15). NGC ID# 22EK, PCGS# 2743

3609 1950 MS67 Red PCGS. A spectacular Superb Gem with sharply detailed design elements and vibrant mint luster to complement the virtually flawless original red surfaces. Population: 39 in 67 (3 in 67+) Red, 0 finer (10/15). NGC ID# 22LA, PCGS# 2779

3610 1951 MS67 Red PCGS. Remarkably few 1951 Lincoln cents have been certified in Superb Gem Red condition. This rare exception is boldly struck and satiny. The central regions show medium coppery-gold luster, but the peripheries are more vividly toned in crimson, amber, and olive rings. Population: 25 in 67 Red, 0 finer (10/15). NGC ID# 22F3, PCGS# 2788

3611 1952 MS67 Red PCGS. An exemplary peach-red representative. Lustrous and virtually devoid of post-strike contact. A couple of minuscule flecks on the portrait preclude perfection. Population: 17 in 67 (1 in 67+) Red, 0 finer (9/15). NGC ID# 22F6, PCGS# 2797

**1953-S Lincoln Cent, MS67+ Red
Paramount Registry Coin**

- 3612 1953-S MS67+ Red PCGS. CAC.** PCGS-certified Superb Gem examples of this San Francisco issue are in and of themselves elusive, but this remarkable coin has the added distinction of being one of just five Plus-designated MS67 Reds at that service with none finer (10/15). Thick, frosty luster glows over each side in coppery-red and lilac-gold hues, while the mint-fresh surfaces are essentially free of flaws. CAC-endorsed for quality and eye appeal, both of which are abundant. NGC ID# 22FB, PCGS# 2812
- 3613 1955 MS67 Red PCGS.** This splendid Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces with vibrant mint luster and tremendous eye appeal. Population: 34 in 67 Red, 0 finer (10/15). NGC ID# 22FF, PCGS# 2824
- 3614 1955 Doubled Die Obverse, FS-101, AU53 PCGS.** Hints of iridescent luster enliven the chestnut-brown surfaces of the briefly circulated 1955 doubled die cent. The strike is exact, and a small area of carbon near the ES in STATES is the only notable surface imperfection. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3615 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** Although deeply toned in chocolate-brown hues, this Choice AU doubled die cent shows only trivial wear. The motifs are boldly rendered and the surfaces display smooth, problem-free patina. The 1955 doubled die obverse is one of the most sought-after Mint errors of the 20th century. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3616 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS.** Mint red lingers near the rims, and also outlines the portrait and fills the date and LIBERTY. The remainder of this coruscating Choice cent is olive-brown. A lens reveals only inconsequential contact. Scattered minor carbon does not deny the eye appeal. *Ex: Long Beach Signature (Heritage, 2/2000), lot 5376.* NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826
- 3617 1958-D MS67+ Red PCGS. CAC.** The original red surfaces of this high-end Superb Gem are impeccably preserved, with radiant mint luster on both sides. The design elements are well-detailed and eye appeal is exceptional. No finer coins have been graded at either of the leading grading services (10/15). NGC ID# 22FR, PCGS# 2851

**1971-S Cent, MS67 Red
Registry Set Contender**

- 3618 1971-S MS67 Red PCGS.** A Registry-grade example of this copper Memorial Reverse issue, showing bold motifs and satiny golden-orange luster. There are no significant abrasions, and a few trivial flyspecks do not detract, even under a loupe. Among the finest 1971-S Lincoln cents certified. Population: 16 in 67 (3 in 67+) Red, 0 finer (10/15). NGC ID# 22GS, PCGS# 2947
- 3619 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS.** Radiant, full red surfaces are seen on each side of this modern but dramatic doubled die error. No obvious evidence of spotting is seen on either side of this high-end coin. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950
- 3620 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS.** *Cherry-pickers'* lists nine different doubled die obverse varieties for the 1972 cent, but FS-101 is by far the strongest, and is also the variety listed in the *Guide Book*. The present peach-red Premium Gem has booming luster and a bold strike. A hint of lime-green is noted near the ICA in AMERICA. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950
- 3621 1972 Doubled Die Obverse, FS-101, MS66+ Red PCGS.** Rose-pink, copper-red, and amber-orange hues intermingle over each side of this high-end Premium Gem example. The strike is sharply rendered, and the frosty surfaces are free of mentionable abrasions. Eye appeal is exceptional. This *Guide Book* variety is one of the most sought-after in the Lincoln cent series behind the 1955 doubled die. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

PROOF LINCOLN CENTS

- 3622 1909 Lincoln PR65+ Red PCGS.** A popular first-year matte proof, with fully struck design elements and well-preserved original red surfaces. From a mintage of 2,198 pieces. Population: 58 in 65 (1 in 65+) Red, 52 finer (10/15). NGC ID# 22KS, PCGS# 3305
- 3623 1910 PR65 Red PCGS. CAC.** Matte proof surfaces emit generous sun-gold luster but with blushes of rose and lilac throughout. The strike is bold and the rims are broadly squared. A few scattered specks are not out of line for the grade. Population: 39 in 65 Red, 28 finer (10/15). NGC ID# 22KT, PCGS# 3308
- 3624 1915 PR64 Red PCGS.** From a meager matte proof mintage of 1,150 pieces, this impressive Choice example displays fully detailed design elements and lightly marked original red surfaces that show a few hints of crimson. Population: 17 in 64 Red, 26 finer (10/15). NGC ID# 22KY, PCGS# 3323
- 3625 1938 PR67 Red PCGS. CAC.** Razor-sharp definition is evident on all design elements of this spectacular Superb Gem and the original red surfaces show no visible distractions. Deeply mirrored fields add to the outstanding visual appeal. Population: 35 in 67 Red, 0 finer (10/15). NGC ID# 22L5, PCGS# 3341

3626 1942 PR66 Red PCGS. CAC. A delightful Premium Gem Lincoln cent, with sharply detailed design elements and impeccably preserved original red surfaces that show deeply mirrored fields. Eye appeal is incredible. PCGS has graded only two numerically finer examples (10/15). NGC ID# 22L9, PCGS# 3353

3627 1952 PR67 Red Cameo PCGS Secure. A magnificent Superb Gem, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields and blazing original red surfaces that are impeccably preserved. Population: 25 in 67 (1 in 67+) Cameo, 2 finer (10/15). NGC ID# 22LC, PCGS# 83365

3628 1956 PR68 Ultra Cameo NGC. A magnificent orange-gold cent. Radiant motifs rise above glassy fields. Carbon and contact are essentially absent. Only a pair of examples are certified finer. Census: 10 in 68 Ultra Cameo, 2 finer (10/15). NGC ID# 22LG, PCGS# 93377

1990 No S Cent, FS-101 PR66 Red Deep Cameo Key to Proof Series

3629 1990 No S, FS-101, PR66 Red Deep Cameo PCGS. Key to a set of proof Lincoln Memorial cents, the proof 1990 No S is rare relative to the millions of collectors of the series. Many examples were left too long in their issued Mint holders, which trapped humidity. But the present Premium Gem is pristine save for a trio of pinpoint imperfections on the right obverse field. The last of the various proof No S mint errors, since the mintmark shortly thereafter became part of the master die. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

3630 1865 Plain 5 MS65 Red PCGS. A coruscating pumpkin-gold Gem. Devoid of contact, and the strike is sharp except for blending on the wreath periphery. Perusal beneath a loupe reveals inoffensive carbon. Certified in a first generation holder. PCGS# 38249 Base PCGS# 3584

3631 1866 MS65 Red PCGS. An attractive Gem representative with sharply detailed design elements and well-preserved original red surfaces that retain much of their original mint luster. Population: 53 in 65 (2 in 65+) Red, 8 finer (10/15). NGC ID# 274R, PCGS# 3590

3632 1869 MS65 Red and Brown NGC. Mintages of the two cent piece steadily declined in the years following its 1864 introduction. The 1869 is scarce as a Gem, although more available than its few successors. This satiny, unmarked, and sharply struck example is generally brick-red but displays powder-blue patina near the ST in TRUST. NGC ID# 22ND, PCGS# 3604

PROOF TWO CENT PIECES

3633 1871 PR65 Red and Brown PCGS. CAC. A predominantly orange-gold Gem, although the high points and the central reverse field are steel-blue. The surfaces are free from contact and show a few tiny flecks across the reverse periphery. TRUST is die doubled, as seen on all 1871 proofs. NGC ID# 22NH, PCGS# 3646

3634 1872 PR65 Red and Brown PCGS. An eye-appealing alternative to the conditionally rare circulation strike, this Gem proof 1872 two cent piece displays needle-sharp motifs and moderately reflective fields. Bronze-gold luster glows beneath soft burgundy-brown overtones, giving the surfaces a pleasant Red and Brown appearance. PCGS lists 23 pieces finer within this color category (10/15). NGC ID# 2752, PCGS# 3649

1872 Two Cent Piece, PR66 Red and Brown Intense, Vivid Coloration

3635 1872 PR66 Red and Brown PCGS. Vivid sun-gold, violet, and electric-blue hues form swirling patterns over each side of this incredibly toned Premium Gem Red and Brown proof. The strike is bold, and any trivial hairlines that might limit the grade are fully masked by the staggering eye appeal. Due to the scarcity in high grade of its circulation-strike counterpart, the proof 1872 two cent piece is ideal for date representation. Population: 22 in 66 Red and Brown, 1 finer (10/15). NGC ID# 2752, PCGS# 3649

1873 Two Cent Piece, PR64 Red Earlier Closed 3 Variety

3636 1873 Closed 3 PR64 Red PCGS. CAC. The final-year two cent issue, struck in proof format only. This Closed 3 example is well-preserved and delightfully colorful, showing lavender and coppery-red interiors surrounded by yellow-gold and mint-green peripheries. The strike is boldly executed, and only a few minor specks are present. Population: 24 in 64 Red, 33 finer (10/15). NGC ID# 5L57, PCGS# 3653

THREE CENT SILVER

3637 1851 MS66+ PCGS. Traces of soft champagne toning accent frosty silver surfaces on this high-end first-year type coin. Abrasions are seemingly nonexistent and were it not for faint roller marks over the central high points, this 1851 silver three cent might have garnered a full Superb Gem grade. Nonetheless, only 18 examples are finer at PCGS (10/15). NGC ID# 22YX, PCGS# 3664

3638 1851 MS66 PCGS. CAC. A 5+ million-piece mintage launched the silver three cent piece to an auspicious beginning, but after the first three years both the popularity and the mintages waned. This Premium Gem example of the first-year issue is well-preserved and untoned, with bright silver luster and thick mint frost. The issue is available at this grade, yet rare at the next level with PCGS reporting just 18 numerically finer pieces (10/15). NGC ID# 22YX, PCGS# 3664

**1851 Three Cent Silver, MS67
Ideal First-Year Type Coin**

3639 1851 MS67 PCGS. A spectacular Superb Gem from the first year of the denomination, with sharply detailed design elements and vibrant mint luster throughout. Interesting clash marks show on both sides, but the surfaces are impeccably preserved and eye appeal is terrific. Population: 18 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 22YX, PCGS# 3664

3640 1851-O MS64 PCGS. CAC. An attractive Choice example of this first-year branch mint type coin, with lightly marked lustrous surfaces and well-detailed design elements. Just a touch of softness on the shield outline. PCGS has graded 77 numerically finer examples (10/15). NGC ID# 22YY, PCGS# 3665

3641 1852 MS66 NGC. Immaculate surfaces are aglow with frosty champagne-tinted luster on this Premium Gem 1852 silver three cent. The highest points of the shield are a trifle indistinct, mirroring some faint roller marks on the reverse Roman numerals. The peripheral stars are sharp. NGC records 20 finer submissions (11/15). NGC ID# 22YZ, PCGS# 3666

3642 1855 MS63 PCGS. CAC. The obverse of this impressive Select specimen is sharply detailed but the reverse is just a little softer, with some interesting clash marks visible on close inspection. The surfaces are lightly toned in shades of greenish-gold and lavender-gray, with a few minor signs of contact. Population: 19 in 63, 67 finer (10/15). NGC ID# 22Z4, PCGS# 3671

3643 1858 MS65 NGC. This patinated Gem exhibits an unusually bold shield and star for the type, with frosty original luster that highlights mottled shades of amber, blue, and sun-gold as it cartwheels beneath a light. Close examination fails to discern any mentionable abrasions. Census: 49 in 65, 36 finer (10/15). NGC ID# 22Z7, PCGS# 3674

3644 1862 MS66 PCGS. Premium Gem is the finest grade likely to be encountered; PCGS reports only 15 pieces finer (10/15). Reddish-tan and aqua-green patination reside on the lustrous surfaces that show the typical weakness in the centers. A few small toning spots are visible over each side. The date and part of the obverse legend are strike-doubled. NGC ID# 22ZB, PCGS# 3680

3645 1862 MS66 PCGS. This pristine Premium Gem is mostly stone-gray but has a blush of light lavender toning on the reverse and a few rose freckles on the left obverse. The centers are incompletely brought up. Struck from clashed dies, and encapsulated in a green label holder. Ex: *FUN Signature (Heritage, 1/2008), lot 584; Long Beach Signature (Heritage, 6/2013), lot 3098.* NGC ID# 22ZB, PCGS# 3680

**1866 Three Cent Silver, MS65
Uncommonly Bold Detail**

3646 1866 MS65 PCGS. CAC. A better date, boasting a scant mintage of 22,000 pieces. This 1866 silver three cent is conditionally rare and beautifully preserved with ocean-blue and lavender toning over semiprooflike surfaces. The strike is razor-sharp on the shield, arrows, and olive leaves, while prominent clash marks appear in the fields. Population: 11 in 65, 22 finer (10/15). NGC ID# 22NK, PCGS# 3686

PROOF THREE CENT SILVER

3647 1859 PR64+ NGC. This high-end Choice specimen exhibits bold design elements, as expected, and a few clash marks on the central reverse. Shades of golden-brown, lavender, and violet toning enhance the well-preserved surfaces, with reflective fields underneath. Census: 44 in 64 (2 in 64+, 1 in 64 ★), 34 finer (10/15). NGC ID# 27C6, PCGS# 3708

**1865 Three Cent Silver, PR66
Sharp, Struck From Fresh Dies**

3648 1865 PR66 PCGS. CAC. Due to the rarity of high-grade circulation strikes, the proof 1865 silver three cent is a suitable choice for date set purposes. This deeply mirrored Premium Gem shows a hint of field-device contrast, but deep aquamarine and lavender-gold toning over each side precludes a Cameo designation. This piece is sharply struck and free of distractions. Population: 19 in 66 (1 in 66+), 0 finer (10/15). NGC ID# 27CB, PCGS# 3715

3649 1869 PR65 PCGS. CAC. Although occasionally seen in lower grades, the proof 1869 three cent silver becomes scarce in Gem or better condition. This piece is boldly struck with glassy mirrors and rich toning. The obverse displays deep ocean-blue, violet, and mint-green, while the reverse shows similar hues around the periphery with a warm golden interior. Population: 35 in 65, 22 finer (10/15). NGC ID# 22ZR, PCGS# 3719

THREE CENT NICKELS

3650 1873 Open 3 MS65 NGC. The 1873 Open 3 is the only Guide Book issue of the series unavailable in proof format. As such, it is elusive in Gem quality. The present satiny example displays variegated silver-gray and autumn-gold toning. The strike is good, and the fields exhibit only a double set of clash marks. Census: 9 in 65, 3 finer (10/15). NGC ID# 22NR, PCGS# 3740

**1876 Three Cent Nickel, MS66
Rare This Fine**

- 3651 1876 MS66 PCGS.** This issue's limited 162,000-coin mintage spurs its scarcity in the finer Mint State grades. This high-end example displays sharp details, with satiny luster shining through just a blush of light golden toning. A few tiny ticks in the field below STATES appear to be the only discernible surface flaws. Population: 11 in 66, 0 finer (10/15). NGC ID# 275A, PCGS# 3744

- 3652 1879 MS66 PCGS. CAC.** A conditionally scarce Premium Gem example of this slightly better three cent nickel issue, surviving from a small 38,000-coin mintage. Vibrant luster and semiprooflike mirroring in the fields showcase well-struck design elements amid nickel-gray toning. Population: 38 in 66, 10 finer (10/15). NGC ID# 275Z, PCGS# 3747

**1884 Nickel Three Cent, MS61
Pleasing Mint State Example**

- 3653 1884 MS61 ANACS.** Although the 1884 three cent nickel's 1,700-coin mintage is slightly higher than that of its 1885 counterpart (1,000 pieces), the certified population for this date is actually somewhat lower overall. This Mint State example is sharply defined and displays soft golden-gray luster. Trivial marks on Liberty's cheek appear to be what limit the grade, but these have little impact on the eye appeal. NGC ID# 2766, PCGS# 3752

- 3654 1888 MS66 PCGS. CAC.** A series of radial die cracks intersect the wreath from various points around the reverse rim, adding interest to the lustrous and sharply struck motifs. The obverse displays equally well-preserved, frosty surfaces with eye appeal worthy of the Premium Gem status and the accompanying CAC endorsement. While PCGS reports 42 numerically finer coins, this outstanding untuned MS66 will be difficult to exceed for high quality. NGC ID# 275H, PCGS# 3757

PROOF THREE CENT NICKELS

- 3655 1866 PR64 Cameo PCGS.** Mislabelled by PCGS as a 3CS. The reflective fields contrast with the frosted devices, giving the present coin enough contrast to earn the desirable Cameo designation. Scattered flyspecks on the obverse and some faint lines on Liberty's cheek account for the near-Gem grade. Incorrectly described by PCGS as a Three Cent Silver on the older blue-label holder. Ex: Long Beach Signature (Heritage, 2/2006), lot 425. NGC ID# 275L, PCGS# 83762

**1868 Three Cent Nickel, PR66 Ultra Cameo
Full Strike, Stark Contrast**

- 3656 1868 PR66 Ultra Cameo NGC.** Ultra Cameo examples of this early-series nickel three cent proof are rarely seen in any grade. The present Premium Gem representative is an impressive proof with stark white-on-black contrast and virtually brilliant surfaces. The frosty design elements are fully struck and are free of the heavy die polishing that affects later-die-state pieces. Census: 8 in 66 Ultra Cameo, 3 finer (10/15). NGC ID# 3L2N, PCGS# 93764

- 3657 1869 PR66 PCGS.** At least 600 proof three cent nickels were estimated to have been struck in 1869, with most survivors grading no finer than PR65. Gold-tan patina embraces this Premium Gem that exhibits sharply struck design elements. The surfaces have been well-cared for. Population: 10 in 66, 1 finer (10/15). NGC ID# 275P, PCGS# 3765

- 3658 1871 PR66+ NGC.** A charming stone-white specimen that exhibits faint glimpses of straw-gold toning. The strike is precise, and the imperfection is a fleck or two near the outer denominational columns. Struck slightly off center toward 9 o'clock, affecting only the width of the rim. NGC ID# 275S, PCGS# 3767

- 3659 1873 Closed 3 PR66+ Cameo NGC.** A nicely mirrored proof representative with nearly brilliant and minutely granular surfaces. The strike is bold save for Liberty's shoulder curl. The dies were lapped, attenuating the eye socket and many of the leaves in the wreath. NGC ID# 275U, PCGS# 83769

**1877 Three Cent Nickel, PR66 Cameo
Bold Detail and Contrast**

- 3660 1877 PR66 Cameo NGC.** Only 900 pieces were struck of this elusive issue, all proofs. As a result, high-grade examples are very popular, and a cameo finish adds even more to the desirability of this important issue. This piece is very deeply mirrored (not all are), and the devices are heavily frosted. Brilliant throughout and very flashy with problem-free surfaces. Census: 62 in 66 Cameo (2 in 66+ Cameo, 5 in 66 ★ Cameo), 27 finer (9/15). Ex: ANA Signature (Heritage, 3/2003), lot 5320. NGC ID# 275X, PCGS# 83773

- 3661 1881 PR67 Cameo PCGS. CAC.** Lightly toned in attractive shades of greenish-gold, this delightful Superb Gem offers sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. Population: 31 in 67 Cameo, 3 finer (10/15). NGC ID# 2763, PCGS# 83777

3662 1885 PR67 Cameo NGC. CAC. The sharply struck and luminous devices are accompanied by smooth and satiny fields. A strong loupe fails to locate any imperfections. A low mintage date. Census: 13 in 67 Cameo (1 in 67 ★ Cameo), 2 finer (10/15). NGC ID# 2767, PCGS# 83781

JEFFERSON NICKELS

3663 1939 Doubled Monticello, FS-801, MS65 PCGS. CAC. Broad doubling appears at MONTICELLO and FIVE CENTS, making the FS-801 variety one of the most dramatic and desirable die varieties in the Jefferson series. This Gem is a diagnostically superior example of the variety, with strong doubling combined with great eye appeal and lustrous, bluish-gray patina. CAC endorsed. NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

3664 1939-D MS66 PCGS. Reverse of 1938. The wavy steps on Monticello identify the less available Reverse of 1938. This delightful Premium Gem offers well-preserved lustrous surfaces and sharply detailed design elements with full steps on Monticello. Population: 52 in 66 (3 in 66+), 5 finer (10/15). NGC ID# 22T9, PCGS# 84005

1941 Nickel, MS67+ Full Steps Among the Finest Certified

3665 1941 MS67+ Full Steps PCGS. The 1941 Jefferson nickel is scarcely seen in Superb Gem condition, with Full Steps examples being the most highly sought-after among Registry collectors. This Plus-designated representative is among the finest certified. The step detail is impressively sharp, and the virtually immaculate surfaces display smooth, satiny luster with a hint of pastel toning over nickel-gray patina. Population: 33 in 67 (3 in 67+) Full Steps, 0 finer (10/15). NGC ID# 22TG, PCGS# 84010

3666 1942-D MS67+ Full Steps PCGS. This high-end Superb Gem displays well-detailed design elements, with Full Steps definition on Monticello. The virtually pristine surfaces radiate vibrant mint luster and show highlights of greenish-gold toning. Population: 63 in 67 (3 in 67+), 0 finer (10/15). NGC ID# 22TL, PCGS# 84014

3667 1943-P MS67+ PCGS. Intense, frosty luster rolls over nearly pristine surfaces on this remarkably attractive Registry coin. The interiors display soft champagne and ice-blue hues, while the peripheries show more vivid yellow-gold, mint-green, and lavender-rose coloration. The strike is bold save for on the steps, which show mild incompleteness. This is one of only three Plus-designated MS67 representatives at PCGS and a single MS68 coin is finer (10/15). NGC ID# 22TP, PCGS# 4018

3668 1943-D MS67+ Full Steps PCGS. A Registry-grade Full Steps example of this Denver war nickel issue. The satiny luster is virtually untouched save for beautiful pastel hues that grace each side. The strike is razor-sharp and the eye appeal is exceptional. PCGS lists three finer representatives (10/15). NGC ID# 22TS, PCGS# 84020

3669 1944-P MS67 Full Steps PCGS. Mint-gold and champagne hues encompass much of each side of this Superb Gem Registry coin, visiting occasional tinges of lavender and peach. Bold central devices complement a lack of bothersome abrasions, giving this piece outstanding eye appeal. Population: 19 in 67 (2 in 67+) Full Steps, 0 finer (9/15). NGC ID# 22TU, PCGS# 84022

3670 1944-P MS67 Full Steps PCGS. An immaculately preserved war nickel, this 1944-P Jefferson is vibrantly frosted with soft champagne toning over each side. The steps of Monticello are bold, and there are no bothersome abrasions. Among the finest certified, ideal for Registry purposes. Population: 19 in 67 (2 in 67+) Full Steps, 0 finer (9/15). NGC ID# 22TU, PCGS# 84022

3671 1946-D D Over Horizontal D, FS-501, MS66 PCGS. This popular *Cherrypickers'* variety shows the mintmark punched horizontally and then corrected with a second impression. This Premium Gem example is among the finer pieces certified. Vibrant surfaces glow in sun-gold, lavender, and blue-gray hues. The design elements are boldly struck, including the steps of Monticello, although a few scattered ticks are observed. NGC ID# 22U3, PCGS# 38507 Base PCGS# 94029

3672 1949 MS65 Full Steps PCGS. A sharply detailed Gem representative, with the Full Steps designation, this coin offers well-preserved lustrous surfaces with highlights of greenish-gold toning. Population: 17 in 65, 1 finer (10/15). NGC ID# 22UB, PCGS# 84037

3673 1954-S MS64 Full Steps PCGS. In 2002, Jefferson nickel specialist Bernard Nagengast estimated that only one out of 3,000 1954-S nickels exhibits five steps. Although struck from a long-in-use reverse die, the steps show pleasing detail, and the delicate powder-blue and straw-gold toning is also attractive. Population: 15 in 64 Full Steps, 9 finer (9/15). NGC ID# 22UU, PCGS# 84054

3674 1954-S MS64 Full Steps PCGS. The 1954-S is rarely seen with Full Steps definition, being among the more poorly produced issues from this decade. The present coin displays satiny luster shining through nickel-gray toning. Considerable die fatigue is evident, although the steps are nonetheless well-defined. Population: 17 in 64 Full Steps, 9 finer (9/15). NGC ID# 22UU, PCGS# 84054

PROOF JEFFERSON NICKELS

1942-P Type Two Nickel, PR66 Cameo Extremely Rare in Cameo Grades

3675 1942-P Type 2 PR66 Cameo PCGS Secure. CAC. Only a handful of proof 1942-P war nickels survive with cameo contrast, this Premium Gem among them. The strike is bold, and the watery fields are seemingly pristine. Soft champagne toning emerges into iridescent lavender around the peripheries, delivering exceptional eye appeal. Population: 6 in 66 Cameo, 2 finer (10/15). NGC ID# 27A4, PCGS# 84180

**1952 Nickel, PR67
Rare Deep Cameo Example**

3676 1952 PR67 Deep Cameo PCGS. This Jefferson nickel proof issue is readily obtainable in all grades in non-Cameo and Cameo format. However, all Deep Cameo coins are very rare. There are merely 20 Deep / Ultra Cameo grading events at PCGS and NGC combined despite a generous mintage of nearly 82,000 proofs. Bold contrast and razor-sharp definition typify this Superb Gem proof. Light dusky patina appears over each side. Housed in a green label holder. Population: 11 in 67 (2 in 67+) Deep Cameo, 3 finer (10/15). NGC ID# 27A6, PCGS# 94184

3677 1971 No S PR68 ★ NGC. A rare No S example of the 1971 proof Jefferson nickel, a major modern error. This incredible specimen offers fully detailed design elements and deeply reflective fields, with no visible surface flaws. Census: 7 in 68 (1 in 68 ★), 5 finer (10/15). NGC ID# 22YN, PCGS# 4204

MERCURY DIMES

3678 1916-D VG10 PCGS. A pleasing VG10 example of this low-mintage series key. Considerable wear shows on the lightly abraded silver-gray surfaces, but about half the sticks in the fasces remain clear. NGC ID# 23GY, PCGS# 4906

3679 1916-D — Cleaning — PCGS Genuine. VF Details. Silver-gray surfaces show deeper tones around the raised devices. Hairlines are visible with a glass, but they are not overly significant at this midlevel grade. The smooth surfaces and motifs retain considerable appeal despite the cleaning. NGC ID# 23GY, PCGS# 4906

3680 1917-S MS65 Full Bands PCGS. A sharply detailed Gem, with full bands on the fasces and attractive shades of blue, gray, and champagne-gold toning on the obverse. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 23H4, PCGS# 4915

3681 1917-S MS66 Full Bands PCGS. This spectacular Premium Gem exhibits full bands on the fasces, but just a touch of softness shows on some of the peripheral legends. The well-preserved, lustrous surfaces are lightly toned in shades of champagne-gold, with some bright specks of die polish in the left obverse field. Population: 66 in 66 (1 in 66+) Full Bands, 11 finer (10/15). NGC ID# 23H4, PCGS# 4915

3682 1917-S MS66 Full Bands PCGS. CAC. This CAC-endorsed Premium Gem 1917-S dime displays mattelike luster cast in champagne and warm olive-gold hues with slivers of blue, violet, and plum in the peripheral regions. The execution of the motifs is exemplary, and the surfaces are free of bothersome abrasions. With Full Bands, this early San Francisco issue is scarce so well preserved. Population: 64 in 66 (1 in 66+) Full Bands, 11 finer (9/15). NGC ID# 23H4, PCGS# 4915

3683 1918 MS65 Full Bands PCGS. A charming Gem example of this early series issue, with well-detailed design elements and full split bands on the fasces. The lightly marked surfaces are brightly lustrous, under shades of pale gold toning. PCGS has graded 49 numerically finer examples (10/15). NGC ID# 23H5, PCGS# 4917

3684 1918-S MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements, with just a touch of softness on the middle bands. The well-preserved, lustrous surfaces radiate vibrant mint luster, with a few traces of greenish-gold toning. Population: 20 in 66 (3 in 66+), 1 finer (10/15). NGC ID# 23H7, PCGS# 4920

3685 1919 MS66+ Full Bands PCGS. CAC. The mostly brilliant obverse of this boldly defined high-end Premium Gem exhibits splashes of pastel gold toning. The reverse displays vivid gold and pale blue. The Plus designation is an important confirmation of quality, bolstered by CAC endorsement. Population: 2 in 66+ Full Bands, 15 finer (10/15). NGC ID# 23H8, PCGS# 4923

3686 1925 MS67 Full Bands PCGS. Narrow streaks of tan-brown toning overlies otherwise brilliant surfaces. Lustrous and splendidly preserved. The centers are fully struck and the borders show only minor blending. Population: 26 in 67 Full Bands, 3 finer (10/15). Ex: Long Beach Signature (Heritage, 6/2010), lot 934, which realized \$2,415. NGC ID# 23HM, PCGS# 4949

**1925-D Dime, MS65 Full Bands
Lustrous, Original Patina**

3687 1925-D MS65 Full Bands PCGS. The 1925-D Mercury dime is difficult to acquire with Full Bands, particularly at the Gem grade level. This piece is uncommonly bold throughout the interiors, even while the peripheral legends are slightly weak near the rims. Light champagne toning encompasses much of each side, although a crescent of crimson and violet appears along the lower-left obverse border. Population: 35 in 65 (1 in 65+) Full Bands, 29 finer (10/15). NGC ID# 23HN, PCGS# 4951

3688 1925-S MS64 Full Bands PCGS. Sharp central detail supports the Full Bands designation on this Choice 1925-S Mercury dime, even while the outer peripheries are a trifle indistinct. Satiny luster yields soft lavender-gold toning with faint olive specks scattered about. A few trivial surface grazes prevent Gem classification. NGC ID# 5LX3, PCGS# 4953

3689 1926-D MS65 Full Bands PCGS. Both sides are primarily silver-white, but tinges of russet and lavender appear on both sides near the rim. The bold strike encompasses not only the all-important split bands, but most of the devices throughout, save for a hint of softness on the E of ONE. Population: 84 in 65 Full Bands, 37 finer (10/15). NGC ID# 23HS, PCGS# 4957

1926-S Dime, MS65 Full Bands
Scarce so Well-Struck

3690 1926-S MS65 Full Bands NGC. Splendidly original, this coin combines a partial overlay of antique-golden toning on the obverse with a much lighter reverse. Both sides are uncommonly well-defined for this otherwise poorly produced branch mint issue. This is a smooth, frosty Gem that should have little trouble finding a new home in an advanced Mercury dime collection. Census: 7 in 65 Full Bands, 2 finer (10/15).
Ex: *Long Beach Signature* (Heritage, 6/2004), lot 8126; *Long Beach Signature* (Heritage, 9/2004), lot 6241. NGC ID# 5LX7, PCGS# 4959

3691 1928-S MS65 Full Bands PCGS. Small S. A honey-gold Gem that boasts booming luster and a bold strike. The fields appear pristine, and the portrait is smooth save for a graze on the cheek. A better San Francisco issue. Population: 65 in 65 Full Bands, 41 finer (10/15). NGC ID# 23HZ, PCGS# 4971

3692 1929-D MS67 Full Bands PCGS. CAC. This Superb Gem 1929-D dime showcases beautiful lavender and rose-gold hues over much of each side, complemented by tinges of olive and russet at the margins. The strike is bold and the surfaces are immaculate, exhibiting vibrant, frosty luster. Population: 42 in 67 (2 in 67+) Full Bands, 2 finer (9/15). NGC ID# 5LXC, PCGS# 4975

3693 1929-S MS66 Full Bands PCGS. CAC. Butter-gold, lilac-red, olive-gold, and dove-gray enrich this lustrous, sharply struck and splendidly preserved example. The left reverse field exhibits vertical die lines, as made. A lower mintage branch mint issue (4.7 million pieces). The two services report only about 50 Full Bands examples finer (10/15). NGC ID# 23J4, PCGS# 4977

3694 1931-D MS67 Full Bands PCGS. CAC. Dappled golden-brown and jade-green toning embraces the borders of this razor-sharp Superb Gem. Well struck and lustrous with outstanding preservation. Population: 56 in 67 (3 in 67+) Full Bands, 0 finer (10/15). NGC ID# 5BZ4, PCGS# 4985

3695 1934-D MS67 Full Bands PCGS. Splashes of peach-gold, lime-green and ruby-red endow this lustrous and well struck Superb Gem. The fields are pristine and the cheek shows only wispy contact. The first Denver issue since 1931, due to the Great Depression. Population: 50 in 67 (4 in 67+) Full Bands, 0 finer (10/15). NGC ID# 23JB, PCGS# 4991

3696 1936-D MS67+ Full Bands PCGS. Dappled golden-brown toning graces the upper right borders of this otherwise silver-gray Superb Gem. A loupe reveals only trivial obverse grazes, and incompleteness of strike is limited to the margins. Population: 127 in 67 (9 in 67+) Full Bands, 9 finer (9/15). NGC ID# 5C48, PCGS# 5001

1938-D Dime, MS68 Full Bands
Splendid Eye Appeal

3697 1938-D MS68 Full Bands PCGS. The coin is frosty-white except for some free-floating chromatic toning accents — reddish-gold at the bust truncation and forehead, with a burst of rainbow tones beneath AMERICA on the reverse. A pinpoint-sharp strike attends the fasces and portrait as well as all other raised elements except LIB of LIBERTY. No finer-certified pieces exist at either service. Population: 12 in 68 Full Bands, 0 finer (9/15). NGC ID# 3DAC, PCGS# 5013

3698 1942/1 FS-101 AU58 PCGS. A ten-power loupe is not required to see the overdate on the 1942/1 dime. The underdigit 1 is as apparent as the 2, and the variety is listed in the first (1947) edition of the *Guide Book*. An untuned, partly lustrous, and problem-free example. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1942/1-D Dime, FS-101
MS62 Full Bands

3699 1942/1-D FS-101 MS62 Full Bands PCGS. A wisp of straw-gold toning adorns this lustrous and sharply struck key date dime. Unimportant facial contact does not appear to limit the grade. In addition to the overdate feature, IN GOD WE TRUST is lightly die doubled. The 1942/1-D was discovered later than its Philadelphia Mint counterpart, and is scarcer overall. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

3700 1943-D MS68 Full Bands PCGS. Pristine, vibrantly lustrous surfaces showcase fully struck design elements on each side of this high-end Superb Gem, among the finest seen by either service. Tinges of gold and amber appear around the peripheries, while the interiors display traces of champagne and ice-blue color. Population: 30 in 68 (1 in 68+) Full Bands, 0 finer (9/15). NGC ID# 23K9, PCGS# 5047

3701 1943-D MS68 Full Bands PCGS. A mixture of lemon-yellow and orange-gold toning forms a thin band at the outer borders on both sides of this exceptional MS68 Denver dime. Satin-smooth surfaces emit vibrant mint luster, and the strike is pinpoint sharp throughout. Neither PCGS nor NGC has certified a numerically finer example. Population: 33 in 68 (1 in 68+) Full Bands, 0 finer (10/15). NGC ID# 23K9, PCGS# 5047

3702 1943-S MS67+ Full Bands PCGS. CAC. Large S. Apricot-gold, jade-green, and stone-gray toning endows the obverse of this well struck and unabraded Superb Gem. The reverse is predominantly olive-gray but has a sun-gold margin. NGC ID# 23KA, PCGS# 5049

3703 1944-S MS67+ Full Bands PCGS. CAC. Large S. A hint of golden patina adorns this lustrous wartime dime. The strike is sharp on the major devices, while the peripheral legends exhibit fadeaway near the rims. Contact is confined to a pair of thin lines near the eye. NGC ID# 5A96, PCGS# 5055

PROOF MERCURY DIMES

3704 1936 PR66 PCGS. This splendid Premium Gem exhibits needle-sharp definition on all design elements and the fields are deeply reflective, with no mentionable distractions. PCGS has graded 70 numerically finer examples (10/15). NGC ID# 27DG, PCGS# 5071

1936 Dime, Lightly Toned PR67
One Coin Finer at PCGS

3705 1936 PR67 PCGS. CAC. The highly collectible set of proof Mercury dimes consists of just seven coins — an achievable set to assemble in Superb Gem condition. The first-year 1936 issue is the lowest proof mintage of the set at just 4,130 pieces struck. This delightfully toned Super Gem displays violet and gold highlights on the winged portrait, with lilac-toned, mirrored fields and devices. The reverse gleams with a mixture of lemon-gold and lilac hues. The strike, as expected, is razor-sharp. Just one proof is numerically finer at PCGS. Population: 69 in 67 (2 in 67+), 1 finer (10/15). NGC ID# 27DG, PCGS# 5071

3706 1940 PR68 NGC. A beautifully toned specimen with orange-gold, cherry-red, and aquamarine obverse patina. The reverse toning is also attractive, and features caramel-gold and sky-blue shades. Census: 45 in 68 (5 in 68 ★), 2 finer (10/15). NGC ID# 27DL, PCGS# 5075

ROOSEVELT DIMES

1952-S Dime, MS68 Full Torch
Tied for Finest Known

3707 1952-S MS68 Full Torch PCGS. An incredible Condition Census example, unsurpassed for Registry Set potential. This boldly struck, frosty Superb Gem is brilliant in the centers, ceding to ice-blue in the margins, and displaying vivid crimson, gold, and forest-green around the peripheries. Population: 4 in 68 Full Bands, 0 finer (10/15). NGC ID# 23L7, PCGS# 85102

3708 1983-P MS68 Full Torch NGC. The present lot is the single finest certified 1983-P dime, the sole example to attain the MS68 Full Torch grade at either NGC or PCGS. Light gold toning visits lustrous and pristine surfaces. The left obverse exhibits a railroad rim, and the reverse rim is broad near 3 o'clock. PCGS# 85164

3709 1984-D MS68 Full Torch PCGS. This stunning Roosevelt displays brilliant silver-white, flawless surfaces. Boldly struck design elements culminate in Full Bands on the reverse torch. One of only two certified in this lofty grade. Population: 1 in 68 Full Bands, 0 finer (10/15). NGC ID# 8TUJ, PCGS# 85167

WASHINGTON QUARTERS

3710 1932-D MS64 PCGS. The 1932-D eclipses the 1932-S as the most challenging date in the Washington quarter series in Uncirculated grades. This Choice key date example features splashes of crimson and russet patina over otherwise satiny, brilliant surfaces. Well-struck without any detracting imperfections. NGC ID# 2448, PCGS# 5791

3711 1932-D MS64 PCGS. The 1932-D Washington quarter is the acknowledged key to the series, from a low mintage of 436,800 pieces. This delightful Choice example exhibits razor-sharp definition on all design elements and the well-preserved surfaces are brightly lustrous, with a few hints of golden-tan and violet toning. NGC ID# 2448, PCGS# 5791

3712 1932-S MS64+ PCGS. CAC. This high-end near-Gem key-date in the Washington quarter series displays freckles of russet color, slightly more prominent on the obverse. Its lustrous surfaces exhibit sharply struck motifs. A few minor obverse ticks barely preclude Gem status. Nevertheless, this piece will stand out in an Uncirculated Washington quarter collection. NGC ID# 2449, PCGS# 5792

1932-S Quarter, MS65
Extremely Rare Any Finer

3713 1932-S MS65 PCGS. A pleasing Gem example of this key Washington quarter issue, showing satiny luster and bold design elements. The obverse displays mottled golden toning, while the reverse is mostly brilliant but with olive-gold around the periphery. Only four MS66 examples are finer at PCGS (10/15). NGC ID# 2449, PCGS# 5792

3714 1935 MS67+ PCGS. CAC. The impeccably preserved surfaces of this high-end Superb Gem are lustrous and lightly toned and the design elements are sharply detailed throughout. PCGS has graded only one numerically finer example (10/15). NGC ID# 244D, PCGS# 5797

3715 1935-D MS67 NGC. Tiny specks of multicolor patina dot the obverse, while the reverse shows more substantial blushes of orange, blue, green, and crimson patina. Each side remains mostly brilliant with satiny luster. Essentially pristine. Census: 16 in 67, 0 finer (10/15). NGC ID# 244E, PCGS# 5798

3716 1936-D MS66 PCGS. CAC. This MS66 1936-D quarter trails 18 Superb Gems at PCGS (10/15), but the eye appeal is in no way subpar. Bold definition characterizes the devices, and seemingly pristine, satiny luster glows beneath soft champagne toning. An outstanding representative of this conditionally better date. NGC ID# 244H, PCGS# 5801

3717 1936-S MS67 PCGS. CAC. Ice-blue and sun-gold endow the obverse, along with a blush of cherry-red near LIBERTY. The reverse is close to brilliant. Lustrous and crisply struck with contact confined to a tick or two on Washington's neck. Population: 47 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 244J, PCGS# 5802

3718 1937-D MS67 PCGS. CAC. Rich powder-blue, lilac-red, and olive-gold toning encompasses coruscating and immaculate surfaces. Less rare than its San Francisco cousin, but nonetheless elusive in the present stellar quality. Population: 62 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 244L, PCGS# 5804

3719 1937-S MS67 NGC. The 1937-S ranks among the lowest mintage issues of the popular Washington quarter series. This fully struck and unmarked Superb Gem displays light sea-green and butter-gold toning. Certified in a former generation holder. Census: 28 in 67, 0 finer (10/15). NGC ID# 244M, PCGS# 5805

1940-D/D Washington Quarter, MS66 Rare Cherrypickers Variety, FS-501

3720 1940-D/D FS-501 MS66 PCGS. Ex: Teich Family Collection. The remnants of a secondary D are seen to the left of the primary mintmark. This feature is most unusual, as the two letters are completely separate, while most repunched mintmarks overlap each other. A sharply detailed Premium Gem, with well-preserved lustrous surfaces and highlights of sea-green and magenta toning. Recent auction appearances for this variety include the MS66 PCGS coin in lot 7688 of the ANA Signature (Heritage, 8/2015), which realized \$2,585. Population (for the variety): 8 in 66 (1 in 66+), 0 finer (10/15)

3721 1943-S Doubled Die Obverse, FS-101, MS64+ PCGS. CAC. All obverse legends are strongly die doubled in a clockwise direction, with the widest spread on TRUST. Lustrous, brilliant, and well preserved. The borders exhibit occasional incompleteness of strike. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

3722 1944-D MS67+ PCGS. Pastel ice-blue and wheat-gold toning accompanies this lustrous and well struck Superb Gem. Pristine aside from a solitary faint diagonal line on the cheek. Population: 114 in 67 (13 in 67+), 2 finer (9/15). NGC ID# 2459, PCGS# 5825

1946 Washington Quarter, MS67+ Front-Running Registry Set Candidate

3723 1946 MS67+ PCGS. CAC. Delicate pastel iridescence melds into a golden hue across the obverse of this high-end Superb Gem quarter. The reverse displays subtle shades of pale blue and lemon-gold. The eagle's left (facing) leg is not quite fully struck up, but the overall quality of this lustrous, satiny coin is beyond reproach. No example is certified numerically finer at either service. Population: 3 in 67+, 0 finer (9/15). NGC ID# 245E, PCGS# 5830

3724 1947-D MS67+ PCGS. CAC. Only a single MS68 coin is finer at PCGS (10/15), giving this Plus-graded Superb Gem a claim in the Condition Census and correspondingly strong appeal for the Registry Set collector. Ice-blue and lavender interiors cede to varying shades of gold and amber around the peripheries. The motifs are boldly rendered, and the frosty luster is uninterrupted by abrasions. NGC ID# 245J, PCGS# 5834

1952 Quarter, Toned MS67+ Immense Registry Potential

3725 1952 MS67+ PCGS. CAC. Mottled toning forms concentric patterns on this high-end Superb Gem, emitting lavender and cool blue hues in the centers with spruce-green, yellow-gold, and amber-red around the peripheries. The strike is bold and the preservation is excellent. This CAC-endorsed 1952 quarter is among the finest in a PCGS holder (10/15), suitable for Registry purposes. NGC ID# 245Z, PCGS# 5849

3726 1953-D MS67 PCGS. CAC. Shades of sea-green, lavender, and amber toning enhance the well-preserved surfaces of this impressive Superb Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster adds to the considerable eye appeal. Population: 30 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 2465, PCGS# 5853

3727 1960 MS67 PCGS. Vivid shades of sea-green, magenta, and amber toning visit the peripheries of this delightful Superb Gem, while the centers remain lustrous and brilliant. The design elements are sharply detailed and no mentionable distractions are evident. Population: 15 in 67, 0 finer (10/15). NGC ID# 246K, PCGS# 5868

1961 Washington Quarter, MS67 Ideal Registry Set Representative

3728 1961 MS67 PCGS. Attractive shades of magenta and sea-green toning visit the impeccably preserved surfaces of this remarkable Superb Gem, with most of the toning on the obverse. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. Population: 7 in 67, 0 finer (10/15). NGC ID# 246M, PCGS# 5870

**1982-P Quarter, MS68
Tied With Two Others for Finest Certified**

- 3729 1982-P MS68 NGC.** The Registry collector's dream coin, this high-end Superb Gem is tied with one other MS68 for the finest 1982-P quarter at NGC, while the comparable grade at PCGS includes only a single additional submission (10/15). Rich, satiny luster glows beneath warm champagne toning and the design elements are boldly rendered. The surfaces are virtually flawless. NGC ID# 247U, PCGS# 5912

PROOF WASHINGTON QUARTERS

- 3730 1938 PR67+ PCGS. CAC.** A fully struck Superb Gem proof with deeply mirrored fields and traces of pastel toning. Close study fails to reveal any distractions on this Registry-grade example. Population: 92 in 67 (4 in 67+), 3 finer (10/15). NGC ID# 27HR, PCGS# 5977
- 3731 1940 PR67+ PCGS. CAC.** A highly attractive color palette of gold-brown, forest-green, and lavender toning endows the lustrous surfaces of this high-end Superb Gem. Sharply struck design features and immaculate preservation further contribute to the coin's eye appeal. PCGS reports a mere two examples finer (10/15). NGC ID# 27HT, PCGS# 5979 Base PCGS# 5972
- 3732 1941 PR67+ PCGS. CAC.** An outstanding Registry-grade example of this proof Washington quarter issue, showing russet and iridescent hues over light golden toning on each side. The strike is sharp, and the mirrored fields are free of marks. PCGS lists five PR68 coins finer (10/15). NGC ID# 27HU, PCGS# 5980
- 3733 1955 PR68 Deep Cameo PCGS.** Sharply struck design elements appear to be suspended over the deep mirrored fields of this magnificent Deep Cameo. Virtually perfect surfaces further contribute to this coin's beautiful eye appeal. Population: 25 in 68 Deep Cameo, 0 finer (10/15). NGC ID# 27HZ, PCGS# 95987

WALKING LIBERTY HALF DOLLARS

- 3734 1916 MS65 PCGS.** This first year Walker claims a relatively low mintage of 608,000 pieces. Lustrous surfaces display russet patina gravitating to the borders, somewhat more extensive and deeper on the obverse. The design features are well-struck, including Liberty's head and branch hand. Both sides are well-preserved. Finer-grade examples are considerably more difficult to locate. NGC ID# 24PL, PCGS# 6566
- 3735 1917 MS65+ PCGS. CAC.** Ruby-red and forest-green fill the peripheries. The fields and devices are silver-gray. Lustrous and nicely struck with minimal contact and exceptional eye appeal. A high-mintage wartime issue, but seldom seen in the present quality. NGC ID# 24PP, PCGS# 6569

**1917-D Half Dollar, MS64+
Obverse Mintmark**

- 3736 1917-D Obverse MS64+ PCGS. CAC.** An exemplary strike defines the relief elements of this high-end near-Gem, while mattelike luster illuminates the minimally abraded surfaces. Both sides display rich original toning: dusky champagne-gray over the interiors with more vivid olive-green, gold, and crimson in the margins. Finer examples of the 1917-D Obverse Mintmark half are infrequently seen. NGC ID# 24PR, PCGS# 6570

- 3737 1917-S Obverse AU53 PCGS.** With a mintage falling short of 1 million coins, the 1917-S Obverse Mintmark half dollar is far scarcer than its Reverse Mintmark counterpart in AU and better grades. This piece shows slight wear over the motifs but retains luster in the fields. Champagne-gray toning overall yield tinges of amber, blue, and olive around the borders. NGC ID# 26G7, PCGS# 6572

- 3738 1917-S Reverse MS62 PCGS.** The strike is a bit blunt at the head and through the centers, but typical for the 1917-S with a Reverse Mintmark. The surfaces are minimally marked with pleasing iridescent toning, where reddish highlights intermingle with satiny mint luster. NGC ID# 24PU, PCGS# 6573

- 3739 1917-S Reverse MS63 PCGS.** An attractive Select specimen, with well-detailed design elements that show a touch of the usual softness on the wreath and eagle's leg, and vibrant mint luster under shades of pale gold and lavender toning. NGC ID# 24PU, PCGS# 6573

- 3740 1917-S Reverse MS63 PCGS.** This attractive Select specimen exhibits a better-than-average strike, with clear separation between Liberty's thumb and fingers on the wreath hand. The lightly marked, lustrous surfaces show a few hints of golden-tan toning. NGC ID# 24PU, PCGS# 6573

1918-D Walker, Lustrous MS63

- 3741 1918-D MS63 PCGS.** A near-brilliant example of this early branch mint Walker, showing frosty luster and lacking any significant abrasions. Trivial strike weakness is seen on Liberty's head and branch hand and the eagle's central feathers, but the eye appeal is yet pleasing. The 1918-D is challenging to locate in Mint State with pleasing luster and detail. NGC ID# 24PW, PCGS# 6575

**1918-S Half Dollar, MS64
Seldom Seen Finer**

- 3742 1918-S MS64 PCGS.** A pleasing example for the Choice grade level, this 1918-S half dollar exhibits frosty, champagne-tinted luster overall and unusually sharp detail on Liberty's head. The thigh and the central eagle's feathers show more of the typical softness. There are no singularly bothersome abrasions. PCGS lists 36 numerically finer representatives (10/15). NGC ID# 24PX, PCGS# 6576

**1918-S Walking Liberty Half, MS64
Seldom Seen Finer**

- 3743 1918-S MS64 PCGS.** Early San Francisco issues in the Walking Liberty half dollar series are often challenging in Gem or better condition, and the 1918-S is no exception. The present near-Gem will be an attractive proposition for the budget-conscious collector. The champagne-toned surfaces are well-preserved and show pleasing, satiny luster. Minor strike weakness on the central high points is as expected for the issue. NGC ID# 24PX, PCGS# 6576

**1918-S Half Dollar, Brilliant MS64
Strong Mint Luster**

- 3744 1918-S MS64 PCGS.** The frosty silver surfaces radiate strong mint luster and the strike is well-defined on this Choice Mint State half. There are no notable marks other than a Mint-related planchet flaw at 3 o'clock on the reverse, but it is tiny and unnoticed if not for some deep toning in its recesses. PCGS reports just 38 numerically finer pieces (10/15). NGC ID# 24PX, PCGS# 6576

**1918-S Half Dollar
Original Near-Gem Surfaces**

- 3745 1918-S MS64 PCGS. CAC.** This lustrous near-Gem half features overt originality combined with nearly mark-free surfaces. The strike is bold at the peripheries but weaker at the centers — a common occurrence for the 1918-S. Deep umber shades occupy areas of the right obverse field and the reverse rims, while gold-tinged, pearlescent silver shades dominate elsewhere. CAC endorsed. Just 36 pieces are numerically finer at PCGS (10/15). NGC ID# 24PX, PCGS# 6576

- 3746 1919-D AU50 PCGS.** Little true wear is present on this About Uncirculated 1919-D half, as most of the central weakness is due to strike deficiency — an often seen characteristic on this issue. Traces of luster remain in the fields beneath golden-gray toning. NGC ID# 24PZ, PCGS# 6578

- 3747 1921 XF40 PCGS.** Most circulated examples of this key Philadelphia issue reside in lower levels, making this XF coin an important opportunity for the collector who finds a Mint State piece to be out of reach. Detail is consistent with the grade, and each side displays dusky golden-gray toning. NGC ID# 24R6, PCGS# 6583

- 3748 1921 — Cleaning — PCGS Genuine. XF Details.** A lightly circulated example of this key Walking Liberty half dollar issue. PCGS notes light cleaning, although the surfaces have since retoned a pleasing steel-gray hue. There are no other obvious imperfections. NGC ID# 24R6, PCGS# 6583

- 3749 1921-D — Cleaning — PCGS Genuine. XF Details.** A light cleaning reveals smoothly worn high points and leaves a consistent, slightly subdued silver-gray coloration. Traces of bright-silver highlights remain at the margins, and any hairlines from the cleaning are inconspicuous. Just 208,000 pieces were struck, the lowest mintage of the entire series.

- 3750 1928-S AU58 PCGS.** This attractive near-Mint specimen shows some of the usual softness on the centers, and the design elements exhibit a trace of high-point wear, but the lustrous surfaces display only minor abrasions. NGC ID# 24RB, PCGS# 6588

1928-S Half Dollar, MS64
Gleaming Mint Luster

3751 1928-S MS64 PCGS. CAC. An abundance of small change in circulation limited half dollar mintages to the San Francisco Mint in 1928 — a similar scenario to the 1923 and 1927 mintages. A conservative production of 1.9 million pieces was deemed sufficient. Apparently, full strikes do not exist for the issue, as none have been seen and the coins are invariably soft through the centers. This example is slightly above average in that regard, with smooth, satin luster across the gleaming silver surfaces embellished by a blush of translucent gold toning. Housed in a green label holder with CAC endorsement. NGC ID# 24RB, PCGS# 6588

1929-D Half Dollar, Toned MS66
Virtually Unobtainable Any Finer

3752 1929-D MS66 PCGS. The 1929-D Walker had a mintage of just more than one million coins and is conditionally scarce at the Premium Gem level. Higher-grade examples are virtually unobtainable. This piece shows above-average design definition, particularly on Liberty's branch hand and the gown lines, with satiny luster that illuminates the well-preserved surfaces. A blush of iridescent champagne toning graces each side, while the obverse also exhibits semitransparent army-green overtones. Population: 65 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 24RC, PCGS# 6589

3753 1934-S MS65 PCGS. Caramel-gold toning invigorates the lower obverse and upper reverse. This lustrous and well-preserved Gem has a lightly struck head, but the remainder of the coin is sharp. A much better Great Depression issue. NGC ID# 24RH, PCGS# 6594

1935 Half Dollar, MS67
Prohibitively Rare Any Finer

3754 1935 MS67 PCGS. The availability of the 1935 Walker declines sharply at the MS67 grade level, making this Superb Gem highly appealing to Registry enthusiasts. Partial thumb separation on Liberty's branch hand is the product of an above-average strike, and the satiny surfaces display iridescent champagne toning that deepens in the margins. Population: 48 in 67 (3 in 67+), 1 finer (10/15). NGC ID# 24RJ, PCGS# 6595

1935 Half Dollar, MS67
Delicate, Beautiful Toning

3755 1935 MS67 PCGS. Pastel rainbow hues adorn the peripheral regions of this Superb Gem 1935 Walking Liberty half dollar, surrounding champagne and ice-blue interiors. Partial thumb separation and sharp head detail contrast with mildly ill-defined feathers on the eagle's trailing leg. Close study with a loupe confirms the lofty grade. This Philadelphia issue is seldom seen this fine, and higher-grade pieces are almost unobtainable. Population: 48 in 67 (3 in 67+), 1 finer (10/15). NGC ID# 24RJ, PCGS# 6595

1935 Half Dollar, MS67
Colorful Condition Rarity

3756 1935 MS67 PCGS. CAC. A mintage of 9.1 million coins — among the highest production totals in the series to that point — explains the availability of the 1935 half dollar through MS66. Superb Gems, however, are condition rarities. A medley of iridescent tones colors each side in shades of lavender, peach-orange, ice-blue, and sea-green. Liberty's skirt and branch hand show clear line and thumb separation. The eagle's right (facing) leg exhibits unimportant softness. Excellent eye appeal, as recognized by CAC. Population: 48 in 67 (3 in 67+), 1 finer (10/15). NGC ID# 24RJ, PCGS# 6595

- 3757 1935-D MS65 PCGS.** A band of golden patina adheres to the right obverse border, while the upper-right reverse margin is more subtly toned. Each side is otherwise brilliant with glistening satin luster. The design elements exhibit faint central incompleteness, as usual. Marvelous surface preservation. NGC ID# 24RK, PCGS# 6596

**1935-D Half Dollar, MS66
Better Date in High Grade**

- 3758 1935-D MS66 PCGS.** This satiny Premium Gem is among the finest 1935-D Walkers certified by either service. Typical strike weakness is seen on Liberty's head and the central eagle's feathers, although the overall definition is pleasing. Traces of champagne toning draw attention away from a few minor luster grazes. NGC ID# 24RK, PCGS# 6596

1935-D Walker, Frosty MS66

- 3759 1935-D MS66 PCGS.** Brilliant, frosty luster characterizes this well-preserved Premium Gem 1935-D half dollar. Liberty's branch hand and the eagle's trailing leg are a trifle soft, but not distractingly so. This mid-series Denver issue is infrequently available in MS66, and no Superb Gems are known finer (10/15). NGC ID# 24RK, PCGS# 6596
- 3760 1935-S MS65 PCGS.** Pleasing hints of champagne-gold and amber toning visit the well-preserved surfaces of this attractive Gem, with well-detailed design elements and vibrant mint luster underneath. NGC ID# 24RL, PCGS# 6597
- 3761 1936-D MS66+ PCGS. CAC.** This Plus-graded Premium Gem with CAC endorsement offers outstanding eye appeal. Light-gold toning with slight russet accents embellish the waves of satiny luster that flow across smooth, minimally marked surfaces. The strike is reasonably bold throughout, with some weakness at Liberty's head and branch hand as often seen. PCGS has graded 37 numerically finer examples (10/15). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**1936-D Half Dollar, MS67
Unsurpassed Quality**

- 3762 1936-D MS67 PCGS.** Bruce Fox remarks that finding "the combination of full strike, minimal surface abrasions and superior eye appeal can be difficult." The search ends with this brilliant Superb Gem. Liberty's head is pinpoint-sharp, and the skirt lines are similarly bold. The branch hand and eagle's leg feather showcase a hint of inconsequential softness. Splashes of light golden-russet patina appear over the obverse. The overall quality is unsurpassed at both services. Population: 35 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599
- 3763 1937 MS67+ PCGS.** An essentially full strike is immediately obvious on this Superb Gem 1937 Walker, showing satiny luster over well-preserved surfaces — a couple of small reed marks near the H in HALF are the only mentionable flaws. Dusky champagne-gold toning appears in the peripheries but lightens considerably in the centers. PCGS lists five finer representatives (10/15). NGC ID# 256A, PCGS# 6601
- 3764 1937 MS67 PCGS. CAC.** A spectacular caramel-gold and pearl-gray Superb Gem. Pristine and highly lustrous with an exemplary strike. Although a handful of 1937 examples have been certified finer, the present piece is as nice as any that we have encountered. NGC ID# 256A, PCGS# 6601

**1937-D Half Dollar, MS67
Among the Finest Certified**

- 3765 1937-D MS67 PCGS.** Frosty brilliance immerses both sides in intense silver luster. Untoned and sharply struck, this Superb Gem Denver issue lives up to its reputation for quality production with bold feather detail on the eagle's leg. A tiny dip in the rim near L of LIBERTY is the only visible flaw. The eye appeal is tremendous. No examples are numerically finer at PCGS. Population: 53 in 67 (1 in 67+), 0 finer (9/15). NGC ID# 24RS, PCGS# 6602
- 3766 1938-D MS65 PCGS.** Lustrous and essentially brilliant with a smooth reverse and moderate obverse field grazes. Only the branch hand lacks a crisp impression. A popular low mintage issue. Encapsulated in a green label holder. NGC ID# 24RV, PCGS# 6605
- 3767 1938-D MS66 PCGS.** A mintage of 491,600 coins secures this Denver issue's semikey status. Examples are accessible through MS66 but rarely encountered finer. This sharply struck Premium Gem has satiny luster over essentially brilliant surfaces that show a thin blush of golden color near the left obverse rim. Grade-limiting marks are hidden among the gown lines. NGC ID# 24RV, PCGS# 6605

3768 1938-D MS66+ PCGS. This high-end Premium Gem exhibits a much better-than-average strike, with visible separation between Liberty's thumb and finger. Delicate shades of pale gold toning visit the well-preserved, lustrous surfaces. PCGS has graded 42 numerically finer examples (10/15). NGC ID# 24RV, PCGS# 6605

3769 1939 MS67+ PCGS. CAC. The 1939 Walker is an available date overall, but rarely found finer than MS67. This Plus-designated piece displays full design definition and softly frosted mint luster beneath a thin blanket of warm golden toning. PCGS has certified only 27 numerically finer representatives (10/15). NGC ID# 24RW, PCGS# 6606

3770 1939-S MS67 PCGS. CAC. A remarkably well-preserved, frosty Superb Gem, this 1939-S Walking Liberty half is among the finest in a PCGS holder (10/15). The strike is bold throughout the eagle and Liberty's head and branch hand. Traces of golden toning emerge from the peripheries, leaving the interiors brilliant. NGC ID# 24RY, PCGS# 6608

3771 1940-S MS66+ PCGS. CAC. This Plus-designated and CAC-approved Premium Gem exhibits well-detailed design elements with just a touch of the usual softness on Liberty's hand and the eagle's leg. The well-preserved surfaces display frosty mint luster and traces of blue, green, and gold toning at the rims. PCGS lists 13 finer examples (10/15). NGC ID# 24S2, PCGS# 6610

3772 1941-S MS66 PCGS. Whispers of purple and electric-blue visit the margins of this Premium Gem half dollar, each side of which is awash in intense luster. Sharply struck throughout, including partial definition in Liberty's branch hand. This is a nicely preserved half. PCGS has graded nine numerically finer examples (10/15). Ex: *FUN Signature (Heritage, 1/2009), lot 6043*. NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

3773 1942-S MS66+ PCGS. CAC. Trumpet tail S. Freckles of golden-brown and sea-green toning grace this lustrous and beautifully preserved Premium Gem. The strike is good for a San Francisco issue, though incomplete. PCGS records eight Superb Gems finer (10/15). NGC ID# 24S8, PCGS# 6617

3774 1943 MS67+ PCGS. CAC. This high-end Superb Gem is a spectacular specimen, with impeccably preserved surfaces and vibrant mint luster throughout. The design elements are sharply detailed in many areas and there is even some emerging detail on Liberty's wreath hand and the eagle's leg. PCGS has graded eight numerically finer examples (10/15). NGC ID# 24S9, PCGS# 6618

1944 Half Dollar, MS67+ Delicately Toned

3775 1944 MS67+ PCGS. CAC. This is a beautifully preserved, Registry-grade 1944 Walking Liberty half and is conditionally scarce as such. Both sides exhibit vibrant, frosty luster with warm yellow-gold toning. Thumb separation and partial detail on the eagle's trailing leg feathers contributes to the eye appeal. PCGS has seen only a single finer representative (10/15). NGC ID# 24SC, PCGS# 6621

3776 1944-S MS66+ PCGS. Large S. Dappled golden-brown and forest-green toning graces this lustrous wartime Walker. Contact is confined to a graze near the Y in LIBERTY. The strike is above average for the San Francisco issue, especially on Liberty's head and skirt lines. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

1944-S Half Dollar, MS66+ Exemplary Luster and Surfaces

3777 1944-S MS66+ PCGS. CAC. Large S. The Plus designation is inherently important on this high-end 1944-S Walker, separating this piece from the more available base-grade Premium Gems and ranking it nearly as fine as the extremely rare and sought-after Superb Gems. Expected softness appears on Liberty's branch hand and the eagle's central feathers but this is almost unnoticed amid the vibrant, frosty luster and unabraded, brilliant surfaces. PCGS lists eight MS67 coins finer (10/15). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

3778 1946 MS67 PCGS. This delightful Superb Gem exhibits a bold strike, with emerging detail on Liberty's wreath hand and the eagle's leg, and impeccably preserved lustrous surfaces that show a few hints of golden-tan toning. Population: 59 in 67 (4 in 67+), 0 finer (10/15). NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

1946-S Half Dollar, MS67 Among the Finest Certified

3779 1946-S MS67 PCGS. Trumpet Tail S Mintmark. Immaculately preserved surfaces and rich, frosty luster are hallmarks of this Superb Gem 1946-S Walker. Vivid obverse border toning in shades of amber-orange, gold, and olive-green surround champagne interiors, and only minor strike weakness occurs on Liberty's branch hand and the eagle's trailing leg. Population: 63 in 67 (4 in 67+), 0 finer (10/15). NGC ID# 24SL, PCGS# 6629

3780 1946-S MS67 PCGS. This delightful Superb Gem exhibits well-detailed design elements, with some emerging detail on Liberty's wreath hand, and impeccably preserved lustrous surfaces that show delicate shades of champagne-gold toning. Population: 61 in 67 (4 in 67+), 0 finer (10/15). NGC ID# 24SL, PCGS# 6629

3781 1947-D MS67 NGC. A well preserved and highly lustrous ice-blue and almond-gold Superb Gem. The strike is crisp, although peripheral elements appear slightly indistinct due to long-in-use dies. Census: 58 in 67 (2 in 67+, 6 in 67 ★), 1 finer (9/15). NGC ID# 5ESK, PCGS# 6631

PROOF WALKING LIBERTY HALF DOLLARS

3782 1937 PR67 PCGS. CAC. Delicate shades of pale gold toning visit the pristine surfaces of this delightful Superb Gem, with a few highlights of green and amber. The design elements are sharply detailed and the fields are deeply reflective. PCGS has graded 10 numerically finer examples (10/15). NGC ID# 5ESS, PCGS# 6637

- 3783 1939 PR67+ PCGS. CAC.** Aquamarine and golden-brown grace the obverse margin, but the remainder of this flashy Superb Gem is brilliant. Sharply struck and desirable. The designer's monogram was hand-engraved on the reverse die, as seen on most proof half dollars of this date. NGC ID# 5ESU, PCGS# 6639
- 3784 1940 PR67+ PCGS.** A fully struck, deeply mirrored brilliant proof Walker, struck from fresh dies without the aggressive polishing that is later seen on the sun rays. This piece is beautifully preserved and shows subtle contrast on the obverse at certain angles. Finer examples are seldom seen. NGC ID# 27V8, PCGS# 6640
- 3785 1940 PR67+ PCGS. CAC.** Razor-sharp definition is evident on all design elements of this high-end Superb Gem, with impeccably preserved surfaces under attractive shades of greenish-gold toning. PCGS has graded 34 numerically finer examples (10/15). NGC ID# 27V8, PCGS# 6640

**1942 Walking Liberty Half, PR68
Vivid Obverse Toning**

- 3786 1942 PR68 PCGS.** This beautifully preserved proof exhibits a sharply contrasted two-sided appearance; the obverse is deeply patinated in peripheral rainbow hues that fade slightly to lavender-gold in the center, while the reverse shows a few amber accents over otherwise brilliant surfaces. Boldly struck with deeply reflective fields. Population: 55 in 68 (2 in 68+), 1 finer (10/15). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

- 3787 1949-D MS66 Full Bell Lines PCGS.** Mint State Full Bell Lines 1949-D Franklin half dollars are readily available through the Gem level of preservation, after which the population drops precipitously. None have been certified in grades above MS66 by either of the leading grading services, although a few have been awarded the Plus designation. Freckles of russet and olive run over the obverse of this attractive piece, while the color palette becomes more extensive on the reverse. Sharply struck and nicely preserved. Population: 62 in 66 (5 in 66+) Full Bell Lines, 0 finer (10/15). NGC ID# 5HWE, PCGS# 86654
- 3788 1949-S MS66+ Full Bell Lines PCGS. CAC.** A charming high-end Premium Gem, with sharply detailed design elements and full definition on the bell lines. The well-preserved lustrous surfaces are blanketed in shades of champagne-gold toning. PCGS has graded seven numerically finer examples (10/15). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655
- 3789 1952-S MS67 PCGS. CAC.** Vibrant mint luster shines through rich shades of sea-green, lavender-gray, and amber toning on the well-preserved surfaces of this spectacular Superb Gem. The design elements are well-detailed and visual appeal is quite strong. Population: 12 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 24T5, PCGS# 6663
- 3790 1953-D MS66+ Full Bell Lines PCGS.** A high-end Premium Gem with the Full Bell Lines designation and well-preserved surfaces that radiate vibrant mint luster. Shades of greenish-gold and silver-gray toning highlight both sides. PCGS has graded only two numerically finer examples (10/15). NGC ID# 24T7, PCGS# 86665

- 3791 1957 MS67 Full Bell Lines PCGS. CAC.** A boldly struck, frosty example of this conditionally scarce Franklin half. The obverse is beautifully toned in deep teal-blue and olive-gold hues, while the reverse displays dusky lavender-gray over the interior with gold around the periphery. Eye appeal is excellent. Population: 22 in 67 (1 in 67+) Full Bell Lines, 0 finer (10/15). NGC ID# 24TW, PCGS# 86672 Base PCGS# 86650
- 3792 1958-D MS67 Full Bell Lines PCGS.** The impeccably preserved lustrous surfaces of this incredible Superb Gem are blanketed in shades of sea-green, turquoise, and lavender-gray toning. The design elements are sharply detailed, with full bell lines. Population: 55 in 67 Full Bell Lines, 0 finer (10/15). NGC ID# 5HNM, PCGS# 86675
- 3793 1958-D MS67 Full Bell Lines PCGS. CAC.** The well-preserved surfaces of this spectacular Superb Gem are blanketed in shades of sea-green, lavender, and gray toning, with vibrant mint luster underneath. The design elements are well-detailed, with Full Bell Lines definition. Population: 55 in 67 Full Bell Lines, 0 finer (10/15). NGC ID# 5HNM, PCGS# 86675
- 3794 1959-D MS66+ Full Bell Lines PCGS.** This Plus-designated Premium Gem exhibits sharply detailed design elements and full definition on the bell lines. The impeccably preserved surfaces are brightly lustrous and show hints of greenish-gold toning at the peripheries. PCGS has graded two numerically finer examples (10/15). NGC ID# 24TK, PCGS# 86677

PROOF FRANKLIN HALF DOLLARS

**1951 Franklin Half, PR65 Ultra Cameo
Seldom Seen so Starkly Contrasted**

- 3795 1951 PR65 Ultra Cameo NGC.** Deep Cameo examples of the 1951 proof Franklin are scarce. This brilliant Gem boasts stark white-on-black contrast with heavily frosted devices and deeply mirrored fields. The strike is full, and the only grade-limiting flaws are a few trivial lines in the fields from poor handling. Census: 20 in 65 Ultra Cameo (1 in 65 ★ Ultra Cameo), 19 finer (10/15). NGC ID# 27VB, PCGS# 96692 Base PCGS# 96690
- 3796 1952 PR67 Cameo PCGS.** The 1952 Franklin half dollar is difficult to locate with a cameo finish. The present Superb Gem offering is a notable exception, displaying pleasing field-motif contrast over both sides, each of which reveals impeccable preservation. Population: 48 in 67 (3 in 67+) Cameo, 2 finer (10/15). NGC ID# 27VC, PCGS# 86693
- 3797 1952 PR67 Cameo PCGS. CAC.** A beautifully preserved and boldly struck Superb Gem proof Cameo, this 1952 Franklin half dollar exhibits brilliant surfaces and outstanding eye appeal. A loupe reveals evidence of excessive die polishing on the portrait's collar, lower hair ends, and bridge of the nose. Population: 51 in 67 (3 in 67+) Cameo, 2 finer (10/15). NGC ID# 27VC, PCGS# 86693

1952 Franklin, Brilliant PR65 Ultra Cameo

3798 1952 PR65 Ultra Cameo NGC. This eye-appealing Gem reveals pronounced contrast on both sides with thickly frosted devices and deeply mirrored fields. The surfaces are virtually pristine aside from inconsequential contact marks in the left obverse field. Seldom encountered so well-preserved in the Ultra Cameo category. Census: 10 in 65 Ultra Cameo, 13 finer (10/15). NGC ID# 27VC, PCGS# 96693

3799 1960 PR68 Ultra Cameo NGC. The design elements of this magnificent Franklin half dollar show razor-sharp definition throughout and the flawless mirrored fields contrast starkly with the frosty devices. Eye appeal is extraordinary. Census: 70 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 6 finer (10/15). NGC ID# 24TY, PCGS# 96701

KENNEDY HALF DOLLAR

3800 1964 MS67 PCGS. The 1964 Kennedy half dollar is always popular as the first year of the design and last year of the 90% silver composition. This well-detailed Superb Gem offers impeccably preserved surfaces, with hints of greenish-gold and violet toning and vibrant mint luster throughout. Population: 41 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 27WH, PCGS# 6706

MORGAN DOLLARS

3801 1878 8TF Spiked Eye, VAM-3, MS65 Prooflike PCGS. Blunt upper beak. The flat area to left of eye, extra metal under the eyelid, die line on upper horizontal of B in LIBERTY, and added feathers at the base of the wings confirm the variety. This is the only year with 8 Tailfeathers and thus is highly important. The Prooflike surfaces of this Gem yield mild field-motif contrast. Sharply struck design elements and nice preservation contribute to the coin's eye appeal. Housed in a green label holder. Population: 14 in 65 Prooflike, 0 finer (10/15). NGC ID# 2YR3, PCGS# 133786 Base PCGS# 7072

3802 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS. Reddish-gold and gunmetal-blue toning deepen at the borders, with tan-gold shades at the central obverse. The reverse shows wide crescent of complementary toning over lustrous, silver surfaces. Die clashing in front of the eye earns the "Alligator Eye" nickname, confirmed by all other attributes of the VAM-14.1A. This Gem example is among the finest known of the variety. Population: 8 in 65, 0 finer (10/15). PCGS# 133796 Base PCGS# 7072

3803 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike PCGS. VAM-190. Dazzling field reflectivity and a precise strike proclaim the charms of this brilliant Choice dollar. Marks are minor and the eye appeal is blatant. A distinctive Second Reverse die marriage with a missing nostril, doubling on GOD WE, a broken star point below the shoulder curl, and a defective D in DOLLAR. NGC ID# 253K, PCGS# 97075

3804 1878 7TF Reverse of 1879 MS65+ PCGS. VAM-201. A lightly toned and lustrous Gem. Boldly struck and unmarked. Characteristics of the R-6 VAM-201 include a missing nostril, die doubled cotton leaves, a defective base on the R in PLURIBUS and a die scratch from the rightmost tail feather to the stem. NGC ID# 253L, PCGS# 7076

3805 1878-CC MS65 PCGS. A first-year Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements throughout. The well-preserved surfaces are visited by shades of gray, golden-tan, and violet toning, with most of the color on the reverse. NGC ID# 253M, PCGS# 7080

3806 1878-CC MS65 PCGS. CAC. Frosty luster cartwheels over the surfaces of this all-brilliant Carson City dollar. The reverse has a semiprooflike quality. Faint roller marks occur on the chin, but not over the ear where the hair strands are sharply defined. Bold, minimally marked, and highly appealing. Housed in a green label holder with CAC approval. NGC ID# 253M, PCGS# 7080

3807 1878-CC MS65+ PCGS. CAC. Silver-white luster radiates from both sides of this high-end Gem, each of which has been very well-cared for. The design elements are sharply defined, including the hair over Liberty's ear. The 1878-CC becomes more challenging to locate any finer. NGC ID# 253M, PCGS# 7080

3808 1878-CC Doubled Leaves, VAM-18, MS61 Prooflike PCGS. Ex: GSA. A Top 100 Variety. VAM-18 and VAM-6 share this die doubled obverse, but the VAM-18 — with the mintmark away from the wreath leaves — is far scarcer than VAM-6. This Prooflike example is sharply struck with modest cameo contrast and traces of light golden toning. Heavily abraded, as the grade suggests. NGC ID# 253M, PCGS# 40457 Base PCGS# 7081

3809 1879 MS65+ PCGS. Champagne-gold border toning contains elements of blue, rose and orange. The centers remain frosty and brilliant, giving this high-end Gem excellent eye appeal to match its impressive technical quality. Sharply struck with minuscule field grazes that only become evident under close scrutiny. NGC ID# 253S, PCGS# 7084

3810 1879 MS65 Prooflike PCGS. Prooflike 1879 Morgan dollars are elusive in all grades but become genuinely rare at the Gem level. This example is brilliant and sharply struck with stark cameo contrast on each side. A few trivial luster grazes on Liberty's cheek and the eagle's breast are not out of line for the grade. Population: 19 in 65 (1 in 65+) Prooflike, 2 finer (10/15). NGC ID# 253S, PCGS# 7085

1879-CC Silver Dollar, AU58 Normal Mintmark

3811 1879-CC AU58 PCGS. This "slider" 1879-CC Morgan dollar is of the Normal Mintmark variety. There is a touch of softness on the hair above Liberty's ear, but actual wear is virtually imperceptible to the unaided eye. Hints of gold toning emerge from the peripheries, and a few minor marks appear on Liberty's cheek. The 1879-CC is one of the more challenging Carson City issues in high grade. NGC ID# 253U, PCGS# 7086

3812 1879-CC Capped Die, VAM-3, AU55 NGC. CAC. A Top 100 Variety. The "Capped Die" VAM is readily distinguished by find die chips immediately around the mintmark. This Choice AU example shows hints of luster in the fields and mottled gunmetal-gray toning. Wear is slight and there are no bothersome abrasions. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

3813 1879-S Reverse of 1878, VAM-9, MS64+ PCGS. CAC. A Top 100 Variety. The ball of the 9 is repunched at the lower left, with engraved feathers on the right (facing) wing and the upper tailfeathers. Variegated blue, sea-green, and peach-gold colors overlay lustrous silver surfaces that show only a few small marks. Liberty's brow, cheek, and neck are remarkably clean and frosted. This attractive Reverse of 1878 dollar is Plus-graded by PCGS for its near-Gem quality and dramatic eye appeal. The sharp strike delivers essentially full details on both sides. Population: 35 in 64+, 53 finer (10/15). NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

3814 1879-S MS67+ PCGS. CAC. Semiprooflike fields and brilliant, dazzling luster combine with the beautifully preserved surfaces to deliver the eye appeal and sheer technical quality that rank this 1879-S Morgan at the uppermost end of the MS67 grade. The strike is sharp and few pieces are certified finer at PCGS. NGC ID# 253X, PCGS# 7092

1879-S Silver Dollar, MS68 Exemplary Type Coin

3815 1879-S MS68 NGC. Plentiful in lower grades, the 1879-S Morgan dollar becomes elusive in MS68, the finest numeric level achieved by this issue (10/15). The present coin is fully struck with thick, frosty luster over the design elements and mild reflectivity in the fields. Devoid of abrasions, this Morgan type coin shows traces of champagne toning around the outer peripheries. NGC ID# 253X, PCGS# 7092

3816 1879-S MS67 Prooflike PCGS. The sharply detailed frosty design elements of this delightful Superb Gem contrast boldly with the deeply reflective fields and the lightly toned surfaces are impeccably preserved. Population: 49 in 67 (3 in 67+) Prooflike, 3 finer (10/15). NGC ID# 253X, PCGS# 7093

3817 1879-S MS67 Prooflike PCGS. Prooflike examples of this collectible San Francisco issue are seldom seen at the Superb Gem level. This piece presents as brilliant but does reveal traces of golden toning around the outer periphery upon closer examination. The strike is bold and each side boasts modest cameo contrast. Population: 49 in 67 (3 in 67+) Prooflike, 3 finer (10/15). NGC ID# 253X, PCGS# 7093

3818 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS. A Top 100 Variety. VAM-4 shows clear remnants of a previous 79 in the loops of the 80 in the date. This is one of the most prominent overdate varieties of the series and is highly sought-after. The present Gem example is boldly struck and semiprooflike with soft champagne toning. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

3819 1880-CC MS65 PCGS. VAM-8. Brilliant surfaces are aglow in frosty luster throughout this well-defined Gem Carson City dollar. The 1880-CC was well-represented in the GSA release of the 1970s, accounting for the availability of high-grade examples despite a relatively small production of 495,000 coins. NGC ID# 2542, PCGS# 7100

3820 1880-CC MS66 PCGS. VAM-3A. Rich and original powder-blue, olive-green, and caramel-gold toning encompasses this coruscating and well preserved Carson City dollar. The cheek is smooth and the eye appeal is impressive. NGC ID# 2542, PCGS# 7100

3821 1880-CC MS66+ PCGS. VAM-3A. Light straw-gold toning adorns this lustrous and carefully preserved Carson City Morgan. A hint of die rust near the mintmark is among the characteristics of the collectible VAM-3A variety. NGC ID# 2542, PCGS# 7100

1880-O Silver Dollar, MS64+

3822 1880-O MS64+ PCGS. CAC. Micro O. A nicely struck and nearly white silver dollar that boasts vibrant luster and a well preserved reverse. The right obverse is also smooth. Minor grazes on the cheek and left field account for the grade. As of (10/15), PCGS has certified 119 examples as MS64+ with only 39 finer. NGC ID# 2543, PCGS# 7114

1880-S Dollar, MS66 Colorful Obverse Patina

3823 1880-S MS66 PCGS. Large S. Dramatic cherry-red, orange, and forest-green toning consumes the obverse. The reverse has a lemon-gold border but is otherwise brilliant. Lustrous and nicely struck with moderate obverse grazes. A plentiful issue but seldom encountered with such intense coloration. NGC ID# 2544, PCGS# 7118

3824 1880-S MS67+ PCGS. The lustrous surfaces of this high-end Superb Gem display hints of light tan on the lower obverse. The design elements are well-struck, a characteristic of this issue. Both sides are impeccably preserved. All 1880-S dollars are from the reverse of 1879 with rounded eagle's breast and slanted top arrow feathers. NGC ID# 2544, PCGS# 7118

3825 1880-S MS67+ PCGS. CAC. Large S, about equal in scarcity relative to its Medium S counterpart. This is a brilliant, thoroughly lustrous, and nicely struck Superb Gem. A magnificently preserved Morgan dollar; ideal for a high quality silver type set. NGC ID# 2544, PCGS# 7118

3826 1880-S MS67+ NGC. CAC. Medium S. A boldly struck and virtually stone-white Superb Gem. Dynamic cartwheel luster sweeps both sides. Marks are essentially absent except near the second L in DOLLARS. An exemplary Morgan type coin. NGC ID# 2544, PCGS# 7118

3827 1880-S MS67 Prooflike PCGS. CAC. Large S. Wheat-gold and ice-blue patina adorns this flashy and boldly struck Superb Gem. Remarkably void of bagmarks, even by the standards of the well-made and prevalent San Francisco issue. NGC ID# 2544, PCGS# 7119

3828 1880/9-S VAM-11 MS67 PCGS. A Hot 50 Variety. The *Guide Book* variety with prominent die fill within the upper half of the 0 in the date. In addition, the mintmark is repunched within the lower loop, and Liberty's neck displays a faint J-shaped die marker. Lustrous and lightly toned with smooth fields and minor facial grazes. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

3829 1880/9-S VAM-11 MS67 PCGS. A Hot 50 Variety. VAM-11 shows the remnants of a previous 9 within the loop of the 0 in the date. This vibrantly lustrous Superb Gem is among the finer-known representatives. The strike is well-executed, and daubs of sun-gold toning appear in the margins on each side. Olive and russet hues are present around the peripheries. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

3830 1880/9-S VAM-11 MS67 PCGS. A Hot 50 Variety. Traditionally considered an overdate variety, VAM-11 displays "the remains of the 9 within the top of the opening of the 0," according to VAMworld.com. A brilliant and semiprooflike Superb Gem that has a clean cheek and a good strike. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

3831 1881 MS66 NGC. Dazzling luster and smooth fields ensure the appeal of this brilliant high-grade silver dollar. The strike is good, and only minor grazes on the portrait determine the grade. Census: 55 in 66 (1 in 66+, 2 in 66 ★), 4 finer (10/15). NGC ID# 2546, PCGS# 7124

3832 1881-CC MS66+ PCGS. CAC. Frosty, radiant luster captivates the eye as it cartwheels around pristine surfaces on this high-end 1881-CC Morgan dollar. The eagle's talons are a trifle soft, but the strike is otherwise bold. Traces of champagne toning emerge from the outer peripheries, beautifully framing the brilliant interiors. NGC ID# 2549, PCGS# 7126

3833 1881-S MS67+ PCGS. Vivid accents of cobalt-blue, violet, and greenish-gold toning visit the impeccably preserved surfaces of this high-end Superb Gem. Razor-sharp definition is evident on all design elements and eye appeal is terrific. NGC ID# 2549, PCGS# 7130

3834 1881-S MS67+ PCGS. CAC. A high-end Superb Gem, brilliant and frosty with cartwheel silver luster over smooth, minimally marked surfaces. The strike is razor sharp, disturbed only by a singular reeding mark beneath DO of DOLLAR. Liberty's cheek is full and unblemished. The dual honors of the PCGS Plus designation and CAC endorsement are well-deserved. NGC ID# 2549, PCGS# 7130

1881-S Silver Dollar, MS68 ★ Vibrant Obverse Coloration

3835 1881-S MS68 ★ NGC. Top-grade 1881-S Morgans are often chosen for type purposes, but this Star-designated piece showcases an unusually high degree of eye appeal. The surfaces are virtually immaculate and the right-hand portion of the obverse is cast in vivid sun-gold, violet, rose, and pine-green ribbons of color. The remainder of each side is champagne-toned, and the design elements are razor-sharp. None are numerically finer at NGC (10/15). NGC ID# 2549, PCGS# 7130

3836 1881-S MS67 Prooflike PCGS. The well-preserved surfaces of this Superb Gem Morgan dollar show much prooflike reflectivity, with delicate hints of pale gold toning in selected areas. The design elements are sharply detailed throughout. Population: 77 in 67 (3 in 67+) Prooflike, 4 finer (10/15). NGC ID# 26G7, PCGS# 7131

3837 1881-S MS66 Deep Mirror Prooflike NGC. Bold, satiny design elements exhibit modest contrast against the deeply mirrored fields on each side of this pristine Premium Gem type coin. Tinges of amber-violet and blue border toning frame brilliant centers, delivering outstanding eye appeal. Housed in a prior generation holder. NGC ID# 2549, PCGS# 97131

3838 1882 MS66 PCGS. CAC. Incredibly well preserved, frosty luster resides beneath dusky golden-tan toning on each side of this Premium Gem 1882 Morgan dollar. Bold detail characterizes the eagle's breast and talons and the obverse hair curls, giving this piece excellent appeal. PCGS lists nine Superb Gems finer (10/15). NGC ID# 254A, PCGS# 7132

1882 Morgan Dollar, Colorful MS66+ Outstanding Eye Appeal

3839 1882 MS66+ PCGS. CAC. Intense luster dazzles the eye as it illuminates vivid multicolor toning on each side of this high-end Premium Gem example. The interiors show mainly blended lavender-gray and silvery-blue, while deeper aquamarine, yellow-gold, and crimson appear around the peripheries. Well-struck and free of abrasions. PCGS lists only nine finer representatives (10/15). NGC ID# 254A, PCGS# 7132

3840 1882-CC MS66+ PCGS. CAC. The design elements of this high-end Premium Gem exhibit razor-sharp definition throughout and the impeccably preserved surfaces display vibrant mint luster on both sides. PCGS has graded 76 numerically finer examples (10/15). NGC ID# 254S, PCGS# 7134

3841 1882-S MS65 Deep Mirror Prooflike NGC. A sharply struck Gem, this example has brilliant and untuned silver surfaces with satiny devices in a frame of deep mirrors. Census: 70 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (10/15). NGC ID# 254E, PCGS# 97141

1883 Silver Dollar, MS67 Few Known Finer

3842 1883 MS67 PCGS. A seldom seen Superb Gem example, showing frosty, brilliant luster and virtually perfect preservation. The design elements are well-defined. The 1883 Morgan is available in most grades but becomes elusive in MS67. PCGS reports only three numerically finer representatives (10/15). NGC ID# 254G, PCGS# 7142

3843 1883-CC MS66+ PCGS. VAM-5A. An intricately struck and essentially brilliant Premium Gem. The lustrous surfaces are virtually pristine aside from minor grazes above Liberty's eye. An interesting VAM with various clash marks and die scratches. NGC ID# 254J, PCGS# 7144

- 3844 1883-S MS61 PCGS.** The 1883-S can be located through near-Gem without too much trouble after which it becomes rare. A silver-white obverse cedes to grayish-tan color on the reverse of this Uncirculated example. The design elements are well-struck, and light scattered marks are fewer and less severe than usually encountered on this heavily bagmarked issue. The obverse is semiprooflike. NGC ID# 254K, PCGS# 7148
- 3845 1883-S MS61 NGC.** A pleasing Mint State Morgan dollar, with well-detailed design elements and brightly lustrous surfaces that show the expected number of minor contact marks for the grade. A few highlights of lavender and greenish-gold toning visit the surfaces. NGC ID# 254K, PCGS# 7148
- 3846 1883-S MS62 NGC.** Lightly abraded, as are most 1883-S dollars, but displaying uncommonly vibrant, eye-catching luster with noticeable semiprooflike mirroring in the fields. The interiors are brilliant, the peripheries display light golden toning. A touch of strike softness is visible on the central high points. NGC ID# 254K, PCGS# 7148
- 3847 1883-S MS63 PCGS.** A satiny, lustrous Select example of this conditionally challenging San Francisco issue, showing well-struck devices and trivial, grade-consistent abrasions. The 1883-S had a mintage in excess of 6 million coins, but Mint State examples are disproportionately elusive. NGC ID# 254K, PCGS# 7148

**1884 Dollar, MS65 Deep Mirror Prooflike
Appealing Cameo Contrast**

- 3848 1884 MS65 Deep Mirror Prooflike PCGS.** A scarcely seen Gem Deep Mirror Prooflike example of this otherwise plentiful Philadelphia issue, showing frosty motifs and modest cameo contrast on each side. The strike is sharp, and grade-limiting abrasions are light, posing little distraction. Hints of light golden toning accent each side. Population: 34 in 65 (1 in 65+) Deep Mirror Prooflike, 5 finer (10/15). NGC ID# 254L, PCGS# 97151
- 3849 1884-CC MS66+ PCGS. VAM-2.** The date is minutely repunched on VAM-2, most obvious on the 1. This high-end Premium Gem example displays frosty, brilliant luster and well-struck design elements. There are no serious abrasions.
- 3850 1884-CC MS66 PCGS. CAC. VAM-2.** Ruby-red, powder-blue, forest-green, olive, and sun-gold dominate the obverse. The reverse is brilliant aside from a slender arc of rainbow toning along the lower margin. Well-struck and coruscating with exemplary surfaces. VAM-2 is one of several minor but interesting repunched date varieties for this popular issue, which emerged in quantity from the GSA holdings. NGC ID# 8BBF, PCGS# 7152
- 3851 1884-CC MS66+ NGC. CAC.** Splashes of orange- and yellow-gold, bluish-green, and lavender patination reside on the central and lower obverse of this high-end Premium Gem, while just a few touches of beige occur on the reverse. Sharply struck devices include the hair above Liberty's ear. This is a great-looking coin that is well-deserving of the CAC sticker. The 1884-CC becomes more difficult to locate in finer levels of preservation. NGC ID# 8BBF, PCGS# 7152

- 3852 1884-O MS67 NGC.** The highly lustrous fields appear watery and show moderate contrast against the frosty design elements, although not enough to merit a Prooflike designation. This impressive survivor has only a couple of nearly imperceptible handling marks. The surfaces are virtually brilliant. NGC has certified a single MS68 coin finer (10/15).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4238. NGC ID# 254N, PCGS# 7154
- 3853 1884-O MS67 NGC.** A smooth piece, largely satin-silver with only trifling softness on the hair over Liberty's ear. A few small flecks are scattered on each side. This New Orleans issue is extremely rare any finer. NGC has graded only one example in higher numeric grade (10/15). NGC ID# 254N, PCGS# 7154
- 3854 1884-S AU58 PCGS.** The surfaces are nearly prooflike on both sides, but numerous light abrasions dot the fields. Still, the coin displays dramatic silver reflectivity and sharpness for the assigned grade. NGC ID# 254P, PCGS# 7156
- 3855 1884-S AU58 NGC.** Whispers of gold and cobalt-blue cling to the margins of this near-Mint Morgan. Both surfaces retain traces of luster in the recessed areas and reveal just a few minute marks that are in concert with a large silver coin that has seen brief circulation. The design features are better-defined than typically seen on this issue, including partial detail in the hair over Liberty's ear and on the eagle's breast. NGC ID# 254P, PCGS# 7156
- 3856 1884-S AU58 PCGS.** Lavender, aquamarine, and wheat-gold patina drapes coruscating and unblemished surfaces. The 1884-S is notoriously elusive in Mint State, and the present piece comes very close to that level, denied solely by a trace of friction on the eagle's breast. NGC ID# 254P, PCGS# 7156
- 3857 1884-S AU58 NGC.** This San Francisco issue continues to generate strong collector interest at the near-Mint and Mint State levels. Attractive mint luster flashes beneath the silver-gray obverse, while the reverse is brightly lustrous and shows nearly full brilliance. A sharply struck example, with a few light abrasions but no heavy marks. NGC ID# 254P, PCGS# 7156
- 3858 1884-S AU58 NGC.** A supreme slider, with frosty brilliance and sharp definition for the issue. Cartwheel silver luster seems undiminished, but slight obverse friction prevents a full Mint State designation. A bit of deep-gray toning at the rim between R and I of PLURIBUS is of no concern. NGC ID# 254P, PCGS# 7156
- 3859 1884-S AU58 PCGS.** A moderately lustrous, golden-toned example of this better San Francisco issue, showing a brush of friction over the high points of the design that limits a Mint State grade. A few minor marks appear on Liberty's cheek, but the surfaces are otherwise smooth. NGC ID# 254P, PCGS# 7156
- 3860 1884-S AU58 NGC.** Luster and semiprooflike mirroring remain in the fields of this near-Mint 1884-S Morgan dollar, while a brush of friction over the high points of the devices precludes a Mint State grade. Medium golden-gray toning blankets each side. NGC ID# 254P, PCGS# 7156
- 3861 1884-S AU58 NGC.** A mostly lustrous near-Mint example of this popular San Francisco issue, showing trivial friction over the high points of the design and traces of champagne toning in the fields. Light, scattered abrasions accompany the grade. NGC ID# 254P, PCGS# 7156
- 3862 1885 MS66 PCGS.** Vertical bands of forest-green, cherry-red, orange-gold, and powder-blue march across most of the obverse. The reverse is untuned save for a hint of peripheral honey patina. Lustrous and nicely struck with a few unimportant left obverse marks. NGC ID# 254R, PCGS# 7158

**1885 Morgan Dollar, MS66
Elusive Deep Mirror Prooflike Example**

3863 1885 MS66 Deep Mirror Prooflike PCGS. The 1885 Morgan dollar was produced in large numbers, and was well-represented in the Treasury releases of the 1960s. As a result, the issue is reasonably available in high grade, making it a popular choice of type collectors. The present coin is a delightful Premium Gem, with sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. The impeccably preserved surfaces display attractive shades of greenish-gold toning. Population: 83 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (10/15). NGC ID# 254R, PCGS# 97159

3864 1885-CC MS65 PCGS. The 1885-CC (228,000 coins) keeps good company with other low-mintage dates like the 1889-CC, 1893-S, and 1894. However, it is far more available thanks to the GSA release of the 1970s. This beautifully original Gem has brilliant centers with crimson, orange, and violet peripheral toning. Frosty and sharply defined. NGC ID# 254S, PCGS# 7160

3865 1885-CC MS65 PCGS. This Gem Carson City Morgan displays intense, frosty luster shining through a lovely champagne veil. The design elements are well-struck, and only a couple of insignificant grazes on Liberty's cheek prevent an even finer grade. NGC ID# 254S, PCGS# 7160

3866 1885-CC MS66 NGC. Boldly frosted central motifs show very few signs of contact, while the semiprooflike fields provide clear and nearly unmarked contrast. Nice quality at the Premium Gem level, with brilliant silver-white appeal and flashy mint luster throughout both sides. NGC ID# 254S, PCGS# 7160

3867 1885-O MS67 PCGS. Reddish-brown and steel-blue patination clings to the margins of this Superb Gem, being somewhat deeper in color on the obverse. Well-struck design elements include the hair over Liberty's ear and the eagle's breast feathers. The lustrous surfaces have been well-preserved. Just one piece is certified finer at PCGS (10/15). NGC ID# 254T, PCGS# 7162

3868 1885-S MS65 PCGS. This impressive Gem displays sharply detailed design elements and vibrant mint luster throughout, with well-preserved brilliant surfaces. Eye appeal is outstanding. PCGS has graded 45 numerically finer examples (10/15). NGC ID# 254U, PCGS# 7164

3869 1886-O MS61 NGC. Despite a mintage of more than 10 million pieces, relatively few Mint State coins are available to satisfy the demands of collectors numbering in the thousands. The dearth of Uncirculated 1886-O coins likely stems from melting under the Pittman Act of 1918. This lustrous, lightly abraded example is sharp for the issue with faint blue and gold border toning. NGC ID# 254W, PCGS# 7168

3870 1886-O MS61 PCGS. Well-struck, fully lustrous, and only faintly toned. The reverse has the look of a finer grade, while the obverse displays distributed, wispy grazes. The 1886-O is conditionally scarce in Mint State and prohibitively rare as a Gem.
Ex: FUN Signature (Heritage, 1/2009), lot 4572. NGC ID# 254W, PCGS# 7168

3871 1886-O MS62 PCGS. Like most examples seen, this attractive MS62 specimen from the New Orleans Mint shows a touch of softness on the centers, but the lustrous surfaces display the minimum number of minor contact marks for the grade. Attractive shades of greenish-gold and magenta toning highlight both sides. NGC ID# 254W, PCGS# 7168

3872 1886-O MS62 PCGS. Pale-gold toning deepens near the borders, where blue and amber-gold accents provide original appeal. The sharp obverse shows few marks on the frosty surfaces, while a scrape over the eagle's head and two or three small contact marks appear on the reverse. The 1886-O is somewhat of an enigma among Morgan dollars, with a large 10+ million-piece mintage, but relatively few Mint State survivors exist. Most of the mintage was likely melted under terms of the Pittman Act of 1918. NGC ID# 254W, PCGS# 7168

3873 1886-O MS62 NGC. This attractive MS62 specimen is sharply detailed for a New Orleans Mint product, and the lustrous surfaces show only scattered minor contact marks, with an amber alloy spot near Liberty's cap. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63
Better Date in Mint State**

3874 1886-O MS63 PCGS. The 1886-O Morgan dollar had a low survival rate in Mint State grades, making it conditionally elusive. This Select example showcases bold central devices and vibrant, satiny luster with a hint of champagne toning. A few trivial abrasions on Liberty's cheek limit the grade but pose little distraction. NGC ID# 254W, PCGS# 7168

**1886-O Morgan Dollar, MS63
Frosty, Crisp Luster**

3875 1886-O MS63 NGC. A slightly better date in Mint State, the 1886-O Morgan dollar is also elusive with pleasing luster. This Select example possesses vibrant, frosty surfaces cast in a hint of champagne toning. The strike is above-average for the issue, and there are no individually disruptive abrasions. NGC ID# 254W, PCGS# 7168

3876 1886-S/S VAM-2, MS64 Prooflike PCGS. A Top 100 Variety. The mintmark is repunched on VAM-2, the primary impression rotated counterclockwise from the first. This Choice example is beautifully prooflike and well-struck with hints of golden toning overall. A few light grazes on Liberty's cheek define the MS64 designation but pose little distraction. PCGS# 42793 Base PCGS# 7171

3877 1887 MS67 PCGS. A delightful Superb Gem, with razor-sharp definition on all design elements, impeccably preserved surfaces, and vibrant mint luster throughout. PCGS has graded only one numerically finer example (10/15). NGC ID# 27Y3, PCGS# 7172

3878 1887 Donkey Tail, VAM-25A (formerly VAM-1A), MS60 PCGS. A Top 100 Variety. This popular "Donkey Tail" VAM shows a bold die break at the right base of the D in DOLLAR. The present Mint State example is satiny with light golden toning and grade-consistent, scattered abrasions. Moderate strike weakness is seen on the central high points. NGC ID# 254Y, PCGS# 133907 Base PCGS# 7172

**1887-S Silver Dollar, MS65
Radiant Luster, Outstanding Eye Appeal**

3879 1887-S MS65 PCGS. CAC. Intense cartwheel luster vibrantly illuminates each side of this Gem 1887-S Morgan dollar, although on the obverse it merges with semiprooflike mirroring in the fields. Liberty's portrait and the eagle's breast feathers show a bold strike, and close study of the surfaces fails to reveal any unsightly abrasions. The obverse shows lavender-gold interior color and russet-blue hues around the periphery; the reverse shows faint lilac overtones amid primarily brilliant mint frost. PCGS lists only 30 finer representatives (10/15). NGC ID# 2554, PCGS# 7180

3880 1887-S MS63 Deep Mirror Prooflike ANACS. The well-detailed design elements of this attractive Select specimen display enough mint frost to contrast noticeably with the reflective prooflike surfaces. Only minor, scattered contact marks are evident. NGC ID# 2554, PCGS# 97181

3881 1888 MS66+ PCGS. CAC. Lush ocean-blue, butter-gold, and plum-red toning embraces both sides of this well preserved and boldly struck silver dollar. Although high-grade 1888 Morgans are collectible, few possess the two-sided vibrant colors of the present Premium Gem. NGC ID# 2556, PCGS# 7182

3882 1888-O MS66 PCGS. Virtually uninhibited brilliance defines each side of this clean O-mint dollar. A couple of tiny grazes occur in the left obverse field and on the cheek, otherwise flawless. The relief elements are boldly impressed. A small toning spot appears above (UNIT)E(D). Among the finest examples at PCGS (10/15). NGC ID# 2556, PCGS# 7184

3883 1888-O MS66 PCGS. The well-detailed design elements of this impressive Premium Gem show the slightest trace of softness on the hair above the ear, but the well-preserved surfaces radiate vibrant mint luster, with highlights of greenish-gold and lavender toning. PCGS has graded no coins in finer numeric grades (10/15). NGC ID# 2556, PCGS# 7184

**1888-O VAM-4 Dollar, AU58
Doubled Die Obverse, 'Hot Lips' Variety**

3884 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU58 NGC. CAC. A Top 100 Variety. This popular *Guide Book* variety shows pronounced doubling on Liberty's lips (hence the nickname), nose, and eye. Each side offers mostly brilliant centers surrounded by delicate golden toning around the borders. The mint luster is surprisingly vibrant for any New Orleans product, let alone one that circulated, however briefly. The higher points of the design exhibit the usual strike incompleteness, and a cud forms at the lower obverse rim. Rarely seen so fine. Census: 17 in 58, 8 finer (10/15). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

3885 1888-S MS65 PCGS. This impressive Gem exhibits well-detailed design elements and lustrous, well-preserved surfaces with highlights of golden-brown and lavender toning. Housed in a green label holder. PCGS has graded 31 numerically finer examples (10/15). NGC ID# 2557, PCGS# 7186

**1889 Dollar, MS66+
Almost Uncollectible Finer**

3886 1889 MS66+ PCGS. CAC. Although available at the Premium Gem level, the 1889 Morgan is prohibitively rare any finer. This Plus-graded MS66 example balances affordability with superior quality. The design elements are well-struck and boast frosty, champagne-toned luster. Deeper amber and sea-green hues also appear around portions of the peripheries. PCGS lists four Superb Gems finer (10/15). NGC ID# 2558, PCGS# 7188

3887 1889-CC VF20 PCGS. CAC. A delightful example for the budget-conscious collector, this midlevel 1889-CC Morgan displays original steel-gray patina and strong detail for the grade. This key Carson City issue is plentiful in circulated condition, but seldom is a piece found with eye appeal as pleasing as that of this example. NGC ID# 2559, PCGS# 7190

3888 1889-CC VF30 NGC. Deeply toned in gunmetal-gray hues, this midgrade 1889-CC Morgan dollar boasts excellent detail and smooth, problem-free surfaces. Although seen with frequency in middle to lower circulated grades, this key Carson City issue is never fails to meet active demand. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, Choice XF
Partially Lustrous Fields**

3889 1889-CC XF45 PCGS. An original, briefly circulated 1889-CC Morgan dollar with glowing luster in portions of the fields and medium golden-gray toning overall. Wear is trivial and there are no bothersome abrasions. This key issue is among the most sought-after Morgans from any mint and is the capstone coin in the Carson City short set. NGC ID# 2559, PCGS# 7190

3890 1889-CC — Obverse Scratched — NGC Details. AU. The only complaint on this barely circulated 1889-CC Morgan is a thin, unobtrusive pincscratch in the lower-right obverse field that nicks the bottom of Liberty's hair curls. Luster remains in the protected regions of the fields, and each side displays light golden toning. NGC ID# 2559, PCGS# 7190

3891 1889-O MS64+ PCGS. The 1889-O Morgan dollar becomes scarce in grades above MS64. This high-end Choice example is well-detailed and brightly lustrous, with delicate shades of pale gold toning and only minor signs of contact. NGC ID# 255A, PCGS# 7192

3892 1889-O MS64+ PCGS. Whispers of light tan cling to the margins of this lustrous high-end near-Gem Morgan dollar, and the hair above Liberty's ear and the eagle's breast feathers exhibit considerable detail. A few minute marks on Liberty's cheek limit the grade. The 1889-O is readily available through near-Gem, after which the population begins to decline. NGC ID# 255A, PCGS# 7192

3893 1889-O MS64+ PCGS. CAC. The 1889-O Morgan dollar's availability plummets between MS64 and MS65, making this Plus-graded Choice example highly appealing to budget-conscious collectors. A few minor abrasions are not out of line for the grade, and mild strike weakness on the central high points is consistent with the issue. Both sides display deep amber-gold color. NGC ID# 255A, PCGS# 7192

3894 1889-O MS64+ PCGS. CAC. A whisper of tan toning visits this lustrous and suitably struck Southern silver dollar. Only infrequent minor grazes on the cheek and fields preclude classification as a Gem. NGC ID# 255A, PCGS# 7192

**1889-O Dollar, Untoned MS65
Near the Top Echelon of Survivors**

3895 1889-O MS65 PCGS. The 1889-O is overshadowed by its famous Carson City brother, and a high mintage of 11.8 million coins belies the issue's conditional rarity. Gems, however, are very scarce, and finer representatives are out of reach for all but the most well-heeled collectors. This Gem approaches the top echelon of survivors. Each side is void of overt flaws, and a hint of central softness is likely all that limits the grade. There are 10 finer grading events at PCGS (10/15). NGC ID# 255A, PCGS# 7192

3896 1889-S MS65 PCGS. Each side of this 1889-S dollar is shrouded in a veil of violet and golden-gray patina with bluish-green accents near the borders. Vibrant mint luster shines through, illuminating generally well-struck motifs that feature a hint of central incompleteness. The 1889-S is a lower-mintage date and is seldom seen finer. NGC ID# 255B, PCGS# 7194

3897 1889-S MS65 PCGS. Dusky shades of golden-brown and slate-gray toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and vibrant mint luster underneath. Overall eye appeal is quite strong. NGC ID# 255B, PCGS# 7194

3898 1889-S MS65 PCGS. A slightly better date with a mintage of only 700,000 coins. Gem 1889-S dollars are occasionally seen, but finer pieces are scarce. This MS65 representative displays radiant, brilliant luster and largely unabraded surfaces. There is no mentionable strike weakness. NGC ID# 255B, PCGS# 7194

3899 1890 MS65 PCGS. The 1890 has a high mintage and is plentiful in bagmarked Uncirculated grades, but Gems are surprisingly scarce. This lightly toned and lustrous example has pleasing surfaces and moderate incompleteness of strike on the fletchings and nearby wreath. NGC ID# 255C, PCGS# 7196

3900 1890-CC MS64 PCGS. VAM-12. The mintmark is repunched, and a "spike" (as made) resides in Liberty's eye. A brilliant and lustrous Choice scarcer date Carson City dollar. The fields and cheek are uncommonly smooth for the designated grade. NGC ID# 255D, PCGS# 7198

3901 1890-CC MS64 Deep Mirror Prooflike PCGS. An attractive Choice specimen, with sharply detailed, frosty design elements and deeply reflective fields. The surfaces show a few scattered minor contact marks that prevent an even higher grade. NGC ID# 255D, PCGS# 97199

3902 1890-O MS65 PCGS. The two-sided, multicolor toning of this Gem dollar is the main attraction, although the strike is sharp for this New Orleans issue. More than 10 million pieces were minted and many were struck from worn-out dies. This example is lustrous and attractive with vivid blue and peach-gold toning. Minor blending of the hair over the ear and a few random marks do not diminish the vibrant eye appeal. NGC ID# 255E, PCGS# 7200

3903 1890-O MS65 PCGS. The MS65 level is the last reasonably available grade for the 1890-O before the number of certified examples drops dramatically. PCGS and NGC combined report just 31 numerically finer pieces (10/15). This Gem example displays a banded patina of sea-green, azure-blue, and peach-gold. Only slight weakness of central strike for the New Orleans issue. NGC ID# 255E, PCGS# 7200

3904 1890-S MS65 PCGS. CAC. Incredibly vibrant, frosty luster immediately dazzles the eye on this Gem 1890-S Morgan dollar, showing also clean surfaces and well-struck design elements. The extreme outer peripheries show hints of champagne toning, but the interiors are brilliant. NGC ID# 255F, PCGS# 7202

3905 1891 Doubled Ear, VAM-2, MS63 Deep Mirror Prooflike PCGS. A Top 100 Variety. Any Deep Mirror Prooflike 1891 dollar is a rarity, but here is the second best VAM for the issue, trailing only the VAM-2A "Mustache" variety. The central obverse is die doubled south, evident on the earlobe and the hair above the ear. The present lightly toned example has flashy fields and a mostly unmarked appearance. The strike is good though inexact at the centers. NGC ID# 255G, PCGS# 43480 Base PCGS# 97205

1891-CC Silver Dollar, Frosty MS65 Rare in Finer Grades

3906 1891-CC MS65 PCGS. VAM-2. The mintmark is clear and set high in the field. This Gem 1891-CC Morgan dollar displays brilliant, frosty luster and well-preserved surfaces. The usual strike weakness appears on the eagle's breast and the hair above Liberty's ear, although the overall eye appeal is excellent. PCGS lists 33 finer submissions (10/15). NGC ID# 255H, PCGS# 7206

3907 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. A Top 100 Variety. Sharp at the centers, and brilliant and frosty, with a few light abrasions that account for the near-Gem grade, but no heavy marks. Cartwheel mint luster flashes across both sides. Many coins were transported to San Francisco for storage after mintage, acquiring scuffs and bagmarks in transit, where they were later released in the 1950s. Other Mint State coins trace to the GSA sales and the Redfield hoard. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

3908 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. A Top 100 Variety. A lustrous and impressively preserved Choice Carson City dollar. The strike is bold and the eye appeal is enticing. A slender strip of plastic is encapsulated near the RIC in AMERICA, and should not be mistaken for an abrasion. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

3909 1891-CC Spitting Eagle, VAM-7, MS60 NGC. A Top 100 Variety. Carson City collectors are aware that the "Spitting Eagle" near-date VAM-3 makes a frequent appearance among Uncirculated 1891-CC Morgan dollars. But few appreciate the rarity of the far-date VAM-7, which shares the same reverse (albeit in a later die state) as its prevalent VAM-3 predecessor. A brilliant and nicely struck example with good luster and relatively few marks.

3910 1891-O MS64+ PCGS. The well-preserved surfaces of this high-end Choice example display a few hints of greenish-gold and violet toning. The design elements are well-detailed and both sides radiate vibrant mint luster. NGC ID# 255J, PCGS# 7208

3911 1891-S MS65+ PCGS. The fields are nearly mark-free on this brilliant, untuned, high-end Gem dollar. The strike is equally sharp on Liberty's portrait, where the hair strands above the ear are complete. A few light grazes are the only discernible marks on the flashy, blaze-white surfaces. Scarce at the MS65 level with the PCGS Plus designation. NGC ID# 255K, PCGS# 7210

1892 Dollar, Well-Struck MS65

3912 1892 MS65 PCGS. The 1892 Morgan dollar is available through near-Gem after which the population declines markedly, making the issue challenging in Gem, with fewer than 420 examples reported by the two services. Finer pieces are extremely rare, with only six submissions seen (10/15). Electric-blue, blue-green, and orange toning clings to the obverse margin. Well struck, including partial detail in the hair above Liberty's ear. NGC ID# 255L, PCGS# 7212

3913 1892 MS64 Prooflike PCGS. Prooflike 1892 Morgan dollars are sparsely populated and become rare in MS64 or better condition. This Choice example is well-struck with highly reflective fields and soft champagne-gray toning. No bothersome abrasions are observed. Population: 29 in 64 (1 in 64+) Prooflike, 5 finer (10/15). NGC ID# 255L, PCGS# 7213

3914 1892-CC MS61 NGC. This pleasing Mint State Morgan dollar offers well-detailed design elements and slightly subdued frosty mint luster under dusky shades of bluish-gray and sea-green toning. The surfaces show the minimum number of contact marks for the grade. NGC ID# 255M, PCGS# 7214

3915 1892-CC MS63 NGC. This attractive Select specimen offers sharply detailed design elements and lightly marked brilliant surfaces, with a few subtle hints of pink and vibrant mint luster throughout. NGC ID# 255M, PCGS# 7214

3916 1892-CC MS63 PCGS. Frosty luster and traces of champagne toning deliver pleasing eye appeal for this Select 1892-CC dollar, while light, scattered surface grazes are not particularly bothersome. Moderate strike weakness in the centers is not unusual for both this and the following issue from the Carson City Mint. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Well-Struck MS64 Prooflike

3917 1892-CC MS64 Prooflike PCGS. Pleasing field-motif contrast is apparent on this near-Gem Prooflike Morgan dollar. Well-struck design elements include the hair above Liberty's ear and the eagle's breast feathers. A few minute marks preclude Gem classification. This issue is always popular because of the CC mintmark. Population: 82 in 64 (4 in 64+) Prooflike, 13 finer (10/15). NGC ID# 255M, PCGS# 7215

**1892-O Dollar, MS65
Above-Average Strike**

- 3918 1892-O MS65 PCGS.** Intense luster emanates from the silver-white surfaces of this Gem O-mint Morgan. The design elements are well-defined for the issue, which is notoriously weak. The hair over Liberty's ear has a modicum of detail, and a good amount of definition is apparent in the eagle's breast feathers. PCGS has seen a mere six pieces finer (10/15). NGC ID# 255N, PCGS# 7216

1892-O Dollar, Frosty MS65

- 3919 1892-O MS65 PCGS.** The certified population of the 1892-O Morgan dollar declines significantly between MS64 and MS65, making this Gem example a highly sought-after coin among series enthusiasts. Vibrant, frosty luster is the chief visual attribute, cartwheeling around brilliant surfaces. Trivial strike weakness is seen at the usual central high points, and a few minor marks in the left obverse field preclude a finer grade. PCGS lists six numerically higher-grade examples (10/15). NGC ID# 255N, PCGS# 7216

- 3920 1892-S AU50 NGC.** Silver mint luster remains strong on this About Uncirculated example of the conditionally rare 1892-S. A few light abrasions and some slate-gray overtones do not reduce the vibrancy of this coin, which exceeds expectations of the AU50 level. NGC ID# 255P, PCGS# 7218

- 3921 1892-S AU50 PCGS.** The 1892-S ranks among the most conditionally rare Morgan dollar issues. This briefly circulated representative is untoned and displays only trivial marks. The centers display light wear, but the eye appeal is impressive. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Partially Lustrous AU55

- 3922 1892-S AU55 NGC.** Moderate luster remains in the fields of this Choice AU 1892-S Morgan beneath soft lavender and champagne hues. Wear is trivial and there are few noticeable abrasions. This issue is the second-rarest date in the series in Mint State, making high-end AU examples appealing to a wide range of collectors. NGC ID# 255P, PCGS# 7218

- 3923 1893 MS63 PCGS.** Rich orange-gold and lilac toning dominates the obverse. The reverse is brilliant save for peripheral peach and jade-green patina. Faint marks on the cheek and near 4 o'clock on the obverse preclude a finer grade.

Ex: Long Beach Signature (Heritage, 9/2012), lot 4198. NGC ID# 255R, PCGS# 7220

- 3924 1893 MS64+ PCGS. VAM-2.** Dynamic cartwheel luster illuminates this brilliant and nicely struck better date dollar. Carefully preserved and attractive. The 1893 repeal of the Sherman Silver Purchase Act was likely responsible for the low mintage of 1893-dated silver dollars. NGC ID# 255R, PCGS# 7220

- 3925 1893-CC XF45 PCGS.** This final-year Carson City example retains prooflike surface at the obverse margins and throughout the reverse fields. Small abrasions are scattered across the surfaces, but none are severe. Traces of golden luster remain in protected areas. The central motifs are slightly soft from a combination of strike and light wear. Relatively few Choice XF coins are listed in the certified population reports, far fewer than the number required to fill the wantlists for circulated sets. NGC ID# 255S, PCGS# 7222

- 3926 1893-CC — Improperly Cleaned — NGC Details. Unc.** A still-attractive and unworn specimen of the rarest Morgan dollar from the Carson City Mint. The surfaces show the flat luster characteristics that indicate a light cleaning in the past, but few contact marks are evident and the design elements are well-detailed. NGC ID# 255S, PCGS# 7222

- 3927 1893-O AU58 NGC.** Just 300,000 pieces were struck, and while the rare San Francisco issue overshadows the scarcity of its New Orleans brother, the 1893-O is the second-scarcest O-Mint issue of the Morgan series. This near-Mint example is brilliant and lustrous with frosty appeal. Slight central weakness and a few reverse luster grazes do not lessen the pleasing visual impression. NGC ID# 255T, PCGS# 7224

- 3928 1893-O AU58 PCGS.** The frosty silver surfaces of this near-Mint 1893-O Morgan are attractively original, showing brief friction over the high points in the form of faint amber toning. The weakness on the eagle's breast and the hair above Liberty's ear is due almost entirely to strike. Significant luster remains in the fields and there are no serious abrasions. NGC ID# 255T, PCGS# 7224

- 3929 1893-O — Obverse Improperly Cleaned — NGC Details. Unc** The turbulent financial times resulted in low mintages at all four Mints in 1893, with Carson City striking the most silver dollars but only nominal mintages at Philadelphia, San Francisco, and New Orleans. This silver-gray O-Mint example retains nice mint luster despite a light obverse cleaning. Abrasions are few, although a rather lengthy, shallow mark runs vertically from the cheekbone to mid-neck. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS61
Scarce O-Mint Issue**

3930 1893-O MS61 NGC. Financial panic influenced silver dollar mintages at all four Mints in 1893, with only the Carson City branch mint producing a somewhat substantial quantity of coins. The New Orleans facility struck a mere 300,000 pieces before operations ceased for the year on June 1. This example shows an even silver-gray patina with soft mint luster shining through. As usual, the strike is not fully brought up on the central high points, but the coin is refreshingly clear of bagmarks or heavy abrasions. A pleasing coin for the grade. NGC ID# 255T, PCGS# 7224

3931 1893-S — Scratches, Cleaned — NGC Details. Good. A low-end example of this sought-after series key, obtainable even by the most cost-weary collectors. The central motifs are boldly outlined, and the rims are complete save a short portion of the obverse border from 9 to 11 o'clock, which is a trifle ill-defined. Though lightly cleaned in the past, each side now shows battleship-gray toning. A few old, thin scratches on Liberty's cheek are noted by NGC. NGC ID# 255U, PCGS# 7226

3932 1893-S VG8 PCGS. This is an outstanding piece for the collector on a limited budget who desires high quality. For the grade, this well-circulated 1893-S is uncommonly attractive. Evenly circulated, each side displays medium golden-gray color in the center and deeper olive, russet, and blue-gray hues around the peripheries, suggestive of old album toning. NGC ID# 255U, PCGS# 7226

3933 1893-S — Rim Damage — NGC Details. VG. A large rim bump below the date and two smaller ones below DOLLAR preclude a numeric grade for this accessible 1893-S Morgan, although the coin is otherwise free of obvious faults. The surfaces are smooth and display medium tan-gold patina. NGC ID# 255U, PCGS# 7226

3934 1893-S VG10 PCGS. This key-date VG dollar displays strong definition, including a bold LIBERTY. Silver-gray surfaces reveal scattered light marks, fewer and less severe than expected for a heavily circulated cartwheel. A nice fit for a lower- to mid-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

3935 1893-S — Improperly Cleaned — NGC Details. Fine. NGC notes evidence of old cleaning, although the surfaces have since retoned a pleasing tan-gray hue. Wear is even and consistent with the Fine level. An affordable example of this sought-after series key. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, Fine 15

3936 1893-S Fine 15 PCGS. Metallic gray hues appear in varying shades on each side of this collector-grade 1893-S Morgan dollar, while lighter tan-gray highlights make the high points of the devices stand out in contrast. Detail is pleasing for the grade and there are no bothersome surface imperfections. Eye appeal is pleasing. NGC ID# 255U, PCGS# 7226

1893-S Morgan, VF Details

3937 1893-S — Improperly Cleaned — NGC Details. VF. A cleaned but well-detailed VF example of this key Morgan dollar issue, showing pale steel-gray patina and a few areas of deeper russet. The surfaces are smooth, devoid of significant cuts or scratches which often affect examples at this grade level. As the most sought-after date in this heavily collected series, the 1893-S is pursued in all grades and conditions. NGC ID# 255U, PCGS# 7226

3938 1894 XF45 PCGS. For the XF level, this 1894 Morgan is an outstanding coin. Consistent champagne toning spreads over smooth surfaces while flashes of original luster emerge from the protected regions of the fields. Wear is minimal. The 1894 is the scarcest Philadelphia issue in the series save for the proof-only 1895, and boasts a scant mintage of 110,000 coins. NGC ID# 255V, PCGS# 7228

3939 1894 AU55 NGC. Moderate luster remains in the fields of this Choice AU 1894 dollar, highlighting the well-struck design elements, which show little wear over their high points. Surprisingly, there are no severe abrasions from this coin's brief stint in circulation. NGC ID# 255V, PCGS# 7228

3940 1894 AU58 PCGS. CAC. This near-Mint 1894 Morgan displays dusky golden-gray and pale olive hues over frosty surfaces and partially lustrous fields. There are no major abrasions, and the eye appeal is spectacular in regards to its originality. NGC ID# 255V, PCGS# 7228

3941 1894-O MS62 PCGS. Moderately abraded but with frosty luster and pleasant champagne toning. The eagle's breast and the hair above Liberty's ear are predictably weak. The 1894-O is a semikey date in all grades but emerges as a conditionally scarce issue in finer Mint State levels. NGC ID# 255W, PCGS# 7230

3942 1894-O MS62 PCGS. The chief attribute of this brilliant 1894-O Morgan is the radiant, frosty luster that enlivens each side. Scattered abrasions are minor in nature, although the often seen strike weakness does appear on the central high points of the eagle and Liberty's portrait. NGC ID# 255W, PCGS# 7230

3943 1894-S MS63+ PCGS. The fields are semiprooflike and nearly untuned, with a faint golden hue that appears sparingly amid the bright silver luster. Bagmarks are limited to a few shallow scuffs in the left obverse field, as well as a short mark in the eagle's left wing. Some parallel roller marks or striations run vertically on the portrait at the lower chin and ear. A high-end Select Uncirculated coin with excellent eye appeal, sharply struck as are most of this well-produced San Francisco date. NGC ID# 255X, PCGS# 7232

3944 1894-S MS64 PCGS. Original, frosty luster illuminates essentially brilliant surfaces on this Choice 1894-S Morgan dollar. A few trivial ticks on Liberty's cheek limit the grade but pose little distraction. Minor strike weakness is seen on the eagle's breast and the hair above Liberty's ear. NGC ID# 255X, PCGS# 7232

3945 1894-S MS64 PCGS. CAC. This impressive Choice specimen exhibits sharply detailed, frosty design elements and lightly marked surfaces that show a mix of satiny mint luster and prooflike reflectivity in the fields. Eye appeal is outstanding. NGC ID# 255X, PCGS# 7232

3946 1895-S AU50 PCGS. Just a touch of high-point wear shows on the well-detailed design elements of this pleasing AU specimen and the lightly abraded surfaces exhibit hints of lavender-gray and sea-green toning, with traces of original mint luster. NGC ID# 255Z, PCGS# 7238

3947 1895-S/S VAM-3 XF40 PCGS. A Hot 50 Variety. Although undesignated as such on the PCGS insert, this is the blundered mintmark variety with a tilted prominent S and a curve from a secondary S to the northwest. But any 1895-S dollar is desirable, since it is key to a date set of the Morgan series. This stone-gray example is lightly marked save for abrasions near the CA in AMERICA. NGC ID# 4BC2, PCGS# 134020 Base PCGS# 7238

3948 1895-S/S VAM-3 AU55 NGC. A Hot 50 Variety. Although the VAM-3 designation is not identified on the holder, this Choice About Uncirculated dollar shows the clearly doubled mintmark tilted to the right and repunched west, where the curved dash of the original S mintmark showing at the upper left and a short spike at the upper loop of the primary S. Mint luster remains at the margins, with slightly busy obverse surfaces but no major marks. Sharp motifs remain despite five points of wear. NGC ID# 4BC2, PCGS# 134020 Base PCGS# 7238

3949 1896 MS67 PCGS. Hundreds of thousands of 1896 dollars were released from Treasury vaults during the mid-20th century. Examples are collectible through MS66, very scarce in MS67, and nearly unobtainable in higher grades. This Superb Gem is sharply struck and fully brilliant with coruscating luster. PCGS reports two submissions finer (10/15). NGC ID# 2562, PCGS# 7240

3950 1896-O MS62 PCGS. The 1896-O is a notoriously duller-than-average issue, with generally poor strike and luster except for a few exceptions. This example is one of the fortunate few, with bright mint luster and plentiful eye appeal. The strike is a bit weak over the ear, but sharper than normal on the eagle's breast and talons. Only light abrasions limit the grade. NGC ID# 27ZU, PCGS# 7242

3951 1897-O MS62 PCGS. A plentiful date in lower grades, the 1897-O becomes increasingly elusive in Mint State levels. This piece is nearly brilliant and displays vibrant, satiny luster. Scattered abrasions limit the grade, and mild strike weakness is seen on the central high points, as usual. NGC ID# 2565, PCGS# 7248

3952 1897-O MS62 NGC. Lightly abraded, as the grade suggests, but with intense, frosty luster and a trace of champagne toning. The eye appeal is further heightened by the sharpness of the design elements, which are far better defined than usual for New Orleans issues from this period. NGC ID# 2565, PCGS# 7248

1897-O Morgan Dollar, MS63 Sharp for the Grade

3953 1897-O MS63 NGC. Diligent searching rewards collectors seeking a nice 1897-O, and this Select example qualifies in all respects. The surfaces are frosty and alive with vibrant mint luster, with a hint of reddish-gold toning over the smooth-silver fields and devices. A strong strike for the issue shows only slight blending at the over-ear hair strands and the eagle's talons. A few minor abrasions are little more than luster grazes on the obverse, while the reverse shows only three or four light marks. NGC ID# 2565, PCGS# 7248

3954 1897-S MS66 PCGS. The 1897-S Morgan dollar had a high mintage exceeding 5.8 million coins and is readily available through Gem. Premium Gems can be located with searching and higher-grade coins are rare; indeed, the two services report fewer than 40 pieces finer than MS66 (10/15). The predominately silver-white surfaces of this representative are well-struck and minimally marked. NGC ID# 2567, PCGS# 7250

1898 Morgan Dollar, MS67

3955 1898 MS67 PCGS. CAC. A brilliant and sharply struck Superb Gem. Both sides display only infrequent and delicate contact. Essentially as nice as can be obtained for this available Philadelphia issue. Groups of die lines above the eagle's shoulders may be of interest to the specialist. Population: 86 in 67 (4 in 67+), 0 finer (10/15). NGC ID# 2568, PCGS# 7252

3956 1898-O MS67 NGC. An excellent strike manifests itself in sharp detail on the design elements, including the hair at Liberty's ear and the eagle's breast feathers. Potent luster exudes from both sides, heightening the coin's overall eye appeal. A few light grazes do not disturb. NGC has graded only one numerically finer example (10/15). NGC ID# 2569, PCGS# 7254

3957 1898-S MS65+ PCGS. The fields are more reflective than frosted, with smooth, nearly unabraded surfaces and a clean cheek on Liberty. A few tiny marks are visible at the eyebrow when viewed with a lens. An untuned example of high quality, where brilliant silver luster reveals a sharp strike throughout. The mintmark is repunched north. Scarce this nice. Population: 6 in 65+, 85 finer (9/15). NGC ID# 256A, PCGS# 7256

3958 1899-O MS66 Prooflike PCGS. This lovely, prooflike Premium Gem is ideal for the grade. The design elements are well struck, the fields are richly reflective, and there are few marks on either side. MS66 is the highest numeric grade recognized in Prooflike format by either service. PCGS Population: 15 in 66 (1 in 66+) Prooflike, 0 finer (10/15). NGC ID# 256C, PCGS# 7261

3959 1900-S MS65 PCGS. Gem examples of this final 19th century San Francisco issue are occasionally seen, but higher-grade pieces are scarce. This near-brilliant representative is free of significant abrasions and shows traces of light golden color. The hair above Liberty's ear exhibits the only noticeable strike softness. NGC ID# 256H, PCGS# 7270

3960 1900-S MS65 Prooflike PCGS. Lightly toned in tan-gold hues and surprisingly reflective for this late date S-mint Morgan. The central devices are well-struck over Liberty's ear and on the eagle's breast. Population: 20 in 65 Prooflike, 6 finer (10/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 7728. NGC ID# 6MTV, PCGS# 7271

1901 Silver Dollar, MS61 Appealing for the Grade

3961 1901 MS61 PCGS. Surprisingly few abrasions are present for the grade on this Uncirculated 1901 Morgan dollar, although moderate strike weakness on the eagle's breast and the hair above Liberty's ear likely contributes to the numerical assignment. The coin is brilliant over the interiors and has warm golden toning around the peripheries. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS62

3962 1901 MS62 NGC. A few minor contact marks are scattered about the lustrous surfaces of this attractive MS62 specimen, with a few hints of golden-tan toning and well-detailed design elements. The 1901 is a famous conditional rarity, common in VF but increasingly rare with incremental Mint State grades. NGC ID# 256J, PCGS# 7272

3963 1901-S MS64+ PCGS. CAC. Dusky stone-gray and gunmetal toning graces lustrous and minimally marked surfaces. The centers are incompletely brought up but the rest of the coin is well struck. A "Two Olive Reverse" variety, caused by hubbing of two different (C3 and C4) reverse subtypes. The reverse is lightly die doubled, most apparent on the southwest portion of the O in DOLLAR. NGC ID# 256L, PCGS# 7276

3964 1901-S MS65 PCGS. An impressive Gem representative of this better date, with well-detailed design elements and vibrant mint luster. Highlights of golden-tan toning visit the well-preserved surfaces. PCGS has graded 38 numerically finer examples (10/15). NGC ID# 256L, PCGS# 7276

1901-S Morgan Dollar, MS64 Prooflike Elusive With Prooflike Fields

3965 1901-S MS64 Prooflike PCGS. The 1901-S Morgan is difficult to locate with notable eye appeal, something with which the prooflike fields of this example help. Abrasions are minimal, and the satiny surfaces display traces of light golden toning. Roller marks can be seen over the central regions, not fully struck out of the planchet by the dies. Corresponding weakness appears on the eagle's breast and the hair above Liberty's ear. Population: 10 in 64 (1 in 64+) Prooflike, 4 finer (10/15). NGC ID# 256L, PCGS# 7277

3966 1902-S MS64+ PCGS. The well-preserved surfaces of this high-end Choice example are highlighted by shades of lavender-gray, cerulean-blue, and golden-tan toning. Well-detailed design elements and frosty mint luster are evident, under the patina. NGC ID# 256P, PCGS# 7282

3967 1902-S MS65 PCGS. Shades of greenish-gold, lavender-gray, and amber toning visit the well-preserved surfaces of this impressive Gem, with well-detailed design elements and vibrant mint luster underneath. NGC ID# 256P, PCGS# 7282

3968 1902-S MS63 Prooflike PCGS. A scarce prooflike example of the 1902-S, with starkly mirrored fields surrounding lightly frosted central motifs. Light marks appear on both sides, with a slightly deeper bagmark below the chin and some faint golden-gray patina emerging at the central reverse. Flashy surfaces reveal only minor weakness above the ear and at the talons. Population: 14 in 63 Prooflike, 12 finer (9/15). NGC ID# 256P, PCGS# 7283

3969 1903-S AU55 NGC. The 1.2 million-piece mintage is small by Morgan dollar standards — always an irresistible attraction for series specialists. Brilliant surfaces show a faint hint of almond-gold toning, but silver luster predominates. Liberty's cheek and neck are clear of any abrasions, while the eagle's breast and the hair over the ear show token blending from wear and strike. NGC ID# 256T, PCGS# 7288

1903-S Morgan, MS62 Upper-End for the Grade

3970 1903-S MS62 NGC. The 1903-S is well-known as one of the Mint State keys among 20th century Morgan dollars. The typically seen example is heavily abraded, which sets apart this unusually clean representative from most other MS62 coins. Grade-limiting abrasions are trivial, undetectable to the naked eye. Satiny surfaces display golden-gray toning and highlight well-defined motifs. NGC ID# 256T, PCGS# 7288

- 3971 1903-S Micro S, VAM-2, XF45 PCGS.** A Top 100 Variety. This steel-gray Micro S Morgan dollar display relatively smooth surfaces and excellent detail with hints of golden luster in the protected regions of the fields. The 1903-S is a better date in and of itself, and the VAM-2 variety makes this piece all the more appealing. NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

1904-O Dollar, MS67
Sharp Over the Ear, Tied for Finest

- 3972 1904-O MS67 NGC.** Excluding Plus and Star coins, this Superb Gem 1904-O is tied for numerical finest at both services combined (10/15). Massive Treasury releases in the early 1960s made what used to be a New Orleans scarcity readily available in all grades except MS67 or finer. The surfaces of the current example show a pale ivory-gold hue over semiprooflike fields. Liberty's cheek is clear, with a pair of tiny marks over the eye only visible with a lens. The strike is remarkably sharp for even this usually well-produced O-Mint issue. NGC ID# 256V, PCGS# 7292

- 3973 1904-O MS66+ Prooflike NGC. CAC.** More than 25% of the 1904-O production was unreleased until 1962, when the Treasury department turned loose of more than a million pieces at face value. The New Orleans Mint did some of its best work in 1904 — its last year of striking silver dollars, although precious few examples approach the MS67 level with prooflike surfaces. This example is brilliant-white, untoned, and needle-sharp with reflective fields and frosted devices. A few small marks prevent an even higher grade. Census: 2 in 66+ Prooflike, 3 finer (10/15). NGC ID# 256V, PCGS# 7293

- 3974 1921 MS66+ PCGS. CAC.** The cartwheel mint luster alone sets this coin apart from other Premium Gem examples, and the overall lack of any significant marks further justifies the PCGS Plus designation. The frost-white surfaces are fine-grained and radiate vibrant eye appeal. The sharpness of strike exceeds most examples. Just 10 numerically finer coins are reported by PCGS despite the huge mintage of more than 44 million pieces. Population: 47 in 66+, 10 finer (10/15). NGC ID# 256X, PCGS# 7296

- 3975 1921-S MS65+ NGC.** The final year of Morgan dollar production saw the California mint strike nearly 22 million examples. Although readily available through MS65, Plus-designated Gems represent a tiny minority of coins certified at that grade level. Finer examples are very scarce. This is a dazzling, all-brilliant dollar with cartwheel luster and pinpoint definition. NGC ID# 256Z, PCGS# 7300

- 3976 1921-S MS65+ PCGS.** A high-end Gem from the final year of the Morgan dollar design, with well-detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show hints of greenish-gold and violet toning at the peripheries and eye appeal is outstanding. PCGS has graded 80 numerically finer examples (10/15). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66
Tied for Finest at PCGS

- 3977 1921-S MS66 PCGS.** This S-mint issue is more challenging than the 1921-P or 1921-D, as most coins are heavily abraded and weakly defined. The hair and breast feathers show strong detail for the date. Blushes of translucent champagne-gold patina provide the only indication of color over otherwise radiantly brilliant and thickly frosted surfaces. Surprisingly, PCGS has yet to encounter an MS67 example, positioning this attractive Premium Gem among the finest certified survivors. Population: 78 in 66 (3 in 66+), 0 finer (10/15). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1890 Morgan Dollar, PR64
Just 560 Proofs Struck

- 3978 1890 PR64 PCGS.** Pale-gold toning is evenly dispersed through the fields and across the lightly frosted central motifs on both sides, deepening at the margins to vibrant, sun-gold shades. The glassy-mirrored fields show a few delicate lines under magnification, yet this radiant proof is exceedingly sharp and attractive for the near-Gem grade. Population: 47 in 64, 38 finer (10/15). NGC ID# 27ZK, PCGS# 7325

- 3979 1897 PR61 NGC.** A pleasing PR61 Morgan dollar from a small proof mintage of only 731 pieces, this specimen exhibits reflective fields and sharply detailed design elements under delicate shades of pale gold toning, with a few specks of violet and amber. NGC ID# 27ZV, PCGS# 7332

- 3980 1900 PR61 NGC.** The reflective fields of this impressive PR61 example show a few hazy areas, but the design elements are sharply detailed and attractive hints of greenish-gold and lavender toning add to the considerable eye appeal. NGC ID# 3KYV, PCGS# 7335

- 3981 1900 PR62 NGC.** This popular turn-of-the-century Morgan dollar offers sharply detailed design elements and reflective fields that show a few scattered hairlines and contact marks. Hints of pale gold toning visit the surfaces on both sides. NGC ID# 3KYV, PCGS# 7335

- 3982 1902 PR58 NGC.** Just a trace of wear shows on the hair above the ear and the surfaces display a few minor hairlines, but the design elements remain well-detailed and the fields are still brightly reflective throughout. Hints of lavender and greenish-gold toning add to the considerable eye appeal. NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

- 3983 1921 MS65 PCGS.** 1921 Peace dollars are typically cataloged as having an “above average” strike, reminiscent of the children of Lake Wobegon. But the present Gem truly does have a pleasing strike, and the stone-gray surfaces are also exceptional for the issue. The reverse exhibits light die rust near DOLLAR. NGC ID# 2U4E, PCGS# 7356
- 3984 1922 MS66+ PCGS. CAC.** The 1922 Peace dollar becomes quite elusive in grades above the MS66 level. This high-end Premium Gem is well-detailed and impeccably preserved, with vibrant mint luster throughout. PCGS has graded 28 numerically finer examples (10/15). NGC ID# 257C, PCGS# 7357

1923-S Peace Dollar, MS65 Extremely Rare Any Finer

- 3985 1923-S MS65 PCGS.** This San Francisco issue is available in low Mint State grades but becomes conditionally scarce at the Gem level, and finer pieces are prohibitively rare. This example is well-preserved and frosty with warm sun-gold toning. The central high points are softly struck, but no major abrasions disturb the surfaces. PCGS lists three finer representatives (10/15). NGC ID# 257H, PCGS# 7362

1923-S Dollar, Frosty MS65 Exceptional Quality

- 3986 1923-S MS65 PCGS.** Frosty luster and a strong strike on the central motifs far exceed the norm for this quality-challenged San Francisco date. The textured, near-brilliant surfaces generate great eye appeal. Numerous die cracks traverse both sides, and minor scuffs occur on and near the portrait. Still, few examples of the issue can equal this coin for visual impact and desirability. PCGS has graded just three examples finer (10/15). NGC ID# 257H, PCGS# 7362

1923-S Peace Dollar, MS65 Almost Unobtainable Finer

- 3987 1923-S MS65 PCGS.** Unlike its Philadelphia counterpart, the 1923-S Peace dollar is scarce in Gem condition, and finer examples are extremely rare. This champagne-toned representative displays vibrant, frosty luster — devoid of abrasions save for a few trivial grazes on the high points of the eagle. Well-struck and eye-appealing. PCGS lists three finer examples (10/15). NGC ID# 257H, PCGS# 7362

- 3988 1924-S MS64+ PCGS. CAC.** The sharply struck surfaces are highly lustrous through a translucent lemon-gold hue and a speckling of russet-red toning. Liberty's hair strands and the eagle's feather definition are above average for the issue. Eye appeal is undiminished by a few tiny scuffs and a short mark on the cheekbone. A Plus-graded near-Gem with CAC endorsement. NGC ID# 257K, PCGS# 7364

- 3989 1925-S MS64+ PCGS. CAC.** Locating a 1925-S Peace dollar finer than MS64 is a major challenge. Indeed, PCGS and NGC combined report just a little over 100 Gem and finer examples, a number of which are likely resubmissions (10/15). Pleasing luster emanates from both sides of this brilliant high-end near-Gem. The design elements are better-struck than ordinarily seen, including nice detail in the hair at Liberty's ear. Scattered light marks barely prevent Gem classification. NGC ID# 257M, PCGS# 7366

- 3990 1926-S MS65+ PCGS. VAM-7.** Almond-gold and ice-blue toning grace this lustrous and well struck branch mint Gem. Only scattered inoffensive contact determines the grade. The 6 in the date and the designer's initials are lightly die doubled. NGC ID# 257R, PCGS# 7369

- 3991 1927 MS65 NGC.** A lustrous and well struck Gem that has a hint of apricot-gold color at the margins. Exceptionally clean and with undisturbed surfaces. A lower mintage issue that is surprisingly elusive at this level of preservation. NGC has graded only three numerically finer examples (10/15). NGC ID# 257S, PCGS# 7370

- 3992 1927 MS65 PCGS.** A delightful Gem Peace dollar, with sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster throughout. PCGS has graded 14 numerically finer examples (10/15). NGC ID# 257S, PCGS# 7370

- 3993 1927-S MS64+ PCGS. CAC.** The 1927-S Peace dollar's availability plummets dramatically between MS64 and MS65, making this Plus-graded Choice example highly important to a plethora of collectors. The strike is bold, and the near-brilliant surfaces yield vibrant, frosty luster. A few trivial, scattered ticks are all that preclude a full Gem designation. NGC ID# 26J6, PCGS# 7372

- 3994 1927-S MS64+ PCGS. CAC.** Shades of amber, gray, pale gold, and russet toning visit the well-preserved surfaces of this high-end Choice example, with most of the color on the obverse. The design elements are well-detailed, and vibrant mint luster radiates from both sides. PCGS has graded 79 numerically finer examples (10/15). NGC ID# 26J6, PCGS# 7372

3995 1928 MS64 PCGS. Predominantly untuned and brilliant, this low-mintage key Peace dollar offers dazzling cartwheel mint luster. A mere hint of almond-gold at the rim serves to confirm the sharply struck, original surfaces, which show a few minuscule ticks plus an angled contact on the neck truncation. The coin is remarkably smooth and appealing. NGC ID# 257V, PCGS# 7373

**1928 Dollar, Lustrous MS65
Lowest Mintage in the Series**

3996 1928 MS65 PCGS. The 1928 has the lowest mintage in the Peace dollar series (360,649 pieces). Gem is the finest grade likely to be encountered as PCGS and NGC report only 21 examples finer (10/15). Dazzling luster radiates from the well-preserved silver-gray surfaces. The design elements are well-impressed. NGC ID# 257V, PCGS# 7373

1928-S Dollar, Lustrous MS64+

3997 1928-S MS64+ PCGS. CAC. Most collectors are unlikely to encounter a 1928-S Peace dollar any finer than this high-end near-Gem. PCGS reports fewer than 60 pieces in higher levels of preservation (10/15). Strong luster emanates from silvery surfaces that exhibit well-struck design elements. A few minor ticks do not distract. NGC ID# 257W, PCGS# 7374

**1928-S Dollar, MS64+
Important Rarity in Finer Grades**

3998 1928-S MS64+ PCGS. CAC. The 1928-S Peace dollar is one of the rarest dates in the series in Gem condition, putting high-end MS64 examples on the radar of a wide variety of collectors. This Plus-designated piece yields excellent mint frost with golden toning and minimal abrasions. The strike is a trifle soft on the central high points but there is little affect on the eye appeal. NGC ID# 257W, PCGS# 7374

3999 1934-D MS64+ PCGS. Ex: Teich Family Collection. Micro D. A popular late-series issue, the 1934-D Peace dollar boasts a moderately low mintage of little more than 1.5 million pieces. This high-end near-Gem displays well-struck motifs and frosty luster. The interiors are brilliant, but fiery-orange and sun-gold hues dominate the margins. NGC ID# 257Y, PCGS# 7376

**1934-S Peace Dollar, MS61
Mint State Key**

4000 1934-S MS61 PCGS. The 1934-S is by far the scarcest issue in the Peace dollar series in Mint State. This example is free of major abrasions, although grade-limiting chatter is seen when studied with a loupe. The strike is sharp, and the satiny luster shows a light champagne hue. A collectible Mint State example of this better late-series issue. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS62
Brightly Lustrous**

4001 1934-S MS62 NGC. In absolute numbers, the 1934-S is by far the scarcest Peace dollar issue in Mint State. This example is well-struck and displays a tinge of champagne color over satin luster. Faint, trivial chatter limits the grade but melts into the surfaces so as to be almost undetectable to the naked eye. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS63
Vibrant Luster, Golden Toning**

4002 1934-S MS63 PCGS. Faint luster grazes on Liberty's cheek preclude a finer grade on this eye-appealing 1934-S Peace dollar, although they are virtually imperceptible to the naked eye. This piece shows satiny surfaces and warm champagne-gold toning. The design elements are sharply brought up. The 1934-S is the scarcest issue in the series in Mint State, even more so than the key-date 1928. NGC ID# 257Z, PCGS# 7377

EISENHOWER DOLLAR

- 4003** 1971-D MS66+ PCGS. CAC. Type One Reverse. This high-end Premium Gem is sharply detailed on the obverse, but the reverse shows a touch of the usual softness on the eagle's feathers. The impeccably preserved surfaces are lustrous and lightly toned in shades of pale gold. PCGS has graded 21 numerically finer examples (10/15). NGC ID# 2585, PCGS# 7407

PROOF EISENHOWER DOLLAR

- 4004** 1978-S PR70 Deep Cameo PCGS. A technically perfect example, with razor-sharp, frosty design elements that contrast starkly with the deeply mirrored fields. A few hints of pale gold toning add to the incredible eye appeal. Population: 67 in 70 Deep Cameo, (10/15). NGC ID# 282D, PCGS# 97438

COMMEMORATIVE SILVER

- 4005** 1893 Isabella Quarter MS65 PCGS. The 1893 Isabella quarter is the only classic silver commemorative of this denomination making it a must-have issue for the completion of a type set of commemorative coinage. Medium-intensity greenish-blue, russet, and gray patination adorns the lustrous surfaces of this Gem. Moreover, the design elements are sharply struck and neither side reveals mentionable marks. This piece yields great overall eye appeal and may have been conservatively graded. NGC ID# BYJ9, PCGS# 9220
- 4006** 1893 Isabella Quarter MS65 NGC. Mottled crimson and violet patina around the rims is characteristic of many Isabella quarters, attesting to the originality of this frosty Gem. Brilliant centers showcase sharply rendered relief elements. The obverse is exceptionally clean, while the reverse features small field grazes that limit the grade but not the eye appeal. NGC ID# BYJ9, PCGS# 9220
- 4007** 1893 Isabella Quarter MS65+ PCGS. CAC. Dusky lavender-gray and champagne toning appears over each side of this high-end Gem Isabella quarter, allowing vibrant cartwheel luster to emerge when rotated beneath a light. The strike is sharp, and there are no obtrusive abrasions. NGC ID# BYJ9, PCGS# 9220

1893 Isabella Quarter, MS66
Attractively Toned

- 4008** 1893 Isabella Quarter MS66 PCGS. Intricate detail characterizes the devices of this Premium Gem Isabella quarter, and a sharp wire rim around each side confirms the bold strike. The surfaces display frosty luster with champagne interiors that cede to russet-gold, olive, and sky-blue ribbons around the peripheries. Finer examples of this popular commemorative are infrequently encountered. NGC ID# BYJ9, PCGS# 9220
- 4009** 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. This boldly struck Lafayette dollar has a lustrous obverse and a satiny reverse. Blushes of forest-green and russet-brown toning encompass the borders. The interior is silver-gray. A few faded thin marks are noted on the left reverse field. NGC ID# BYKW, PCGS# 9222

1921 Alabama 2x2 Half, Sharp MS66+

- 4010** 1921 Alabama 2X2 MS66+ PCGS. This frosty Alabama Centennial half dollar is impressively bold throughout the relief elements and displays beautiful surface preservation. Hints of ice-blue and champagne accent the silvery luster while occasional olive-green overtones appear irregularly overall. PCGS lists seven Superb Gems finer (10/15). NGC ID# BYEZ, PCGS# 9225

1921 Alabama 2x2 Half, MS66+
Brilliant, High-End Silver Luster

- 4011** 1921 Alabama 2x2 MS66+ NGC. CAC. Essentially untuned and brilliant, frosty silver luster graces this lustrous and boldly struck Gem. The low mintage 2x2 variety is a series semikey in the present superior quality. Only a dozen 2x2 Alabama Centennial pieces rank numerically finer at PCGS and NGC combined than the present high-end Premium Gem. NGC Census: 7 in 66+, 9 in 66 ★, 5 finer (9/15). NGC ID# BYEZ, PCGS# 9225

1921 2x2 Alabama Centennial Half, MS66+
Soft Luster, Original Toning

- 4012** 1921 Alabama 2X2 MS66+ PCGS. CAC. This Plus-designated Premium Gem is well-struck and devoid of any distracting abrasions. Satiny luster resides beneath a blanket of dusky golden-gray toning with deeper russet and amber-red tinges around portions of the peripheries. The 2x2 variety is the scarcer of the two Alabama Centennial half dollar issues and is seldom seen in this grade. PCGS shows only seven finer examples (10/15). NGC ID# BYEZ, PCGS# 9225
- 4013** 1937 Antietam MS67+ PCGS. CAC. Shades of pale gold and lavender toning visit the impeccably preserved surfaces of this high-end Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded 18 numerically finer examples (10/15). NGC ID# BYF4, PCGS# 9229

1939-D Arkansas Half Dollar, MS67
Attractive Patina

- 4014 1939-D Arkansas MS67 PCGS.** This final D-mint Arkansas Centennial half dollar issue had a distribution of only 2,104 coins, including assay pieces. This Superb Gem survivor is rare. The strike is bold, and the vibrantly lustrous surfaces provide comparable appeal. Silvery-lavender toning is the dominant hue, although the obverse also shows tinges of sun-gold around the periphery. Population: 11 in 67 (1 in 67+), 1 finer (10/15). NGC ID# BYFK, PCGS# 9250

- 4015 1935-D Boone MS67 NGC.** Golden-tan patina is slightly deeper on the reverse of this Superb Gem commemorative half. The lustrous surfaces exhibit well-struck devices and have been very well-cared for. Tied for finest at either service. NGC Census: 6 in 67, 0 finer (10/15). NGC ID# BYFR, PCGS# 9259

- 4016 1936-D Boone MS67+ PCGS. CAC.** Light sea-green, powder-blue, and straw-gold patina graces lustrous and precisely struck surfaces. The preservation is outstanding, and none are certified finer by either leading service. Population: 46 in 67 (7 in 67+), 0 finer (9/15). NGC ID# BYFZ, PCGS# 9267

- 4017 1938-D Boone MS67 PCGS. CAC.** An essentially mark-free and border-toned Boone half, with lovely satinlike, silver surfaces and reddish-umber accents. The surfaces are essentially mark-free and sharply struck for the issue. Just 2,100 pieces were distributed. Population: 74 in 67 (7 in 67+), 5 finer (10/15). NGC ID# BYG7, PCGS# 9275

1925-S California Half, MS67
Distinctive Toning

- 4018 1925-S California MS67 PCGS.** This is a sharp, vibrantly lustrous California Diamond Jubilee half dollar, devoid of bothersome abrasions. The obverse displays a blush of pale champagne toning over much of the interior, while the periphery is toned in vivid violet, blue, and sun-gold hues. The reverse is two-faced, showing an array of multicolor toning on the left side and near-brilliance on the right with a hard olive-brown line separating the two schemes. NGC ID# BYGA, PCGS# 9281

- 4019 1936 Columbia MS67+ PCGS. CAC.** Splashes of reddish- and orange-gold on the obverse of this high-end Superb Gem display a beautiful color palette that also appears in more reserved fashion at the reverse periphery. Sharply struck design elements and impeccably preserved lustrous surfaces round out the magnificent eye appeal, appropriately recognized by CAC. Population: 9 in 67+, 1 finer (10/15). NGC ID# BYGC, PCGS# 9291

1892 Columbian Half Dollar, PR61
Attractively Toned

- 4020 1892 Columbian PR61 PCGS.** A pleasing lower-end example of the rare proof variety of the 1892 Columbian half dollar, surviving from a mintage of approximately 100 coins. The design elements are fully struck and the fields are deeply mirrored. Lavender-gold interiors cede to violet, blue, and golden-green ribbons in the margins. Population: 1 in 61, 47 finer (10/15). NGC ID# BYMW, PCGS# 9295

- 4021 1935 Connecticut MS67 NGC.** Brownish patination gravitates to the margins of this mostly brilliant, highly lustrous Superb Gem. Sharply struck design elements and impeccable preservation round out the coin's outstanding eye appeal. This is an impressive example in all respects. Census: 5 in 67+, 12 in 67 ★, 1 finer (10/15). NGC ID# BYGH, PCGS# 9299

1936 Gettysburg Half Dollar, MS67
Extremely Rare any Finer

- 4022 1936 Gettysburg MS67 PCGS. CAC.** The turning point of the Civil War, the Battle of Gettysburg, is remembered in the designs of this popular classic commemorative. The issue had a moderate distribution of 26,928 coins, but Superb Gem survivors are scarce. This piece is boldly struck and well-preserved. Champagne-gray luster reveals hints of amber, olive, and lavender around the borders. There are two MS68 coins finer at PCGS (10/15). NGC ID# BYGM, PCGS# 9305

- 4023 1922 Grant With Star MS62 NGC.** A pleasing lower-Mint State example of the scarcer of the two Grant Memorial half dollar varieties. A blush of light golden toning warms both sides, while the satiny surfaces are largely free of noticeable abrasions. NGC ID# BYPP, PCGS# 9307

- 4024 1922 Grant With Star MS64 NGC.** An attractive Choice specimen of the popular With Star variety, with well-detailed design elements and well-preserved surfaces that radiate vibrant mint luster. Eye appeal is outstanding. NGC ID# BYPP, PCGS# 9307

- 4025 1928 Hawaiian MS62 NGC.** The 1928 Hawaii half dollar is the key to the silver commemorative series. The silver-gray surfaces of this MS62 example exhibit well-defined devices, including even the intricate elements of the beach landscape. The luster is somewhat subdued. NGC ID# BYGR, PCGS# 9309

- 4026 1928 Hawaiian MS63 NGC.** An impressive Select specimen of this important silver commemorative key, with well-detailed design elements and satiny mint luster throughout. The brilliant surfaces show only minor signs of contact. NGC ID# BYGR, PCGS# 9309

- 4027 1928 Hawaiian MS63 PCGS.** A bold strike and vibrant luster rank this Hawaiian half dollar among the finer MS63 coins certified. Champagne toning underlies occasional splashes of amber and deep blue, confirming the originality of the surfaces. An absence of the usual greenish coloration is an additional attribute that many collectors will appreciate. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half Dollar, Well-Struck MS64+

- 4028 1928 Hawaiian MS64+ PCGS. CAC.** The silver-white surfaces of this high-end near-Gem commemorative yield strong luster and well-struck design elements, including the reverse beach landscape. A few minor ticks are all that keep this piece from Gem classification. The CAC endorsement affirms the above-average eye appeal. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half, MS65
Attractive Luster and Toning**

- 4029 1928 Hawaiian MS65 PCGS.** The luster on this Gem Hawaiian half is somewhat more vibrant than is typically seen, attractively showcasing well-struck design elements and largely undisturbed surfaces. Champagne-silver luster shows overtones of the usual pistachio-green color but additional lavender-pink is also present over the lower-left obverse. Finer examples of this scarcer classic commemorative are infrequently seen. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half, Brilliant MS65

- 4030 1928 Hawaiian MS65 NGC.** Unlike many Hawaiian halves, this piece is brilliant over each side and lacks the often-seen greenish patina. The mint luster is satiny and bright, and each side is remarkably free from the marks that usually accompany these pieces. This low-mintage commemorative has been considered a key to the series since issuance.
Ex: FUN Signature (Heritage, 1/2006), lot 7394; Dallas Signature (Heritage, 11/2006), lot 1642; FUN Signature (Heritage, 1/2010), lot 3204; Long Beach Signature (Heritage, 6/2010), lot 1307. NGC ID# BYGR, PCGS# 9309

- 4031 1918 Lincoln MS67 PCGS.** This is a gorgeous Superb Gem example of the Illinois Centennial commemorative half dollar, which is frequently referred to as the "Lincoln" commemorative. The bright, satiny surfaces reveal sharply struck design motifs and attractive layers of variegated, iridescent toning. PCGS reports just two numerically finer examples (10/15). NGC ID# BYGU, PCGS# 9320

**1936 Long Island Tercentenary Half
Colorful MS67**

- 4032 1936 Long Island MS67 PCGS.** A bold, impressive Superb Gem example of this classic commemorative issue, lacking the mint-made metal debris marks that often affect the ship's sails on the reverse. Mottled multicolor toning blankets each side, allowing immaculate luster to shine through. Population: 69 in 67 (4 in 67+), 0 finer (10/15). NGC ID# BYGX, PCGS# 9322

- 4033 1936 Lynchburg MS67+ PCGS. CAC.** Senator Carter Glass of Virginia was still alive at the time of his depiction on the Lynchburg commemorative, a source of some controversy. This MS67+ coin, one of 11 in the (10/15) PCGS Population Report with none finer, has a tab-toned obverse with peach, olive, and rose patina. The reverse exhibits dappled sea-green and straw-gold with stone-gray high points. NGC ID# BYDJ, PCGS# 9324

**1921 Missouri Centennial Half, MS66
Prohibitively Rare Any Finer**

- 4034 1921 Missouri MS66 NGC.** Compared to most other issues in the classic commemorative series, the 1921 Missouri Centennial half dollar was produced with fairly bold relief. As a result, the issue often shows minor strike weakness on the obverse coonskin cap and on the reverse frontiersman's back, as is seen on this piece. This Premium Gem is nonetheless well-preserved and displays champagne-tinted, satiny luster. Census: 36 in 66, 2 finer (10/15). NGC ID# BYH2, PCGS# 9330

- 4035 1938 New Rochelle MS67+ PCGS. CAC.** A seemingly flawless New Rochelle commemorative half dollar, showing radiant, satiny luster and boldly rendered motifs. The obverse displays soft lavender-blue centers with sun-gold and amber-violet toning in the margins; the reverse is similarly toned but with the border hues pushed clear to the outer peripheries. PCGS lists six finer representatives (10/15). NGC ID# BYDX, PCGS# 9335

- 4036 1936 Norfolk MS68 PCGS.** Peripheral golden-orange toning is more pronounced on the reverse of this gorgeous commemorative. Lustrous surfaces exhibit sharply struck design elements and are immaculately preserved. PCGS lists two finer representatives (10/15). NGC ID# BYH5, PCGS# 9337

- 4037 1925 Norse Medal, Thin Planchet, MS65 PCGS. CAC.** Attractively patinated with rich forest-green and mauve margins. The motifs are stone-gray. Lustrous and fully struck with unimportant field marks below 1825 and the reverse oars. Population: 46 in 65, 7 finer (10/15). NGC ID# 2WHM, PCGS# 9451

**1939-D Oregon Trail Half, MS68
Among the Finest Known**

- 4038 1939-D Oregon MS68 NGC.** The Oregon Trail commemorative half dollar series finally came to an end in 1939, a year in which the Denver mint struck only 3,000 examples (plus four coins for assay purposes). This satiny MS68 representative features immaculately preserved and seemingly brilliant surfaces with strongly struck design detail. Census: 34 in 68 (6 in 68+, 14 in 68 ★, 2 in 68+★), 0 finer (10/15). NGC ID# BYHM, PCGS# 9353

- 4039 1939-S Oregon MS67+ PCGS. CAC.** Near-identical crescents of richly iridescent, rainbow toning appear on the right-hand border of both the obverse and the reverse. The balance of the coin displays delightful, pearlescent silver-gray patina. A high-end Superb Gem example of this popular issue — pinpoint-sharp — with just 3,005 pieces distributed. Population: 7 in 67+, 8 finer (10/15). NGC ID# BYHN, PCGS# 9354

- 4040 1926 Sesquicentennial MS65 NGC.** Pale lemon-gold and subtle powder-blue hues encompass each side, complementing razor-sharp design elements. Surface abrasions are minimal, though a few faint ticks on Washington's cheek are seemingly unavoidable for the issue. NGC has encapsulated only 21 finer representatives (10/15). NGC ID# BYJ4, PCGS# 9374

- 4041 1926 Sesquicentennial MS65 NGC.** The well-preserved surfaces of this attractive Gem are richly toned in shades of golden-brown and lavender-gray, with vibrant mint luster underneath. The design elements are well-detailed and eye appeal is quite strong. NGC ID# BYJ4, PCGS# 9374

- 4042 1935 Spanish Trail MS66 PCGS.** A sharply impressed, appealing Premium Gem Spanish Trail half. The obverse is lightly toned with pearlescent fields and well-defined elements, while the reverse displays attractive, reddish-brown patina. A softly lustrous, decidedly original example. NGC ID# 34AP, PCGS# 9376

- 4043 1935 Spanish Trail MS66 NGC. CAC.** This boldly struck Premium Gem displays smooth, satiny surfaces cast in warm champagne toning. The Spanish Trail half dollar is occasionally available in this grade, but finer pieces are seldom seen. NGC ID# 34AP, PCGS# 9376

- 4044 1946-D Booker T. Washington MS67 PCGS. CAC.** The Booker T. Washington halves range from brilliant white and untuned examples to others that are flamboyantly toned. This example is colorfully toned but well-balanced with deep-seated, exquisite pastel shades that retain full mint luster and tremendous eye appeal. A few tiny marks are well hidden on the portrait. CAC endorsed, tied for numerical finest at PCGS. Population: 52 in 67 (5 in 67+), 0 finer (10/15). NGC ID# 26JE, PCGS# 9405

**1950 Booker T. Washington Half, MS67
None Finer at PCGS or NGC**

- 4045 1950 Booker T. Washington MS67 PCGS. CAC.** The satin-smooth surfaces are virtually untuned and brilliant, with frost-white silver luster and nearly mark-free fields. As always for the Booker T. Washington halves, the strike on the portrait is not 100% brought up, resulting in incomplete metal fill within the deepest recesses of the die. The small, ticklike marks that remain are remnants of the original planchet surface. The present example is far superior to most in this regard, requiring strong magnification to detect any flaws. CAC endorsed. Population: 14 in 67, 0 finer (10/15). NGC ID# 34RG, PCGS# 9420

- 4046 1951-D Washington-Carver MS66+ PCGS. CAC.** A high-end Premium Gem specimen, with well-detailed design elements and well-preserved, brilliant surfaces imbued with vibrant mint luster. Tied for the finest certified at PCGS. Population: 9 in 66+, 0 finer (10/15). NGC ID# BYKZ, PCGS# 9431

- 4047 1952 Washington-Carver MS67 NGC.** Vibrant mint luster is undiminished by a richly endowed palette of gold, lilac, and olive-gray patina that covers both sides. A glass reveals a couple of tiny marks that plague the issue, but they are nearly invisible within the attractive toning of this Superb Gem Washington-Carver. Census: 36 in 67 (1 in 67+, 10 in 67 ★, 2 in 67+★), 1 finer (10/15). NGC ID# 3325, PCGS# 9434

COMMEMORATIVE GOLD

- 4048 1903 Louisiana Purchase, McKinley, Gold Dollar MS66 PCGS. CAC.** A lustrous and intricately struck peach-gold Premium Gem. The sole imperfection is a faint vertical line through the D in DOLLAR. William McKinley was assassinated in 1901 at the Pan-American Exposition in Buffalo, New York. This tragedy accounted for the appearance of the late President on a variety of the 1903 Louisiana Purchase gold dollar. He later appeared on the 1916 and 1917 McKinley Memorial gold dollars. NGC ID# BYLE, PCGS# 7444

**1904 Lewis and Clark Gold Dollar
MS65, Dazzling Luster**

- 4049 1904 Lewis and Clark Gold Dollar MS65 NGC.** A highly lustrous butter-gold Gem with exemplary preservation and good eye appeal. The strike is crisp aside from the dentils. Although the Lewis and Clark Centennial Exposition took place solely in 1905, commemorative gold dollars were issued with both 1904 and 1905 dates. Encased in a prior generation holder. NGC ID# BYLE, PCGS# 7447

- 4050 1915-S Panama-Pacific Quarter Eagle XF45 NGC.** It is rare to come across a noticeably circulated example of this commemorative gold issue; most such coins were likely carried as pocket pieces as opposed to actually being used in commerce. This Choice XF example displays original orange-gold patina with remnants of luster in the protected areas. Wear is limited to the high points of the devices. NGC ID# BYLP, PCGS# 7450
- 4051 1916 McKinley Gold Dollar MS63 Prooflike NGC.** One of nine Prooflike examples certified by NGC, this Select 1916 McKinley gold dollar displays bold motifs set against mirrored straw-gold fields. A few stray lines in the reflective surfaces limit the grade as there are no bothersome contact marks. Census: 4 in 63 Prooflike, 3 finer (10/15). NGC ID# BYLK, PCGS# 7454
- 4052 1916 McKinley Gold Dollar MS66 PCGS.** Intense luster emanates from the gold surfaces of this Premium Gem commemorative that displays partial prooflike tendencies on the obverse. The design elements are sharply struck throughout and no mentionable marks are evident. NGC ID# BYLK, PCGS# 7454
- 4053 1922 Grant Gold Dollar, No Star, MS66 PCGS.** The two Grant gold dollar varieties are about equally available in lower Mint State grades, but the No Star variety becomes more challenging in MS66. Frosty luster rolls over light lemon-gold surfaces. The portrait and frame house exhibit bold detail, and a loupe fails to reveal any marks that merit mention. NGC ID# BYLN, PCGS# 7458

**1922 Grant Memorial Gold Dollar, MS67
Superb No Star Type Coin**

- 4054 1922 Grant Gold Dollar, No Star, MS67 NGC.** Although readily available in most grades, the No Star Grant gold dollar is a scarce issue at the Superb Gem level. This piece is exceedingly spectacular, showcasing rich yellow-gold luster and virtually perfect surfaces. The tree trunk left of the cottage door is diagnostically weak, but the remaining design elements exhibit far better definition than is typical. NGC reports five MS68 coins finer (10/15), although the present piece is among the best examples available to the majority of collectors. NGC ID# BYLN, PCGS# 7458
- 4055 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A vibrantly lustrous example with yellow-gold peripheries and rich orange-gold interiors. The design elements are well-defined, and no significant abrasions are observed. This is the final gold issue in the classic commemorative series, boasting a distribution of just 46,019 coins. Housed in a green label holder. NGC ID# 2FE9, PCGS# 7466
- 4056 1926 Sesquicentennial Quarter Eagle MS65 NGC.** A lovely Gem type coin, this Sesquicentennial quarter eagle boasts frosty sun-gold luster with wisps of coppery-orange throughout. The design elements are well-struck and there are no significant abrasions. NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

- 4057 1995-W Silver Eagle PR63 Deep Cameo PCGS.** This key Silver Eagle proof is rarely seen in the lower end of the proof grade range, giving this Select Deep Cameo a unique sort of appeal. The strike is bold, and the contrast is stark on each side. Trivial hairlines in the fields limit the grade but remain invisible to the unaided eye. NGC ID# 28WZ, PCGS# 9887
- 4058 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** An estimated mintage of just 10,000 pieces is assigned to this unusual Mint oversight, where dies lacking the final finishing steps were shipped from Philadelphia to the West Point facility for production of proof 1999-W American gold eagles. Ranked number 24 in Schechter and Garrett's *100 Greatest U.S. Modern Coins*, this *Guide Book* necessity retains its high desirability and appeal. PCGS reports just a single MS70 example, making an MS69 coin among the finest typically available to collectors. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 4059 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** The West Point dies lacked the final proof finish imparted on them, one of 10,000 pieces so-minted according to the *Guide Book* listing. This near-perfect example is sharp and radiant with original golden luster. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 4060 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** Mintages of U.S. gold bullion coins soared in 1999 due to Y2K fears. The additional demand may be responsible for the present scarce variety, along with a tenth-ounce counterpart. Both varieties are listed in the *Guide Book* and *Cherrypickers'*. The West Point mintmark was intended only on proofs, while the bullion coins were supposed to lack a mintmark. Apparently, a production step was omitted for one die pair, and it was never prepared with a proof finish. Fully struck and virtually perfect. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**2009 One-Ounce Gold Ultra High Relief Twenty
MS70 Prooflike**

- 4061 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** This Ultra High Relief Saint-Gaudens gold bullion coin was met with feverish collector demand at the time of issue in 2009, and the secondary market experienced almost immediate price increases. This perfectly preserved Prooflike example beautifully showcases Saint-Gaudens Liberty and eagle in a way that has not been seen since the 1907 Ultra High Relief patterns — coins that sell for millions of dollars today. NGC ID# 26S4, PCGS# 506602

Libertas Americana Medal
One-Ounce Gold Modern Restrike
Paris Mint, PR67 Ultra Cameo

- 4062** (2014) **Libertas Americana Medal**, Paris Mint Restrike, High Relief, Gold, PR67 Ultra Cameo NGC. Plain edge. The famous Libertas Americana medal, initially struck by the Paris Mint in the 18th century, is the subject of a modern restrike by the same facility in proof format. The weight is one troy ounce of .999 Fine gold. The alloy and the Monnaie de Paris hallmark are on the reverse exergue. The designated grade appears conservative since no imperfections are readily apparent.

COINS OF HAWAII

- 4063** **1883 Hawaii Half Dollar MS63 NGC.** A substantial mintage of 700,000 Hawaii half dollars was accomplished in 1883, but the issue was heavily melted and MS63 examples are very scarce today. This attractive Select specimen is well-detailed and lightly marked, with satiny luster under shades of lavender and gold toning. Census: 43 in 63, 45 finer (10/15). NGC ID# 2C5B, PCGS# 10991

John T. Waterhouse Token, XF45
First Hawaii Store Card, M. 2TE-1

- 4064** (1860) **Waterhouse Token XF45 PCGS. M. 2TE-1.** The John T. Waterhouse token is believed to be the earliest Hawaiian store card. Struck in a soft pewter alloy, examples invariably show a blunt nose on the bust of King Kamehameha IV. But the present piece displays hints of mint luster across the moderately marked cream-white surfaces. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBK, PCGS# 600500

1871 Wailuku Plantation Token
12 1/2 Cents, Choice VF
Medcalf 2TE-2

- 4065** **1871 Wailuku Plantation, 12 1/2 Cents, Narrow Starfish, VF35 PCGS. M. 2TE-2.** 6.01gm. The 12 1/2 cent or one bit tokens were paid to workers at the Wailuku cane sugar plantation. Narrow Starfish and Broad Starfish varieties are known. M. 2TE-2 is typically encountered with indistinct stars, but only the upper left star on the date side shows softness. The legends are bold with the exception of the base of the 2 and the fraction. The glossy olive-brown surfaces are problem-free. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBL, PCGS# 600503

- 4066** **1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars AU55 PCGS. M. 2TE-8.** Captain Thomas H. Hobron built a railroad in Maui to transport sugar from plantations to a seaport. There are two types of the 12 1/2 cent denomination, one with six stars on the dated side, while the other (M. 2TE-9) shows two stars. This is a problem-free chocolate-brown thin-planchet example with moderate inexactness of strike along the lower borders. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBN, PCGS# 600515

1886 Grove Ranch Plantation Token
12 1/2 Cents, Medcalf TE-16
VF Details

- 4067** **1886 Grove Ranch Plantation 12 1/2 Cent Token — Environmental Damage — PCGS Genuine. VF Details. M. TE-16.** The Grove Ranch was a sugar plantation located in Haliimaile, Maui, about six miles south of the Haiku Plantation, or about 12 miles east of the Wailuku Plantation. Although the Grove Ranch was more than 3,800 acres in size, tokens from that operation are rare today. The present example is well struck and free from marks, but the steel-gray fields are granular, particularly on the reverse. Listed on page 414 of the 2016 *Guide Book*. PCGS# 600521

ERRORS

1943 Lincoln Cent, XF40
on a Silver Dime Planchet

- 4068** 1943 Lincoln Cent — Struck on a Silver Dime Planchet — XF40 PCGS Secure. 1943 was the year that Lincoln cents were struck on zinc-plated steel planchets, to reserve copper for the war effort. Since a 1943 cent struck on a silver dime planchet looked similar, upon cursory inspection, to a regular issue cent of that year, the coin remained in circulation for a few years. Eventually, a collector noticed the proximity of WE TRUST and UNUM to the rim, and those legends exhibit the distortion associated with metal flow toward the border. The silver-gray surfaces show moderate wear but are unblemished.

1958 Lincoln Cent, MS63
Struck Over a 1958 Cuba Centavo

- 4069** 1958 Lincoln Cent — Struck Over a 1958 Cuba Centavo — MS63 NGC. The U.S. Mint struck copper-nickel Cuba centavos in 1958. An example of that KM-30 issue apparently lodged in a Mint tote bin, which was then filled with cent planchets and delivered to a Lincoln cent press. A lustrous and unabraded powder-blue, caramel-gold, and lilac representative. The undertype is distinct on Lincoln's vest and along the obverse margin. The 1958 centavo date is apparent on the upper portion of the right wheat ear. Struck aligned with the collar die at 4:30, with IN GOD WE and the LI in LIBERTY off the flan.

1958 Lincoln Cent, MS65
on a Cuba Centavo Blank

- 4070** 1958 Lincoln Cent — Struck on a Cuba Centavo Blank — MS65 NGC. 2.5 gm. The expected weight of a 1958 cent is 3.1 gm. In 1958, the U.S. Mint struck copper-nickel centavos for Cuba (KM-30). This wrong-planchet mint error was struck aligned with the collar at 7:30. IN GOD WE TRUST is off the flan but the other legends are complete aside from the L in LIBERTY. A lustrous chocolate-brown Gem with pleasing surfaces. The strike is intricate on the portrait and wheat ears.

1921-S Morgan Dollar
Struck 5% Off Center, AU55

- 4071** 1921-S Morgan Dollar — 5% Off Center — AU55 PCGS. Off center toward 6 o'clock, but the date is complete, as is the mintmark. A relatively broad area of unstruck surface is present near 12 o'clock. The devices show slight friction. The strike is unusually sharp for a 1921-S, since the collar die was absent, allowing the obverse and reverse dies to further approach each other. Ex: *Summer FUN Signature (Heritage, 7/2007)*, lot 2206. NGC ID# 256Z, PCGS# 7300

1901-O Ten Dollar, MS63
Obverse Lamination

- 4072** 1901-O Liberty Eagle — Obverse Lamination — MS63 NGC. A narrow diagonal lamination crosses the obverse between stars 3 and 13. Lustrous and satiny with sea-green and apricot toning. Minimally marked for the designated grade. The 1901-O is a lower mintage issue, and all New Orleans eagles are conditionally scarce at the MS63 level. Census: 19 in 63, 8 finer (10/15).

WASHINGTONIA

- 4073** (1808) Washington / Franklin Samsom Medal, Restrike, MS63 NGC. Baker-58A, Betts-617, Julian CM-5b, Greenslet-82. Bronze, 41mm. Although NGC has classified this medal as a restrike, there is not a true restrike of this medal, although there is a possibility it was a later striking. John Reich, the assistant engraver at the U.S. Mint, cut the dies for this medal for the issuer, merchant Joseph Sansom of Philadelphia. The obverse features jugate busts of Franklin and Washington while the striking reverse includes an eagle with lightning bolts in its talons descending on a portion of a globe identified as the United States. Published by Sansom and struck at the Philadelphia Mint as a part of his History of the Revolution series, this medal was designed to commemorate the signing of the Treaty of Paris that officially ended the American Revolutionary War. A mahogany-brown medal with pleasing surfaces. Two unobtrusive spots are noted on Washington's forehead and the field above the globe.

U.S. MINT MEDAL

Gold 1879 Grant Parade Medal MS63 Deep Prooflike Julian CM-18

- 4074** 1879 Grant Parade Mint Employees Medal, Gold, MS63 Deep Prooflike NGC. DeWitt-USG-1880-2, Julian CM-18, Rulau-Pa-Ph-390A. 13.01 gm. A parade for former Civil War General and U.S. President Grant was held in Philadelphia on December 16, 1879. To commemorate the event, the U.S. Mint struck a large quantity of medals in brass, and distributed the medals to the public. White metal examples were also struck, and Julian (1977) states one example was made in silver, unaccounted for today. In gold alloy, CM-18 is extremely rare, and just two are known (per Rulau). The present well-struck and handsome yellow-gold piece has flashy fields and provides excellent eye appeal.

CIVIL WAR MERCHANTS

- 4075** I. August, 84th Regiment Illinois Volunteers, Sutler Token MS62 NGC. S&I-IL-84-5B, R.8, brass.
I. August was the sutler for the 84th Regiment of Illinois Volunteers and examples of this issue are generally seen in circulated condition (John Ford's specimen was AU55 NGC). This piece exhibits well-detailed design elements and lightly marked olive-brown surfaces throughout.

GSA DOLLARS

- 4076** 1880-CC GSA MS64+ NGC. The frosty, silver-white surfaces of this high-end near-Gem from the GSA release exhibit pleasing luster and well-struck design elements. A few light scuffs preclude Gem classification. Housed in a band-certified black GSA holder, no box or paperwork. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100
- 4077** 1880-CC GSA MS65+ NGC. The lustrous silver-gray surfaces of this high-end Gem Morgan reveal just an occasional hint of faint gold-tan color. The design elements are relatively well-struck for the issue, with at least partial definition in the hair over Liberty's ear. A few minuscule marks do not disturb, which is a refreshing attribute as many 1880-CC Morgans tend to be extensively bagmarked (Bowers, 2007). The 1880-CC exists in two varieties: the Reverse of 1878 and the Reverse of 1879. The present example is of the latter reverse, showing a slanted top arrow feather. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100
- 4078** 1881-CC GSA MS66 NGC. The quality of this brilliant and silver-white GSA dollar is exceptional. Untoned and free of all but the most insignificant marks, the coin displays cartwheel luster that rolls across the frosted surfaces in waves. Only a few luster grazes prevent an even higher grade. Band-certified in the black GSA holder of issue including the box and an unnumbered insert. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

- 4079** 1882-CC GSA MS65+ NGC. Strong luster emanates from the silver-gray surfaces of this high-end Gem Morgan dollar. The design features are well-impressed, evidenced from the detail in the hair above Liberty's ear. Both sides reveal impeccable preservation and notably semiprooflike fields. Band-certified in its black GSA holder, no box or paperwork. NGC ID# 254B, PCGS# 518866 Base PCGS# 407134
- 4080** 1882-CC GSA MS66 NGC. CAC. Ex: GSA Hoard. A sharp strike delivers pinpoint hair detail with only slight blending at the eagle's left (facing) talons. Abrasions and marks from bag storage are minimal, with slight scuffs on the jawline and neck, but no notable disturbances in the fields. Brilliant, frost-white surfaces radiate cartwheel luster. Housed in a black GSA holder, no box, band-certified by NGC with CAC endorsement. Still only 14 pieces in GSA holders are in a finer numerical grade at NGC, a situation that has not changed in quite some time (10/15). NGC ID# 254B, PCGS# 518866 Base PCGS# 407134
- 4081** 1882-CC GSA MS66 NGC. VAM-2C1, Counter Clash Lip. A Hit List 40 Variety. The 882 of the date is doubled (primarily visible on the outer top loop of the second 8). Liberty's upper lip is counterclashed. Housed in its original black GSA holder with the black box, this band-certified MS66 NGC example is brilliant, frosty, and nearly unmarked. Sharply struck with nearly full hair and talon detail. By far the sole-finest VAM-2C1 in a GSA holder shown by NGC (10/15). NGC ID# 254B, PCGS# 518866 Base PCGS# 407134
- 4082** 1883-CC GSA MS66 NGC. VAM-8A. A high grade and essentially brilliant Carson City type coin. Nicely struck and well preserved. VAM-8A is the clashed die state of VAM-8, noteworthy for its repunched date. No box or certificate accompanies the lot. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144
- 4083** 1884-CC GSA MS66 NGC. Semiprooflike surfaces surround frosted central elements of this untuned, highly lustrous Premium Gem 1884-CC in its original GSA black plastic holder (no box or papers). The strike is nearly full, while abrasions are limited to light scuffs on the high points. The fields and Liberty's cheek are clear of any distracting marks. Band-certified MS66 NGC. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152
- 4084** 1884-CC GSA MS66 NGC. Band-certified MS66 NGC, this Premium Gem 1884-CC comes in its original black GSA holder with the undamaged black box and a numbered card insert. The obverse is virtually untuned and silver-white, while the reverse displays variegated shades of blue and amber-gold. Faint Mint-made planchet striations angle upward across the portrait and within the hair, yet only minuscule signs of contact or other marks exist anywhere on the coin. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152
- 4085** 1885-CC GSA MS65 NGC. An untuned and brilliant-white Gem, with frost-white central motifs set against semiprooflike fields and vibrant cartwheel luster. Nearly 65% of the entire 1885-CC mintage was released in the GSA sales. Band-certified by NGC in its original black plastic holder, no box. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160
- 4086** 1903-O GSA MS64 NGC. Cartwheel luster casts a lilac sheen over the pleasing silver-gray surfaces. A pair of reeding marks above the eye and a short streak of struck-in grease near star 11 are the only mentionable marks; otherwise, Liberty's cheek and neck are clear, smooth, and rounded. The strike is bold for a 1903-O, seldom seen in Choice condition in the soft pack GSA format. NGC ID# 256S, PCGS# 417286

End of Session Two

SESSION THREE

SHIELD NICKELS

- 4087 1867 Rays MS65 PCGS.** An attractive Gem representative of this short-lived design type, with well-detailed design elements and well-preserved surfaces that radiate vibrant mint luster throughout. Population: 38 in 65 (1 in 65+), 8 finer (10/15). NGC ID# 22NY, PCGS# 3791
- 4088 1868 Reverse of 1868, FS-901, MS66 PCGS.** A hint of wheat-gold toning visits this highly lustrous and well struck Premium Gem. Virtually unabraded with a small circular granular area near the C in CENTS. *Cherrypickers'* identifies six die marriages of 1868 nickels with the scarce Fletcher IIb Reverse. FS-901 has a broken C in CENTS but the other letters in CENTS, STATES, and UNITED are normal. The variety is undesignated on the PCGS holder. PCGS# 400244 Base PCGS# 3795
- 4089 1872 MS65 PCGS. CAC.** This sharply detailed Gem shows an extensive network of spidery die cracks on the obverse and some parallel striations on the reverse. The well-preserved surfaces are brightly lustrous and show traces of pale gold toning. Population: 41 in 65, 32 finer (10/15). NGC ID# 22P6, PCGS# 3799

1881 Shield Nickel, MS66+ Seldom Seen So Fine

- 4090 1881 MS66+ PCGS. CAC.** With a minimal mintage of 68,800 pieces, the 1881 Shield nickel is a slightly better date in high grade. This Plus-designated Premium Gem displays unabraded, frosty luster and a bold strike. The surfaces are essentially brilliant, and an array of die cracks on the obverse is typical of the issue. Population: 19 in 66 (2 in 66+), 5 finer (10/15). NGC ID# 276F, PCGS# 3811

1882 Shield Nickel, MS67 Among the Few Finest Known

- 4091 1882 MS67 PCGS.** The 1882 Shield nickel is much more plentiful in the absolute sense than many preceding dates, but Superb Gem examples are contrastingly rare. This piece displays bold motifs and rich, champagne-toned luster. Die cracks appear around each periphery and there are pair of shallow planchet laminations near the obverse rim at 2 o'clock. Population: 7 in 67, 0 finer (10/15). NGC ID# 22PC, PCGS# 3812
- 4092 1883 MS66+ PCGS. CAC.** A spectacular example of the final-year Shield nickel. Thoroughly lustrous and immaculate with a precise strike and numerous spindly die cracks. Lightly toned steel-blue and almond-gold. The date is repunched, apparent within the 3 and first 8. NGC ID# 22PH, PCGS# 3813

PROOF SHIELD NICKELS

- 4093 1867 No Rays PR65 PCGS.** An outstanding Gem No Rays proof Shield nickel, this 1867 is fully struck with near-brilliant nickel-gray surfaces. The obverse exhibits significant cameo contrast, the reverse not nearly as much. Eye appeal is excellent. Population: 34 in 65, 11 finer (10/15). NGC ID# 4T4L, PCGS# 3821
- 4094 1869 PR66 Cameo NGC.** This boldly struck Cameo proof exhibits a tinge of pale tan-gold color over each side, leaving the deeply mirrored fields unhindered and the frosty devices starkly contrasted. A lack of any distracting marks or hairlines confirms the lofty grade. Census: 9 in 66 Cameo, 2 finer (10/15). NGC ID# AMTZ, PCGS# 83823
- 4095 1870 PR66 PCGS. CAC.** This delightful Premium Gem displays sharply detailed design elements throughout and the brilliant, mirrored fields show no mentionable flaws, aside from a small planchet chip near the final A in AMERICA. Population: 12 in 66 (1 in 66+), 0 finer (10/15). NGC ID# 276L, PCGS# 3824
- 4096 1871 PR66+ NGC.** Conditionally scarce as a Premium Gem proof and only further appealing with a Plus designation. This proof 1871 Shield nickel is sharply struck with modest cameo contrast on the obverse. A streak of golden toning runs through the upper portion of the shield. Census: 37 in 66 (3 in 66+, 1 in 66 ★, 1 in 66+★), 4 finer (10/15). NGC ID# 276M, PCGS# 3825
- 4097 1872 PR66 Cameo PCGS.** Pale shades of champagne-gold and lavender toning blanket the well-preserved surfaces of this impressive Premium Gem. The frosty design elements contrast boldly with the reflective fields. Population: 25 in 66 (3 in 66+) Cameo, 4 finer (10/15). NGC ID# AMU4, PCGS# 83826
- 4098 1874 PR66 Cameo PCGS.** The design elements of this spectacular Premium Gem are sharply detailed in all areas, save for a touch of flatness on a single star on the reverse. The lightly toned reflective fields provide bold cameo contrast with the frosty devices. Population: 20 in 66 (2 in 66+) Cameo, 4 finer (10/15). NGC ID# 276R, PCGS# 83828
- 4099 1874 PR66+ Cameo PCGS. CAC.** A rather small number of Cameo-designated proof 1874 Shield nickels is clustered around the PR65 to PR66 grades. This Plus-awarded Premium Gem is among the finer of these, second to only a handful of Superb Gems. The strike is sharp, and the golden-toned surfaces yield highly reflective fields. Cameo contrast is readily apparent. Population: 18 in 66 (2 in 66+) Cameo, 4 finer (9/15). NGC ID# 276R, PCGS# 83828
- 4100 1875 PR66 PCGS. CAC.** An estimated 700 proofs were struck of the 1875 with only three dozen Premium Gem survivors known. The obverse fields are brightly reflective while the reverse is less so. Just the slightest touch of pale aqua toning covers each side of this fully struck Shield nickel. Population: 17 in 66, 1 finer (10/15). NGC ID# 276S, PCGS# 3829
- 4101 1877 — Improperly Cleaned — NGC Details. Proof.** The 1877 is the rarer of the two proof-only dates in the Shield nickel series. This crisply struck specimen appears unabraded, but the stone-gray surfaces are delicately hairlined and display subdued luster.
- 4102 1878 PR64 NGC.** A proof only issue, essential for a complete date set of Shield nickels. This Choice example offers bold, frosty design elements with a vibrant cartwheel effect in the modestly reflective fields. Daubs of amber toning appear near the right-hand borders, but each side is otherwise brilliant. NGC ID# 276V, PCGS# 3832

4103 1879/8 PR66 PCGS. CAC. This so-called 1879/8 proof Shield nickel variety represents approximately half of the PCGS population for the 1879 issue. The present Premium Gem example is boldly struck and beautifully preserved. The fields display a blend of cartwheel luster and proof mirroring, while each side is cast in soft pastel toning. NGC ID# 22PG, PCGS# 3834

4104 1879/8 PR66 PCGS. CAC. The remnants of an undertype 8 can be seen between the knob and upper loop of the final digit in the date on this sharply detailed Premium Gem. The well-preserved surfaces show reflective fields and a few hints of pale gold toning. PCGS has graded 34 numerically finer examples (10/15). NGC ID# 22PG, PCGS# 3834

LIBERTY NICKELS

1883 No Cents Liberty Nickel, MS67 Stark Field-Motif Contrast

4105 1883 No Cents MS67 PCGS. CAC. This debut Liberty nickel type omitted the word CENTS in the fashion of the earliest federal coinage, although its similarity in size and design to the half eagles of 1883 caused a counterfeiting problem that resulted in the addition of CENTS to the lower reverse later in the year. This No Cents Superb Gem offers remarkable semiprooflike fields and frosty design elements with distinct cameo contrast. The corn ear to the left of the wreath bow is soft, as usual, and die cracks appear in the peripheral regions. Traces of light golden toning preclude full brilliance. Population: 31 in 67, 0 finer (10/15). NGC ID# 2772, PCGS# 3841

4106 1885 XF45 PCGS. This key-issue Liberty nickel displays solid XF definition and minimally blemished surfaces for the assigned grade. Moderate wear on Liberty's forecurls and at the lower wreath elements are grade-appropriate. Deep-gray accents surround the raised motifs of this originally toned, Choice example. NGC ID# 2773, PCGS# 3846

4107 1885 — Cleaning — PCGS Genuine. AU Details. Daubs of luster appear in the peripheries of this key-date Liberty nickel, while each side exhibits light golden-gray color overall. Faint hairlines — primarily on the obverse — preclude a numeric grade but hardly impede the eye appeal. As usual, the lower-left portion of the wreath is a trifle soft. NGC ID# 2773, PCGS# 3846

4108 1888 MS65 PCGS. CAC. Iridescent hues are cast throughout the warm champagne-gold toning over each side of this Gem 1888 Liberty nickel. The corn ear to the left of the wreath bow is weak, but the remaining design elements show pleasing definition. A couple of tiny ticks on Liberty's cheek appear to be all that limit the grade. Population: 76 in 65 (2 in 65+), 20 finer (9/15). NGC ID# 2774, PCGS# 3849

1890 Nickel, Conditionally Rare MS66

4109 1890 MS66 PCGS. A rare Premium Gem example of this otherwise plentiful Liberty nickel issue, showing satiny golden-gray luster and unabraded surfaces. Although not full, the corn ear to the left of the wreath bow is better defined than usual. Population: 19 in 66 (5 in 66+), 1 finer (10/15). NGC ID# 22PM, PCGS# 3851

4110 1892 MS66 PCGS. CAC. Vibrant, frosty luster displays traces of champagne toning on this Premium Gem 1892 Liberty nickel. The obverse stars are sharp, and the wreath exhibits above-average boldness. Population: 32 in 66 (4 in 66+), 0 finer (10/15). NGC ID# 2777, PCGS# 3853

4111 1893 MS66 PCGS. An impressively sharp example, especially for the late state of the dies. Both sides of this Premium Gem 1893 nickel display moderate metal flow lines in the fields, and the reverse shows rim crumbling along the lower-left border. Peripheral die cracks round out the characteristics. This piece exhibits frosty luster and golden-gray toning. Population: 32 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 2778, PCGS# 3854

4112 1895 MS65 PCGS Secure. Although nearly 10 million pieces were struck, the 1895 Liberty nickel becomes scarce in Gem and finer grades. This piece is sharply defined throughout the wreath and stars with frosty champagne-tinted luster. Devoid of abrasions, although a couple of faint lines on Liberty's cheek limit the grade. Population: 66 in 65 (3 in 65+), 26 finer (10/15). NGC ID# 277A, PCGS# 3856

1895 Nickel, Golden-Toned MS66 Conditionally Rare

4113 1895 MS66 PCGS. CAC. The lofty grade and satiny luster of this Premium Gem 1895 nickel are complemented by uncommonly sharp definition of the stars and wreath, particularly that of the corn ear to the left of the bowknot. Each side displays soft golden toning and excellent eye appeal. This issue is rarely seen so fine, and better pieces are almost unknown. Population: 21 in 66 (2 in 66+), 1 finer (9/15). NGC ID# 277A, PCGS# 3856

4114 1896 MS65 PCGS. CAC. Traces of ice-blue and soft champagne color accent the satiny Gem-quality surfaces of this 1896 Liberty nickel. As is characteristic of the issue, several obverse stars and the lower-left portion of the wreath are slightly soft. Population: 65 in 65 (2 in 65+), 23 finer (10/15). NGC ID# 277B, PCGS# 3857

- 4115 1898 MS66 PCGS. CAC.** Vibrant, satiny luster shows traces of light golden toning on each side of this well-preserved Premium Gem example. The corn ear to the left of the wreath bow and star 13 on the obverse are weakly struck, but Liberty's portrait is well-defined. Population: 36 in 66 (1 in 66+), 1 finer (10/15). NGC ID# 22PP, PCGS# 3859

**1899 Liberty Nickel, MS66+
Beautifully Preserved**

- 4116 1899 MS66+ PCGS.** A remarkably well-preserved, boldly struck example of this popular type-coin issue, showing vibrant luster shining through a blend of olive-gold, amber, violet, and ice-blue hues. A single tiny tick in front of Liberty's ear appears to be all that precludes a full Superb Gem grade. Population: 74 in 66 (5 in 66+), 2 finer (10/15). NGC ID# 22PR, PCGS# 3860

- 4117 1901 MS66 PCGS. CAC.** This Premium Gem 1901 Liberty nickel combines conditional scarcity with 20th century type coin appeal. Golden-gray toning warms well cared for surfaces and frosty luster. Surprisingly sharp detail is seen throughout the wreath. Population: 59 in 66 (10 in 66+), 3 finer (9/15). NGC ID# 277C, PCGS# 3862

- 4118 1901 MS66+ PCGS. CAC.** This high-end Premium Gem offers well-detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. Population: 62 in 66 (11 in 66+), 3 finer (10/15). NGC ID# 277C, PCGS# 3862

- 4119 1902 MS66+ PCGS.** Frosty, champagne-toned surfaces are so well-preserved on this 1902 Liberty nickel that it is difficult to identify flaws that prevent a Superb Gem grade. This Plus-designated MS66 coin shows the usual weakness on the lower-left portion of the wreath, but the obverse design elements are bold. Population: 72 in 66 (8 in 66+), 5 finer (10/15). NGC ID# 277D, PCGS# 3863

- 4120 1902 MS66+ PCGS. CAC.** This high-end Premium Gem 1902 nickel is devoid of abrasions, although a few faint lines appear on the cheek when tilted just right beneath a light. Frosty luster shows nickel-gray hues on each side, while the corn ear to the left of the wreath bow and several obverse stars exhibit the usual weakness. Population: 72 in 66 (8 in 66+), 5 finer (10/15). NGC ID# 277D, PCGS# 3863

- 4121 1907 MS66 PCGS.** Beautifully preserved with frosty nickel-gray luster. This 1907 Liberty nickel is predictably soft on several obverse stars and on the corn ear to the left of the wreath bow, but the eye appeal is hardly affected. Population: 33 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 277J, PCGS# 3868

- 4122 1910 MS66 PCGS.** A thin layer of golden-tan patina graces both sides, while similar but darker coloring occurs within the recesses of UNITED and AMERICA on the reverse. Stars 1, 2, and 11 are softly struck, but the other stars exhibit full centers. Liberty's hair curls and the wreath are well-detailed, and each side is extraordinarily clean — even for this high grade. Population: 24 in 66 (3 in 66+), 1 finer (10/15). NGC ID# 277L, PCGS# 3871

- 4123 1912-D MS65 PCGS.** A satin-smooth Gem example of this popular branch mint issue, showing golden-gray luster and lacking any discernible abrasions. The corn ear to the left of the wreath bow is not fully defined, this being the only noticeable weakness in the strike. Finer examples are infrequently seen. NGC ID# 277P, PCGS# 3874

- 4124 1912-D MS65 PCGS.** The Liberty design was retired after 1912, an important consideration for type purposes. This impressive Gem from the Denver Mint offers well-detailed design elements and well-preserved lustrous surfaces. PCGS has certified 40 numerically finer examples (10/15). NGC ID# 277P, PCGS# 3874

- 4125 1912-S AU58 PCGS.** An attractive near-Mint specimen of this low-mintage key, with just a trace of wear on the high points of the design elements and lightly abraded surfaces under shades of lavender-gray toning. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Seldom Located Finer**

- 4126 1912-S MS65 PCGS.** A hint of light golden toning accents smooth, satiny surfaces on this Gem 1912-S Liberty nickel, and close examination fails to reveal any bothersome abrasions. The lower-left portion of the wreath and the hair strands over Liberty's brow are typically soft. An unusual attribute for this issue is clashing in the obverse fields. PCGS lists 30 finer representatives (10/15). NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Final-Date Key Issue**

- 4127 1912-S MS65 PCGS. CAC.** A well-produced example of this low-mintage San Francisco nickel, one of 238,000 pieces struck over four days in December 1912, shortly before retirement of the Liberty nickel design. The low mintage was no secret to speculators and collectors and many pieces were saved, although Gem examples are scarce and Premium Gems are rare. This lustrous Gem is nearly blemish-free, although it shows the identifying characteristics of all genuine 1912-S nickels — die bulge in the left obverse field, slight softness at Liberty's forecurls, and weakness at the lower wreath, bow knot, and ear of corn. Satiny luster provides a golden glow to the steely-gray surfaces. CAC endorsed. PCGS reports just 24 numerically finer pieces (10/15). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 4128 1883 No Cents PR67 Cameo PCGS.** A beautifully preserved, boldly struck proof Cameo, this Superb Gem No Cents Liberty nickel type coin displays stark field-device contrast with traces of light golden toning. Population: 20 in 67 Cameo, 0 finer (10/15). NGC ID# 22PU, PCGS# 83878
- 4129 1884 PR67 Cameo NGC.** Both sides show distinct contrast between the deep nickel-gray reflectivity of the mirrors and the lighter, mildly frosted effect on the sharply struck central devices. Carefully preserved with noteworthy eye appeal for this second-year proof Liberty nickel issue. Census: 14 in 67 Cameo (1 in 67 ★ Cameo), 4 finer (10/15).
Ex: *Dallas Signature (Heritage, 10/2008), lot 370; Baltimore Signature (Heritage, 3/2009), lot 570.* NGC ID# 22PV, PCGS# 83882

1885 Nickel, PR67 Delicately Toned

- 4130 1885 PR67 PCGS. CAC.** A beautiful, pastel-toned Superb Gem example of this popular proof issue. The design elements are fully rendered, and the fields show modest reflectivity. The scarcity of the circulation-strike 1885 nickel in high grade heightens collector demand for this, its proof counterpart. Population: 17 in 67 (3 in 67+), 2 finer (10/15). NGC ID# 277T, PCGS# 3883
- 4131 1890 PR67 Cameo NGC.** This golden-toned Superb Gem proof Cameo displays attractive field-motif contrast and beautifully preserved surfaces. Trivial weakness on the lower-left portion of the wreath is characteristic of the type. Census: 3 in 67 Cameo, 0 finer (10/15). NGC ID# 277Y, PCGS# 83888
- 4132 1906 PR67 Cameo NGC.** The population data indicate that a fair number of the 1,475 proof 1907 nickels struck have survived. Cameos are not as plentiful, however, especially at the Superb Gem level. This PR67 Cameo displays excellent field-motif contrast. Its well-preserved surfaces are untuned and exhibit sharply struck design elements. Census: 13 in 67 Cameo (1 in 67+ Cameo), 0 finer (10/15).
Ex: *ANA Signature (Heritage, 8/2007), lot 384.* NGC ID# 278G, PCGS# 83904
- 4133 1906 PR67 Cameo PCGS Secure. CAC.** Rich toning and strong contrast rarely go hand-in-hand, yet this Superb Gem specimen sports a remarkable cameo effect through rich greenish-gold patina. The devices retain a lighter color and frosted texture, while the fields offer their signature gleam. Population: 21 in 67 (1 in 67+ Cameo), 2 finer (10/15).
Ex: *FUN Signature (Heritage, 7/2010), lot 3293.* NGC ID# 278G, PCGS# 83904
- 4134 1908 PR67 Cameo NGC.** Ex: *Richmond Collection.* Pastel powder-blue, butter-gold, and rose-red toning visits this intricately struck and nicely mirrored Superb Gem. Census: 7 in 67 Cameo, 0 finer (10/15).
Ex: *Richmond Collection, Part II (David Lawrence, 11/2004), lot 1261; Slotkin Family Trust Collection (Heritage, 4/2011), lot 3123, which realized \$4,025.* NGC ID# 278J, PCGS# 83906
- 4135 1909 PR67 PCGS.** Almond-gold and powder-blue adorn this fully struck and lustrous Superb Gem nickel. A few minuscule flecks on the lower reverse are all that deny an even finer grade. NGC ID# 278K, PCGS# 3907

- 4136 1909 PR67 PCGS. CAC.** Brilliant nickel-gray surfaces are seemingly pristine on this Premium Gem 1909 proof Liberty nickel. Fully defined relief elements boast outstanding eye appeal, while the fields display a balanced combination of cartwheel luster and proof mirroring. Population: 41 in 67, 3 finer (10/15). NGC ID# 278K, PCGS# 3907

- 4137 1911 PR67 Cameo NGC.** A brilliant and nearly pristine Superb Gem. The strike is exacting and the motifs exhibit noticeable contrast. Census: 8 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (10/15).
Ex: *Slotkin Family Trust Collection (Heritage, 4/2011), lot 3130, which realized \$2,990.* NGC ID# 278M, PCGS# 83909

BUFFALO NICKELS

1913-D Type One Buffalo Nickel, MS67 Only Two Finer PCGS-Certified Coins

- 4138 1913-D Type One MS67 PCGS. CAC.** This high-quality Superb Gem exhibits fully brilliant mint luster with bold design features and tinges of ice-blue and gold toning. Both the Denver mintmark and the bison's head are sharp — key for the issue, since they are often softly struck — and the satin-smooth surfaces are pristine throughout. Here is an exceptional example that will provide a nice boost to any high-grade Buffalo nickel collection. Population: 66 in 67 (3 in 67+), 2 finer (10/15).
From *The Leon Hendrickson Collection.* NGC ID# 22PX, PCGS# 3916
- 4139 1913-D Type Two MS66 PCGS. CAC.** Subtle hints of color appear on this lustrous Premium Gem example. The luster has a soft golden glow and delivers a modest mattelike texture without any obvious die erosion in the fields. The rarity of finer Mint State examples adds to the appeal of this piece. Population: 70 in 66, 15 finer (10/15).
From *The Leon Hendrickson Collection.* NGC ID# 254M, PCGS# 3922

1913-S Type Two Nickel, MS65 First Generation Holder

- 4140 1913-S Type Two MS65 PCGS.** The surfaces of this Gem offer pale champagne patina and softly frosted luster. The strike is well-impressed overall with typical weakness over LIBERTY and the tail. The bison's horn and head are notably bold. Scattered tiny flecks appear, but do not unduly detract. Housed in a first generation holder. Only 35 examples have achieved higher grades from PCGS (10/15). NGC ID# 22R3, PCGS# 3923

- 4141 1914 MS66+ PCGS. CAC.** Tan-gold and faint ice-blue shades enrich this lustrous and nearly pristine Premium Gem. The mattelike luster often seen on the 1914 delivers a soft glow on this piece, and the strike is better than average with only the hair above the Indian's braid lacking satisfactory detail. PCGS reports 25 Superb Gems finer (10/15).
Ex: FUN Signature (Heritage, 7/2011), lot 3310.
From The Leon Hendrickson Collection. NGC ID# 22R4, PCGS# 3924

**1915-S Buffalo Nickel, MS65
Sharply Detailed, Attractively Toned**

- 4142 1915-S MS65 PCGS.** This semikey Gem exhibits lovely powder-blue, lilac, and honey-gold patina. The reverse is sharply struck, while the obverse definition is exemplary save for minor softness on the hair above the braid. Free from contact and unquestionably desirable. Scarcer in Mint State than the more celebrated 1913-S Type Two.
Ex: Central States Signature (Heritage, 4/2012), lot 3624.
From The Leon Hendrickson Collection. NGC ID# 25ZR, PCGS# 3929

1915-S Nickel, Fully Struck MS65

- 4143 1915-S MS65 PCGS. CAC.** Scarce in the better grades of Uncirculated, the 1915-S can show wide variance in strike definition. This is an unquestioned full strike. The bright, lustrous surfaces show barely any color and a magnifier picks up only the slightest flyspecks of carbon. An exceptional 1915-S nickel. NGC ID# 25ZR, PCGS# 3929
- 4144 1916-D MS65 PCGS.** Wisps of champagne, ice-blue, and lavender patina adhere to the lustrous surfaces of this lovely Gem 1916-D nickel. Generally well-struck on the devices with a few light flecks are visible over each side. PCGS lists 20 numerically finer coins (10/15).
Ex: FUN Signature (Heritage, 7/2009), lot 246.
From The Leon Hendrickson Collection. NGC ID# 22RB, PCGS# 3932
- 4145 1916-D MS65 PCGS. CAC.** Glistening mint luster beautifully illuminates soft lavender, ice-blue, and champagne hues over each side of this Gem 1916-D Buffalo nickel. As is characteristic of the issue, considerable strike weakness is seen on the bison's shoulder and the central obverse hair detail. No detracting abrasions are observed. PCGS lists only 20 finer representatives (10/15). NGC ID# 22RB, PCGS# 3932

- 4146 1916-S MS65 PCGS.** The portrait of the Chief is particularly well brought up on this sharply struck San Francisco nickel. Brassy-gold toning dominates the obverse, while lilac and golden shades visit the reverse. The issue is challenging in Gem condition such as the present lustrous, appealing example. PCGS reports just 39 numerically finer pieces (10/15). NGC ID# 22RC, PCGS# 3933

- 4147 1917-D MS65 PCGS.** A splendid Gem example with stunning, original rainbow toning and lustrous, satin-smooth surfaces. Minimal die erosion affects the sharp strike even at the borders, avoiding a common problem with this Denver issue. Gradations of gold, lime-green, and pink colors merge with lavender centers for tremendous eye appeal. Housed in a green-label holder. PCGS reports just 20 numerically finer pieces (10/15). NGC ID# 22RE, PCGS# 3935

- 4148 1917-D MS65 PCGS.** A pastel medley of yellow-gold, violet, ice-blue, and lime-green bathes the obverse of this Gem D-mint nickel, while the same color palette is dominated by violet on the reverse. The design elements exhibit above-average detail with the horn particularly sharp. Finer pieces total 21 at PCGS (10/15).
Ex: Long Beach Signature (Heritage, 5/2009), lot 313; Long Beach Signature (Heritage, 9/2009), lot 316; Long Beach Signature (Heritage, 2/2010), lot 262; FUN Signature (Heritage, 1/2012), lot 5299.
From The Leon Hendrickson Collection. NGC ID# 22RE, PCGS# 3935

- 4149 1918 MS65 PCGS. CAC.** Well-struck overall, if a little soft on the bison's shoulder and the hair above the Indian's braid, with light gold-green toning over parts of otherwise nickel-white surfaces. Satiny and attractive with eye appeal befitting a Gem. Finer pieces are scarcely seen.
Ex: FUN Signature (Heritage, 7/2011), lot 3312.
From The Leon Hendrickson Collection. NGC ID# 22RG, PCGS# 3937

- 4150 1919 MS66 PCGS.** Golden-brown, cream-gray, and ice-blue enrich this lustrous and pristine Premium Gem example. The left borders show minor weakness of strike, but the central motifs are bold. Unusually prominent clash marks include an "apostrophe" in the field above the Indian's nose and readable letters from PLURIBUS beneath the jaw. PCGS awards finer grades to only 18 coins (10/15).
Ex: Chicago Signature (Heritage, 8/2011), lot 3442.
From The Leon Hendrickson Collection. NGC ID# 22RL, PCGS# 3941

**1919-S Nickel, Stately Near-Gem
Notable Strike Rarity**

- 4151 1919-S MS64 PCGS.** The 1919-S is both a strike rarity and condition rarity in the series, with only 34 PCGS certified examples graded finer than this piece (10/15). Dave Bowers calls MS64 the "Optimal Collecting Grade" for the issue in his *Guide Book* to the series. This lovely near-Gem displays brilliant, satin luster with faint lilac and gold toning. A scattering of light marks on the bison's shoulder result from the planchet not being fully struck up, but in-hand the marks are indistinguishable and the eye appeal is considerable.
Ex: New York Signature (Heritage, 12/2011), lot 3280.
From The Leon Hendrickson Collection. NGC ID# 22RN, PCGS# 3943

4152 1920-D MS63 PCGS. The satiny lavender-gray luster of this Select 1920-D Buffalo nickel is largely undisturbed, although a deficient strike is in this case likely a greater hindrance to the grade. Considerable weakness is seen on the central devices and around portions of the peripheries, as is often seen on this Denver issue. It must be understood, however, that sharply struck examples of this issue are rare. NGC ID# 22RR, PCGS# 3945

4153 1920-D MS64 PCGS. CAC. Iridescent patina — largely lavender-blue and green-gold — graces broadly luminous surfaces. This 1920-D Buffalo nickel is characteristically soft on the central devices with minor die erosion in the fields, but the overall presentation is quite pleasing. Finer pieces are seldom seen.
Ex: New York Signature (Heritage, 12/2011), lot 3281.
From The Leon Hendrickson Collection. NGC ID# 22RR, PCGS# 3945

1920-D Buffalo Nickel, MS65 Well-Defined Motifs

4154 1920-D MS65 PCGS. An impressively well-struck example of this often poor-quality Denver issue, showing golden-toned, satiny luster and lacking bothersome abrasions. The obverse shows die erosion in the fields when viewed with a loupe. The reverse is more extensively deteriorated, with scattered die cracks and clash marks also in attendance. Population: 68 in 65 (3 in 65+), 3 finer (10/15). NGC ID# 22RR, PCGS# 3945

1920-S Nickel, MS64 Outstanding Appeal for the Issue

4155 1920-S MS64 PCGS. The typical 1920-S is poorly produced and struck from eroded dies, but this exceptional coin is Choice. The high points are somewhat lightly struck, yet sharpness exists everywhere else including the smoothness in the fields up to the rims. LIBERTY and the date are bold. Attractive, pewter-gray surfaces show pleasing mint luster that reveals blue, champagne-gold, and soft-pink highlights. One of the scarcest Buffalo nickels in Mint State, the present near-Gem is head and shoulders above most examples and is sure to elicit a premium bid as a result. Just 23 pieces have earned a finer numeric grade at PCGS (10/15).
From The Leon Hendrickson Collection. NGC ID# 22RS, PCGS# 3946

4156 1921 MS66 PCGS. CAC. This delightful Premium Gem displays razor-sharp definition on all design elements, despite minor die erosion in the reverse fields and evidence of lapping below the Indian's chin on the obverse. The surfaces are brightly lustrous under attractive highlights of gold, ice-blue, and lavender toning. Only 24 coins have been certified in higher numeric grades at PCGS (10/15).
Ex: FUN Signature (Heritage, 7/2011), lot 3318.
From The Leon Hendrickson Collection. NGC ID# 22RT, PCGS# 3947

4157 1921-S AU58 PCGS. From a mintage of 1.5 million pieces, the 1921-S Buffalo nickel is an elusive issue in all grades. This attractive near-Mint specimen shows just a trace of high-point wear and the lightly abraded surfaces retain traces of satiny mint luster, under shades of greenish-gold and silver-gray toning. NGC ID# 22RU, PCGS# 3948

1921-S Buffalo Nickel, MS64 Sharp Definition, Choice Surfaces

4158 1921-S MS64 PCGS. This near-Gem is well-impressed for the issue — remarkably so, actually — with most 1921-S coins confirming the issue's reputation for weak strikes. Some softness is noted in the hair of the bison, but the hair definition above the braid knot is sharp and the peripheral elements are well-struck. Lustrous, light-gray surfaces reveal just a few unobtrusive marks. Challenging to locate in a finer grade, PCGS reports just 79 Gem or finer examples (10/15).
Ex: Long Beach Signature (Heritage, 2/2012), lot 3948.
From The Leon Hendrickson Collection. NGC ID# 22RU, PCGS# 3948

4159 1923 MS66 PCGS. CAC. Soft, frosted mint luster covers each side of this brilliant, well-struck 1923 Buffalo nickel. Attractive, problem-free surfaces further heighten the eye appeal. A loupe reveals evidence of die lapping around the Indian's profile. There are 16 Superb Gems finer at PCGS (10/15).
Ex: Long Beach Signature (Heritage, 9/2011), lot 3291.
From The Leon Hendrickson Collection. NGC ID# 22RV, PCGS# 3949

1924-D Buffalo Five Cent, MS65 Visually Impressive

4160 1924-D MS65 PCGS. Scarce at the Gem level and rare any finer, the 1924-D was at one time a series stopper in high grades until several dozen nice pieces emerged from the Connecticut State Library hoard. Still conditionally scarce, the eye appeal of this MS65 example overcomes minor deficiency of central strike. Gleaming gold and silver-blue toning vie for position across the satin-smooth surfaces. Bold mint luster provides irresistible charm. PCGS reports just eight pieces in a numerically finer grade (10/15).
From The Leon Hendrickson Collection. NGC ID# 22RY, PCGS# 3952

4161 1925 MS66+ PCGS. CAC. Frosty silver-gray luster emanates from both sides of this high-end Premium Gem nickel. The design elements are well-struck except for weakness in the 1 of the date and slight blending of the hair strands. This piece has been well-cared for. PCGS reports only 14 examples in a higher grade (10/15). NGC ID# 22S2, PCGS# 3954

1926 Nickel, MS67
Dazzling Mint Luster

- 4162 1926 MS67 PCGS. CAC.** This incredible Superb Gem Buffalo nickel exhibits pinpoint definition on all design elements while the unmarked, brilliant-silver surfaces show fleeting shades of champagne-gold and ice-blue. Vibrant, satiny mint luster adds to the tremendous visual appeal. Other nickels may be its equal, but it is doubtful many can exceed the combination of outstanding eye appeal and Mint-fresh allure. Population: 36 in 67 (1 in 67+), 0 finer (10/15).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3183.
From The Leon Hendrickson Collection. NGC ID# 22S5, PCGS# 3957

1927-S Nickel, Satiny MS64
Very Elusive in Finer Condition

- 4163 1927-S MS64 PCGS.** The 1927-S Buffalo nickel is a collectible issue in MS63 and MS64 but becomes rare any finer. This near-Gem example displays smooth, satiny luster with iridescent sun-gold toning. Moderate die deterioration in the fields has a marginal effect on the sharpness of the design elements. PCGS lists three dozen finer representatives (10/15). NGC ID# 22SA, PCGS# 3962

1927-S Buffalo Nickel, MS64
Scarce When Choice or Finer

- 4164 1927-S MS64 PCGS.** Honey-gold and stone-gray toning compete for territory throughout this satiny and unblemished near-Gem, with rich luster beneath the attractive patina. The strike is moderately sharp given its San Francisco origin, with the usual minor inexactness on the curve of the tail and the hair above the braid. A costly acquisition any finer, since PCGS has seen a mere three dozen numerically finer examples (10/15).
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3485.
From The Leon Hendrickson Collection. NGC ID# 22SA, PCGS# 3962

1927-S Buffalo Nickel, MS64+
Advanced Die State

- 4165 1927-S MS64+ NGC.** This Choice 1927-S Buffalo nickel is moderately well-struck, despite significant die erosion in the fields. During the 1920s, the San Francisco Mint often used working dies well-beyond their life expectancy, resulting in poor strike quality. The Buffalo nickel and Standing Liberty quarter show the effects the most prominently. This five cent piece displays light golden toning over satiny surfaces. NGC records 28 finer examples (10/15). NGC ID# 22SA, PCGS# 3962

- 4166 1928-D MS66 PCGS. CAC.** Caramel-gold and slate toning enriches this refreshingly unabraded and lustrous scarcer date branch mint nickel. The strike is superior for the issue, although the curve of the bison's tail and a few letters in LIBERTY are incompletely defined. Population: 50 in 66 (1 in 66+), 0 finer (10/15).
Ex: FUN Signature (Heritage, 7/2011), lot 3329.
From The Leon Hendrickson Collection. NGC ID# 22SC, PCGS# 3964

1928-S Nickel, Sharp MS65+
Multicolor Iridescence

- 4167 1928-S MS65+ PCGS.** Rings of iridescent green, blue, rose, and gold surround a sky-blue center on the obverse, while similar hues appear intermixed over the reverse. The peripheral motifs are as bold as can be expected of a branch mint nickel from this period, and the bison's head and shoulder are sharply detailed. Softly frosted luster completes the extraordinary visual appeal. This high-end Gem should garner attention from knowledgeable students of the series. PCGS shows 11 finer submissions (10/15). NGC ID# 22SD, PCGS# 3965

**1928-S Buffalo Nickel
Appealing Satiny Gem**

- 4168 1928-S MS65 PCGS. CAC.** The 1928-S is an elusive issue, especially in Gem or finer grades. This beauty exudes charisma, with light gold toning over satin luster with delicate rose and iridescent highlights. All branch mint nickels from the twenties are elusive in better Uncirculated condition, and the 1928-S is no exception. Population: 76 in 65 (3 in 65+), 11 finer (10/15).
From The Leon Hendrickson Collection. NGC ID# 22SD, PCGS# 3965

- 4169 1929-S MS66+ PCGS. CAC.** The well-preserved surfaces of this high-end Premium Gem radiate satiny mint luster, under shades of nickel-gray and greenish-gold toning. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded nine numerically finer examples (10/15). NGC ID# 22SG, PCGS# 3968

- 4170 1931-S MS66+ PCGS.** Glistening, frosty luster gives this champagne-toned 1931-S Buffalo nickel incredible eye appeal. The surfaces are devoid of bothersome abrasions, and the only visual distraction is the often-seen strike weakness on the bison's shoulder and the hair above Liberty's ear. PCGS lists six Superb Gems finer (11/15). NGC ID# 22SK, PCGS# 3971

- 4171 1935 MS67 PCGS.** Pale blue overtones are prominent on this Philadelphia Superb Gem. Well-defined on the bison's head with surfaces that come alive when they catch the light. PCGS has graded just one numerically finer example (10/15).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 7478; FUN Signature (Heritage, 7/2011), lot 3330.
From The Leon Hendrickson Collection. NGC ID# 22SN, PCGS# 3974

**1935 Buffalo Nickel, MS67+
Nearly Unsurpassable Quality**

- 4172 1935 MS67+ PCGS. CAC.** Whether this coin graces a high-end type collection or takes honors in a well-formed Registry Set, the technical quality and eye appeal of this Plus-graded Superb Gem nickel are undeniable. The coin is sharply struck with immaculate surfaces, ice-blue base toning, plus flashes of yellow-gold and deep-lilac accents. Wheat-gold patina joins the mix on the reverse. Gleaming satin mint luster radiates from every angle. Population: 6 in 67+, 1 finer (10/15). NGC ID# 22SN, PCGS# 3974

- 4173 1935-D MS66 PCGS.** A satiny, well-preserved example of this late-series Denver issue with warm golden toning and unabraded surfaces. Weakness on the bison's shoulder and the hair above the Indian's braid is not unusual for the issue and fails to impede the eye appeal. PCGS lists only nine finer representatives (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 10192.
From The Leon Hendrickson Collection. NGC ID# 22SP, PCGS# 3975

- 4174 1935-D MS66 PCGS. CAC.** A satiny Premium Gem example with lovely iridescent toning and unabraded surfaces. Minor strike weakness is seen on the bison's shoulder and the hair above the Indian's braid. PCGS lists nine Superb Gems finer (11/15). NGC ID# 22SP, PCGS# 3975

- 4175 1936-D MS67 PCGS. CAC. Ex:** The Tom Mershon Collection. Bright luster emanates from impeccably preserved surfaces that display soft rose and ice-blue coloration. Intricate design detail is evident throughout. Strike doubling appears on the date and the Indian's profile. Population: 67 in 67, 2 finer (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 5333.
From The Leon Hendrickson Collection. NGC ID# 22ST, PCGS# 3978

- 4176 1936-S MS67 PCGS. CAC. Ex:** The Tom Mershon Collection. Highly lustrous and fully struck, with soft steel-blue and olive toning. The expertly preserved surfaces are nearly pristine, and eye appeal is correspondingly superb. Population: 83 in 67 (2 in 67+), 0 finer (10/15).
Ex: ANA Signature (Heritage, 7/2005), lot 5717; FUN Signature (Heritage, 1/2012), lot 5334.
From The Leon Hendrickson Collection. NGC ID# 22SU, PCGS# 3979

PROOF BUFFALO NICKELS

**1913 Buffalo Nickel, Fully Struck PR66
Pleasing Type One Subtype**

- 4177 1913 Type One PR66 PCGS.** Olive-green and steel-blue toning dominates, but occasionally cedes to autumn-gold. This fully struck, attractive Premium Gem displays satin luster and finely textured, pristine fields and devices aside from a few pinpoint flecks. The sole proof issue of the introductory design subtype, since reproduced (with modifications) on a silver dollar from 2001 and on gold bullion issues since 2008. Housed in a green label holder, one of just 1,520 proofs struck of the popular Type One design.
Ex: FUN Signature (Heritage, 1/2012), lot 5344.
From The Leon Hendrickson Collection. NGC ID# 278R, PCGS# 3988

**1913 Type Two Buffalo Nickel, PR66
Important First-Year Type Coin**

- 4178 1913 Type Two PR66 PCGS. CAC.** The 1913 Buffalo Nickel is an important first-year type issue, and the proof mintage for the Type Two design was only 1,514 pieces. This impressive Premium Gem displays razor-sharp definition throughout, with light-gold toning and faint violet accents on the pristine matte surfaces. Housed in a green label holder.
Ex: The MKJ Collection / Central States Signature (Heritage, 4/2012), lot 3676.
From The Leon Hendrickson Collection. NGC ID# 278S, PCGS# 3990

**1916 Nickel, Gem Matte Proof
Rare in an Absolute Sense**

- 4179 1916 PR65 PCGS.** Only 600 proof Buffalo nickels were struck in 1916, but many members of the collecting community did not embrace the matte proof offerings. It is doubtful that all these proofs were sold (despite the low mintage), and unsold proofs were almost certainly melted after the end of the year. An "absolute rarity" as a result, this fully struck Gem exhibits satiny mint luster, under attractive shades of champagne-gold and lavender toning. Housed in an old green label holder.
Ex: Central States Signature (Heritage, 4/2012), lot 3683.
From The Leon Hendrickson Collection. NGC ID# 278V, PCGS# 3993

- 4180 1936 Type Two — Brilliant Finish PR67 NGC.** Alternating waves of apple-green, hot pink, lemon-yellow, and sun-gold create an impressive iridescent palette on both sides of this Type Two Buffalo nickel. An exceptional Superb Gem prize for the toned nickel collector. NGC reports just 19 numerically finer proofs with the brilliant finish (10/15). NGC ID# 278Y, PCGS# 3995

**1936 Buffalo Nickel, Blue-Toned PR67
Stunningly Brilliant, Type Two Finish**

- 4181 1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** An intensely gleaming beauty with a chrome finish under light and startling steel-blue patina. A subtle track of pale apricot color visits the inner portrait. A magnificently preserved specimen of the first brilliant proof five cent striking in decades, and by contemporary popular demand the preferred proof format for the Buffalo nickel series. PCGS reports just seven numerically finer brilliant proofs (10/15).
Ex: The Richard P. Ariagno, M.D. Collection (Heritage, 1/2013), lot 3519.
From The Leon Hendrickson Collection. NGC ID# 278Y, PCGS# 3995

- 4182 1937 PR65 PCGS.** A nicely struck and essentially pristine specimen that displays light to medium caramel-gold and powder-blue patina. The luster resembles the satin finish proofs of the prior year. Encased in a first generation holder. NGC ID# 278Z, PCGS# 3996

1937 Nickel, Lightly Toned PR67+

- 4183 1937 PR67+ PCGS. CAC.** Iridescent toning warms the mirrored fields and satiny devices of this high-end Superb Gem proof Buffalo nickel. The strike is bold, and no contact marks are observed. Although available in PR67, the 1937 proof Buffalo nickel is seldom seen finer. This Plus-graded representative will have significant appeal for the budget-conscious enthusiast. PCGS lists 26 finer representatives (10/15). NGC ID# 278Z, PCGS# 3996

EARLY HALF DIME

1797 Half Dime, VF30 V-2, LM-1, 15 Stars

4184 1797 15 Stars, V-2, LM-1, R.3, VF20 PCGS. The distinctive 15-star obverse identifies this most-often-seen 1797 half dime variety. The present example is evenly struck and shows excellent detail for the grade. The dentils are sharp around the reverse border but grow slightly weak along the upper obverse. Each side shows bright steel-gray patina. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

4185 No lot.

BUST HALF DIME

4186 1833 V-6, LM-9, R.2, MS65 NGC. Die erosion near the profile and a diagonal crack above the cap are the two most obvious identifiers for LM-9. Attractive jade-green and rose-red toning adorns this unabraded Gem. The borders are fully struck, though the centers show moderate inexactness. NGC ID# 232F, PCGS# 38700 Base PCGS# 4280

SEATED HALF DIMES

4187 1839 No Drapery MS65 NGC. This is a sharply defined No Drapery type coin, with Gem-quality surfaces and soft, satiny luster. Both sides show lovely lavender-gray and gunmetal-blue toning, while small bits of gold and amber are also in evidence. Census: 37 in 65, 30 finer (10/15). NGC ID# 232S, PCGS# 4319

4188 1840 Drapery MS65 NGC. CAC. A beautifully preserved, conditionally rare Gem example of this early With Drapery half dime issue, although not quite fully struck on Liberty's head and on isolated high points of the wreath. Each side displays lavender-gray and champagne toning with occasional olive accents. Census: 11 in 65 (1 in 65+★), 4 finer (11/15). NGC ID# 232W, PCGS# 4326

4189 1847 MS66 NGC. High-grade examples of the Stars Obverse Seated Liberty design are elusive. This Premium Gem displays satin mint luster shining through champagne and iridescent toning. The design features are well-defined and neither side reveals mentionable marks. Census: 15 in 66 (1 in 66 ★), 4 finer (10/15). NGC ID# 2339, PCGS# 4337

4190 1850 MS66 PCGS. Attractively toned in alternating shades of steel-blue, violet, and rose-gold across both the obverse and the reverse. There are no distracting marks or weakness of strike to report. Mint luster radiates from both sides in cartwheels, unhindered by the rich patina. Population: 19 in 66, 11 finer (10/15). NGC ID# 233F, PCGS# 4345

4191 1853 Arrows MS65+ PCGS. A boldly struck, frosty example of this popular type-coin issue, showing Gem-quality surfaces and rich golden-orange and violet toning. The 1853 is by far the most plentiful With Arrows issue in the series, offering many excellent examples such as this from which to choose. NGC ID# 233Y, PCGS# 4356

4192 1853-O Arrows MS64 PCGS. CAC. Soft gold patina graces the lustrous surfaces of this near-Gem, taking on more of a golden-tan hue on the reverse along with a strip of bluish-green. The design elements are well-impressed throughout. Prooflike surface qualities are visible beneath the toning, suggesting this coin was struck from fresh dies. Population: 11 in 64, 13 finer (10/15). NGC ID# 233Z, PCGS# 4357

4193 1854 Arrows MS65 PCGS. The widespread export of silver subsidiary coins provided the impetus for a weight reduction in 1853. Arrows were used through 1855 to denote the change. This Gem half dime has dusky violet-gray and olive patina, with the obverse deeper in tone. The motifs are well-struck with softness over the date and clash marks at the upper reverse. Population: 42 in 65, 13 finer (10/15). NGC ID# 2342, PCGS# 4358

4194 1857 MS67 NGC. An available date for type purposes, the 1857 half dime becomes a notable condition rarity at the Superb Gem level. This piece is delicately toned with luminescent ocean-blue and violet hues around the peripheries and light golden color in the centers. The right-hand stars are slightly soft, as is the upper-left portion of the reverse, but the strike is otherwise pleasing. Census: 20 in 67 (7 in 67+), 1 finer (10/15). NGC ID# 233S, PCGS# 4365

4195 1858 MS66 PCGS. CAC. The lavender centers are encompassed by apple-green, navy-blue, and apricot-gold margins. A lustrous and pristine Premium Gem. Only the dentils lack a precise strike. Population: 50 in 66 (1 in 66+), 17 finer (10/15). NGC ID# 233U, PCGS# 4367

4196 No lot.

SEATED HALF DIMES

4197 1861/0 FS-301 MS65 PCGS. Die fill west of the 1 in the date suggests an underdigit 0, although the variety's status as a true overdate is contested. Kevin Flynn's recent reference proposes extra metal around the date was the result of a damaged date punch. Apricot-gold and silver-gray toning dominate, and the rims offer pleasing blushes of lavender and steel-blue. The reverse strike is hampered by roller marks in the upper left quadrant. An interesting variety — and an unabraded, satiny Gem. Population (for the 1/0 variety): 3 in 65, 9 finer (10/15). PCGS# 145479 Base PCGS# 4380

4198 1867 MS64 PCGS. CAC. A boldly struck semiprooflike example of this conditionally elusive Seated half dime issue, showing sharp, frosty design elements and well-preserved surfaces. Although the impression is bold enough to be a proof striking, heavy clash marks on the obverse and a thin die crack at Liberty's left (facing) shoulder denote a later die state such as that seen on a worn circulation issue die pair. Splashes of lavender-gold and russet toning appear on each side. Population: 31 in 64, 16 finer (10/15). NGC ID# 234L, PCGS# 4390

PROOF SEATED HALF DIMES

4199 1862 PR65 Cameo PCGS. The sole limitations for this attractive, contrasted proof half dime are the accustomed die rust on the portrait and the ubiquitous delicate lines revealed with a lens. A sprinkling of grayish-gold toning visits the obverse, while the reverse fields are glassy-smooth, deeply reflective, and untuned. A razor-sharp strike covers both sides. Just 550 proofs were struck. Population: 6 in 65 (1 in 65+) Cameo, 10 finer (10/15). NGC ID# 235X, PCGS# 84445

4200 1865 PR65 Cameo NGC. A well-struck Civil War Gem with medium powder-blue, chestnut-gold, and lime-green toning. The fields are flashy and undisturbed. The reverse is minutely die doubled west, apparent on the uprights of the H in HALF and the D in DIME. Census: 14 in 65 Cameo (1 in 65+★ Cameo), 6 finer (10/15). NGC ID# 2362, PCGS# 84448

- 4201 1868 PR66 PCGS.** Multi-colored toning over frosty devices and reflective fields. Strike detail is generally good throughout, and the surfaces are virtually blemish free. The 1868 has an overall low mintage of 89,200 pieces, of which only 600 are proofs. Population: 10 in 66, 3 finer (10/15). NGC ID# 2365, PCGS# 4451

**1868 Half Dime, Colorful PR67
One-Sided Cameo**

- 4202 1868 PR67 PCGS. CAC.** With a mintage of 600 pieces, the proof 1868 Seated half dime is a major rarity at the Superb Gem level. This CAC-endorsed example ranks among the finest non-Cameos known and displays a beautiful array of multicolor toning. As is sometimes seen on proof half dimes of this period, the upper-left portion of the wreath is softly struck. The obverse shows considerable cameo contrast, the reverse less so. Population: 3 in 67, 0 finer (10/15). NGC ID# 2365, PCGS# 4451

**1869 Half Dime, PR67
Glassy Mirrors, Multicolor Toning**

- 4203 1869 PR67 NGC.** Bold multicolor toning embraces the glasslike fields of this Superb Gem 1869 proof half dime. There is a single point of strike softness on the upper-left portion of the wreath, but the obverse portrait is bold. A few die polish lines should not be mistaken for hairline scratches, of which there are none seen. Census: 11 in 67 (1 in 67 ★), 1 finer (10/15). NGC ID# 2366, PCGS# 4452

**1869 Half Dime, Toned PR67
Infrequently Found at This Level**

- 4204 1869 PR67 NGC.** Deep russet patination is joined by light green coloration, especially on the reverse. The design elements are razor-sharp, befitting a proof strike. Both sides are impeccably preserved. The 1869 proof half dime saw a production of 600 pieces and is infrequently located in this level of preservation. Census: 11 in 67 (1 in 67 ★), 1 finer (10/15). NGC ID# 2366, PCGS# 4452

- 4205 1869 PR66 Cameo PCGS.** Only 600 Seated Liberty half dimes were struck in 1869 and few survivors can match the quality and eye appeal of this spectacular Premium Gem. The well-detailed frosty design elements contrast boldly with the deeply reflective fields and the well-preserved surfaces show a few hints of greenish-gold and cerulean-blue toning. Population: 4 in 66 Cameo, 1 finer (10/15). NGC ID# 2366, PCGS# 84452

EARLY DIMES

**1796 Draped Bust Dime, Good 6
Popular First Year Issue, JR-1**

- 4206 1796 JR-1, R.3, Good 6 NGC.** All legends and stars are clear on this luminous first-year dime. The minutely granular surfaces show pearl-gray centers and iridescent aquamarine and lavender borders. Abrasions are inconsequential except for a hair-thin reverse mark between 12 o'clock and the left (facing) wingtip. The variety is easily recognized by the cud at star 1. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

**1805 JR-1 Five Berries Dime, XF40
Rich, Original Toning**

- 4207 1805 5 Berries, JR-1, R.3, XF40 PCGS.** Rich dove-gray, cobalt-blue, and medium-brown toning envelops this early silver type coin. The obverse shows a few thin marks concealed by the patina. A sharp strike exists despite isolated softness on the upper right portion of the shield. Population: 5 in 40, 15 finer (10/15). Ex: FUN Signature (Heritage, 1/2007), lot 2539. PCGS# 38768 Base PCGS# 4478

- 4208 1805 4 Berries, JR-2, R.2, Fine 15 PCGS.** A few areas of deeper patina are confined to the borders except for an oblong toning accent beneath the chin, with an original golden-gray appearance throughout both sides. All elements are well-defined for the grade although the the rim is worn above UNITED with some merging into the legend. Nice appeal remains with no untoward marks or distractions. Population: 1 in 15, 8 finer (9/15). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

- 4209 1805 4 Berries, JR-2, R.2, VF25 ANACS.** An attractively defined cream-gray Heraldic Eagle dime. The obverse displays minor mint-made roller marks, but the surfaces lack consequential abrasions. Only two 1805 die marriages are known, and each receives a separate Guide Book entry due to different berry counts. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

BUST DIME

- 4210** 1830 Medium 10C, JR-6, R.2, MS63 PCGS. Apple-green and cherry-red adorn the borders of this fully struck and satiny Select dime. The centers are steel-gray. An unblemished and pleasing type representative. PCGS has yet to certify any Mint State 1830 dimes as JR-6 (10/15). PCGS# 38843 Base PCGS# 4516

SEATED DIMES

- 4211** 1837 No Stars, Large Date, F-101b, R.2, MS62 PCGS. Radial obverse die cracks from 4:30 and 7 o'clock intersect below Liberty's knees. Sea-green, lilac-red, and orange toning endows the obverse. The brilliant central reverse is bounded by golden-brown and cobalt-blue patina. A well struck and colorful example of the briefly issued No Stars subtype. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

1838 Seated Dime, MS65 Fortin-101a, Small Stars, Dramatic Toning

- 4212** 1838 Small Stars, Doubled Die Reverse, F-101a, FS-801, R.3, MS65 NGC. This is the late die state Small Stars variety with prominent peripheral die cracks on each side. The reverse shows bold die doubling, most easily detected on the O and D in ONE DIME, as well as on the lower wreath leaves and bow. The relief elements are boldly impressed, and the surfaces show delicately preserved, frosty luster. Splashes of teal, gold, and pale lavender toning blanket each side, attesting to the originality of this immensely appealing No Drapery dime. Census: 8 in 65, 4 finer (10/15). PCGS# 537662 Base PCGS# 4569

1840 No Drapery Dime, MS65+ Fortin-103, 'Chin Whiskers'

- 4213** 1840 No Drapery, F-103, R.3, MS65+ NGC. A Top 100 Fortin Variety. F-103 exhibits heavy die lines below Liberty's chin, giving the allegorical figure the appearance of having a goatee. This high-end Gem No Drapery dime is fully struck and displays satiny luster beneath golden-gray, amber-red, and sea-green toning. The exceptional surface quality holds up even under close scrutiny with a loupe. PCGS# 537703 Base PCGS# 4573

- 4214** 1842 F-101, R.4, MS64 PCGS. CAC. Silver-white frosty luster embraces each side of this attractive near-Gem and the design elements are well-struck. A few minor field scuffs preclude Gem status. The faint die crack through the M in AMERICA is present, but differs from the line drawn on the Fortin page for the variety. Population: 21 in 64 (1 in 64+), 13 finer (10/15). PCGS# 537782 Base PCGS# 4581

1842-O Seated Dime, MS62 Elusive in Mint State

- 4215** 1842-O Medium O, F-105, R.3, MS62 NGC. A die gouge near Liberty's left (facing) hand aids in identification of this variety. As a date, the 1842-O dime is rarely seen in Mint State, giving this boldly struck example significant appeal. The surfaces are satiny and show minimal abrasions for the grade. Russet-gold peripheral toning surrounds brilliant centers. Census: 5 in 62, 14 finer (10/15). PCGS# 537801 Base PCGS# 4582

1843 Seated Dime, MS66 Tied for Finest Certified

- 4216** 1843 Repunched Date, F-101, R.2, MS66 PCGS. CAC. The 3 is repunched left, and the drapery under Liberty's elbow is polished. Gerry Fortin notes that "the historically stated mintage [1.3 million coins] is not supported by the present number of identified dies and their die states." Five obverse dies and six reverse dies are known, suggesting a lower production total than reported. Silver-gray centers meld into rings of orange and rose-violet around the peripheries of this wonderful Premium Gem dime. Sharply struck and devoid of overt impairments, this is one of three MS66 submissions at PCGS with none finer. NGC shows a single MS66 and none finer (10/15). PCGS# 537809 Base PCGS# 4583

- 4217** 1846 F-101, R.4, VF30 PCGS. The ultra-low mintage 1846 is a key among Philadelphia issues. The present midgrade example displays light gold and stone-gray toning. A lens reveals only minor marks, along with a few minuscule obverse spots. PCGS# 537837 Base PCGS# 4588

- 4218** 1853 Arrows MS65 PCGS. The central reverse is untuned, but the remainder of this coruscating Gem is richly patinated forest-green and tobacco-brown. The reverse is pristine, and the obverse displays unobtrusive contact near star 2 and above the shield. Both sides exhibit a wire rim. NGC ID# 2398, PCGS# 4603

- 4219** 1853 Arrows MS66 NGC. F-103, R.3. Rich toning is present on both sides of this Premium Gem, the colors particularly vibrant on the obverse. The shades include deep gold, red-brown, emerald-green, teal, steel-blue, and plum. This attractive piece exhibits a crisp strike and is scarce this well-preserved. Census: 43 in 66 (1 in 66+, 1 in 66 ★), 17 finer (10/15).
Ex: Dallas ANA Signature (Heritage, 10/2012), lot 3913. NGC ID# 2398, PCGS# 4603

**1853 Arrows Dime, MS66
Elusive Fortin-118 Die Marriage**

- 4220 1853 Arrows MS66 PCGS. F-118, R.4.** Fortin-118 exhibits heavy die lines in the recesses of Liberty's portrait. Fortin recalls having seen only three examples of this die pairing, grading from a low of Good 4 to a high of XF40. This MS66 example should garner significant attention. A bold strike produces a sharp wire rim around each periphery, while the satiny surfaces are aglow with warm champagne-gold toning. Population (all varieties included): 41 in 66 (2 in 66+), 20 finer (10/15). NGC ID# 2398, PCGS# 4603

- 4221 1860 Doubled Die Obverse, F-106, R.4, MS66 PCGS. CAC.** A Top 100 Variety. Portions of UNITED STATES are lightly die doubled. Dappled forest-green, dove-gray, and tan-brown toning embrace this coruscating, unabraded, and crisply struck Premium Gem. PCGS# 538153 Base PCGS# 4631

- 4222 1862 MS66 PCGS. Fortin-Unlisted.** A beautifully preserved and attractively toned Premium Gem example of this collectible Civil War-era Seated dime. The design elements are sharply rendered, surrounded by bold wire rims on each side and set against partially reflective fields. Both sides exhibit warm olive, gold, and reddish-amber toning. This variety is unlisted by Fortin; the date placement appears virtually identical to that of F-101a, but there is no horizontal die line in the right side of the shield. All peripheral lettering is bold, and the reverse is lightly clashed. Population: 17 in 66 (2 in 66+), 2 finer (10/15). NGC ID# 239H, PCGS# 4635

**1875-S Seated Dime, Lustrous MS65+
Mintmark Above Bow**

- 4223 1875-S Mintmark Above Bow MS65+ PCGS. CAC. Fortin-101.** In-Wreath Mintmark. Strong luster emanates from the light silver-gray surfaces of this high-end S-mint Gem dime. Most design elements are relatively well-defined except for the normal weakness at Liberty's head and foot, which usually appear flat. No mentionable marks appear on either side. Spindly die cracks and die clashing show around the reverse periphery, but the lower reverse is still in its precud state, at which point it would become Fortin-101a with a fully shattered reverse. A high Condition Census example of the issue. Population: 5 in 65 (2 in 65+), 3 finer (10/15). Ex: Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as MS66 NGC), lot 98251. NGC ID# 23AG, PCGS# 4677

- 4224 1876-CC MS66 NGC. F-101, R.3.** The Type One Reverse Fortin-101 dies are severely deteriorated, showing multiple cracks and rim cuds along with severe erosion in the fields and heavy rust on Liberty's figure. This Premium Gem example is nonetheless well-defined and displays light golden toning. Census: 24 in 66 (2 in 66+), 6 finer (10/15). NGC ID# 23AJ, PCGS# 4680

**1876-CC Dime, Frosty MS66+
High-End Carson City Type Coin**

- 4225 1876-CC MS66+ NGC. F-122, R.3.** A boldly struck, well-preserved example of this collectible Carson City Seated dime, showing frosty pastel-toned luster and unabraded surfaces. Despite a mintage in excess of 8 million coins, the 1876-CC dime is scarce in Premium Gem condition and is rarely seen finer. Census: 24 in 66 (2 in 66+), 6 finer (10/15). NGC ID# 23AJ, PCGS# 4680

**1886-S F-101 Dime, MS66
Better San Francisco Issue**

- 4226 1886-S F-101, R.4, MS66 NGC.** Dappled golden-brown and sea-green toning embrace this lustrous, unabraded, and well struck Premium Gem. A scarce low mintage issue, the 1886-S has less than 5% of the production of its 1887-S successor. Only two die varieties are known. Census: 7 in 66, 4 finer (10/15). PCGS# 538720 Base PCGS# 4697

**1887 Dime, Gorgeous MS67
Among the Three Finest at PCGS**

- 4227 1887 MS67 PCGS. CAC. Fortin-Unlisted.** The tip of the left foot of the 1 is positioned over two dentils, and the obverse is free of die cracks or clash marks. The reverse shows clashing within DIME and die cracks around the wreath. Both sides are frosty and brilliant with pale gold and magenta toning near the borders, contributing to the marvelous eye appeal. Liberty's head and the corn kernels feature bold detail. A top-ranked survivor from a mintage of 11.2 million coins. Population: 3 in 67, 0 finer (10/15). NGC ID# 23B5, PCGS# 4698

- 4228 1889 Doubled Die Reverse, F-104, R.3, MS66 PCGS.** The left half of the wreath is nicely die doubled, similar to FS-801 but from a different reverse die. Myriad tiny die lines in Liberty's shield confirm the attribution. A sea-green and rose-gold Premium Gem. Lustrous, nicely struck, and beautifully preserved. PCGS# 538797 Base PCGS# 4702

PROOF SEATED DIMES

4229 1858 PR64 Cameo NGC. The actual number of proofs struck in 1858 remains uncertain, although the reported mintage of 80 pieces is certainly too low. The 2016 *Guide Book* estimates 300+ proof Seated dimes. A faint golden hue deepens slightly at the rims on this Choice cameo proof. The strike is faultlessly sharp, while a scattering of light lines in the obverse field account for the grade. Census: 2 in 64 Cameo, 11 finer (10/15). NGC ID# 23CC, PCGS# 84747

4230 1863 PR65 Cameo PCGS. F-101, R.4. Icy devices rise in intricate detail above the glassy fields. A brilliant Gem that boasts exemplary eye appeal. A lintmark below the Y in LIBERTY provides an identifier. A Civil War date with a low proof mintage of 460 pieces. NGC ID# 23BS, PCGS# 84756

4231 1863 F-101, R.4, PR66 PCGS. A stunning, well-toned Gem with concentrically transitional multicolor hues that culminate in cobalt-blue and lavender in the centers. Added pressure as a date due to the scarcity of Mint State examples, this specimen is sure to please. Population: 13 in 66 (1 in 66+), 0 finer (10/15). Ex: FUN Signature (Heritage, 1/2004), lot 5642. PCGS# 539011 Base PCGS# 4756

1866 Dime, PR65 Deep Cameo Incredible Field-Motif Contrast

4232 1866 PR65 Deep Cameo PCGS. F-102, R.3. The scarcity of the circulation-strike Seated dime of 1866 heightens demand for proof representatives. This boldly contrasted and razor-sharp Gem is one of only a dozen proofs in any grade awarded a Deep Cameo designation at PCGS. Brilliant interiors showcase clear fields, while the peripheries display vivid lavender-gold and ocean-blue. Population: 4 in 65 Deep Cameo, 3 finer (10/15). NGC ID# 23CP, PCGS# 94759

1866 Dime, PR66+ Fantastic Multicolor Patina

4233 1866 F-102, R.3, PR66+ PCGS. CAC. Dime production at the Mint amounted to a meager 8,000 circulation strikes and 725 proofs in 1866. Proofs tend to be more readily available, and are often targeted as alternatives to their business-strike counterparts. Fantastic multicolor toning covers nearly the entirety of each side, including shades of green, blue, rose, violet, and orange with an area of brilliance over the left wreath elements. The resulting eye appeal is sure to impress. High-end for the grade and appropriately endorsed by CAC. Population: 6 in 66 (1 in 66+), 1 finer (10/15). NGC ID# 23CP, PCGS# 539017 Base PCGS# 4759

1866 Seated Dime, PR67 ★ Exemplary Eye Appeal

4234 1866 F-102, R.3, PR67 ★ NGC. A vivid array of multicolor toning supports the coveted Star designation on this Superb Gem 1866 proof dime. The design elements are fully brought up above deep, glassy mirroring in the fields. The 1866 proof had a moderate mintage of 725 pieces, supplementing a scant circulation-strike coinage of 8,000 representatives. Census: 6 in 67 (2 in 67 ★), 2 finer (10/15). NGC ID# 23CP, PCGS# 539017 Base PCGS# 4759

4235 1871 F-102, R.4, PR66 PCGS. CAC. A boldly struck Premium Gem proof with mirrored fields and frosty design elements. Both sides show splashes of lavender-gold, mint-green, and sky-blue toning. Among the finer-known representatives. Population: 12 in 66 (1 in 66+), 0 finer (10/15). PCGS# 539028 Base PCGS# 4764

4236 1873 No Arrows PR65 Cameo PCGS. F-101. Rose-red, straw-gold, and olive-green toning enriches this flashy and well struck Gem. A small area of gray patina is noted above the right ribbon loop. Arrows proof dimes were also issued in 1873, but the Open 3 variety was not struck in proof format. NGC ID# 23DH, PCGS# 84766

1881 Dime, PR67 Attractive Toning Rare Fortin-103

4237 1881 F-103, High R.6, PR67 NGC. Ocean-blue centers are bounded by caramel-gold. Glimpses of lilac-red appear on both sides. Satiny and pristine with reflective fields and a good strike. The rare F-103 was unknown to Awash, and in fact was not reported to Fortin until September 2014. John Dannreuther was the discoverer. He believes that that 50 proofs delivered during the second quarter of 1881 were the F-103 variety. The logotype was entered further right, with an upward slope, relative to the "common" F-101 and F-102 proofs. PCGS# 539051 Base PCGS# 4778

4238 1883 PR66 Cameo PCGS. CAC. F-103, R.3. The flashy fields exhibit delicate lilac-red toning. The strike is bold except for minor blending on the upper left portion of the wreath. The devices are luminous, and no imperfections are readily apparent. NGC ID# 23D8, PCGS# 84780

4239 1888 PR66 Cameo NGC. CAC. F-103. Orange-red toning endows the borders of this handsome Premium Gem. The motifs are frosty and the fields are flashy. The strike is good, and the sole imperfection is a hair-thin line on the wreath near 9 o'clock. Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3342, which realized \$1,725. NGC ID# 23DD, PCGS# 84785

- 4240 1888 F-102a, R.3, PR67 PCGS.** Diagnostics of Fortin-102a include a medium-level date that slopes slightly upward, weakness on the base above the 8s in the date, and a die defect on the corn ear. Faint golden-russet toning occurs over each side, with surfaces that feature boldly struck devices and reveal minimal marks. Of the 832 proofs issued, PCGS has seen just six in PR67 (one in PR67+) and none finer (10/15). PCGS# 539062 Base PCGS# 4785

BARBER DIMES

- 4241 1893-S MS65 PCGS. CAC.** An overlay of dove-gray, russet, and sky-blue patina adorns each side, while the underlying surfaces are aglow in frosty luster. The strike is needle-sharp with bold forecurls and complete kernel definition on the ear of corn. An original, eye-appealing example. Population: 14 in 65, 8 finer (11/15). NGC ID# 23DS, PCGS# 4802
- 4242 1894 MS66 PCGS.** Ex: Lily Nicole Collection. A delightful Premium Gem with well-detailed design elements and beautifully preserved surfaces that show prooflike reflectivity in many areas, under shades of greenish-gold and lavender-gray toning. Population: 9 in 66 (1 in 66+), 3 finer (10/15). NGC ID# 23DT, PCGS# 4803
- 4243 1895-O VF20 PCGS.** The 1895-O Barber dime claims a low mintage of 440,000 pieces, making it a sought-after key date in the series. This pleasing VF specimen retains most letters in LIBERTY and exhibits lightly abraded silver-gray surfaces. NGC ID# C4KL, PCGS# 4807
- 4244 1896-S MS64 PCGS.** The 1896-S Barber dime is scarce in Mint State and is rarely seen finer than this MS64 example. Detail is sharp throughout each side, illuminated in satiny, champagne-toned luster. The reverse exhibits several die cracks, including a couple of small chips in the upper wreath leaves. Population: 33 in 64 (1 in 64+), 26 finer (10/15). NGC ID# 23E2, PCGS# 4811
- 4245 1897 MS66+ PCGS. CAC.** In Mint State, the 1897 Barber dime is most often seen in the MS62 to MS64 grade range; this Plus-designated Premium Gem is a significant condition rarity. The design elements are sharply rendered, and the satiny surfaces display dusky multihued patina. A few small marks on Liberty's cheek are all that preclude a full MS67 designation. Population: 34 in 66 (6 in 66+), 5 finer (10/15). NGC ID# 23E3, PCGS# 4812

1897 Dime, Razor-Sharp MS67

- 4246 1897 MS67 PCGS.** Strong mint luster rolls across the frosted surfaces of this Superb Gem dime, one of just a dozen examples of the issue to achieve such a high status with both services combined. Reddish-orange luster highlights the obverse margins, while teal, lilac, and silver-rose toning blankets the reverse. The strike is razor sharp, and the surfaces are nearly unmarked except for a shallow scrape above E of ONE. Population: 5 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 23E3, PCGS# 4812
- 4247 1897-O MS63 NGC.** The silver-gray lustrous surfaces of this Select O-mint dime display deep grayish-green patina at the obverse margin, and the design elements are well-impressed throughout. A handful of ticks do not distract. Census: 4 in 63, 35 finer (10/15). NGC ID# 23E4, PCGS# 4813

1901-O Dime, MS66 One Numerically Finer at PCGS

- 4248 1901-O MS66 PCGS. CAC.** Ex: Lily Nicole Collection. Light tinges of ruby-red complement the smoke-gray patina on each side of this near-pristine piece. A single tick in the right obverse field is the only visible evidence of contact. An elusive piece so fine, much nicer than the run-of-the-mill example in this grade. Population: 8 in 66 (1 in 66+), 1 finer (10/15). One of five in this grade with the CAC green approval sticker.
Ex: Long Beach Signature (Heritage, 2/2007), lot 2945; Oliver Collection / Chicago Signature (8/2011), lot 3630; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3927. NGC ID# 23EG, PCGS# 4825
- 4249 1901-S MS63 PCGS.** The 1901-S is a better date in the Barber dime series. This Select example is of median quality for the issue — visually pleasing yet affordable. The strike is bold, and there are no singularly obvious abrasions. Satiny luster displays subtle champagne toning. Population: 8 in 63, 32 finer (10/15). NGC ID# 23EH, PCGS# 4826
- 4250 1906-S MS66+ PCGS. CAC.** The 1906-S Barber dime is a challenging date in Uncirculated condition, rarely seen finer than MS65. This Plus-designated Premium Gem is of exceptional quality and eye appeal. The frosty surfaces showcase intermingled lavender-gray, gold, and aquamarine hues, while the underlying design elements are struck to full advantage. Population: 23 in 66 (3 in 66+), 3 finer (10/15). NGC ID# 23F2, PCGS# 4841

1911-S Dime, Beautifully Toned MS67

- 4251 1911-S MS67 PCGS. CAC.** Ex: Lily Nicole Collection. An impeccable Superb Gem Registry coin, this beautifully toned piece is bathed in mottled peach, lavender, mint-green, and aqua-blue hues. Even inspection with a glass yields very little in the way of disturbances on this high-quality condition rarity. Population: 10 in 67 (1 in 67+), 0 finer (10/15)
Ex: FUN Signature (Heritage, 1/2005), lot 4063; Lily Nicole Collection / Central States Signature (Heritage, 4/2015), lot 3966. NGC ID# 23FL, PCGS# 4859
- 4252 1915 MS66+ PCGS. CAC.** A beautifully preserved, frosty example of this late-series Philadelphia issue, showing soft olive-gold overtones amid otherwise frost-white luster. Well-struck with comparably high surface quality. Seldom seen this fine. Population: 28 in 66 (7 in 66+), 1 finer (10/15). NGC ID# 23FW, PCGS# 4868

**1916 Barber Dime, MS67
Frosty Final-Year Example**

4253 1916 MS67 PCGS. CAC. In total, more than 40 million dimes were struck at the Philadelphia Mint in 1916 — 18+ million were Barber dimes, while 22 million dimes of the new “Mercury” Winged Liberty Head design captivated the public. This Superb Gem Barber dime is an outstanding representative of the final year for the outgoing series. A speckling of olive-gray toning yields to vibrant blue and copper-gold hues at the margins. The strike is needle-sharp and the surfaces are boldly lustrous and frosty. There are no mentionable marks or detractions on this CAC-endorsed coin, which is tied for numerical finest regardless of the service. Population: 9 in 67 (2 in 67+), 0 finer (10/15). NGC ID# 23FY, PCGS# 4870

4254 1916-S MS66+ PCGS. Ex: Lily Nicole Collection. Iridescent lavender-gold and silver patina over each side deepens considerably to olive and russet around portions of the rims. Well-struck with smooth, frosted surfaces. The final S-mint Barber dime issue is a condition rarity this well-preserved. Population: 21 in 66 (5 in 66+), 0 finer (10/15).
Ex: *Long Beach Signature* (Heritage, 5/2007), lot 734; *Long Beach Signature* (Heritage, 5/2009), lot 539. NGC ID# 23FZ, PCGS# 4871

PROOF BARBER DIMES

**1899 Barber Dime, PR66 Cameo
Brilliant and Nicely Contrasted**

4255 1899 PR66 Cameo PCGS. The 1899 is a natural for type collectors as it the final year that has a date from the 1800s. This is a remarkably attractive coin that is brilliant throughout with stark white-on-black contrast seen on each side between the devices and fields. There are no reportable contact marks on this lovely Barber dime. Population: 14 in 66 (3 in 66+) Cameo, 7 finer (10/15). NGC ID# 23GC, PCGS# 84883

4256 1902 PR66 NGC. Rich toning covers the deep-mirrored surfaces of this strong Premium Gem proof, delivering top-notch eye appeal. Steel-blue and reddish-gold shades vie for attention with the blue tones occupying slightly more territory. There are no mentionable marks. Census: 26 in 66, 17 finer (10/15). NGC ID# 23GF, PCGS# 4886

4257 1906 PR65 PCGS. Only 675 proof Barber dimes were struck in 1906. This impressive Gem is sharply detailed throughout, with deeply reflective fields and well-preserved surfaces that show a few hints of green and lavender toning at the rims. Population: 23 in 65, 35 finer (10/15). NGC ID# 23GK, PCGS# 4890

4258 1907 PR66 PCGS. Exquisitely struck design elements stand out on this Premium Gem proof. Luminous surfaces display variegated steel-blue and reddish-purple coloration over incredibly deep mirrored fields that have obviously been well cared for. From a mintage of 575 pieces. Population: 24 in 66, 15 finer (10/15). NGC ID# 23GM, PCGS# 4891

4259 1907 PR65+ Cameo PCGS. CAC. Icy motifs rise in full detail above the glassy fields. A whisper of golden patina visits the unperturbed surfaces. A scant 575 proofs were issued. Population: 11 in 65 (1 in 65+) Cameo, 4 finer (10/15). NGC ID# 23GM, PCGS# 84891

TWENTY CENT PIECES

4260 1875-CC AU55 NGC. BF-2, R.1. Golden-brown margins encompass cream-gray centers. This moderately circulated Carson City type coin is free from reportable abrasions. A small vertical strike-through (as made) near star 13 provides an identifier. NGC ID# 23R6, PCGS# 5297

4261 1875-CC AU58 NGC. CAC. BF-4, R.2. The right side of the 1 is well right of the shield point, and the mintmark is widely spaced. This is the only collectible CC issue in the short-lived twenty cent series. Original antique patina shrouds each side with glimpses of partial luster near the recesses. A touch soft on the head, foot, and right stars. NGC ID# 23R6, PCGS# 5297

4262 1875-CC MS62 PCGS. BF-2, R.1. Forest-green borders encompass cream-gray, lavender, and straw-gold centers. The strike shows incompleteness only on the eagle's breast and the top of the left (facing) wing. A thin mark is beneath star 8, but the satiny surfaces are otherwise well preserved. For most collectors, the only obtainable CC-Mint twenty cent date. NGC ID# 23R6, PCGS# 5297

**1875-CC Twenty Cent, MS63
Excellent Surface Quality**

4263 1875-CC MS63 PCGS. CAC. BF-2, R.1. This Carson City twenty cent type coin appears slightly finer from a technical standpoint, although considerable strike weakness on the upper eagle and lower obverse portrait likely contributes to the grade. Frosty luster yields few abrasions and each side is cast in warm champagne and amber-gold hues. NGC ID# 23R6, PCGS# 5297

4264 1875-S MS63 PCGS. BF-3, R.5. Rich peach-gold toning is chiefly confined to the borders. Lustrous and nicely struck with smooth surfaces aside from minor contact on the right obverse field. BF-3 is described as “a rare die marriage” in the Brunner-Frost reference. NGC ID# 23R7, PCGS# 5298

4265 1875-S MS64 PCGS. BF-6, R.4. Always the target of type collectors, the 1875-S had a large mintage of 1,155,000 pieces struck from 16 listed die pairs. This BF-6 example is among the scarce die marriages, with die clashing on both sides and numerous die cracks on the reverse. The smooth, frosted surfaces display pale-gold toning at the borders with lustrous, cream-white centers. The right-side star centers as well as Liberty's head are somewhat weak, as is the eagle's left (facing) shoulder. An attractive, near-Gem coin. NGC ID# 23R7, PCGS# 5298

4266 1875-S MS64+ NGC. BF-5, R.2. This variety is attributed by the following: a long, curved, horizontal die line in the lower gown to the right of the shield, a horizontal die crack between the U in UNITED and the star, another from the lower part of the last S in STATES to O in OF, and one from the lower beak to the wing. Lustrous surfaces display orange-gold, lavender, and blue-green peripheral toning along with sharply struck design elements. NGC ID# 23R7, PCGS# 5298

4267 1875-S MS64+ PCGS. BF-14, R.1. Dusky golden-gray toning covers the central obverse, framed by a ring of speckled violet patina. Similar hues appear throughout the reverse, but the overall tone is lighter. The reverse is also better-defined than the obverse with notable definition on the claws and wing feathers. Ideal for type representation. NGC ID# 23R7, PCGS# 5298

4268 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS63 PCGS. The so-called "dollar sign" variety with prominent repunching on the mintmark serifs. The top of a 5 is misplaced in the dentils beneath the 7 in the date. This coruscating type coin has a good strike and pleasing preservation. Original charcoal-gray toning visits the borders. NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECE

4269 1875 PR61 Cameo NGC. BF-1, R.1. Date placed right. According to Brunner and Frost, 1875 Philadelphia twenty cent production comprises 2,790 proofs and 36,910 circulation strikes. Bold cameo contrast defines this specimen, the result of lightly toned, deeply reflective fields and thickly frosted motifs. Scattered contact marks are undistracting. NGC ID# 23X7, PCGS# 85303

EARLY QUARTERS

1806 Draped Bust Quarter, B-2 Original Surfaces, Choice VF Example

4270 1806 B-2, R.2, VF35 PCGS. Tompkins Die State 3/5. The natural, dusky-gray patina shows reddish-gold luster around the motifs despite wear from circulation and a few light marks, including a toned-over, hair-thin line that runs from the shoulder to the jawline. Struck from a late die state, with rim crumble at star 7 and above LIB of LIBERTY and emerging rim cuds above ED and STA of UNITED STATES. Sharp definition remains on the devices with outstanding, original eye appeal. NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

1806 Quarter, B-9, XF40 Draped Bust Type Coin

4271 1806 B-9, R.1, XF40 NGC. Tompkins Die State 3/3. A heavy, vertical die crack bisects the obverse from the 1 in the date to the E in LIBERTY with heavy clash marks in the fields, but the later lapping of the obverse that weakens the lower hair curls has not yet occurred. This Draped Bust type coin is evenly struck and exhibits little wear. Both sides display mottled lavender-gray toning. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

1815 B-1 Quarter, AU55 Enigmatic 'E' Counterstamp

4272 1815 B-1, R.1, AU55 NGC. "E" Counterstamp. First noted in numismatic literature in the 1870s, the enigmatic E and L counterstamps on 1815 and 1825 quarters have never been fully explained or understood. Some attribute the marks to the Harmony Society community of Economy, Pennsylvania circa 1832, where the counterstamps were possibly a voting mechanism. Other theories abound, such as linking the counterstamps to Planters Bank in Louisiana. The E and L countermarks are highly sought by collectors, who await a solution to the mystery and the likely increase in value once a confirmed attribution is discovered. This Choice 'E' example is lightly toned with amber-gold accents at the margins and pleasing, sharply struck motifs. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

4273 1819 Small 9, B-3, R.1, XF40 PCGS. Tompkins Die State 4/3. The final die state with cracks on both sides. Sea-green, cream-gray, and lilac toning enrich this unblemished and moderately circulated Capped Bust quarter. Luster outlines the peripheral legends. NGC ID# 23RK, PCGS# 402646 Base PCGS# 5325

4274 1825/4(2) B-3, R.3, AU50 PCGS. A lightly circulated olive-gray and lilac-red quarter that retains noticeable luster across the legends and motifs. There are no relevant marks. Much has been written about the underdigits of the B-3 variety, but it should also be noted that the 8 is repunched. NGC ID# 23RS, PCGS# 38973 Base PCGS# 5336

- 4275 1834 O Over F in OF, B-1, FS-901, R.1, AU58 PCGS.** Tompkins Die State 5/5. The dies were lapped, although remnants of the recutting throughout the legend remain. The obverse shows heavy die clashing at the ear and a trio of diagnostic die cracks that characterize the latest state of the die. As expected, the reverse is rotated 45° and portions of the olive leaves and left talons are lost to die lapping, as is the upper portion of the left upright in M of AMERICA. Considerable luster remains on this near-Mint example, with lightly toned centers and deeper amber-gold shades at the margins. Sharply struck despite the late die state. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

SEATED QUARTERS

1839 No Drapery Seated Quarter Well-Struck MS62

- 4276 1839 No Drapery MS62 PCGS. Briggs 1-A.** Late Die State. This issue often comes poorly struck, especially on Liberty's head, the stars, and the eagle's head and legs (Larry Briggs, 1991). These areas are all well-defined on this MS62 example. Golden-gray patina imbued with traces of blue rests on softly lustrous surfaces. The typically seen late die state crack runs from the rim beneath the 1 in the date along the lower left border, and another bisects the reverse from the T of UNITED to the R in AMERICA. Scattered light marks are observed. Population: 12 in 62, 31 finer (10/15).
Ex: ANA Signature (Heritage, 8/2007), lot 628; The Christmas Lake Collection / Pittsburgh Signature (Heritage, 10/2011), lot 3577. NGC ID# 23SF, PCGS# 5392

- 4277 1840-O No Drapery MS62 NGC. Briggs 1-A.** Large O. Repunched 8 in the date. Butter-gold toning visits the peripheries of this otherwise brilliant representative. Unabraded aside from faint lines near stars 4 and 11. Luster fills the borders and motifs. The first New Orleans quarter issue, and the only issue of the denomination from the facility without drapery below the raised elbow. Census: 10 in 62, 11 finer (10/15). NGC ID# 23SG, PCGS# 5393

1841-O Quarter, MS64 Unabraded and Satiny

- 4278 1841-O MS64 PCGS.** Satiny and sharply struck with delicate almond-gold toning. The surfaces are smooth aside from minor granularity on the right obverse field. 1841 was only the second year of quarter production at New Orleans, but the 1841-O is readily located in VG to Fine. Mint State examples are scarce despite a number of pieces recovered from excavations at the Meridien Hotel. Population: 7 in 64, 1 finer (10/15). NGC ID# 23SL, PCGS# 5400

1852-O Seated Quarter, XF40 Rare This Fine

- 4279 1852-O XF40 PCGS. Briggs 1-A.** The scarcity of this pre-1853 New Orleans issue is becoming increasingly recognized by collectors in recent years. From a mintage of 96,000 pieces, this lightly circulated example displays bright steel-gray patina with lavender and gold overtones around the peripheries. The softness on Liberty's head is due more to strike than wear. Finer pieces exist, but locating one may be more challenging than affording one. Population: 8 in 40, 10 finer (10/15). NGC ID# 23T9, PCGS# 5420
- 4280 1853 Arrows and Rays MS62 PCGS.** An attractive MS62 example of this popular short-lived design type, with well-detailed relief elements and somewhat subdued mint luster under dusky shades of lavender, gray, and amber patina. Ideal for the collector who appreciates old-time coloration. NGC ID# 23U4, PCGS# 5426
- 4281 1854 Arrows MS63 PCGS Secure.** The interior design elements of this Select 1854 With Arrows Seated quarter are well-defined, even while the top of Liberty's head and several peripheral stars show slight weakness. Dusky tan-gold toning blankets each side, and there are no singularly bothersome abrasions. NGC ID# 23U6, PCGS# 5432

1858 Quarter Dollar, MS65 ★ Colorful No Motto Type Coin

- 4282 1858 MS65 ★ NGC.** Gem-quality surfaces emit frosty, glowing luster on this colorful 1858 Seated quarter. The eagle's left (facing) leg feathers are a trifle soft, but the obverse stars and portrait are well-defined. The 1858 is an available date with a mintage in excess of 7.3 million coins. Nonetheless, Gem and finer examples are conditionally elusive. Census: 30 in 65 (1 in 65+, 1 in 65 ★), 19 finer (10/15). NGC ID# 23TH, PCGS# 5445
- 4283 1858-S — Cleaned — ANACS Details. AU53. Briggs 2-B.** A well-struck example of this low mintage early S-mint quarter. Delicate golden-brown toning drapes the partly lustrous and lightly hairlined surfaces. The obverse has a tiny rim nick at 6:30. Rarely seen with AU sharpness.
Ex: Long Beach Signature (Heritage, 2/2007), lot 3158. NGC ID# 23TK, PCGS# 5447
- 4284 1859-S — Cleaned — ANACS Details. XF40. Briggs 1-A.** From a mintage of 80,000 pieces, the 1859-S Seated Liberty quarter is scarce-to-rare in all grades. This lightly worn example displays a full LIBERTY and the scroll edges are bold, but the lightly abraded surfaces show signs of a light cleaning. NGC ID# 23TN, PCGS# 5450

- 4285 1866-S VF20 PCGS. Briggs 1-A.** Always a popular type selection for its first-year Motto reverse, the 1866-S quickly becomes scarce even in lower grades. This smoothly worn example displays full rims on both sides with a crescent of blue and gold toning at the upper obverse. The slightly subdued surfaces show light abrasions, but IN GOD WE TRUST is sharp, and all of the motifs are well-defined for the grade. NGC ID# 23UC, PCGS# 5469

**1867-S Seated Quarter, VF35
Original Color, Excellent Detail**

- 4286 1867-S VF35 PCGS. Briggs 1-A.** With a mintage of just 48,000 coins, the 1867-S Seated quarter is elusive in all grades. This Choice VF example shows sharper detail and richer color than is typically seen. Original olive-gray patina blankets both sides, and the surfaces are relatively problem-free. Population: 7 in 35, 17 finer (10/15). NGC ID# 23UE, PCGS# 5471

- 4287 1873 Arrows MS63 PCGS. Briggs 3-B.** Light lemon-gold toning visits this lustrous and well preserved two-year type coin. Housed in a green label holder. The strike is sharp except on the stars. Both sides display clash marks, as coined. Population: 26 in 63, 58 finer (10/15). NGC ID# BZMG, PCGS# 5491

- 4288 1874 Arrows MS63 PCGS Secure. Briggs 4-C.** Wheat-gold toning graces this lustrous and well struck Select quarter. Impressively devoid of abrasions, and a desirable addition to a specialized holding. The Arrows and Motto combination was issued for just two years. NGC ID# 23VX, PCGS# 5494

- 4289 1876-CC MS64 PCGS. Briggs 7-F. Type Two Reverse.** Small CC. Dusky dove-gray, olive-green, and chestnut-gold toning encompasses this intricately struck and satiny Carson City type coin. Marks are minimal, and the eye appeal is attractive. Both sides exhibit a partial wire rim. NGC ID# 23V3, PCGS# 5502

**1877-CC Quarter, MS66
Beautifully Toned**

- 4290 1877-CC MS66 NGC. Briggs-Unlisted.** Large CC. The 1 points between verticals 6 and 7, the stars are sharp, the mintmark is widely spaced, and die cracks encircle the legends on each side. Carson City quarter dollar production jumped from 140,000 to nearly 4.2 million coins between 1875 and 1877. The increase was the result of the passage of the Specie Resumption Act of January 14, 1875, which directed the Treasury Secretary to coin subsidiary silver "as rapidly as practicable" in exchange for greenbacks. This attractively toned Premium Gem quarter showcases cobalt-blue patina around the margins and in the hidden areas with violet elements centrally. Radiant luster percolates from underneath, illuminating typically struck motifs. Census: 16 in 66 (4 in 66+), 6 finer (10/15). NGC ID# 23V6, PCGS# 5505

- 4291 1878-S AU55 NGC. Briggs 1-A.** Though less famous than its half dollar counterpart, the 1878-S quarter is rare for the same reason: San Francisco production of the denomination ended with the advent of the Morgan dollar. The present lightly circulated example is cream-gray with olive-green patina on the fields. NGC has certified only 31 pieces in all grades (10/15). Ex: Philadelphia Signature (Heritage, 8/2012), lot 3288. NGC ID# 23VA, PCGS# 5510

**1879 Quarter, MS66+
Low-Mintage Date**

- 4292 1879 MS66+ PCGS. Briggs 1-A.** Arcs of forest-green and peach-red endow the upper left obverse. The reverse is brilliant aside from peripheral blushes of pumpkin-gold. Lustrous, well preserved, and boldly struck. A meager 13,600 pieces were struck. Population: 36 in 66 (2 in 66+), 25 finer (10/15). NGC ID# 23VB, PCGS# 5511

- 4293 1882 MS65 PCGS. Briggs 1-A.** The 1880s saw an abundance of silver subsidiary coins return from abroad, reducing the need for new quarters and explaining the low mintages of the period. Only 15,200 quarters were struck in 1882. This all-brilliant example boasts frosty luster and well-struck devices. Abrasions are virtually unseen without magnification. NGC ID# 23VE, PCGS# 5514

**1883 Quarter, MS66
Iridescently Toned**

- 4294 1883 MS66 PCGS. Briggs 2-A.** Olive-green and caramel-gold blend throughout the obverse. The equally pleasing reverse displays medium golden-brown and powder-blue patina. The strike is sharp and both sides are splendidly preserved. Struck from a different reverse die than Briggs 1-A, the marriage used to coin proofs. Population: 20 in 66 (1 in 66+), 3 finer (10/15). NGC ID# 23VF, PCGS# 5515

**1888-S Quarter, MS65
Deep Natural Patina**

- 4295 1888-S MS65 NGC. Briggs 6-F.** Dusky forest-green and mahogany-brown toning encompasses this satiny and refreshingly unabraded Gem. The strike is full and the eye appeal is immense. The 1888-S is frequently encountered in circulated grades, but Gems are very scarce. Census: 13 in 65, 7 finer (10/15). NGC ID# 23VN, PCGS# 5521

PROOF SEATED QUARTERS

- 4296 1859 PR64 PCGS. Briggs "1-B."** Rich forest-green and golden-brown toning blankets this fully struck near-Gem. A loupe reveals incidental contact marks. Briggs described 1-A and 2-B proof varieties. The former has a Type One Reverse, and the latter has a Type Two Reverse. The present example pairs obverse 1 with reverse B, a Briggs-unlisted proof marriage. NGC ID# 23WL, PCGS# 5555

**1868 Quarter, PR65 Cameo
Intricate Strike, Reflective Fields**

- 4297 1868 PR65 Cameo PCGS. Briggs 2-B.** Rose-red and cobalt-blue embrace the margins, but the fields and motifs remain mostly brilliant. The sharply struck devices are evenly frosty, and the flashy fields appear unblemished. Only 600 proofs were struck. Population: 5 in 65 (1 in 65+) Cameo, 2 finer (10/15). NGC ID# 23WZ, PCGS# 85567

**1873 Arrows Quarter, PR64
First of Two Years for the Type**

- 4298 1873 Arrows PR64 PCGS.** The two-year-only Arrows, With Motto quarter design is popular with type collectors as well as series enthusiasts. This first-year Choice Proof has rich blue-gray and gold patina, richer on the obverse. Marvelously detailed and a coin with great charm for the grade. Population: 31 in 64, 16 finer (10/15). NGC ID# 23XR, PCGS# 5574

- 4299 1883 PR64 PCGS. CAC. Briggs 1-A.** An intricately struck, brilliant, and flashy Choice proof. Icy motifs provide obvious contrast with glassy fields, although undesignated as Cameo due to the circa-2000 generation of the PCGS holder. NGC ID# 23XE, PCGS# 5584

- 4300 1887 PR66 Cameo NGC. Briggs 2-B.** The frosty design elements of this spectacular Premium Gem contrast dramatically with the deeply mirrored fields. The surfaces are well-preserved and lightly toned. The strike is sharp except on Liberty's hair and the uppermost stars. Census: 7 in 66 Cameo (1 in 66+ Cameo), 5 finer (10/15). NGC ID# 23XK, PCGS# 85588

- 4301 1890 PR65 PCGS.** Dramatic ocean-blue, plum-red, and sun-gold shades endow this well struck and flashy Gem. No post-strike detractors are apparent. A scant 590 proofs were issued. Population: 22 in 65, 38 finer (10/15). NGC ID# 23XN, PCGS# 5591

BARBER QUARTERS

- 4302 1892 MS66 PCGS.** Type Two Reverse, with the wingtip across most of the E in UNITED. This precisely struck Premium Gem is toned in rich tobacco-brown, cream-gray, and aquamarine shades. The surfaces are virtually immaculate.
Ex: Orlando FUN (Heritage, 1/2007), lot 4001, which realized \$1,725. NGC ID# 23XT, PCGS# 5601

- 4303 1893-O MS65 PCGS.** Dappled forest-green, stone-gray, and magenta toning embraces this lustrous New Orleans Gem. The reverse is pristine and the obverse is only inoffensively marked. The strike is sharp except near the fletchings. Population: 17 in 65, 14 finer (10/15). NGC ID# 23XX, PCGS# 5605

- 4304 1896-S VG8 NGC.** The 1896-S is the first of three chief key dates in the Barber quarter series. While rare Mint State survivors are highly sought-after, the fact remains that most collectors acquire this date in low circulated grades — particularly those with budget restrictions. This VG example displays steel-gray interiors with deeper gunmetal hues in the peripheral fields. LIBERTY is completely readable, although BER is weak. NGC ID# 23Y9, PCGS# 5615

1901-S Quarter, Well-Detailed Good 4

- 4305 1901-S Good 4 NGC.** A decidedly attractive piece for the grade, this 1901-S Barber quarter displays original olive-gray patina and complete rims; the L and Y in Liberty are also clear. A couple of old, thin pinscratches appear on the lower-left obverse, hardly noticed by the unaided eye but likely keeping this piece from a Good 6 designation. NGC ID# 23YR, PCGS# 5630

- 4306 1903-S MS65 PCGS.** A seldom seen Gem Mint State example of this heavily circulated San Francisco issue. The eagle's right (facing) talons and a few right-hand obverse stars are a trifle soft, but the strike is otherwise sharp. Satiny luster yields shades of lavender-gold, gray, and steel-blue toning. Population: 16 in 65, 12 finer (10/15). NGC ID# 23YX, PCGS# 5636

- 4307 1908-D MS65 PCGS.** Shades of russet, magenta, and sea-green toning blanket the well-preserved surfaces of this impressive Gem, with satiny mint luster and well-detailed design elements underneath. Population: 21 in 65 (1 in 65+), 17 finer (10/15). NGC ID# 23ZD, PCGS# 5650

1908-O Barber Quarter, MS66
Only One Numerically Finer at PCGS

4308 1908-O MS66 PCGS. This attractive Premium Gem exhibits a sharper-than-average strike for a branch mint issue, with just a touch of the usual softness on the central reverse. The well-preserved surfaces radiate frosty mint luster under shades of greenish-gold, gray, and lavender toning. Population: 13 in 66 (2 in 66+), 1 finer (10/15). NGC ID# 23ZE, PCGS# 5651

4309 1909 MS65 PCGS. CAC. A sharply struck and coruscating olive-gray Gem. Both sides are remarkably free from contact. One tiny spot is noted above the eagle's left (facing) leg. Population: 65 in 65 (2 in 65+), 22 finer (10/15). NGC ID# 23ZG, PCGS# 5653

4310 1911-D MS64 PCGS. A slightly better date with a mintage that falls just shy of 1 million pieces. This Choice example is brilliant with satiny luster and notably bold detail on the eagle's talons and plumage. The obverse stars are comparably sharp and there are no singularly bothersome abrasions. Population: 23 in 64, 9 finer (10/15). NGC ID# 23ZP, PCGS# 5660

4311 1913-S Good 6 PCGS. This well-circulated 1913-S Barber quarter is significantly better-detailed than a typical Good coin, showing outlines of about half of the leaves on the obverse and with the L and Y in LIBERTY plainly visible. Original ten-gray surfaces show deeper gunmetal hues in the fields and are free of problems. Housed in a green label holder. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

1892 Quarter, PR65 Ultra Cameo
Captivating White-on-Black Contrast

4312 1892 PR65 Ultra Cameo NGC. Type Two Reverse. Eye-catching white-on-black contrast defines this Gem Ultra Cameo proof quarter. Light toning colors the edges in shades of peach-gold and magenta, but the fields maintain tremendous reflectivity. A predictably fully struck first-year specimen with unbeatable eye appeal. From a mintage of 1,245 proofs. Census: 1 in 65 Ultra Cameo, 15 finer (10/15). NGC ID# 2427, PCGS# 95678

4313 1896 PR66 PCGS. From a mintage of just 762 pieces, this impressive Premium Gem proof quarter displays sharply detailed design elements and deeply reflective fields under vivid shades of cerulean-blue and greenish-gold toning. Population: 23 in 66 (1 in 66+), 21 finer (10/15). NGC ID# 23Y7, PCGS# 5682

4314 1902 PR66 PCGS. CAC. The reverse is brilliant save for a peripheral arc of autumn-brown toning, but the obverse is richly patinated lavender-red and apple-green. The strike is exacting and the preservation is outstanding. NGC ID# 242H, PCGS# 5688

4315 1909 PR66 PCGS. A vivid mix of greenish-gold, lavender, and blue toning visits the impeccably preserved surfaces of this delightful Premium Gem, with sharply detailed design elements and mirrored fields under the patina. Population: 36 in 66 (1 in 66+), 29 finer (10/15). NGC ID# 242R, PCGS# 5695

4316 1909 PR65 Cameo NGC. Icy motifs and mirrored fields ensure that this brilliant Gem exhibits exemplary cameo contrast. The strike shows minor incompleteness in the usual places, but detractions are absent and the eye appeal is exceptional. NGC ID# 592H, PCGS# 85695

4317 1912 PR66 PCGS. A well struck specimen that boasts reflective fields and a frosty portrait. The reverse displays faint almond-gold toning. Devoid of carbon. One of only 700 proofs issued. NGC ID# 242U, PCGS# 5698

4318 1912 PR65+ Cameo NGC. A fully truck proof Cameo with deeply mirrored fields and frosty devices. This Plus-graded Gem 1912 Barber quarter boasts vivid splashes of violet, amber, and gold toning on the obverse with lighter champagne hues over the reverse. Census: 14 in 65 Cameo (1 in 65+ Cameo), 20 finer (11/15). NGC ID# 242U, PCGS# 85698

4319 1915 PR65 Cameo PCGS. A meager total of 450 specimens represents the final proof mintage in the Barber quarter series. The 1915 is also the most challenging proof issue in high grade. This lightly toned Gem has moderately frosted devices over glassy mirrors, producing bold cameo contrast on each side. Population: 4 in 65 Cameo, 3 finer (11/15). NGC ID# 242X, PCGS# 85701

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter
VG Details

4320 1916 — Improperly Cleaned — NGC Details. VG. Hints of tan-gold toning appear over each side of this well-circulated 1916 Standing Liberty quarter. Numerous hairlines denote aggressive cleaning in the past, but the resulting smoothness of the surfaces has its own appeal. The date is worn at the top but clear on the lower half. The rims are bold, and the interior motifs are uniformly worn.

4321 1917 Type One MS66 Full Head PCGS. The typical champagne-gold luster of this popular Type One quarter appears in the centers of this Premium Gem example, while seldom-seen album toning surrounds the peripheries in deep amber, russet, and olive hues. The strike is well-executed throughout, and satiny luster is uninterrupted by abrasions. NGC ID# 242Z, PCGS# 5707

4322 1917 Type One MS66+ Full Head PCGS. CAC. Even for the 1917 Type One, this high-end Premium Gem Standing Liberty quarter is boldly struck. Broad rims surround razor-sharp interiors, which include a raised outer rim of the shield and bold stars along either side of the figure. A hint of champagne toning accents beautifully preserved, mattelike luster. NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
Inviting Sun-Gold Hues**

- 4323 1917 Type One MS67 Full Head NGC.** This is a refreshingly attractive Type One Standing Liberty quarter, boasting radiant mint luster and warm golden toning with scattered blue, violet, and amber accents. The design elements showcase the outstanding detail for which this issue is known, and the frosty surfaces are free of distractions. Census: 66 in 67 (3 in 67+, 1 in 67 ★, 1 in 67+★) Full Head, none finer (10/15). NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
Pleasing Luster and Toning**

- 4324 1917 Type One MS67 Full Head PCGS.** Luminous surfaces display light golden-gray toning with peripheral amber and russet accents. The strike is boldly executed, and each side yields outstanding preservation. This Full Head Superb Gem is among the finest 1917 Type One quarters certified and is a prime type set candidate. Population: 83 in 67 (4 in 67+) Full Head, 0 finer (10/15). NGC ID# 242Z, PCGS# 5707

- 4325 1917-D Type One MS65 Full Head NGC.** Frosty silver surfaces feature faint golden-gray toning around the borders and near the protected areas of the design. Well-struck on Liberty's head, though several shield rivets, the eagle's breast, and the leading edge of the left (facing) wing are a bit soft. NGC ID# 2432, PCGS# 5709

- 4326 1917-D Type One MS66 Full Head PCGS.** Compared to its Philadelphia counterpart, the 1917-D Type One Standing Liberty quarter is mildly elusive in Premium Gem and finer Full Head. This boldly rendered and satiny example offers clean surfaces and rich toning. Deep sea-green and lavender-russet hues around the peripheries frame warm golden interiors. PCGS lists 23 Superb Gem Full Heads finer (10/15). NGC ID# 2432, PCGS# 5709

- 4327 1917 Type Two MS66 Full Head PCGS. CAC.** This high-end Full Head example is sharply struck from mildly rusted dies, showing a fine mattelike texture over the lustrous surfaces. Soft champagne-gray hues encompass much of each side, allowing the emergence of a few violet and pine-green daubs along the left-hand borders. Population: 80 in 66 (4 in 66+) Full Head, 13 finer (9/15). NGC ID# 2434, PCGS# 5715

- 4328 1918-D MS65 PCGS.** A particularly pleasing, well-struck example for a non-Full Head Gem, this 1918-D Standing Liberty quarter showcases frosty, champagne-toned luster without bothersome abrasions. Liberty's head is 80% sharp, and most of the shield rivets are discernible. Population: 57 in 65, 22 finer (10/15). NGC ID# 2438, PCGS# 5722

**1918-S Quarter, MS66
Elusive This Fine**

- 4329 1918-S MS66 PCGS. CAC.** A high-mintage (more than 11 million pieces) but conditionally scarce issue. This Premium Gem 1918-S quarter boasts unabraded, mattelike luster and a touch of champagne and ice-blue toning. Liberty's temple is weak, but the interior design elements are impressively well-struck by contrast. Population: 17 in 66, 3 finer (10/15). NGC ID# 2439, PCGS# 5724

**1919 Quarter, MS66 Full Head
Sharp and Beautifully Preserved**

- 4330 1919 MS66 Full Head PCGS.** Remarkably clean, frosty surfaces are high-end even for the MS66 grade. This Full Head 1919 Standing Liberty quarter also boasts sharp date numerals and stars along with well-defined shield rivets. The majority of each side is cast in dusky lavender-gray toning, although tinges of sun-gold emerge from the peripheries. Finer Full Head examples of this early Type Two issue are infrequently seen. NGC ID# 243B, PCGS# 5729

1919-S Quarter, Well-Struck MS64

- 4331 1919-S MS64 PCGS.** Liberty's head and the shield rivets display much sharper detail than typical for the 1919-S, even if not complete. The satiny surfaces are free of distracting abrasions and display warm golden toning. Both sides are heavily clashed with the expected die striae from the Mint's efforts to efface the worst of the damage. Population: 51 in 64, 50 finer (9/15). NGC ID# 243D, PCGS# 5732

- 4332 1921 MS64 PCGS.** Original, frosty luster illuminates minimally disturbed surfaces on each side of this Choice 1921 quarter. Liberty's head is nearly complete, and the shield and stars are similarly well-defined. The first 1 in the date is flat, but all four numerals are clear. Champagne-gray and ice-blue hues accent each side. NGC ID# 243H, PCGS# 5740

- 4333 1921 MS64 PCGS.** A high-end example of the 1921 Standing Liberty quarter is usually near the top of the list for the collector pursuing this difficult series. This piece was struck from a late state of the dies, showing mild flow lines in the fields and a crack along the top of the date. The resulting vibrant luster is cast in a light golden hue. A single, linear mark on the eagle's left (facing) wing is the only abrasion of note. Liberty's head and the shield rivets show mild weakness, while the date is clear.
Ex: ANA Signature (Heritage, 8/2007), lot 750. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS65
Bold Date Numerals**

- 4334 1921 MS65 PCGS.** A pleasing example for the MS65 grade, this 1921 Standing Liberty quarter displays frosty, golden-toned luster and unabraded surfaces. The shield is sharp, and the date numerals are uncommonly bold. Liberty's head is a trifle weak at the temple, precluding a Full Head designation. PCGS lists 28 non-Full Head coins finer (10/15). NGC ID# 243H, PCGS# 5740

1921 Quarter, Sharp MS64 Full Head

- 4335 1921 MS64 Full Head PCGS.** The sharpness of Liberty's head and the shield on this Choice 1921 Standing Liberty quarter is outstanding and is mirrored by the definition of the eagle's feathers on the reverse. This piece displays satiny luster with light champagne toning. No bothersome abrasions are observed, although clash marks appear in the recesses around Liberty's legs. NGC ID# 243H, PCGS# 5741
- 4336 1923 MS67 NGC.** Gorgeous frost-white luster is the hallmark of this Superb Gem 1923 quarter, although impeccable preservation and bold strike further contribute to the eye appeal. Liberty's head detail is nearly complete. Census: 53 in 67 (2 in 67+, 1 in 67 ★), 0 finer (10/15).
Ex: Long Beach Signature (Heritage, 9/2004), lot 6448. NGC ID# 243J, PCGS# 5742
- 4337 1923-S AU58 PCGS.** The well-detailed design elements of this attractive near-Mint specimen show just a trace of high-point wear and the lightly abraded surfaces retain much of their original mint luster. The 1923-S is a low-mintage key. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS64
Impressively Sharp Throughout**

- 4338 1923-S MS64 PCGS.** Remarkably close to Full Head detail, this 1923-S Standing Liberty quarter displays just a touch of softness on Liberty's ear. The shield rivets, drapery folds, and date numerals are sharply rendered — incredibly so for the issue. This piece displays satiny, champagne-tinged luster and is free of any bothersome abrasions. NGC ID# 243K, PCGS# 5744
- 4339 1923-S AU58 Full Head PCGS.** The 1923-S has long been a sought-after key date, and this near-Mint Full Head example resides in what is arguably the most popular grade among budget-restricted collectors. Remarkably bold definition characterizes virtually every element of the design, with particular notice given to the date, stars, and eagle's feathers. Slight friction over the motifs prevents a Mint State grade, although remnants of luster remain amid the nickel-gray patina. NGC ID# 243K, PCGS# 5745

**1924-D Quarter, MS65 Full Head
Sharp, Brilliant Example**

- 4340 1924-D MS65 Full Head PCGS.** The 1924-D is often seen with a dishied-out head reminiscent of the '26-D, making this brilliant Full Head Gem a sought-after rarity. Die cracking appears around the obverse periphery and mild erosion is seen in the fields on both sides. More than most, the branch mint issues of 1924 are seen with varying degrees of die wear, although this does not always equate to a weak strike, as this piece proves. The date, stars, and eagle's feathers on this coin all show above-average definition. NGC ID# 243M, PCGS# 5749
- 4341 1924-S MS64 NGC.** The central obverse is largely brilliant, framed by light golden hues, while the reverse displays speckled olive-tan patina over powdery-blue surfaces. Liberty's head is well-defined, though not full, as are the shield rivets and feathers. Seemingly clean for the Choice assessment. NGC ID# 243N, PCGS# 5750
- 4342 1924-S MS63 Full Head PCGS.** A remarkably well-struck, satiny example of this better Type Two issue, showing light, scattered marks and a hint of champagne toning. The fields exhibit numerous parallel die striae from an attempt to efface clash marks, the remnants of which are still visible on the upper reverse and in the recesses of Liberty's gown.
Ex: The Dr. Robert Wharton Collection / Portland Signature (Heritage, 3/2004), lot 5711. NGC ID# 243N, PCGS# 5751

4343 1926-S MS65 ★ NGC. The 1926-S is somewhat underappreciated in Gem and finer grades, even without Full Head detail. This Star-designated piece is impressively well preserved for the grade, displaying frosty champagne-tinged luster. Expected weakness appears on Liberty's ear, the shield, and the eagle's feathers, but the other areas are sharply struck. Census: 27 in 65 (1 in 65 ★), 12 finer (10/15). NGC ID# 4462, PCGS# 5758

4344 1927-D MS65 Full Head PCGS. A satiny Gem example of this better Denver issue with a touch of champagne toning overall. Liberty's head displays sufficient detail for the Full Head designation, although the usual strike softness persists on the shield rivets, bottom two stars, and Liberty's toes. There are no significant abrasions and eye appeal is pleasing. Population: 89 in 65 (5 in 65+) Full Head, 15 finer (9/15). NGC ID# 243V, PCGS# 5763

4345 1927-S AU50 PCGS. A seldom seen AU example of this key recessed-date issue, showing slight wear over the design elements and light golden toning over partially lustrous surfaces. Particularly notable is a lack of obvious clash marks — something which is rarely seen on any 1927-S quarter. A few faint die striations are visible in the obverse recesses. NGC ID# 243W, PCGS# 5764

1928 Quarter, MS66 Full Head Uniquely Appealing Coloration

4346 1928 MS66 Full Head PCGS. Soft lavender and pink-rose hues blend over the satiny surfaces of this Premium Gem 1928 Standing Liberty quarter. Liberty's head is fully defined, and the shield rivets display better-than-average sharpness. The 1928 is somewhat scarcer in high-grade Full Head than might be assumed, given its moderate availability in lower grades. Population: 55 in 66 (5 in 66+) Full Head, 8 finer (10/15). NGC ID# 243X, PCGS# 5767

4347 1928-S MS66 Full Head PCGS. CAC. Boldly struck design elements go beyond Liberty's Full Head to include strong definition on the chain mail and vertical lines in the inner shield. Occasional glimmers of canary-yellow patina show against otherwise bright silver-white surfaces. Smooth and remarkable.
Ex: Long Beach Signature (Heritage, 9/2009), lot 681. NGC ID# 243Z, PCGS# 5771

4348 1929 MS66 Full Head PCGS. CAC. Although the 1929 in Full Head is marginally available at the Premium Gem level, finer pieces are far out of reach for most collectors. This particularly pleasing MS66 Full Head showcases a well-rendered figure of Liberty and eagle, along with frosty luster and champagne toning. PCGS lists nine Superb Gem Full Heads finer (11/15). NGC ID# 2442, PCGS# 5773

4349 1929-S MS67 NGC. CAC. The 1929-S is inherently elusive in Superb Gem condition, with or without a Full Head. This piece is beautifully preserved and vibrantly lustrous with mottled sun-gold, olive, and blue-gray toning. Liberty's head and the central portion of the figure are not fully detailed, although the design is hardly impeded. Census: 25 in 67 (1 in 67+), 0 finer (10/15). NGC ID# 2444, PCGS# 5776

4350 1930 MS66 Full Head PCGS. The favorite post-1924 issue among type collectors, the 1930 Standing Liberty quarter is available in MS66 Full Head and typically comes in this grade with excellent eye appeal. The present coin is no exception, displaying bold design elements and unabraded, satiny luster. Olive-gold toning appears over each side. NGC ID# 2445, PCGS# 5779

1930-S Quarter, MS67 Full Head Registry Set Quality

4351 1930-S MS67 Full Head PCGS. As is characteristic of the issue, this exemplary Superb Gem 1930-S quarter showcases intense, frosty luster with a suggestion of light golden toning overall. A sharp Full Head complements better-than-average interior definition, and the preservation is truly superb. This dazzling final-year Standing Liberty quarter is among the finest seen at PCGS. Population: 25 in 67 (1 in 67+) Full Head, 0 finer (10/15). NGC ID# 2446, PCGS# 5781

EARLY HALF DOLLARS

4352 1795 2 Leaves, O-104, T-24, R.4, Fine 12 PCGS. The surfaces are lightly porous across this silver-gray Flowing Hair half. Deeper golden-gray toning encircles the borders. Smooth wear on the central devices is grade-consistent, while the rims and dentils are surprisingly sharp for the grade. Numerous tiny marks are distributed across both sides. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

4353 1795 2 Leaves, O-105, T-25, High R.3 — Counterstamped "S.C. Kingman" — NGC Details. Fine. Designated by NGC as O-105a, but the radial die crack to the B in LIBERTY is absent. A silver-gray and almond-gold example with minor adjustment marks near the date. Abrasions are trivial except on the R in LIBERTY. The S.C. Kingman counterstamp is entered vertically on the portrait. Rulau assigns this counterstamp to the Hard Times era (HT-G458 through HT-K458), but Kingman only placed his mark on numismatic coins, such as a Pine Tree shilling, hardly in circulation during the 19th century. Brunk designates the stamp as K-221 and suggests the culprit might be a Dover, New Hampshire jeweler, but our research has confirmed the issuer is Samuel Clayton Kingman, the Bridgeport, CT inventor, machinist, and gunmaker based on a matching punch used on a bullet mold of Kingman's manufacture. Other lots with the Kingman counterstamp in this sale include an 1855 pattern proof cent (lot 4786) and a 1795 Draped Bust dollar (lot 4456).

4354 1795 2 Leaves, O-107a, T-31, R.5 — Graffiti — PCGS Genuine. VF Details. The cursive initials JB are lightly pinscratched on the right obverse field. Each letter is approximately 3mm x 4mm in size. Otherwise, this nicely defined olive-gray and wheat-gold representative is a worthy entry into a specialized holding of Flowing Hair half dollars. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

**1795/1795 Half Dollar, Fine 12
Two Leaves Reverse, O-112**

4355 1795/1795 2 Leaves, O-112, T-20, R.4, Fine 12 PCGS. The date was initially entered too low, overlapping portions of the dentils. The second date impression was much better centered. The obverse die was paired with two reverses to create two different *Guide Book* varieties, the Three Leaves O-111 and the Two Leaves O-112. This is an example of the latter marriage, which features glossy and moderately marked olive-green and gunmetal-gray surfaces. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

4356 1795 2 Leaves, O-119, T-1, R.4, VG10 NGC. Deep gunmetal-gray toning drapes relatively unscathed surfaces of this well-worn O-119 Flowing Hair type coin. All legends, stars, berries, and leaves are present despite extensive circulation. A small planchet defect is noted near star 2, and what appears to be a small cud above Y of LIBERTY is more likely a rim bruise, since we are aware of no such rim break on this variety.

Ex: *Central States Signature* (Heritage, 4/2009), lot 621. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

4357 1795 2 Leaves, O-119, T-1, R.4, Fine 15 NGC. Nice eye appeal and technical quality for the assigned grade, with smooth, natural silver-gray surfaces and considerable detail remaining on the eagle's wings. The rims and dentils are strong for this Choice Fine early half. The diagnostic die defect above star 15 appears as a pair of lumps, and a leaf point touches the base of the I in UNITED, confirming the Overton-119 variety. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

4358 1795 2 Leaves, O-122, T-5, R.5, VG10 PCGS. CAC. Tompkins Die State 5/3. Silver-gray devices contrast with chestnut fields. A circulated but problem-free representative of the introductory Flowing Hair type. The late die state, sometimes called "O-122a", with die lines in Liberty's hair near her neck. The arc-shaped break below AMERICA is well advanced. NGC ID# 24E7, PCGS# 39238 Base PCGS# 6052

**1795 Small Head Half, VG10
O-128, Two Leaves**

4359 1795 2 Leaves, Small Head, O-128, T-18, High R.5, VG10 PCGS. A minimally abraded example of the conditionally rare O-128 Small Head variety. The finest known is graded VF Details scratched by NCS. The present piece displays some inner hair and plumage detail, and has microgranular almond-gold and stone-gray surfaces. For all Small Head varieties, Population: 13 in 10, 13 finer (10/15).

Ex: *Houston Signature* (Heritage, 12/2008), lot 583. NGC ID# 24E7, PCGS# 39251 Base PCGS# 6054

**1802 Half Dollar, VF25
O-101, Sole Variety for the Year**

4360 1802 O-101, T-1, R.3, VF25 PCGS. A low mintage of 29,820 pieces was struck in the second year of Draped Bust half dollar production, slightly less than the inaugural 1801 issue. Both dates are scarce in all grades. This attractive VF25 example of the 1802 shows pleasant album toning with golden-gray and blue margins merging into smooth, pale-gold centers. Sharp definition remains on the devices with no heavy marks. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

4361 1803 Large 3, Large Reverse Stars — Polished — PCGS **Genuine. AU Details.** The surfaces of this Heraldic Eagle half are overly bright and shiny from polishing, with both sides showing remnants of ebony-colored toning and deep build-up in various crevices of the devices. Sharp details remain despite the misguided attempt at surface improvement.

**1805/4 O-102 Half Dollar, XF40
Sharp and Original Example**

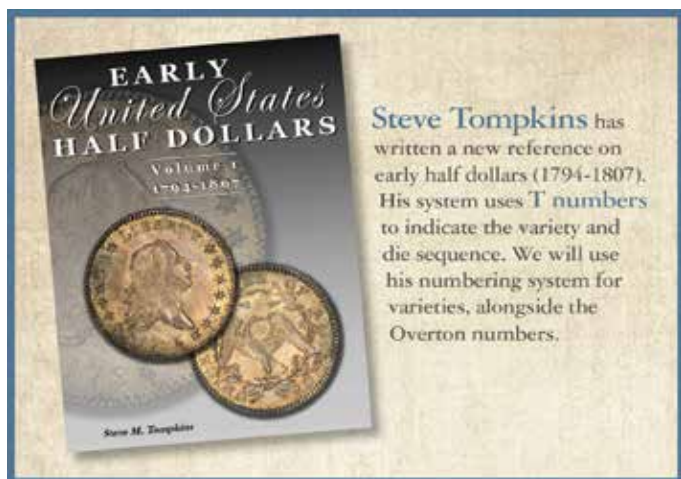

4362 1805/4 O-102, T-5, R.3, XF40 PCGS. CAC. Struck from an early state of the obverse die. Sharp for the assigned grade, although the variety always shows some weakness at the star centers and especially at the lower half of the reverse shield. The overdate is clear, with a curved-top 5 over the 4. Hints of golden luster remain beneath original silver-gray patina that is evenly distributed on both sides. Only minuscule marks are seen. Rightfully CAC endorsed. Population (all 1805/4 varieties): 21 in 40, 47 finer (10/15). NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

4363 1806 Pointed 6, Stem, O-121, T-29, R.4 — Cleaning — PCGS **Genuine. AU Details.** A partly lustrous stone-gray and rose-gold half dollar. Marks are essentially limited to a single line on the starry reverse field. Thorough evaluation reveals unimportant hairlines, and the shield and left reverse border display minute spots. NGC ID# 24EJ, PCGS# 39327 Base PCGS# 6071

4364 1807 Draped Bust, O-103, T-11, R.3, XF45 PCGS. Medium steel-gray toning enriches well defined and problem-free surfaces. Glimmers of luster emerge from design crevices. As nice as can be found for the Choice XF level. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

4365 1807 Draped Bust, O-105, T-4, R.1 — Cleaning — PCGS **Genuine. AU Details.** A richly detailed Draped Bust type coin bathed in jade-green, rose-gold, and pearl-gray toning. Inoffensively hairlined, although a few faded thin marks are noted on the left obverse field below the ribbon and the L in LIBERTY. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

1807 O-105 Draped Bust Half Dollar Uncirculated Details

- 4366** 1807 Draped Bust, O-105, T-4, R.1 — Improperly Cleaned — NGC Details. Unc. Deep gunmetal-blue toning is comprehensive across both sides. This satiny Draped Bust type coin has a remarkably intricate strike on the portrait and eagle. Only the final three obverse stars are incompletely brought up. The surfaces are multiply clashed but free from any remotely relevant abrasions. No hairlines are readily apparent. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

1807 O-112 Capped Bust Half, AU55 50/20, Large Stars

- 4367** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. The quickest pick-up point to distinguish the O-112 variety from its O-111 50/20 counterpart is the 1 of the date, which is missing its lower left serif on the O-111. Both serifs are present on the O-112, and the large stars are closer to the milling as well. This example displays a slight cloudy-gray presence, although the coin is primarily bright and untomed. Mint luster clings boldly to the margins. A few light marks are softened by the brief circulation, not to be confused with faint die clashing that visits both sides. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1809 O-107a Capped Bust Half, MS62 III Edge, Tied for Finest of the Variety

- 4368** 1809 III Edge, O-107a, R.4, MS62 NGC. III Edge. An intricate network of obverse die cracks branch out from a strong radial crack near star 12 to confirm the scarce O-107a variety. The reverse shows multiple areas of die clashing, including triple embossed segments above the arrowheads and throughout AMERICA. Golden-brown, sky-blue, and reddish-gold toning adorn the peripheries of this lustrous, smooth, and sharply struck Bust half. The present coin is listed at the top of the Autumn, 2015 Steve Herrman census for the O-107a variety.
Ex: FUN Signature (Heritage, 1/2005), lot 7163; FUN Signature (Heritage, 1/2008), lot 1460; ANA Signature (Heritage, 8/2008), lot 492. NGC ID# 24ES, PCGS# 39384 Base PCGS# 6094

- 4369** 1810 O-107, R.3, AU55 PCGS. Dusky peach-gold, cobalt-blue, and lavender toning enriches this lightly circulated better variety half dollar. Minor hairlines are apparent, but no abrasions are consequential. The O-107 is conditionally rare, and the present piece likely resides in the Condition Census for the variety. NGC ID# 357M, PCGS# 39414 Base PCGS# 6095

1814 O-105 Half Dollar, MS62

- 4370** 1814 O-105, R.2, MS62 PCGS. A coruscating silver-gray and straw-gold representative. Impressively free from abrasions, and both sides exhibit a wealth of detail. Only a few examples of O-105 have been certified finer. Struck from late-in-life, boldly clashed dies, but not the final die state "Single Leaf" subvariety. NGC ID# 24F3, PCGS# 39480 Base PCGS# 6105

1815/2 Capped Bust Half Dollar, XF Details O-101, Scarce and Popular Overdate

- 4371** 1815/2 O-101, R.2 — Cleaning — PCGS Genuine. XF Details. The War of 1812 was disruptive to Mint operations and even though hostilities officially ended at the end of 1814, silver was in short supply. Just 47,150 half dollars were struck in 1815 from an overdated 1812 die. This example is identified as cleaned by PCGS, with some light porosity and faint lines beneath alternating light- and deep-gray toning. XF detail remains.

4372 1821 O-106, R.1, MS62 NGC. This satin Mint State beauty is mostly bright silver with speckled golden-brown and iridescent toning on both sides. The design elements are sharp and the eye appeal is excellent. Census: 23 in 62 (1 in 62+), 65 finer (9/15).
Ex: Houston Signature (Heritage, 12/2010), lot 3638. NGC ID# 24FF, PCGS# 39584 Base PCGS# 6128

4373 1823 O-106a, R.2, AU58 PCGS. The O-106a variety is known for its “tampered” 3, with two small dimples or die chips interrupting the lower-outside curve of the 3. The 3 is noticeably taller than the other three digits of the date. This near-Mint example offers exceptionally nice surfaces for the grade, with nearly full frosty luster and pale-gold toning. Deeper orange-gold and sky-blue accents add to the impressive eye appeal. NGC ID# 47HP, PCGS# 39610 Base PCGS# 6131

4374 1825 O-113, R.1, MS63 NGC. Five of the stars lack their full central detail, but otherwise a sharp strike prevails across both sides. Golden luster pours across the satiny smooth surfaces, framed by cerulean-blue at the borders. A readily available Overton variety, but the exceptional quality of this Select Uncirculated piece puts it at the low end of the Condition Census for the O-113. NGC ID# 24FL, PCGS# 39660 Base PCGS# 6142

**1829 Half Dollar, MS64
 O-112, Small Letters**

4375 1829 Small Letters, O-112, R.1, MS64 PCGS. Stone-gray, cobalt-blue, tobacco-brown, and lavender toning embraces this satiny and well-preserved near-Gem. The strike is sharp except on star 6. O-112 is distinctive for its cluster of parallel and diagonal die lines below star 13. An impressive Capped Bust type coin. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

4376 1831 O-115, R.4, MS63 PCGS. Dusky wheat-gold and rose-red visits the obverse, while the reverse displays rich sea-green and steel-gray toning. A coruscating, unmarked, and nicely struck Select half dollar, certainly within the Condition Census for the variety. The scarcity of O-115 is likely due to the obverse die, which previously struck O-114. The obverse border displays die wear, with the stars drawn to the rim. NGC ID# 24FV, PCGS# 39852 Base PCGS# 6159

**1833 Half Dollar, O-102
 Attractive, Near-Gem Example**

4377 1833 O-102, R.1, MS64 PCGS. Struck from a late die state, with the normal pick-up of star 1 recutting only slightly visible with a lens. A stubby, triangular flag on the 5 of the denomination helps confirm the variety. Tangerine-gold and lilac shades combine for attractive toning that drapes both the obverse and reverse in delightful hues. A sharply struck, high-luster near-Gem, poised at the lower end of the Condition Census for the variety. NGC ID# 24FX, PCGS# 39888 Base PCGS# 6163

4378 1834 Small Date, Small Letters, O-117, R.2, MS62 PCGS. Repunching below the crossbar of the A in STATES provides the attribution marker for Overton-117. The smooth and coruscating surfaces are deeply patinated dove-gray, sea-green, and tan-brown. Likely within the Condition Census for the variety, which is seldom seen in Mint State. NGC ID# 24FY, PCGS# 39922 Base PCGS# 6166

**1835 Bust Half, MS64
 O-108, Lustrous Iridescence**

4379 1835 O-108, R.3, MS64 PCGS. Star 11 is boldly repunched and a arcing die crack runs above Liberty's cap. The richly toned surfaces display iridescent satin-smoothness with attractive lilac, rose-red, and blue accents mixing with the prevailing caramel-gold patina. The strike is rather soft on Liberty's curls at the temple and at the eagle's left (facing) wing and leg plumage. The O-108 variety is scarce in near-Gem condition, with this piece tied for second in the Steve Herrman census. NGC ID# 24FZ, PCGS# 39934 Base PCGS# 6168

**1836 O-101 Bust Half Dollar, MS64
 Semiprooflike Fields, Rainbow Toning**

4380 1836 Lettered Edge, O-101, R.1, MS64 NGC. CAC. A readily identified variety, with stars 6 and 7 recut, a triple dentil above the second S of STATES, and the left upright of N in UNITED recut into two vertical sections. This near-Gem example is sharply struck on both sides with semiprooflike fields and gleaming rainbow iridescence. Only a few tiny ticks disturb the nearly unmarked surfaces. CAC endorsed, the near-Gem designation ties for third in the Condition Census for the O-101 variety (10/15). NGC ID# 4EKF, PCGS# 39937 Base PCGS# 6169

**1836 Lettered Edge Half Dollar, MS64
O-113, Eye-Catching Patina**

- 4381** 1836 Lettered Edge, O-113, R.2, MS64 PCGS. Stars 1 through 4 show recutting, the clasp outline is doubled, and the upper tailfeather barely pierces the leaf stem. Eye-catching patina covers both sides in shades of violet and golden-gray. Ice-blue toning colors the reverse rim, and gleaming luster emanates from the underlying surfaces, enhancing the visual appeal. The stars and lower portion of the eagle are razor-sharp. Few marks for the grade. Population (all varieties): 53 in 64 (2 in 64+), 16 finer (11/15). NGC ID# 4EW7, PCGS# 39948 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

**1836 Reeded Edge Half, GR-1, Pleasing XF40
Important First-Year Type**

- 4382** 1836 Reeded Edge, GR-1, R.2, XF40 PCGS. CAC. The Mint abandoned its long run of striking lettered edge Bust halves in favor of steam-powered coining press capabilities in 1836. The reeded edge format was of smaller diameter and slightly different composition, but the amount of silver remained the same. A small mintage of the new format was struck — reportedly 1,200 pieces, although the quantity is thought to be larger by some numismatists. This pleasing example shows light wear and a scattering of small marks but no problems for the grade. Faint gold highlights enrich the natural, smooth-gray surfaces. CAC endorsed. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

- 4383** 1837 GR-6, R.6, MS62 PCGS. The 7 is repunched above the crossbar, characteristic of the rare GR-6. Peach-gold fills the borders but the fields and devices are close to brilliant. Lustrous and pleasing with a crisp strike on the major motifs. NGC ID# 24G4, PCGS# 531052 Base PCGS# 6176

**1837 Half Dollar, Lustrous MS63
GR-9, Middle Die State**

- 4384** 1837 GR-9, R.1, MS63 PCGS. Long, curving die cracks around the perimeter on both the obverse and reverse identify the GR-9 die pair, while recutting on the 3 and 7 of the date confirm the attribution. This frosty coin is a creamy, silver-gray example with cartwheel luster and few marks or abrasions for the Select Uncirculated level. The strike is sharp despite die clashing that visits both sides. NGC ID# 24G4, PCGS# 531055 Base PCGS# 6176

- 4385** 1838 GR-11, R.1, MS61 PCGS Secure. The 8 is lightly repunched, and the second horizontal shield line extends to the left shield border. A well struck and satiny half dollar that offers minimally marked pearl-white, sea-green, and golden-brown surfaces. A good candidate for an advanced silver type set. PCGS# 531092 Base PCGS# 6177

- 4386** 1839-O GR-1, R.1, VF35 PCGS. The popular GR-1 variety is easily identified by the arcing die crack through ERIC in AMERICA (same reverse die as the famous 1838-O). This Choice VF specimen shows moderate wear on the devices, but LIBERTY and the clasp remain bold. The mouse-gray surfaces are lightly abraded for the grade and even retain a few hints of mint luster. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

- 4387** 1839 No Drapery, WB-101, XF40 PCGS. A silver-gray example of this in-demand design subtype, with several faint lines and minor abrasions, but no heavy marks. A hair-thin scrape travels from the rock through BER of LIBERTY. Pleasing detail remains on the motifs, with minor dark build-up in the low portions of the devices. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 4388** 1839 No Drapery, WB-101, XF45 NGC. An ideal representative of the No Drapery motif and an important opportunity for collectors to acquire a scarce Choice XF example of the intended Gobrecht design. The coin is richly toned in vibrant cobalt-blue shades at the rims, ceding to vivid orange-gold central toning on both sides. High point wear is grade-consistent, yet the eye appeal of this briefly minted type exceeds its numeric grade. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 4389** 1839 No Drapery, WB-101, XF45 PCGS. Coveted by collectors and important for type, the first-year No Drapery Seated halves are scarce in circulated grades and very scarce when Uncirculated. This Choice XF example is an ideal collector-grade representative, with gun-barrel blue and olive-gold toning surrounding brief silver centers. A few light lines are hidden in the toning, but exceptionally sharp definition remains on the devices. Star 1 is close to the rock, confirming the No Drapery variety. The eye appeal is great for collectors of originally toned halves. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1840-(O) Seated Half, AU55
Medium Letters, Reverse of 1838
Popular 'Missing Mintmark' Issue

- 4390 1840-(O) Medium Letters, WB-101, Die Pair 4, R.3, AU55 PCGS.** One of two die pairs from the 1840 New Orleans mintage that utilize a leftover reverse die prepared for the 1839 Reeded Edge Bust halves (type of 1838) with the O mintmark missing — since the 1839-O Bust halves had the mintmark on the obverse. The lettering for the legend and the denomination are larger than on other 1840-O varieties, and the eagle's claws are open rather than closed. The silver-gray surfaces of this Choice AU coin show orange accents at the margins and an impressive network of reverse die cracks. Light abrasions dot the surfaces, but mint luster and sharp motifs remain. Population (Missing O varieties): 3 in 55, 15 finer (10/15). NGC ID# 24GP, PCGS# 572003 Base PCGS# 6233

- 4391 1842 Medium Date, Large Letters, WB-104, MS63 PCGS. CAC.** Variegated toning of lilac, rose, and auburn-gold visit both sides of this fully struck Seated half. An interesting network of fine die cracks winds its way around the peripheries, while silver luster complements the subtle toning on this Medium Date example. All varieties of the 1842 date are underrated in Mint State and very scarce in Select Uncirculated condition or finer. Population (all varieties): 10 in 63, 14 finer (10/15). NGC ID# 24GU, PCGS# 572013 Base PCGS# 6239

- 4392 1846 6 Over Horizontal 6, WB-104, FS-301, AU53 PCGS.** A must-have variety for Seated half specialist, and an equally necessary addition to any collection of Mint blunders. No attempt was made to efface or minimize the spectacular engraving error, made during a period when date anomalies, double or triple-punching, and all sorts of numismatically interesting varieties routinely reached public hands. This attractively toned AU53 example of the "lazy 6" displays a late state of the dies, with rim cuds beneath the 846 and above UNITED. The fields retain slight reflectivity beneath rich orange-gold and blue toning. Population: 6 in 53, 17 finer (10/15). NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254

1846-O WB-106 Half Dollar, AU55
Appealing O-Mint Tall Date

- 4393 1846-O Tall Date, WB-106, Die Pair 22, R.4, AU55 PCGS.** A rare, Choice AU example of this popular and challenging New Orleans subtype, sharply struck with much remaining silver luster. Isolated remnants of deep toning and old build-up appear sparingly on the obverse and more frequently on the reverse. A few scrapes and light lines to the left and right of the eagle's wings are noted. Few 1846-O Tall Date pieces exist any finer. Population (all Tall Date varieties): 3 in 55, 4 finer (10/15). PCGS# 572053 Base PCGS# 6256

1848-O Seated Half, MS63
WB-101 Early Die State, Nice Luster

- 4394 1848-O WB-101 MS63 PCGS. CAC.** A discovery coin of sorts, struck from an early state of the dies. Most of the devices are sharp, with exception of a few star centers on the obverse and slight weakness at the eagle's left (facing) talon. The obverse matches the Wiley-Bugert Die Pair 26, although in an earlier state than pictured in the reference, with full foot support and no die cracks. The reverse die is a match for Reverse "L," which in our opinion is an earlier die state of the reverse from Die Pair 26 (Reverse "O"). A lustrous and attractive Select Uncirculated coin, quite scarce in this condition. The fields and devices are satiny and smooth, with light lilac and peach-gold patina. Remarkably free of any significant marks. Population (all varieties): 7 in 63, 7 finer (10/15). PCGS# 572065 Base PCGS# 6261

- 4395 1849 WB-101 MS62 NGC.** Golden luster peaks through the even, lilac-gray toning, while only tiny marks are visible with a lens. Star 8 is a bit flat and the eagle's left (facing) talon shows minor incompleteness, but overall this is a sharply struck example. Like most Seated halves from the 1840s and 1850s, few Mint State coins survive in relation to the mintage, a fact that is clearly evident in the population reports. Census: 7 in 62, 33 finer (10/15). NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262

- 4396 1849 Repunched Date, WB-103, MS62 PCGS.** The 1 in the date is broadly recut north, and less-obvious recutting exists on the 849 as well. One other 1849 variety shows a dramatically doubled date (the rare WB-102), yet the current coin is scarce and desirable in its own right. Silver luster beams brightly across the sharply struck surfaces, with almond-gold accents over the pearlescent-gray fields and devices. Population (all 1849 varieties): 11 in 62, 37 finer (10/15). PCGS# 572070 Base PCGS# 6262

- 4397 1850 Repunched Date, WB-102, AU50 PCGS.** Crisp definition remains on the devices while autumn-gold toning with blue accents drape both sides of this scarce Philadelphia issue. Just 227,000 pieces were struck. The 0 in the date is widely repunched northwest. Only a few light marks are distributed across the smooth and attractive surfaces, which show remnants of mint luster despite 10 points of wear. Population: 14 in 50, 60 finer (10/15). PCGS# 572075 Base PCGS# 6264

- 4398 1851 Repunched Date, WB-103, AU55 PCGS.** With the price of silver fluctuating and out of balance with the price of gold, the abbreviated mintage of 200,750 half dollars in 1851 was sparse in the context of the Seated half series. Few pieces survive. This Choice About Uncirculated example shows recutting south on the 18 of the date and reflective, reddish-bronze surfaces. Mint luster remains despite brief circulation, and marks are limited to a few wayward field lines. Population (all varieties): 13 in 55, 40 finer (10/15). PCGS# 572080 Base PCGS# 6266

- 4399 1852 WB-101 AU53 PCGS.** The 1852 is a noted Seated half dollar scarcity both by low mintage and by the high value of silver at the time. Some pieces were hoarded, and others were likely melted prior to mintage of the lower-weight, 1853 Arrows and Rays halves. Traces of original prooflike surface remain around the stars, date, legend, and eagle on this lightly toned, silver-gray half. Nice detail and traces of mint luster appear on both sides, with only minor abrasions from the minimal circulation. Population: 5 in 53, 66 finer (10/15). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

4400 1856 WB-101 MS64 PCGS. A challenging date in the series, very scarce in near-Gem or finer condition. This sharply struck example shows full star centers, head, and hair details — important, because the issue often comes weak at the peripheries. Mint luster glows beneath the frosted, pale-gold obverse and mostly untoned reverse. Population: 17 in 64 (1 in 64+), 6 finer (10/15). PCGS# 572092 Base PCGS# 6287

**1857-O Half Dollar, MS64
Seldom Encountered So Fine**

4401 1857-O WB-101, Die Pair 7, R.3, MS64 NGC. Ex: Eric P. Newman Collection. This Normal Date half dollar had a mintage of 818,000 pieces, but examples are very scarce in Uncirculated grades, especially in MS64 or finer. Only one other piece has been certified MS64 by NGC, with just one MS65 coin finer (10/15). This example shows unusually sharp definition for an O-mint half of this period. Both obverse and reverse display dappled multicolored patina. Ex: *Eric P. Newman Collection, Part II (Heritage, 11/2013)*, lot 33729. PCGS# 572102 Base PCGS# 6291

4402 1857-S Medium S, WB-102, Die Pair 4, R.4, XF45 PCGS. Medium S mintmark. The small mintage of 158,000 pieces attracts Seated half specialists to this scarce San Francisco issue. Here is a blatantly original example, with warm-gray patina and some old charcoal-gray build-up in the recesses. Evidence of the sharp strike remains on all of the raised motifs. Housed in a green label holder. Population (all varieties): 15 in 45, 23 finer (10/15). NGC ID# 64YS, PCGS# 572106 Base PCGS# 6292

4403 1858-O Repunched Date, WB-110, Die Pair 33, R.3, MS63 PCGS. The softly lustrous, silver-white surfaces of this Select half dollar exhibit sharply struck design features. The coin is nearly mark-free save for a small scrape to the upper-right of star 1 and a light abrasion in the upper-left reverse field. Struck from a very late state of the dies, with the repunching of the date no longer visible and numerous die cracks exceeding those shown in the Bill Bugert reference. This is the sole PCGS Plus-graded example at this level. Population (all varieties): 1 in 63+, 25 finer (10/15). NGC ID# 97NT, PCGS# 572124 Base PCGS# 6294

**1859-S WB-102 Seated Half, MS63
Frosty, Sharp Strike**

4404 1859-S Medium S, WB-102, Die Pair 6, R.3, MS63 PCGS. Medium S mintmark. Frosty, cartwheel mint luster radiates from both sides of this sharply struck San Francisco issue. A faint champagne-gold patina complements the pleasing Mint-fresh silver surfaces. Light die clashing exists beneath Liberty's elbow plus a few light abrasions that define the Select Uncirculated grade. Even so, the eye appeal exceeds the numeric grade. Population (all varieties): 7 in 63, 19 finer (10/15). NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

4405 1864-S Large S, WB-101, Die Pair 1, R.2, AU58 NGC. Type One reverse. Large S mintmark. Golden-gray toning blankets both sides — more gold than gray — with plenty of mint luster still evident across the briefly circulated surfaces. Sharp definition remains on the motifs. S-Mint Seated half dollars remained a workhorse denomination on the West Coast throughout the Civil War, and few examples were saved from attrition due to long circulation. Census (all varieties): 14 in 58, 14 finer (10/15). PCGS# 572160 Base PCGS# 6312

4406 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4, VF35 PCGS. A Choice, medium-gray example of the No Motto type, one of just 60,000 pieces struck before the arrival of new dies for the With Motto varieties. A scarce variety, always in demand by both type and series collectors. Hints of reddish mint luster glow beneath the toning, a coin with nice originality and eye appeal at this grade level. Population: 13 in 35, 50 finer (10/15). PCGS# 572170 Base PCGS# 6315

4407 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4 — Cleaning — PCGS Genuine. AU Details. The finely granular surfaces are somewhat subdued from the cleaning, with slate-gray color surrounding the motifs and mattelike, silver-gray fields. Crisp detail remains on the devices. Two small areas of deep toning exist above the eagle's neck. Struck from a late state of the dies — just 60,000 pieces were minted prior to arrival of the With Motto reverse dies.

4408 1867 WB-101 MS63 PCGS. The Select surfaces of this richly patinated, frosty Mint State half dollar glow with soft silver luster. Subtle rose and blue highlights complement olive and tan toning that blankets both sides. Like many Seated halves from the 1860s, few Select or finer Uncirculated coins survive. Population: 12 in 63, 20 finer (10/15). PCGS# 572177 Base PCGS# 6321

**1870-CC WB-101 Half Dollar, Fine 12
Elusive Key Carson City Issue**

4409 1870-CC WB-101, Die Pair 2, R.5, Fine 12 PCGS. The first-year Carson City half dollar mintage of 54,617 pieces was promptly placed into circulation and few pieces remain from the rugged use in Old West commerce. Perhaps 200 pieces survive in all grades. This Fine example offers generally smooth, silver-gray surfaces with a few small scrapes and light lines but no heavy marks. Parts or all of the letters LITY of LIBERTY are visible, and the motto within the scroll is readable. Substantial wing definition remains for the assigned grade. Population: 11 in 12, 81 finer (10/15). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

4410 1870-S Very Small S, WB-101, Die Pair 1, R.4, AU58+ PCGS. Struck from a late state of the dies, with diagnostic weakness at the 18 of the date, as well as at the mintmark, olive leaves, lower scroll edge, and the eagle's tailfeathers. Curiously, all other motifs are sharply rendered. Borderline Mint State, with bright mint luster nearly complete beneath a powdering of pale-gold toning. A few light marks and minor field abrasions determine the assigned grade. Population: 4 in 58 (1 in 58+), 20 finer (10/15). NGC ID# 6467, PCGS# 572191 Base PCGS# 6329

- 4411 1871-S Very Small S, WB-102, Die Pair 5, R. 3, MS63 PCGS.** The position of the mintmark below and slightly to the left of the feathertip is the pick-up point for this die pair, the only variety for the issue at such a far-left position. Sharply struck, this Select Uncirculated example displays bright cartwheel luster across the frosty, silver-gray fields and devices, with a few faint almond-gold accents. Marks are minimal, with a few light lines the only disturbance to the smooth, attractive surfaces. Population: 8 in 63, 12 finer (10/15). NGC ID# C4X9, PCGS# 572199 Base PCGS# 6332

**1872-CC WB-101 Seated Half
Elusive in Choice XF**

- 4412 1872-CC WB-101, Die Pair 8, R.4, XF45 PCGS.** The Carson City Mint's half dollar production crept up in its third year of operation to 257,000 pieces, yet the issue is scarce in higher circulated grades and rare in Mint State. This Choice XF example shows only scattered light abrasions over deep-lilac surfaces. Traces of mint luster remain at the margins. The motifs retain nice definition from a sharp strike, helped by the early state of the dies for this pairing, which soon developed extensive peripheral cracks in a later state. Population (all varieties): 19 in 45, 30 finer (10/15). NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

- 4413 1873 No Arrows, Closed 3, WB-102, MS63 PCGS.** The majority of No Arrows Seated halves are of the Closed 3 type, outnumbering the mintage of Open 3 No Arrows halves by almost three to one. This Select Uncirculated example flashes slate-blue overtones along with natural golden-gray patina. Mint luster glows beneath the toning. As usual, the strike is sharp for this Philadelphia issue. A few light grazes in the right obverse field account for the assigned grade. Scarce in all Mint State grades. Population (all No Arrows, Closed 3 varieties): 13 in 63, 12 finer (10/15). PCGS# 572207 Base PCGS# 6336

- 4414 1873 Large Arrows, Misplaced Date, FS-301, WB-106, MS63 PCGS Secure.** The upper loop of a misplaced numeral is seen in the dentils beneath the right arrowhead. This *Cherrypickers'* variety is not distinguished in Wiley-Bugert but does fall into the Large Arrows WB-106 variety. The present Select example offers satiny luster and well-struck design elements. Luminous turquoise and light golden hues appear around the peripheries, while the interiors show dusky lavender-gray patina. PCGS# 413732 Base PCGS# 6343

**1874 Arrows Half Dollar, MS64
Sharply Struck Throughout**

- 4415 1874 Large Arrows, WB-102, MS64 PCGS.** Light rose and gray patina prevail on most of each side, although there is a small patch of dark toning near the upper reverse rim. Sharply struck surfaces show a stray tick or two, accounting for the grade. Much more elusive any finer where the two services report fewer than 40 coins. Population: 80 in 64 (1 in 64+), 22 finer (10/15). NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

- 4416 1875-S Very Small S, WB-101, Die Pair 7, R.3, MS64 PCGS.** A frosty and lightly toned near-Gem example from a substantial mintage of 3.2 million pieces. The coin is boldly struck at the centers but less so at the peripheries, where the obverse stars, the bottom of the date numerals, and parts of the reverse legend lack completeness. Still, lilac and pale-blue toning combine with strong cartwheel mint luster and a few golden highlights to provide great eye appeal. PCGS# 572229 Base PCGS# 6351

**1879 Half Dollar, Gem Mint State
Just 4,800 Pieces Struck for Circulation**

- 4417 1879 Closed Bud, WB-102, MS65 PCGS. CAC.** All circulation strikes display a Type Two reverse with a Closed Bud, as do virtually all proofs. This is a no-questions Gem business strike, with frosted areas competing with prooflikeness in the fields. The central motifs are fully frosted and stand out boldly against the surrounding pristine surfaces. Full-strike definition on Liberty's head, hair, and each of the star centers accompany an equally sharp eagle on the reverse. A mere 4,800 pieces were coined for circulation in 1879. Housed in an old green label holder with CAC endorsement. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

- 4418 1881 Closed Bud, WB-102, MS63 PCGS.** Closed Bud reverse. Sharply struck with an attractive, pale-ivory patina and scattered golden hues. The semi-reflective fields show moderate contrast with the mildly frosted devices. A carefully preserved Select Uncirculated example overall, with very few marks. Just 10,000 pieces were struck for circulation. Population: 26 in 63, 65 finer (10/15). Ex: Long Beach Signature (Heritage, 9/2005), lot 3257. NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

- 4419 1890 WB-101 MS62 PCGS.** The surfaces of this sharply struck half display deep and satiny olive-gray patina with traces of colorful iridescence, especially at the reverse margins. Just 12,000 circulation strikes were released by the Mint, many going to speculators who were well-aware of the scant half dollar mintages from 1879 through 1890. Population: 15 in 62, 85 finer (10/15). NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

PROOF SEATED HALF DOLLARS

- 4420 1859 PR63 Cameo PCGS.** Razor-sharp and boldly contrasted, the frosted motifs stand out against the colorfully toned, deeply mirrored fields of this Select cameo proof. The reverse is particularly vibrant with ruby-red, electric-blue, and rich-gold shades. Sea-green, blue, and amber-gold hues grace the obverse. Few 1859 proofs are finer from an unconfirmed mintage listed as 800 pieces in the 2016 *Guide Book*. Population: 10 in 63 Cameo, 14 finer (10/15). NGC ID# 27TJ, PCGS# 86413

1859 Seated Half, PR64 Cameo Dramatic Proof Set Toning

- 4421 1859 PR64 Cameo NGC.** Deep cerulean-blue borders merge with violet and reddish-gold shades to encircle frost-white silver centers on this Choice cameo proof. The Mint ramped up its marketing of proofs to the general public in 1859, when proofs were distributed mostly in sets with the other minor denominations. Most likely, not all of the reported mintage of 800 proofs were sold. This example is pinpoint sharp and boldly contrasted. A few light lines define the near-Gem grade. Census: 3 in 64 Cameo, 13 finer (10/15). NGC ID# 27TJ, PCGS# 86413

1860 Seated Half, Crisply Struck PR64

- 4422 1860 PR64 PCGS.** The Mint expected a larger demand for proofs from the public than it received in 1860, the first year of actively promoting proofs with a premium charged for the format. The 1,000-piece proof mintage saw fewer than 600 pieces sold, and the rest were melted. This sharp, near-Gem example displays thick, iridescent toning that mutes the mirrored finish around the frosted devices, but remains deeply glassy at the margins (most notably on the reverse). The coin is attractively toned and razor-sharp. Population: 40 in 64, 24 finer (10/15). NGC ID# 27TK, PCGS# 6414

1874 Arrows Half Dollar, PR63 Merely 700 Proofs Minted

- 4423 1874 Arrows PR63 PCGS Secure.** The Mint struck a total of 1,200 proof Arrows half dollars in 1873 and 1874 combined (500 and 700 specimens, respectively). Examples from the latter issue can be found through Choice condition. This collectible Select proof is richly toned in dusky violet and olive-gray tones that appear more vibrant when tilted under a lamp. The reverse is lighter than the obverse. The fields maintain partial reflectivity, but contrast is minimal. NGC ID# 27UV, PCGS# 6435

1874 Arrows Half Dollar, PR65 Undesignated Field-Device Contrast

- 4424 1874 Arrows PR65 NGC.** Although undesignated, this piece is clearly a Cameo proof with nice field-to-device contrast. The ivory-white surfaces show a hint of gray, accompanied by peripheral blue and iridescent toning on both sides. Minor strike weakness shows at the lower reverse. Census: 15 in 65, 9 finer (10/15). NGC ID# 27UV, PCGS# 6435

- 4425 1874 Arrows PR62 Cameo NGC.** A fully struck representative of the two-year Arrows type in brilliant and contrasted Cameo proof format. Widely scattered, delicate lines are visible primarily with a lens, while the glassy-mirrored surfaces are deeply reflective and entirely untuned. The dazzling fields contrast boldly with the frost-white motifs. Census: 4 in 62 Cameo, 20 finer (10/15). NGC ID# 27UV, PCGS# 86435

**1881 Seated Half, PR65 Cameo
Deep, Silvery Mirrors**

- 4426 1881 PR65 Cameo NGC.** Only 975 proofs were produced in 1881, and today an estimated 90 pieces survive in Gem or better Cameo condition. This example would have graded even higher if not for a planchet irregularity on Liberty's hand and pole as well as a few planchet problems elsewhere on Liberty. Possibly struck through something, two streaks start below the left leg and travel up into the field. The devices show excellent contrast on the deeply mirrored proof fields. Census: 19 in 65 Cameo (1 in 65 ★ Cameo), 20 finer (10/15). NGC ID# 27UG, PCGS# 86442

1883 Half Dollar, Pastel-Toned PR65

- 4427 1883 PR65 PCGS.** Beautiful pastel peach, mint, amber, and saffron hues invigorate each side of this splendid Gem proof which, despite its moderate color, seems to merit a Cameo designation as well, such is the frost seen over the devices on each side. A great-looking example of this late-series proof strike. Population: 36 in 65, 14 finer (10/15). NGC ID# 27UJ, PCGS# 6444
- 4428 1884 PR64 PCGS. WB-101.** Normal date. With so few coins produced in business-strike format (just 5,275 pieces), many collectors opt for a proof to fill the 1884 slot in their sets. This near-Gem proof is one of 875 struck, a golden-toned beauty with shades of cerulean-blue and violet shades at the margins. A deeply reflective and Choice original proof. PCGS lists just 38 non-Cameo proofs in numerically finer grades (10/15). NGC ID# 27UK, PCGS# 6445
- 4429 1884 PR64 PCGS. WB-101.** The low-mintage of 5,275 business-strike Seated Liberty half dollars was accompanied by a proof emission of 875 pieces in 1884. This pleasing Choice example offers well-detailed design elements and reflective fields under shades of greenish-gold and lavender-gray toning. Population: 64 in 64, 38 finer (10/15). NGC ID# 27UK, PCGS# 6445

**1887 Seated Half, PR66
Abundantly Toned**

- 4430 1887 PR66 PCGS.** The business-strike mintage of 5,000 pieces yields relatively few high-grade examples in comparison to the proof survivors in similar grades, making a sharp proof issue the logical selection for many collectors. This intensely toned proof is blanketed in olive-brown and dusky-blue shades that do not reveal their complex and vivid coloration until viewed at an advantageous perspective. Once turned to the correct angle and light, fire-orange, lavender, and yellow-gold colors vibrate across the deeply mirrored fields. A remarkable Premium Gem proof that needs to be seen to be fully appreciated. Population: 14 in 66, 2 finer (10/15). NGC ID# 27UN, PCGS# 6448

BARBER HALF DOLLARS

- 4431 1892-S MS62 PCGS.** Champagne-tinted, satiny luster illuminates well-struck design elements on each side of this first-year Barber half dollar, while light surface chatter is all that limits the grade. The 1892-S is a slightly better date in all grades. NGC ID# 24LJ, PCGS# 6464
- 4432 1893 MS63 PCGS.** All Barber halves with pre-1900 dates are appealing to collectors, and the 1893 date has an inherent attraction because of the scarcity of silver dollars from the year. The 1.8 million-piece half dollar mintage was normal, however, and the date is reasonably available as a result. This originally toned, Select Uncirculated coin displays a strong strike with alternating areas of brilliant silver and dusky olive-gray patina. PCGS reports just 66 numerically finer coins. NGC ID# 24LK, PCGS# 6465

1893 Half Dollar, Toned MS66

- 4433 1893 MS66 PCGS.** Splashes of electric-blue, lavender, and purple toning are slightly more evident on the reverse of this Premium Gem Barber half. All design elements exhibit strong definition except for the usual weakness in the upper-right shield corner. Very difficult to locate at this level of preservation. Population: 12 in 66 (1 in 66+), 1 finer (10/15). NGC ID# 24LK, PCGS# 6465

**1893 Barber Half, MS65
FS-801, Tripled Die Reverse**

4434 1893 Tripled Die Reverse, FS-801, MS65 PCGS. Tripling of the die is clearly visible at ATE of STATES and at ALF of HALF. Other letters and reverse elements are obviously doubled. Few doubled die varieties exist in the entire Barber half series (let alone of the tripled nature), and both PCGS and NGC now list this important variety as a separate entry. The coin is a lustrous and sharply struck example with cream-white surfaces and splendid, satiny luster. It is the sole Gem listed with the acknowledged Tripled Die Reverse at either service. For all 1893 varieties, just a dozen coins are numerically finer at PCGS. Population (Tripled Die Reverse): 1 in 65, 0 finer (9/15). PCGS# 510588 Base PCGS# 6465

4435 1893-O MS64 PCGS. CAC. A primarily brilliant example, with hints of soft-gray patina confirming the natural, lustrous surfaces. The obverse strike is sharp for this early New Orleans issue, although some blending on the eagle from the neck to the arrow fletchings is noted. Eye appeal is terrific for the near-Gem grade as confirmed by the CAC endorsement. PCGS reports just nine numerically finer coins. Population: 42 in 64 (1 in 64+), 9 finer (10/15). NGC ID# 24LL, PCGS# 6466

4436 1897-O XF45 PCGS. A nicely defined and lightly granular cream-gray representative. Rarer than implied by its mintage of 632,000 pieces, the 1897-O is usually encountered in grades below Fine. Choice XF examples are rare, and in demand from collectors seeking a matched set. NGC ID# 24LZ, PCGS# 6478

**1907-D Half Dollar, MS66
Rare This Well-Preserved**

4437 1907-D MS66 NGC. This is an appealing Premium Gem with golden-brown and iridescent toning over frosty luster on both sides. The strike shows some weakness in the centers, especially on the reverse. This early Denver Mint product has few peers at this grade level. Census: 5 in 66, 3 finer (10/15).
Ex: Dallas Signature (Heritage, 4/2007), lot 805. NGC ID# 24MZ, PCGS# 6509

4438 1909 MS65 PCGS. This delightful Gem exhibits well-detailed design elements, with just a trace of softness on the eagle's claw and arrow fletching. The well-preserved surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 66 in 65 (1 in 65+), 14 finer (10/15). NGC ID# 24N8, PCGS# 6516

4439 1911-D MS64 PCGS. The 1911-D Barber half dollar is a low-mintage issue and examples are seldom encountered in high grade. This impressive Choice specimen offers well-preserved, satiny surfaces under shades of lavender-gray and sea-green toning. Population: 42 in 64 (1 in 64+), 35 finer (10/15). NGC ID# 24NE, PCGS# 6522

4440 1912 MS64 PCGS. CAC. The 1912 Barber half dollar is a scarce issue in MS64 condition and finer examples are rare. This well-detailed Choice example offers vibrant mint luster and lightly marked surfaces with hints of greenish-gold and lavender-gray toning. PCGS has graded 27 numerically finer examples (10/15). NGC ID# 24NG, PCGS# 6524

**1914 Half Dollar, MS64
Smallest Mintage in the Set**

4441 1914 MS64 PCGS. The 1914 is a semikey in the Barber half series with a mintage of 124,230 coins — the lowest production total in the series. Each side is strongly defined with localized softness on stars 1, 3, and 11, and the right shield / wing juncture. A lovely Choice example that will appeal to those who appreciate a Mint-fresh look. Population: 46 in 64 (3 in 64+), 12 finer (10/15). NGC ID# 24NN, PCGS# 6530

4442 1915-S MS65 NGC. Deep brass-gold toning encompasses much of the obverse, while the reverse shows the same but in a significantly lighter hue. Trivial weakness on the eagle's right (facing) talons is the only mentionable striking deficiency, and Liberty's cheek is free of distracting abrasions. Census: 45 in 65, 10 finer (9/15). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

**1894 Barber Half Dollar, PR65
Spectacular Multicolor Toning**

4443 1894 PR65 PCGS. Intense shades of dappled greenish-gold and cobalt-blue toning blanket the well-preserved surfaces of this delightful Gem, from a mintage of 972 pieces. The design elements are sharply detailed, aside from a touch of softness on the shield point, and the fields are deeply reflective, under the toning. Population: 32 in 65, 37 finer (10/15). NGC ID# 24NW, PCGS# 6541

1895 Half Dollar, PR65 Cameo
Important Proof Year

- 4444 1895 PR65 Cameo NGC. CAC.** A delightful Gem Cameo proof, the 1895 is highly popular because of its famous Morgan dollar counterpart. This specimen exhibits light silver-gray surfaces with delicate gold toning near the borders, displaying prominent field-to-device contrast. Census: 12 in 65 Cameo, 44 finer (10/15). NGC ID# 24NX, PCGS# 86542

1896 Half Dollar, PR66 Cameo
Impressively Sharp

- 4445 1896 PR66 Cameo PCGS. CAC.** A stark white-on-black Cameo proof of a technical quality that is rarely seen. This 1896 proof half dollar boasts tack-sharp definition on the motifs and exemplary preservation of the mirrored fields. Traces of champagne color emerge from the peripheries, although the coin presents as brilliant upon first glance. Population: 13 in 66 (2 in 66+) Cameo, 4 finer (10/15). NGC ID# 24NY, PCGS# 86543

- 4446 1899 PR64 Cameo PCGS. CAC.** A needle-sharp strike and strong cameo contrast provide the initial bold impression, although the gorgeous toning and deep, glassy mirrors command attention, too. Fire-orange toning merges with ruby-red and electric-blue accents at the margins. The central devices appear stark-white and frosted. An uncommonly well-preserved near-Gem proof, CAC endorsed. Population: 18 in 64 (3 in 64+) Cameo, 30 finer (10/15). NGC ID# 24P3, PCGS# 86546

1900 Half Dollar, PR66
Crisply Defined Throughout

- 4447 1900 PR66 NGC.** Crisp detail is apparent on the design features of this Premium Gem, befitting a proof strike. Even the upper-right shield corner, talons, and arrow feathers are sharp, areas sometimes found weak even on proofs. The 1900 proof becomes challenging in Premium Gem with only about 30 examples reported by the two services. Census: 14 in 66, 31 finer (10/15). NGC ID# 24P4, PCGS# 6547

1906 Barber Half, Toned PR66

- 4448 1906 PR66 PCGS.** A bold strike complements deeply reflective fields on this Premium Gem Barber half dollar proof. Modest cameo contrast is subdued by rich aquamarine and olive-green toning that blankets each side, masking any trivial hairlines that limit the grade. Out of a 675-coin mintage, few proof 1906 halves survive in high grade. Population: 23 in 66, 12 finer (10/15). NGC ID# 24PA, PCGS# 6553

- 4449 1908 PR65 PCGS.** Faint contrast appears on both sides of this delicately gold toned Gem proof Barber half dollar. Although the contrast is insufficient for a Cameo designation, it is stronger than on most other survivors from the 545 proof mintage. The attractive mirrored fields reveal only a few delicate lines under magnification. Population: 30 in 65, 27 finer (10/15). NGC ID# 24PC, PCGS# 6555

- 4450 1910 PR64 Cameo PCGS.** The sharply detailed frosty design elements of this impressive Choice specimen contrast boldly with the deeply reflective fields and only a few minor signs of contact are evident. Population: 14 in 64 Cameo, 18 finer (10/15). NGC ID# 24PE, PCGS# 86557

- 4451 1910 PR64 Cameo PCGS. CAC.** Attractively contrasted design elements reside within a halo of subtle champagne toning around the outer rims on each side, and the fields display deep mirroring. The eagle's right (facing) wing junction shows the only mentionable softness, and a few minor marks on the obverse are all that limit the grade. Population: 14 in 64 Cameo, 18 finer (10/15). NGC ID# 24PE, PCGS# 86557

1913 Half Dollar, PR65
Modest Field-Motif Contrast

- 4452 1913 PR65 PCGS.** A boldly struck Gem proof 1913 Barber half dollar, showing deeply mirrored fields and light golden toning. The reverse shows pleasant cameo contrast, although the obverse is slightly less pronounced in that regard, preventing such a designation from PCGS. A small mintage of 627 pieces makes high-end examples of this late-series proof issue attractively scarce in high grade. Population: 23 in 65, 31 finer (10/15). NGC ID# 24PH, PCGS# 6560

EARLY DOLLARS

4453 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — **Cleaning** — PCGS Genuine. VG Details. Bowers Die State III. A smoothly worn — but cleaned — example, with areas of slight porosity and possible smoothing of the surfaces. Dusky-gray patina is lighter on the moderately worn devices. An interesting but inconclusive circular, ear-to-cheek mark defines a lighter area on the central obverse of the approximate size and shape of a silver plug, unconfirmed by PCGS.

4454 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — **Graffiti** — PCGS Genuine. VF Details. Bowers Die State II. The surfaces retain nice old-silver patina, but a few faint linear scratches on the portrait — possibly graffiti with an A and H visible — account for the net grading. There are three planchet flaws visible on the coin: one at the neck, another at the eagle's beak, and a third above the second S in STATES at the rim. Despite the mint-related flaws and central marks, considerable eye appeal remains. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

4455 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, PCGS Genuine. The PCGS number ending in 92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an VF specimen that has been cleaned. Faint hairlines across the eagle's body — and more noticeable hair-thin marks throughout much of the portrait — confirm the cleaning. The eagle's left (facing) wing displays nearly complete detail, and the right wing exhibits most of its initial feathers. Significant eye appeal remains despite the old cleaning. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, Centered, XF Details
B-15, BB-52, 'S.C. Kingman' Counterstamp

4456 1795 Draped Bust, Centered, B-15, BB-52, R.2 — **Counterstamped** — NGC Details. XF. A wonderful, original example of the Draped Bust Small Eagle dollar, centered bust, with iridescent and silver-gray patina. Some luster remains across the smooth and attractive surfaces. Struck from a very late state if the dies matching Bowers Die State VII. The present example is net-graded by NGC for the "S.C. Kingman" counterstamp, which appears vertically in the right obverse field opposite the profile of Liberty.

Several scarce and collectible host coins that carry the identical S.C. Kingman counterstamp. Two other examples are in this auction — lot 4786, an 1855 pattern Flying Eagle proof cent, and a 1795 Flowing Hair half dollar as lot 4353. Other known coins with the Kingman countermark include a 1652 Pine Tree shilling, a 1794 half cent, a worn 1790s-vintage large cent, and an 1837 Hard Times token. Rulau assigns an R.9 rating in the Hard Times section of his reference, while the Gregory G. Brunk reference assigns the K-221 number to the S.C. Kingman countermark.

4457 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, Good 6 NGC. Bowers Die State III. The minimally abraded gunmetal-gray fields contrast with cream-white high points. The U in UNITED is worn, but the remainder of the legends are clear. BB-82 secures its own *Guide Book* listing as the sole Small Eagle, 13 Stars die variety. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

4458 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, Fine 12 PCGS. Bowers Die State II. A cream-gray example with smooth surfaces. Evenly struck aside from the star above the eagle's head. All but one letter in E PLURIBUS UNUM is at least partly present. A smooth depression between the AM in AMERICA may merit personal inspection.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4316; Chicago Signature (Heritage, 8/2011), lot 4279. NGC ID# 24X6, PCGS# 40011 Base PCGS# 6876

4459 1798 Large Eagle, Pointed 9, Wide Date, B-23a, BB-105, R.3, Fine 15 PCGS. CAC. Bowers Die State III. Wide Date, 8 touching the bust. Luminous blue-gray color overall with deeper shadings at the lower obverse and all around the reverse margins give this moderately worn yet still-attractive early dollar nice eye appeal. The variety often shows weakness of strike at the centers — especially in a late die state — adding to the appearance of wear. Even so, this example is sharply defined for the grade.
Ex: FUN Signature (Heritage, 1/2010), lot 3547. NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877

4460 1798 Large Eagle, Pointed 9, Close Date, B-28, BB-118, R.3, VF30 PCGS. Bowers Die State I. Struck from an early state of the reverse die, with none of the advanced die cracks that develop from later strikes. The left upright of N in UNITED is struck over an erroneous I. Attractive golden-gray surfaces show hints of mint luster despite moderate wear. The centers show weakness at the drapery folds and the reverse field stars. An attractive early dollar of the Heraldic Eagle type. NGC ID# 24X6, PCGS# 40035 Base PCGS# 6873

4461 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, Fine 15 NGC. Bowers Die State II. Bluish-brown toning in the fields surrounds reddish-tan devices. The only 1798 variety with four berries on the reverse, and they are large and prominent even on this well-circulated dollar. A few light marks occupy the obverse fields, where the left-side stars are diagnostically weak. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

4462 1799 7x6 Stars, B-12, BB-160, R.3, Fine 12 PCGS. Bowers Die State II. Moderate wear defines the grade, although the coin is visually pleasing and sharply detailed on the obverse more so than the reverse. Warm-gray patina yields to silver-tan toning on the raised elements. Only small abrasions mark the surfaces. A "No Berries" variety, although in this earlier die state the stems for the bottom two berries are faintly visible. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

4463 1800 AMERICA, B-19, BB-192, R.2, Fine 15 NGC. Bowers Die State IV. The "more-available" AMERICA variety, but only when compared to B-11, the scarcer AMERICA variety. This example is scarce in its own right due to the late die state indicated by a die crack above UNITED. Deeply toned surfaces are free of significant marks for the grade, with only a few scattered abrasions.
Ex: Summer FUN Signature (Heritage, 7/2009), lot 763. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

1800 Silver Dollar, XF40
AMERICA!, B-19, BB-192

4464 1800 AMERICA!, B-19, BB-192, R.2, XF40 NGC. Bowers Die State III. A die scratch near the stem is the source of the AMERICA! nickname, enshrined in the *Guide Book* since its fourth edition. Two die marriages, B-11 and B-19, share the AMERICA! reverse die, and the latter is more prevalent. Deep cream-gray fields contrast with pearl-white high points. A moderately circulated representative whose only noticeable mark is a minor reverse rim ding at 4 o'clock. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

4465 1800 B-13, BB-193, R.4, VF20 ANACS. Bowers Die State III. Housed in an early generation holder, the Bolender-18 variety is indicated on the ANACS label, although B-18 is really just a late die state of B-13, BB-193 with die clashing and a die break on the reverse legend at OF AMERICA. Medium golden-gray surfaces show a pair of short scrapes in the right obverse field and numerous light abrasions, but the surfaces are pleasing with nice definition for the grade. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1800 Draped Bust Dollar, XF40
B-17, BB-196 Variety

4466 1800 12 Arrows, B-17, BB-196, R.1, XF40 ANACS. Bowers-Borckardt Die State IV. The "collar" clash marks at Liberty's throat and the die line left of 1 in the date identify the popular BB-196 variety. Only light wear shows on the well-detailed design elements, the hair is well-outlined and the drapery is distinct. The surfaces are blanketed in shades of flat gray toning, but only a few minor abrasions are evident. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

4467 1803 Large 3, B-6, BB-255, R.2, Fine 15 NGC. Bowers Die State III. All of the right-side obverse stars are connected by a faint die crack. Old album toning produced gunmetal-blue and sea-green shades at the borders surrounding pale orange-gold shades over the central devices. E PLURIBUS UNUM is entirely readable on the reverse. The 3 in the date is double punched at the bottom loop. Colorfully toned with nice eye appeal. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

GOBRECHT DOLLAR

1836 Gobrecht Dollar, XF Details
Judd-60, Die Alignment I

4468 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Plugged — NGC Details. XF. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). There is no evidence of the angling die clash mark above the eagle's wing, a trait that places this piece among the first 400 dollars produced. The plug is located to the right of the head of Liberty and is also evident on the reverse above LL in DOLLAR. Numerous small to medium-sized abrasions are scattered throughout and light to medium gray patina covers each side. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1842 Seated Dollar, MS61+
Intriguing Grade

4469 1842 MS61+ NGC. Seated dollars from 1841 to 1843 are popular among type set assemblers and survive in Mint State to a collectible extent. This Plus-designed Uncirculated 1842 boasts well-defined motifs and satiny luster but also has scattered abrasions that keep it at an affordable grade level. Each side displays champagne-gray toning with occasional olive-green and amber accents. A few diagonal roller marks (mint-made) appear on the reverse. Census: 20 in 61 (1 in 61+), 58 finer (10/15). NGC ID# 24YC, PCGS# 6928

4470 1845 AU50 PCGS. Seateddollarvarieties.com estimates that 5% or 1,250 coins survive from a low original mintage of 24,500 pieces. Lightly abraded silver-gray surfaces retain a degree of semiprooflike contrast. Sharply struck motifs exhibit a hint of high-point rub over the stars, head, and wingtips. The 1845 is arguably the second-scarcest issue from the 1840s, behind only the 1848 in terms of scarcity, although some will argue the 1844 and 1846-O are equally challenging. NGC ID# 24YF, PCGS# 6931

4471 1846 MS61 NGC. In circulated grades, the 1846 is one of the more frequently seen Seated dollars. However, Uncirculated pieces are predictably scarce, especially in higher grades. This MS61 example is one of the more available grades in mint condition. The fields on each side show the usual bright semiprooflike reflectivity, which is apparent even through the medium-density gray-golden toning. The striking details are just a bit short of complete, and there are a number of small to medium sized chatter marks in the fields that account for the grade. Census: 20 in 61, 57 finer (10/15). Ex: Long Beach Signature (Heritage, 6/2010), lot 856. NGC ID# 24YH, PCGS# 6932

4472 1846-O AU55 PCGS. Attractive shades of greenish-gold and lavender-gray patina blanket the lightly abraded surfaces of this Choice AU specimen, and only a touch of wear is evident on the well-detailed design elements. Population: 24 in 55, 39 finer (10/15). NGC ID# 26GG, PCGS# 6933

4473 1847 AU58 PCGS. A sharply detailed, original No Motto type coin, this near-Mint 1847 Seated dollar displays mottled olive-gray toning over each side with hints of luster in the protected regions of the fields. A small rim bruise at 3 o'clock on the reverse is the only notable imperfection. NGC ID# 24YJ, PCGS# 6934

**1850 Seated Dollar, AU55
Better No Motto Issue**

4474 1850 AU55 PCGS. The 1850 Seated dollar had an enticingly low mintage of 7,500 coins and appears at auction with a proportionately infrequent rate. This Choice AU example displays trivial friction over sharply struck design elements. Partially reflective fields exhibit golden-gray toning that further encompasses the motifs. Population: 38 in 55, 56 finer (9/15). NGC ID# 24YM, PCGS# 6937

**1850-O Seated Dollar, AU50
Exceptional Quality for the Issue**

4475 1850-O AU50 PCGS. Silver dollar coinage in New Orleans was sporadic. After the reintroduction of the flag ship silver denomination in 1836, 1850 marked only the second occasion when the Louisiana branch struck silver dollars. The 1850-O had a mintage 40,000 pieces, substantial for the period but without any significant survival in high grades. This issue is every bit as scarce overall as the lower-mintage Philadelphia issue of this year and has noticeably fewer Mint State survivors to its tally. This AU example is well-detailed with partially reflective fields and warm golden-gray toning. An outstanding problem-free coin. Population: 28 in 50, 43 finer (10/15). NGC ID# 24YN, PCGS# 6938

**1856 Silver Dollar, XF45
Well-Detailed and Problem-Free**

4476 1856 XF45 PCGS. A sharp XF example of this less often seen No Motto Seated dollar, showing steel-gray surfaces and trivial wear over the well-defined motifs. Although currently valued somewhat lower, the 1856 is virtually as scarce as the previous two issues in the series, and Mint State examples are slightly rarer by comparison. This Choice XF coin should not be allowed to pass by. NGC ID# 24YV, PCGS# 6944

4477 1860 AU53 PCGS. Colorful multihued toning embraces each side of this About Uncirculated 1860 Seated dollar, accentuating the sharply detailed devices and smooth surfaces. Hints of semiprooflike mirroring appear in the protected regions of the fields when tilted beneath a light. NGC ID# 24Z2, PCGS# 6949

4478 1863 XF45 PCGS. CAC. Sharply detailed for the XF level, this CAC-endorsed 1863 Seated dollar displays deep olive-drab and gray-brown toning over each side. Problem-free surfaces make this piece ideal for the collector who appreciates old-time patina. NGC ID# 24Z6, PCGS# 6953

1865 Dollar, Colorful AU53

4479 1865 AU53 PCGS. Deeply toned in multicolor hues, this About Uncirculated 1865 Seated dollar displays bold design elements with remnants of luster in the fields. No bothersome abrasions are present and high-point wear is trivial. Civil War-era Seated dollars are seldom seen in high grade and boast correspondingly strong collector demand. Population: 14 in 53, 55 finer (10/15). NGC ID# 24Z8, PCGS# 6955

4480 1869 Misplaced Date and Repunched Date, FS-301, AU53 PCGS. Untoned except for a ring of pale gold color at the rim. The surfaces were once prooflike, although several hair-thin lines and light abrasions are now present. The motifs show slight high point wear but they are otherwise well-defined. The base of a secondary 1 is visible south of the primary 1, and the top of a misplaced digit appears in the dentils below the 6. PCGS# 416930 Base PCGS# 6962

**1872-CC Silver Dollar, Fine 15
Elusive Seated Liberty Issue**

- 4481 1872-CC Fine 15 NGC.** Silver dollar coinage at the Carson City Mint was unimpressive until government legislation in 1873 called for the production of millions of Trade dollars. The 1872-CC Seated dollar is one of the earlier issues whose mintage was dictated primarily by the requests of silver depositors. This Seated Liberty coin had a total production of 3,150 pieces, and problem-free survivors are scarce. This collector-grade example displays even wear and medium battleship-gray patina. Moderate detail remains in the eagle's plumage and Liberty's gown. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, VF Details

- 4482 1872-CC — Improperly Cleaned — NGC Details. VF.** This lightly cleaned, gunmetal-gray 1872-CC silver dollar offers the budget-conscious collector an ideal opportunity to acquire a well-detailed example of the semikey issue without breaking the bank. The motifs are well-detailed, and an old scratch on the obverse shield is the only obvious surface flaw aside from the cleaning. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Liberty Dollar, XF40
Elusive Problem-Free Example**

- 4483 1872-CC XF40 NGC.** This semikey Carson City issue is seldom seen in the finer circulated grades without evidence of cleaning, corrosion, or other problems. This fault-free XF example displays deep gunmetal-gray surfaces that lighten over the relief elements. The eagle and Liberty are well-detailed, and the overall eye appeal is outstanding in the view of a collector who appreciates old-time coloration. NGC ID# 24ZK, PCGS# 6969

**1872-CC Dollar, Sharp XF Details
Pleasing Color**

- 4484 1872-CC — Improperly Cleaned — NGC Details. XF.** This sharply detailed 1872-CC dollar is lightly cleaned but has long since retoned. The obverse displays mottled gunmetal-blue and gray hues, while the reverse is lighter gold with a peppering of microscopic specks. Although the surfaces display the mildly glossy texture of a cleaned coin, there are no obvious hairlines or other distractions. NGC ID# 24ZK, PCGS# 6969

**1872-CC Silver Dollar, AU Details
Partially Reflective Fields**

- 4485 1872-CC — Improperly Cleaned — NGC Details. AU.** Due to past cleaning, the general impression of this piece is that of unnatural brightness, but remnants of luster remain in the fields and there are no abrasive hairlines observed on either side. The motifs are sharp, and the surfaces display pale champagne toning. The 1872-CC Seated dollar is a rarity in AU and better grades, making this piece an attractive proposition for the budget-minded enthusiast. NGC ID# 24ZK, PCGS# 6969

- 4486 1873 AU58 NGC.** The 293,000-piece mintage of circulation strike 1873 Seated dollars is deceiving, because not all were paid out or placed into circulation. Many were melted to provide bullion for the new 1873 Trade dollars. As a result, 1873 Seated dollars are scarce in all circulated grades. This near-Mint example is semiprooflike with bronze-gold toning and underlying mint luster. A few light marks exist within the bold, square rims. An attractive and original dollar. Census: 22 in 58, 71 finer (9/15). NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

- 4487 1866 Motto PR58 PCGS.** One of 725 proofs issued in 1866. The nearly untuned mirrored surfaces retain much of their reflectivity, although light friction in the open fields impairs the reflectivity. The central motifs show pleasing, frosted contrast and sharp definition. NGC ID# 5GDV, PCGS# 7014

- 4488 1869 PR61 ANACS.** Irregular splashes of faint gray and bluish-tan color visit this sharply struck proof dollar. The surfaces are abrasion free, but show subdued reflectivity.
Ex: The Beau Clerc Collection (Heritage, 9/2007), lot 1947. NGC ID# 252R, PCGS# 7017

- 4489 1870 PR58 PCGS.** Attractive shades of golden-brown, gray, and cerulean-blue toning blanket the appealing surfaces of this lightly circulated proof. Nice reflectivity remains in the fields. From a fairly generous proof mintage of 1,000 pieces. NGC ID# 252S, PCGS# 7018

**1872 Seated Dollar, PR62
Collector-Grade Example**

- 4490 1872 PR62 PCGS.** A proof mintage of 950 coins accompanied a circulation-strike production of 1.1 million Seated dollars in 1872. Around 60% of proofs are estimated to survive, mostly between PR62 to PR64. This collector-grade example is lightly toned, and contact marks are well-hidden within the central motifs. Reverse die doubling is most prominent on IN GOD WE. Moderate mirrors produce mild field-device contrast. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

**1873 Trade Dollar, MS64
Frosty First-Year Type Coin**

- 4491 1873 MS64 PCGS.** Original mint frost illuminates well-preserved surfaces on this Choice first-year Trade dollar type coin, showing a hint of champagne toning and a vibrant cartwheel effect. The eagle's talons are a trifle soft, but the remaining design elements show crisp definition. Housed in a green label holder. Population: 50 in 64 (3 in 64+), 16 finer (10/15). NGC ID# 252W, PCGS# 7031

- 4492 1875-S Type One Reverse MS63 PCGS.** Large S. Rich lavender-gray, olive-green, and wheat-gold toning embraces satiny and unabraded surfaces. A small strike-through (as made) is noted on the right obverse field. The strike is good despite the usual incompleteness on the eagle's right (facing) leg. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

**1876-S Trade Dollar, MS64
Brilliant and Highly Lustrous**

- 4493 1876-S Type One Obverse, Type One Reverse, MS64 PCGS.** Large S. Only occasional hints of ivory patina are seen over the otherwise brilliant surfaces of this Choice survivor. Well defined with strong mint luster and eye appeal to match. Despite a mintage of over 5.2 million pieces, the 1876-S Trade dollar is a rarity any finer, with just six such examples known to PCGS (10/15). NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

- 4494 1877-CC XF40 NGC. CAC.** Tall CC. A well-detailed, lightly circulated example of this collectible Carson City Trade dollar. Both sides display deep lavender-gray patina and grade-consistent marks. CAC-approved for strong XF quality. NGC ID# 253D, PCGS# 7045

**1877-S Trade Dollar, MS62
Doubled Die Reverse**

- 4495 1877-S Doubled Die Reverse, FS-801, MS62 PCGS.** Large S. The *Cherrypickers'* reference calls this doubled die reverse "a highlight of the trade dollar varieties," as it should be with such a bold spread — visible most plainly on E PLURIBUS UNUM and UNITED STATES OF AMERICA. This is the only Mint State example attributed by PCGS (10/15), although additional Uncirculated pieces likely exist within the standard population figures. This coin is sharply struck and displays satiny luster with golden-gray toning. No major abrasions are observed. PCGS# 145811 Base PCGS# 7046

1878-CC Trade Dollar, AU Details

- 4496 1878-CC — Tooled, Cleaned — ANACS. AU Details, Net VF30.** Although lightly cleaned in the past, this 1878-CC Trade dollar has since retoned a pleasing tan-gray hue. Minor tooling is observed in the obverse fields when studied with a loupe. This coin displays well-detailed design elements and would serve well in the collection of a budget-conscious enthusiast. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

1879 Trade Dollar, PR64+ Old-Time Patina

- 4497 1879 PR64+ NGC. CAC.** Aside from the almost unobtainable 1884 and 1885, which were not official issues, the proof Trade dollar series does not contain any real “stoppers,” making a complete date set fully pursuable by patient collectors. The 1879 is the second proof-only Philadelphia issue, and production spiked to 1,541 pieces (up from 900 coins in 1878). This is a collectible near-Gem example with deep original toning that displays warm sun-gold color in the centers and deeper violet, lilac, and aquamarine around the peripheries. Sharp design elements further contribute to the visual appeal. NGC ID# 27YR, PCGS# 7059

1880 Trade Dollar, PR64 Cameo Pronounced Field-Motif Contrast

- 4498 1880 PR64 Cameo NGC.** The 1880 Trade dollar is a proof-only issue approaching a mintage of 2,000 pieces. Pronounced field-motif contrast is evident over both sides, each of which exhibits razor-sharp design elements. A few minor marks barely prevent Gem condition. Brilliant throughout. Census: 61 in 64 Cameo (3 in 64+ Cameo), 77 finer (10/15). NGC ID# 27YS, PCGS# 87060
- 4499 1881 PR61 PCGS.** Pale gold and lilac toning have little impact on the deep-silver mirrors surrounding lightly contrasted devices. A proof-only issue of 960 pieces, the 1881 Trade dollars were struck for collectors and fancied by speculators. Light, hair-thin lines on the obverse account for the assigned grade of this example, yet considerable eye appeal remains. A sharp strike exists throughout both sides. NGC ID# 27YT, PCGS# 7061

1882 Trade Dollar, Sharp PR64 Cameo

- 4500 1882 PR64 Cameo PCGS.** Cameo examples of this proof-only Trade dollar are rare finer than the currently offered PR64 coin, making this piece among the finest many collectors will be able to acquire. This piece is sharp throughout the relief elements and displays deep, glassy mirroring in the fields. Both sides are toned in mottled cream-gold, russet, and pale gray toning. Population: 51 in 64 (5 in 64+) Cameo, 18 finer (7/15). NGC ID# 27YU, PCGS# 87062

GOLD DOLLARS

- 4501 1849-O Open Wreath MS62 NGC. Variety 1.** The doubled R in DOLLAR is the pick-up point for this reverse variety, one of three identified for the sole Open Wreath New Orleans issue. The date was on the hub, and is thus placed identically on all '49-O gold dollars. An unmarked, satiny, and nicely struck sun-gold example. NGC ID# 25BE, PCGS# 7508
- 4502 1849-O Open Wreath MS62 PCGS. CAC. Variety 1.** Uncirculated examples of the 1849-O gold dollar are scarce without detracting abrasions. This CAC-endorsed MS62 coin exhibits minor contact on Liberty's cheek and in the fields but lacks any singularly obvious flaws. The strike is above-average for the issue, and the satiny surfaces display pleasing straw-gold luster. NGC ID# 25BE, PCGS# 7508
- 4503 1851-C AU58 PCGS. Variety 1.** A sharply struck green-gold Borderline Uncirculated Charlotte Mint type coin. Partly lustrous and only moderately abraded. A quality example of this scarce issue. Winter describes three varieties for the 1851-C but we have only seen Variety 1 and 3. NGC ID# 25BL, PCGS# 7514

1851-O Gold Dollar, MS64 Sharp and Lustrous

- 4504 1851-O MS64 PCGS. Variety 2.** The 1851-O is among the more plentiful of the six New Orleans issues in the gold dollar series, making it ideal for type purposes. This Choice example is sharp and attractive with frosty yellow-gold luster and pleasantly smooth surfaces — only a couple of trivial marks on Liberty's cheek limit the grade. Population: 32 in 64, 32 finer (10/15). NGC ID# 25BN, PCGS# 7516
- 4505 1852-C — Improperly Cleaned — NGC Details. AU. Variety 2.** A collectible Charlotte gold dollar issue, despite its low mintage of 9,434 pieces. This example is well-detailed but has unnaturally bright surfaces due to old cleaning. A pair of mint-made planchet voids appear on the reverse near the AR in DOLLAR. NGC ID# 25BR, PCGS# 7518

4506 1853 MS64+ PCGS. A tack-sharp, frosty Type One gold dollar, this Plus-graded near-Gem boasts immense visual appeal stemming from its crisp detail and rich honey-gold luster. The presence of a few faint, stray lines in the patina likely accounts for the grade in the absence of any identifiable abrasions. NGC ID# 25BU, PCGS# 7521

4507 1853-D VF30 PCGS. Variety 5-G. A single variety is known for this issue. Circulated 1853-D gold dollars, while scarce, can be located with diligent searching, but Mint State pieces are very rare. The yellow-gold surfaces of this VF30 example exhibit the typical weakness in Liberty's hair, but the letters in LIBERTY plainly show. NGC ID# 25BW, PCGS# 7523

4508 1853-O MS62 PCGS. CAC. Variety 1. A popular O-Mint type coin and one of only six New Orleans issues in the gold dollar series. Coinage was suspended at the Louisiana branch following the outbreak of the Civil War, and by the time the facility reopened in 1879, branch mint production of this denomination had long ceased. This Mint State example is remarkably bold throughout the central devices and the peripheral legends and stars, despite minor die erosion in the fields. A lovely straw-gold example, devoid of bothersome abrasions. NGC ID# 25BX, PCGS# 7524

4509 1854 Type Two MS62 NGC. A pleasing MS62 example of the short-lived Type Two design, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks. NGC ID# 32EH, PCGS# 7531

4510 1855 MS61 NGC. A satiny, straw-gold Mint State Type Two gold dollar, lacking any major abrasions. Slight strike softness is seen on the high points of Liberty's portrait and clash marks appear on both sides, as is characteristic of the Type Two design. NGC ID# 25C4, PCGS# 7532

**1855-D Gold Dollar
XF Sharpness
Only D-Mint Type Two Issue**

4511 1855-D — Ex-Jewelry — PCGS Genuine. XF Details. Variety 7-I. A well-defined apricot-gold example. The glossy surfaces exhibit distributed tiny marks from jewelry box storage, and a thin horizontal mark crosses Liberty's mouth. The key Type Two issue. Despite a tiny mintage of 1,811 pieces, two reverse dies were used to coin the 1855-D. Variety 7-I has a sharp date and a superior aesthetic appearance, relative to the rare Variety 7-J. NGC ID# 26AT, PCGS# 7534

4512 1859 MS64 NGC. The light yellow and rose-gold surfaces of this attractive Choice example show only a few minor contact marks on both sides. Satiny mint luster adds to the considerable visual appeal. NGC ID# 25CL, PCGS# 7551

4513 1862 MS65 PCGS. CAC. This collectible Civil War-era gold dollar becomes elusive in Gem and better grades. The present piece is sharply struck and frosty with shimmering orange-gold luster and beautifully preserved surfaces. Eye appeal is outstanding. NGC ID# 25CW, PCGS# 7560

4514 1868 MS62 Prooflike NGC. A sharp Mint State example of this elusive gold dollar issue and one of only 18 Prooflike pieces at NGC. A few stray lines likely account for the grade in the absence of any serious abrasions, and the eye appeal is excellent. Census: 5 in 62 Prooflike, 5 finer (10/15). NGC ID# 25D4, PCGS# 77567

4515 1869 MS62 NGC. The 1869 gold dollar is obtainable in circulated and low-level Mint State grades, but becomes difficult in MS63 and finer levels of preservation. The yellow-gold surfaces of this MS62 specimen display more pronounced luster in the recessed areas. The design elements are well-struck. A few minute marks are in concert with the grade. Census: 18 in 62, 31 finer (10/15). NGC ID# 25D5, PCGS# 7568

**1872 Gold Dollar, MS64
Choice Eye Appeal**

4516 1872 MS64 PCGS. CAC. A notably scarce series issue, the 1872 gold dollars saw a mintage of just 3,500 circulation strikes plus 30 proofs. Perhaps as many as 150 coins survive in Mint State, although many are in lesser grades than this Choice near-Gem example. Rich, medium gold surfaces are nearly prooflike with slight cloudiness preventing a full prooflike designation. Only a few tiny ticks and light lines appear on the attractive fields and frosted devices. Population: 14 in 64, 17 finer (10/15). NGC ID# 25D9, PCGS# 7572

1880 Gold Dollar, Semiprooflike MS67

4517 1880 MS67 NGC. The 1880 gold dollar boasts an enticingly low mintage of 1,600 coins, but enough examples were saved at the time of issue to make this date collectible today in high grade. The present Superb Gem boasts sharp design elements and semiprooflike fields with rich wheat-gold luster. NGC lists 24 finer examples (10/15). NGC ID# 25DJ, PCGS# 7581

**1881 Gold Dollar, MS67
Immaculate Surfaces**

4518 1881 MS67 PCGS. A seemingly pristine, fully struck Superb Gem example of this late-series gold dollar, showing frosty orange-gold luster with interwoven threads of rose and lilac. The 1881 had a small mintage of 7,620 pieces but was heavily saved at the time of issue and remains popular for type representation today. NGC ID# 25DK, PCGS# 7582

- 4519 1882 MS65 PCGS.** A spectacular Gem example of this popular date, from a mintage of just 5,000 pieces. The design elements are sharply detailed and the pristine orange-gold surfaces display vibrant satiny mint luster. Population: 30 in 65, 70 finer (10/15). NGC ID# 25DL, PCGS# 7583
- 4520 1882 MS66 NGC.** Late-date gold dollars are popular for their relatively low mintages — 5,000 coins in this case — and their availability in high grades. This glittering Premium Gem has beautiful orange and yellow-gold coloring with pale lavender accents. Well-struck, nearly unmarked, and devoid of die clash. NGC ID# 25DL, PCGS# 7583
- 4521 1888 MS66 PCGS. CAC.** Radiant yellow-gold mint bloom illuminates carefully preserved surfaces on this boldly struck Premium Gem example. PCGS has encapsulated 52 numerically finer representatives (10/15). NGC ID# 25DT, PCGS# 7589

CLASSIC QUARTER EAGLES

1835 Two and a Half, MS61

- 4522 1835 MS61 NGC. Breen-6141, Variety 6, R.2.** The dentils and stars are needle-sharp, as are the eagle's neck and wings. The indifference of strike at the centers is unavoidable for the type. Luster dominates all but the open fields, and the straw-gold surfaces are only moderately marked.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 3735, which realized \$3,881.25. NGC ID# 25FT, PCGS# 7693

1839-O Quarter Eagle, XF45 Only New Orleans Classic Issue

- 4523 1839-O XF45 PCGS. Breen-6152, Variety 27, R.3.** A charming green-gold representative. Marks are confined to an obverse tick at 5 o'clock and a subtle abrasion on the F in OF. The High Date, Wide Fraction variety. The 1839-O is the only New Orleans Classic gold issue, and has a low mintage of 17,781 pieces. Two die pairs were struck, with Variety 27 somewhat more available than Variety 28. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1847-D Two and a Half, AU58 Smooth Surfaces, Few Abrasions

- 4524 1847-D AU58 NGC. Variety 9-N.** The moderate mintage of 15,784 pieces makes this Dahlonega issue a popular type selection, albeit a scarce one in near-Mint and full Mint State. This example is remarkably unabraded for the grade, with only minor hair-thin lines showing in the fields and no real distractions. Sharp definition remains despite brief circulation. A small rim nick near star 5 may be a test cut. Census: 46 in 58 (3 in 58+), 21 finer (9/15). NGC ID# 25H7, PCGS# 7746

- 4525 1851 MS64 PCGS. CAC.** Ebullient luster issues from the yellow-gold surfaces of this attractive near-Gem. The design elements are well-struck except for the usual weakness in the eagle's neck and legs. A few minute scuffs are insignificant. Population: 46 in 64 (1 in 64+), 5 finer (10/15). NGC ID# 25HL, PCGS# 7759

- 4526 1853 MS64 PCGS. CAC.** The 1853 boasts the highest mintage of the Liberty quarter eagle series, exceeding 1.4 million pieces, but is surprisingly elusive in the finer Mint State grades. This Choice example displays frosty orange-gold luster and minimally abraded surfaces. The eagle's left (facing) leg is not fully struck, but the obverse is sharp throughout. Population: 72 in 64, 8 finer (10/15). NGC ID# 25HV, PCGS# 7767

1855 Two and a Half, MS64 Scarce and Overlooked Issue

- 4527 1855 MS64 PCGS.** This is one of those issues that leaves you scratching your head, wondering when was the last time you saw one? Garrett-Guth explain why: "The 1855 Liberty Head quarter eagle is seen much less often than the Philadelphia quarter eagles from 1851 to 1854. ... In Uncirculated condition the date becomes increasingly scarce with higher-grade levels. Choice and Gem examples are seldom seen." This is a highly lustrous, sharply struck example with pronounced die clashing seen on each side. The only mark of note is across Liberty's nose. Population: 16 in 64, 7 finer (10/15). NGC ID# 25J4, PCGS# 7774

- 4528 1856 MS63 PCGS.** Frosty bronze-gold luster delivers the initial appearance of a Choice or finer coin, although close study reveals a few stray lines that limit the grade of this Select 1856 quarter eagle. The eagle's left (facing) leg is slightly soft, but the obverse portrait is well-defined. Population: 29 in 63, 27 finer (10/15). NGC ID# 25J7, PCGS# 7777

4529 1858 MS61 NGC. P-Mint quarter eagles from the late 1850s are considerably scarcer than the preceding Philadelphia issues as mintages declined. Just 47,377 pieces were struck in 1858. Attractive, sun-gold color commands the eye, while hair-thin lines and weakness of strike on the eagle's legs neck, legs, and talons do little to impair the overall appeal. Census: 32 in 61, 33 finer (10/15). NGC ID# 25JG, PCGS# 7786

4530 1861 Old Reverse, Type One, AU58 NGC. The Old Reverse has an oval O in OF. Examples are many times rarer than their New Reverse counterparts, with only 100 coins believed extant. This near-Mint quarter eagle has full stars, bold hair curls, and relatively strong detail on the eagle's claws and fletchings. Both sides are clashed, as usual, but the lustrous yellow-gold surfaces lack overly distracting flaws. NGC ID# 25JX, PCGS# 97794

4531 1867-S AU55 PCGS. The San Francisco Mint struck 28,000 quarter eagles in 1867, of which 150 or so coins survive. The typical certified example grades XF45. This Choice AU piece has partial luster over soft olive and green-gold surfaces. The stars show full centers, and the overall definition is strong despite minor friction. Population: 11 in 55, 19 finer (10/15). NGC ID# 7JRX, PCGS# 7806

4532 1869-S AU58 NGC. This attractive near-Mint quarter eagle retains ample luster on its orange-gold surfaces imbued with hints of light green. The design elements are generally well-impressed except for the usual weakness on the eagle's leg feathers. Census: 69 in 58, 19 finer (10/15). NGC ID# 25KE, PCGS# 7810

1873-S Two and a Half, MS62 Rare in Uncirculated Condition

4533 1873-S MS62 PCGS. The 1873-S quarter eagle survives almost entirely in circulated grades. This rare Mint State example boasts rich, original luster in shades of honey, rose, and yellow-gold. A few minor handling marks on the relief elements limit the grade but pose little visual impairment. The eagle's left (facing) leg exhibits the only noticeable strike deficiency. Population: 6 in 62, 5 finer (10/15). NGC ID# 25KP, PCGS# 7820

1896 Quarter Eagle, Sharply Defined MS66 Very Rare Any Finer

4534 1896 MS66 NGC. The 1896 quarter eagle is scarce in Premium Gem where NGC and PCGS report only slightly more than 50 submissions; higher-grade pieces are very rare. Yellow-gold luster imbued with hints of light green embrace this lovely example. All design elements are sharply defined, further enhancing the coin's eye appeal. A small spot is visible left of Liberty's nose. Census: 26 in 66 (1 in 66+, 1 in 66 ★), 8 finer (10/15). NGC ID# 25LL, PCGS# 7848

1899 Two and a Half, MS66 Universal Appeal

4535 1899 MS66 PCGS. CAC. This blazing Premium Gem quarter eagle has something for everyone, whether it be a full strike, thick, frosty mint luster, virtually pristine surfaces, or attractive peach and rose-gold coloration. The issue's relatively low mintage of 27,200 coins enhances this coin's appeal, as does its position among some of the finest-certified survivors. Population: 22 in 66 (2 in 66+), 7 finer (10/15). NGC ID# 25LP, PCGS# 7851

4536 1901 MS66 NGC. A frosty, sharply struck Premium Gem type coin, this 1901 quarter eagle boasts unabraded surfaces and rich green-gold luster. Seldom seen finer with only 26 Superb Gems listed on the NGC Census. Housed in a prior generation holder. NGC ID# 25LS, PCGS# 7853

1903 Liberty Quarter Eagle, MS67 Conditionally Rare in Finer Grades

4537 1903 MS67 NGC. The 1903, from a production exceeding 200,000 pieces, is one of the most common dates in the Liberty Head quarter eagle series with thousands of Uncirculated coins graded by the two major services. Only about 170 specimens, however, have been certified MS67 and just five finer (10/15). Ebullient luster exudes from impeccably preserved yellow-gold surfaces and all design features are sharply struck. NGC ID# 2688, PCGS# 7855

1905 Quarter Eagle, MS67+ Superb 20th Century Type Coin

4538 1905 MS67+ NGC. The availability of the 1905 quarter eagle makes it an ideal type coin, particularly at the Superb Gem level. This Plus-graded example showcases sharp devices set against frosty, unabraded fields with luminous green-gold luster throughout. NGC lists six numerically finer examples (10/15), although it is doubtful if any have a significant aesthetic advantage over this piece. NGC ID# 267S, PCGS# 7857

- 4539 1907 MS65 PCGS. CAC.** An ideal coin for a Gem set, with vibrant mint luster over richly frosted surfaces. This fully struck is just a few minor ticks from an even higher grade. Olive highlights enrich the lustrous, wheat-gold surfaces. A final-year mintage of 336,200 pieces adds to the appeal of this CAC-endorsed example. NGC ID# 2688, PCGS# 7859

INDIAN QUARTER EAGLES

- 4540 1908 MS65 PCGS.** The obverse is smooth and impressive — sharply struck and nearly mark-free. Flashy mint luster radiates from beneath the honey-gold coloration. The reverse is equally lustrous with a few light field lines and the usual softness on the eagle's shoulder. A great type coin, truly Gem condition. NGC ID# 288Y, PCGS# 7939
- 4541 1908 MS65 PCGS.** Beautiful light yellow-gold surfaces exhibit nearly full definition, save for the usual indistinctness over the upper portion of the eagle's wing, resulting from improperly prepared dies. The unaided eye fails to pick up on any mentionable imperfections. Ideal for type purposes. NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS65+ Exemplary Strike and Luster

- 4542 1908 MS65+ PCGS. CAC.** A delightful high-end Gem example of this first-year type-coin issue. The 1908 Indian quarter eagle is famous for indistinct wing feathers on the eagle — a product of the engraving and not the strike. This piece is razor-sharp throughout the headdress feathers and displays frosty yellow-gold luster as if just ejected from the dies. Finer examples are infrequently seen. NGC ID# 288Y, PCGS# 7939

1908 Quarter Eagle, MS65+ Remarkably Clean Surfaces, Bright Color

- 4543 1908 MS65+ PCGS. CAC.** The first-year 1908 quarter eagles and half eagles have an enduring popularity, and fortunately a good number were set aside at the time of issue. This is a bright yellow-gold example that lacks the numerous small abrasions normally seen. The strike is complete except, of course, on the upper wing, an area that is never completely detailed on circulation strike quarter eagles of this date. NGC ID# 288Y, PCGS# 7939

- 4544 1909 MS64 NGC. CAC.** Nice mint luster and splendid eye appeal make this near-Gem quarter eagle a candidate for an advanced set. The motifs are sharply struck throughout. Attractive, medium-gold color shows faint olive-gold toning on the upper-right obverse. The high point fields are remarkably unabraded save for a few light lines near the reverse margin at 1 o'clock. CAC endorsed. NGC ID# 288Z, PCGS# 7940

- 4545 1909 MS64 PCGS. CAC.** Strong yellow-gold color with hints of peripheral orange characterize the satiny surfaces of this Choice Mint State example. The design elements offer slightly above-average definition for the issue.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2694. NGC ID# 288Z, PCGS# 7940

1910 Two and a Half, MS65 Lustrous Indian Head Type Coin

- 4546 1910 MS65 NGC.** Frosty yellow-gold luster illuminates sharply struck design elements on this Gem 1910 Indian quarter eagle. There are no significant abrasions, and the corresponding eye appeal is excellent for type representation. The 1910 is occasionally seen in MS65, but finer pieces are genuinely rare. NGC records 15 Premium Gems finer (10/15). NGC ID# 2892, PCGS# 7941

1910 Quarter Eagle, MS65 Attractive, Frosty Type Coin

- 4547 1910 MS65 PCGS. CAC.** The 1910 Indian quarter eagle is more difficult to locate in high grade than its mintage of 492,000 pieces would indicate, and the date is particularly rare above MS65. This well-detailed Gem offers rich mint luster with attractive orange-gold surfaces that show hints of lilac. PCGS records 11 Premium Gems finer (10/15).
Ex: The Jim O'Neal Gold Type Collection / FUN Signature (Heritage, 1/2012), lot 6199.
From The Leon Hendrickson Collection. NGC ID# 2892, PCGS# 7941

- 4548 1911 MS64 PCGS.** This lustrous near-Gem displays attractive yellow-gold surfaces that have been well-cared for. The design elements exhibit a sharper strike than typically seen on this issue, including the headdress feathers and the eagle's plumage. NGC ID# 7KR6, PCGS# 7942

- 4549 1911 MS64+ PCGS.** Lovely rose and lilac hues are strewn throughout the rich orange-gold surfaces of this Plus-graded Choice 1911 quarter eagle, complementing sharp design elements. The obverse appears almost a grade point finer, although scattered stray luster grazes in the reverse fields limit the PCGS designation. NGC ID# 7KR6, PCGS# 7942

1911 Quarter Eagle, MS65
Unusually Sharp Details

- 4550 1911 MS65 NGC.** This delightful Gem is sharply detailed throughout, an unusual attribute for a date that is usually softly struck. The pleasing greenish-gold surfaces are lustrous and free of mentionable distractions. Eye appeal is quite strong on this piece. NGC has graded only seven coins in higher numeric grades (10/15).

Ex: *Houston Signature (Heritage, 11/2012)*, lot 4827. NGC ID# 7KR6, PCGS# 7942

1911 Two and a Half, MS65
Only a Single Piece Finer at PCGS

- 4551 1911 MS65 PCGS. CAC.** This is a delightful Gem with sharply detailed design elements and vibrant mint luster. The attractive orange-gold surfaces display hints of lilac and mint-green color and are devoid of bothersome flaws. The 1911 Indian quarter eagle is virtually unobtainable in higher grades, as PCGS lists a single Premium Gem finer (10/15).

Ex: *The Jim O'Neal Gold Type Collection / FUN Signature (Heritage, 1/2012)*, lot 6202.

From *The Leon Hendrickson Collection*. NGC ID# 7KR6, PCGS# 7942

1911-D Quarter Eagle, XF40
Popular Low-Mintage Issue

- 4552 1911-D XF40 PCGS.** This sought-after key issue is housed in a green label holder. The rich orange-gold surfaces show highlights of lilac in selected areas and a scattering of minor abrasions on both sides. The cheekbone and headdress feathers show light wear, but the overall presentation is quite acceptable. NGC ID# 7KR7, PCGS# 7943

- 4553 1911-D Strong D — Scratch — PCGS Genuine. AU Details.** A sharp, bronze-gold example of this key Indian quarter eagle issue with a bold mintmark and diagnostic wire rim along the upper-right obverse border. Several faint scratches in the upper reverse field preclude a numeric grade but pose little distraction to the unaided eye. NGC ID# 7KR7, PCGS# 7943

- 4554 1911-D Strong D — Polished — PCGS Genuine. AU Details.** This series key Indian eagle has a bold mintmark and minimal wear, but the surfaces are somewhat glossy and bright, particularly on the field beneath the ERT in LIBERTY. NGC ID# 7KR7, PCGS# 7943

- 4555 1911-D Strong D — Mount Removed — PCGS Genuine. AU Details.** The Denver mintmark is distinct on this key date quarter eagle. The central obverse has a circular depressed area where the coin was formerly soldered into jewelry. The portrait is glossy and the fields are luminous and mattelike. NGC ID# 7KR7, PCGS# 7943

- 4556 1912 MS64+ PCGS. CAC.** Indian quarter eagles such as the 1912 were popular Christmas gifts in the years prior to World War I. Most were eventually spent, since PCGS has certified more than 2,000 examples of the 1912 in circulated grades. But the present near-Gem was carefully saved. The strike is crisp and the coruscating wheat-gold surfaces are generally smooth. NGC ID# 7KR8, PCGS# 7944

- 4557 1913 MS64 PCGS. CAC.** Yellow-gold and olive coloration resides on the lustrous surfaces of this nicely struck near-Gem. Neither side reveals marks of consequence. The pleasing eye appeal is appropriately recognized by CAC. The availability of the 1913 declines significantly any finer. NGC ID# 7KR9, PCGS# 7945

1913 Indian Quarter Eagle, MS65
Very Rare in Finer Grades

- 4558 1913 MS65 NGC.** Gem Indian quarter eagles are always in demand, as the nature of the sunken relief design significantly inhibited the survival rate of high-grade representatives. As the coins had no protective rims, their exposed fields were easily scarred by such minuscule tasks as stacking in a bank vault. This 1913 example shows shimmering honey-gold luster and unusually clean fields. The strike is boldly impressed, leaving nothing unsightly for the eye. NGC has seen just six numerically finer pieces (10/15). NGC ID# 7KR9, PCGS# 7945

**1913 Quarter Eagle, MS65
Few Known Finer**

- 4559 1913 MS65 PCGS.** A rich copper-gold and lime-green example with even, satiny luster and smooth surfaces. Boldly struck and carefully preserved, with a tiny abrasion in the field area just left of the Indian's nose, and surfaces that seem otherwise blemish-free. PCGS records seven Premium Gems finer (10/15).
Ex: Denver Signature (Heritage, 8/2006), lot 1700; The Jim O'Neal Gold Type Collection / FUN Signature (Heritage, 1/2012), lot 6216.
From The Leon Hendrickson Collection. NGC ID# 7KR9, PCGS# 7945

- 4560 1914 MS62 PCGS.** A collectible Mint State example of this better Philadelphia issue, showing sharp design elements and satiny green-gold luster. There are no individually significant abrasions, only light handling marks in the fields. NGC ID# 7KRA, PCGS# 7946

- 4561 1914 MS63 PCGS.** An attractive Select example of this low-mintage issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 7KRA, PCGS# 7946

- 4562 1914-D MS63 PCGS.** This appealing orange-gold quarter eagle represents one of the more challenging issues in the series behind the 1911-D and the 1914. The headdress feathers, eagle's shoulder, and leg exhibit crisp detail for the date. Wispy scattered marks preclude a near-Gem assessment. NGC ID# 2899, PCGS# 7947

- 4563 1915 MS64 PCGS. CAC.** This piece displays luminous orange-gold surfaces with areas of pale rose-gold color. The strike is well-executed, and only a few stray lines in the fields prevent Gem classification. Finer examples are somewhat more elusive. NGC ID# 7KRC, PCGS# 7948

- 4564 1915 MS64+ PCGS. CAC.** This Plus-designated Choice example is about as close to Gem quality as is possible without breaking that higher price barrier. The design elements are sharply struck and the yellow-gold surfaces display frosty luster. A few faint lines in the reverse fields are all that preclude a full MS65 designation. NGC ID# 7KRC, PCGS# 7948

**1915 Quarter Eagle, Mattelike MS65
Last of the Series Until 1926**

- 4565 1915 MS65 PCGS. CAC.** After producing the 1915 quarter eagles, the Mint would make no more until 1926. The 1915 is of about median rarity at the Gem Mint State level for the series; finer examples are all but unobtainable. This piece has typical mattelike surfaces with orange-yellow color and full luster.
Ex: FUN Signature (Heritage, 1/2012), lot 6231.
From The Leon Hendrickson Collection. NGC ID# 7KRC, PCGS# 7948

- 4566 1927 MS65 PCGS.** Glowing apricot-gold overtones blanket satiny, silvery-gold luster on this Gem 1927 quarter eagle, while closer study with a loupe reveals hints of mint-green and lilac around portions of the peripheries. The eagle and headdress feathers are boldly defined and, were it not for a couple of minor marks in the left obverse field, this Gem type coin might have garnered an even finer grade. Housed in a green label holder. PCGS lists 21 Premium Gems finer (10/15).
From The Leon Hendrickson Collection. NGC ID# BUTL, PCGS# 7951

- 4567 1928 MS65 PCGS.** A dusky apricot-gold Gem type coin with minimal field marks and an above-average strike on the headdress. The 1928 is one of a handful of dates that are collectible in MS65, but it becomes a major rarity in MS66. Encapsulated in a green label holder. PCGS records 11 Premium Gems finer (10/15).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4225.
From The Leon Hendrickson Collection. NGC ID# 289E, PCGS# 7952

- 4568 1928 MS65 PCGS. CAC.** A spectacular Gem representative of this late-series issue, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces show minimal signs of contact. PCGS has graded 11 numerically finer examples (10/15). NGC ID# 289E, PCGS# 7952

**1929 Indian Quarter Eagle, MS65
Incredible Coloration**

- 4569 1929 MS65 PCGS.** Attractive shades of orange-gold, lilac, and rich rose adorn the beautifully preserved surfaces of this impressive Gem, and frosty mint luster adds to the considerable visual appeal. The design elements are well-detailed, and the surfaces show only minor contact marks when viewed beneath a loupe. PCGS records four coins in higher numeric grades (10/15).
Ex: The Jim O'Neal Gold Type Collection / FUN Signature (Heritage, 1/2012), lot 6246.
From The Leon Hendrickson Collection. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

- 4570 1854 AU53 NGC.** Just a touch of high-point wear shows on the design elements of this attractive first-year type coin, and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 25M3, PCGS# 7969

- 4571 1854 AU58 NGC.** Traces of friction over the high points of the motifs, combined with shimmering orange-gold luster in the fields, gives this near-Mint 1854 three dollar gold piece exceptional eye appeal and type coin prospects. The surfaces are smooth and problem-free. NGC ID# 25M3, PCGS# 7969

- 4572 1855 AU58 PCGS.** Smooth and still-lustrous surfaces include a sharp strike on the devices with abundant eye appeal for the grade. Marks are limited to tiny ticks visible with a lens. Pleasing light-yellow coloration shows faint green overtones, while the raised elements confirm slight high point wear. NGC ID# 25M6, PCGS# 7972

- 4573 1856 AU55 ANACS.** Partially lustrous fields complement well-detailed design elements on this Choice AU three dollar gold type coin. The wreath bow is weak, as expected, but the obverse portrait is sharp. NGC ID# 25M8, PCGS# 7974

- 4574 1857 AU55 NGC.** Slight friction over the high points of the design precludes a Mint State grade but allows moderate luster to remain in the fields. This collectible Philadelphia issue is not one of the most plentiful dates in the series but would nonetheless serve well for type purposes in AU condition. NGC ID# 7K5G, PCGS# 7976

**1857 Three Dollar Gold, MS61
Impressive for the Grade**

- 4575 1857 MS61 PCGS.** The typical 1857 three dollar gold piece grades AU. This Mint State example offers shimmering yellow-gold luster with trivial chatter in the fields to limit the grade. The wreath bowknot is weakly defined, but the obverse portrait is sharp. A loupe reveals light clash marks on both sides. Population: 15 in 61, 64 finer (10/15). NGC ID# 7K5G, PCGS# 7976

**1860 Gold Three Dollar, AU58
Shimmering Luster**

- 4576 1860 AU58 PCGS Secure.** An accurately graded, eye-appealing near-Mint example of this less often seen pre-Civil War issue, showing a brush of friction over the high points of the design but retaining shimmers of luster in the fields, with smooth surfaces and rich honey-gold color. The wreath bow is indistinct, but the strike is otherwise sharp. NGC ID# 25ME, PCGS# 7980

**1868 Gold Three Dollar, MS61
Pleasing for the Grade**

- 4577 1868 MS61 NGC.** Although not completely defined, the bowknot is sharper than usual on this Mint State 1868 three dollar gold piece. The obverse portrait is well-struck, and the surfaces display bright yellow-gold luster. There are no individually bothersome abrasions. The 1868 is a less often seen issue in Mint State grades. NGC ID# 25MP, PCGS# 7989

**1874 Three Dollar Gold, MS62
Glistening Mint Frost**

- 4578 1874 MS62 PCGS.** The 1874 is an available issue in the three dollar gold set despite a mintage that would be considered small for most other series (41,800 coins struck). Rich orange-gold surfaces are awash in glistening mint frost. Liberty's curls are typically defined, though the overall impression is bold, especially on the bowknot and left leaf. The obverse is clean for the grade, while the reverse shows small abrasions inside the wreath. NGC ID# 7KDE, PCGS# 7998

- 4579 1878 AU58 NGC.** Only a touch of high-point wear shows on the well-detailed design elements of this popular type issue and the satiny orange-gold surfaces are lightly abraded throughout. A few hints of rose patina are evident on both sides. NGC ID# 25MZ, PCGS# 8000

- 4580 1878 AU58 NGC.** A brush of high-point friction is all that interrupts the shimmering yellow-gold luster of this near-Mint three dollar gold type coin. Save for the bowknot all design elements are sharply detailed, and there are no obtrusive abrasions. NGC ID# 25MZ, PCGS# 8000

- 4581 1878 MS61 NGC.** Type collectors often seek out this issue for its ready availability in most Mint State grades. This MS61 example displays moderate reflectiveness in the fields and pleasing orange accents in protected areas. Lustrous, honey-gold surfaces provide nice eye appeal while the strike shows only nominal weakness at the high points of the headdress, curls, and bow knot. NGC ID# 25MZ, PCGS# 8000

- 4582 1879 AU58 PCGS.** An attractive near-Mint example with practically mark-free surfaces and well-struck motifs. Soft mint luster remains beneath the greenish-gold coloration. Traces of prooflikeness appear at the legends and near the wreath. Just 3,000 pieces were struck. NGC ID# 25N2, PCGS# 8001

1888 Three Dollar, Frosty MS63

- 4583 1888 MS63 PCGS.** Three dollar gold coin output reached 5,000 pieces in 1888 as the series approached its conclusion one year later. The mintage was mostly symbolic; the coins did not circulate, and examples can still be found through MS65. Frosty luster glistens over attractive lemon-gold surfaces. The obverse is remarkably clean, while the reverse shows milling marks below the date. A minor luster disturbance occurs near ST(ATES). NGC ID# 25NB, PCGS# 8010

CLASSIC HALF EAGLE

- 4584** 1834 — Improperly Cleaned — NCS Details. XF. Second Head, Crosslet 4, Breen-6503, McCloskey 5-D, R.4. The Classic Head design was introduced in 1834 and the McCloskey 5-D variety, with a Crosslet 4 in the date, is much more elusive than its Plain 4 counterpart. This lightly worn specimen displays XF sharpness, but the lightly abraded surfaces show signs of a light cleaning in the past. NGC ID# 25RU, PCGS# 8172

LIBERTY HALF EAGLES

- 4585** 1840 Narrow Mill AU58 PCGS. The 1840 half eagle is occasionally seen in circulated condition but becomes rare in Mint State. This near-Mint representative displays a bold strike with trivial friction over the high points of the design. Straw-gold surfaces yield remnants of luster and exhibit lightly scattered abrasions, as is typical of the grade and issue. Population: 13 in 58, 15 finer (10/15). NGC ID# 25SA, PCGS# 8194
- 4586** 1842-O — Improperly Cleaned — NGC Details. XF. An early New Orleans issue with a scant mintage of 16,400 pieces. This straw-gold representative is mildly bright but only inoffensively abraded. The strike is usual on Liberty's curls and the eagle's neck and legs. NGC ID# 25SZ, PCGS# 8212
- 4587** 1843 MS61 PCGS. The 1843 is one of the more collectible half eagles from this decade in Mint State, although such coins are still scarce in all grades. This piece is sharply rendered, even with die lapping having weakened the peripheral stars. The surfaces are attractively smooth and display warm straw-gold luster. Population: 14 in 61, 18 finer (10/15). NGC ID# 94FD, PCGS# 8213
- 4588** 1843-O Large Letters XF45 NGC. Variety 1. The reverse is lapped and cracked on this late die state example, although pleasing detail remains in the devices for the Choice XF level. Each is problem-free and displays medium olive-gold patina. The Large Letters variety is slightly more available than its Small Letters counterpart, although both are scarce in all grades. NGC ID# 25T6, PCGS# 8216
- 4589** 1844-D VF30 NGC. Variety 11-G. In the context of Dahlonega half eagles, the 1844-D is moderately collectible with as many as 500 pieces extant. The present coin is ideal for the budget-conscious type collector seeking a single representative from this mint. The design elements retain pleasing detail for the grade, and the olive-gold surfaces have expected small marks scattered about. NGC ID# 25T9, PCGS# 8221
- 4590** 1845-O XF45 PCGS. Variety 1. The 1845-O Liberty half eagle claims a mintage of 41,000 pieces and all examples seen show a lightly repunched date. Some light wear shows on the top of Liberty's hair and the eagle's wingtips, but the pleasing orange-gold surfaces are lightly abraded throughout. Population: 31 in 45, 38 finer (10/15). NGC ID# 25TD, PCGS# 8225

1847 Half Eagle, MS62+ Interesting Obverse Die Cracks

- 4591** 1847 MS62+ NGC. The 1847 is one of the more plentiful half eagles from this period, but Mint State examples are nonetheless scarce above the MS62 level. This Plus-graded representative boasts partially reflective fields and well-defined motifs. Yellow-gold surfaces show scattered abrasions but none are individually bothersome. There are a number of misplaced date varieties for this issue, but the present obverse is distinctive for a bisecting die crack that extends from the 1 in the date, through Liberty's eye, to the rim between stars 7 and 8. A second crack extends from star 3 to Liberty's mouth where it perpendicularly joins the first crack. Census: 46 in 62 (2 in 62+), 36 finer (10/15). NGC ID# 25TL, PCGS# 8231
- 4592** 1848-C XF45 NGC. Variety 1. Doug Winter notes that while the issue's mintage of nearly 65,000 coins is virtually identical to the 1849-C, the 1848-C is a much scarcer date. This Choice XF survivor is well-detailed considering the poor quality for which the Charlotte Mint is renowned. Minor softness occurs over several stars, curls, and the lower portion of the eagle. Minimally abraded. NGC ID# 25TT, PCGS# 8237
- 4593** 1848-C — Improperly Cleaned — NGC Details. AU. Variety 1. This Charlotte type coin has a pleasing strike by the standards of the remote branch facility. The surprisingly unabraded surfaces are moderately luminous from a long-ago wipe. Minor strike-throughs (as made) are near star 13 and the eagle's neck. NGC ID# 25TT, PCGS# 8237
- 4594** 1850-C Weak C XF45 NGC. Variety 4. With as many as 300 pieces extant, the 1850-C is among the more plentiful Charlotte half eagles from this period, ideal for type purposes. The mintmark on this often-seen variety is weakly impressed but remains visible on the current coin even to the naked eye. This piece is straw-gold with hints of luster and is well-detailed for the grade. NGC ID# 25U2, PCGS# 98244
- 4595** 1852-D XF45 NGC. Variety 32-V. A well-detailed Choice XF example of this collectible Dahlonega half eagle, this 1852-D displays medium straw-gold patina with the expected scattered abrasions that are typical of the grade. The border dentils are weakly defined, but the central devices are better struck. NGC ID# 25UC, PCGS# 8252
- 4596** 1852-D AU50 NGC. Variety 32-V. A butter-gold Dahlonega type coin with plentiful pockets of luster near the letters, stars, shield, and plumage. No marks merit mention. Characteristic of the Georgian facility, the curls, claws, and fletchings are lightly brought up. NGC ID# 25UC, PCGS# 8252
- 4597** 1855-S XF45 NGC. This Choice XF 1855-S half eagle will appeal to an array budget-conscious branch mint gold collectors, as finer representatives of this date are scarcely seen. This piece is well-detailed with partially lustrous green-gold surfaces and relatively few singular abrasions. Wear is primarily limited to the high points of the central devices. Census: 18 in 45 (1 in 45+), 73 finer (11/15). NGC ID# 25UU, PCGS# 8265

**1856-S Half Eagle, AU58
Seldom Seen This Fine**

4598 1856-S AU58 NGC. The 1856-S half eagle is available in lower and middle circulated grades but quickly becomes scarce in the upper AU tiers; Mint State examples are rarely seen and often show heavy abrasions. This near-Mint example offers partially lustrous honey-gold surfaces and well-detailed motifs. A lack of severe circulation scars delivers a high degree of eye appeal. Census: 17 in 58, 7 finer (10/15). NGC ID# 25UZ, PCGS# 8270

4599 1858-C — Improperly Cleaned — NGC Details. AU. Variety 1. Well defined for a Charlotte Mint product, this caramel-gold representative is mildly bright but shows plentiful glimmers of luster. A couple of moderate marks are noted near stars 8 and 9.

4600 1859 AU55 PCGS. The 1859 half eagle is scarce and underrated in all grades. About Uncirculated examples are rarely seen, and Mint State pieces are unobtainable by most collectors. This Choice AU representative is sharply detailed with luster remaining in the protected regions of the fields. Bright yellow-gold surfaces show scattered abrasions, consistent with the grade. Population: 7 in 55, 11 finer (10/15). NGC ID# 25VB, PCGS# 8280

4601 1872-S XF45 NGC. From a nominal mintage of 36,400 pieces, this Choice XF specimen shows some light wear on Liberty's hair and the eagle's neck and wingtips. The light antique-gold surfaces are lightly abraded throughout. Census: 16 in 45, 53 finer (10/15). NGC ID# 25WH, PCGS# 8327

4602 1873 Closed 3 MS61 PCGS. Half eagle coinage at the Philadelphia Mint in 1873 was evenly split between the Open 3 and Closed 3 date types, and the two varieties are similar in scarcity today. This Mint State Closed 3 example displays well-struck motifs and rich orange-gold luster. Scattered abrasions limit the grade. Population: 28 in 61, 37 finer (10/15). NGC ID# 25WK, PCGS# 8329

**1881-S Half Eagle, MS65
Only One Coin Certified Finer**

4603 1881-S MS65 NGC. Although the 1881-S half eagle had an identical mintage to the 1882-S (969,000 pieces), it is a slightly scarcer issue in Mint State. This Gem example is a significant condition rarity. The strike is bold and the frosty surfaces display vibrant green-gold luster. Census: 22 in 65, 1 finer (10/15). NGC ID# 25XF, PCGS# 8357

4604 1882-CC — Reverse Damage — NGC Details. Unc. Variety 1-A. This 1882-CC half eagle is well-struck with frosty green-gold luster and minimal abrasions, although a single gouge on the horizontal shield lines precludes a numeric grade. Nonetheless, Uncirculated examples of this Carson City issue are rare, and this piece will appeal to a number of budget-conscious collectors. NGC ID# 25XH, PCGS# 8359

**1882-S Half Eagle, MS65
Conditionally Rare**

4605 1882-S MS65 NGC. The 1882-S half eagle is available in grades through MS64, but Gems are rarely seen. This piece boasts vibrant, frosty luster with rich orange-gold highlights. The design elements are sharp, and there are no obtrusive abrasions. Excellent for type or date purposes. Census: 32 in 65 (2 in 65+), 3 finer (10/15). NGC ID# 25XJ, PCGS# 8360

4606 1883 MS64+ PCGS. Gem examples of the 1883 five dollar gold seldom make an appearance at auction, suggesting this high-end MS64 example with the PCGS Plus designation is an unsung rarity as well. The population report confirms it, since just two examples at this level have earned the Plus distinction and a mere four pieces are shown in finer grade. Softly lustrous, honey-gold surfaces display mint frost so thick the nearly mark-free fields and fully struck devices have a mattelike texture. Population: 20 in 64 (2 in 64+), 4 finer (10/15). NGC ID# 25XK, PCGS# 8361

**1885 Half Eagle, Frosty MS65
Few Known So Fine**

4607 1885 MS65 NGC. Most Uncirculated 1885 half eagles reside in grades from MS61 to MS63; Choice examples are infrequently seen, and Gems are decidedly rare. PCGS reports two pieces in MS65 or finer, NGC 14. This Gem is awash in frosty wheat gold luster and devoid of bothersome abrasions. Minor strike softness is seen on the hair curls around Liberty's face. Census: 13 in 65, 1 finer (9/15). NGC ID# 25XS, PCGS# 8367

4608 1885-S MS65 NGC. A scarce Gem example of this collectible San Francisco half eagle, showing sharp design elements and frosty peach-gold luster. A few trivial, scattered grazes preclude an even finer grade but are largely undetectable to the naked eye. NGC records 13 numerically finer representatives (10/15). NGC ID# 2Y7X, PCGS# 8368

4609 1891-CC AU55 NGC. Variety 2-A. The second 1 in the date is lightly repunched north. A smooth green-gold Carson City type coin. Luster fills the borders and devices. The strike is crisp throughout. NGC ID# 25Y5, PCGS# 8378

- 4610 1891-CC MS62 NGC. Variety 2-A.** While the 1891-CC half eagle is generally available and a logical selection for type, it can be challenging to find a nice Mint State coin. This example is minimally marked and frosty, with olive-gold accents that flash across the softly lustrous surfaces. The strike is first-rate. Struck from one of two die pairs used for the issue, this one with a narrowly repunched second 1 in the date. NGC ID# 25Y5, PCGS# 8378

**1892 Liberty Half Eagle, MS66
Razor-Sharp Details**

- 4611 1892 MS66 NGC.** High-grade examples of the 1892 half eagle are scarce despite the mintage of about three-quarters of a million coins. This reddish-orange Premium Gem shows a sharp strike on Liberty's hair, the beads, the star centers, and throughout the reverse. Abrasions are minimal, in concert with the grade. Census: 21 in 66 (1 in 66 ★), 8 finer (10/15). NGC ID# 42AS, PCGS# 8379

**1892-S Five Dollar, MS64
None Finer at PCGS**

- 4612 1892-S MS64 PCGS.** This satiny rose-gold 1892-S Liberty five is among the finest at PCGS. Trivial softness on the hair curls around Liberty's face fails to affect the eye appeal, although faint chatter on the portrait and in the adjacent field does preclude a full Gem designation. The 1892-S is an underappreciated issue in Mint State, seldom seen without heavy abrasions. Population: 8 in 64, 0 finer (10/15). NGC ID# 25Y9, PCGS# 8382

- 4613 1893-CC AU55 NGC. Variety 1-A.** The variety is attributed by a centered date and high mintmark with a dull spike from a dentil below star 1. The 1893-CC usually displays rich, frosty luster, as seen within the protected regions of the Choice AU example. Well-defined reddish and khaki-gold surfaces are lightly abraded. NGC ID# 25YB, PCGS# 8384

- 4614 1893-O MS62 NGC. Variety 1.** The New Orleans Mint preferred the ten dollar denomination during its postwar service, but Liberty fives were coined there between 1892 and 1894. The 1893-O is the most collectible, since its 110,000-piece mintage is four times greater than the other two issues combined. The present apricot-gold example has good luster and a nice strike. An obverse rim mark is noted at 10 o'clock. NGC ID# 25YC, PCGS# 8385

- 4615 1895 MS65 NGC.** Available through MS63, the 1895 half eagle becomes elusive at the Choice level and is particularly challenging in MS65. This frosty Gem is sharply struck and well-preserved with rich orange-gold luster. Census: 79 in 65 (3 in 65+), 13 finer (10/15). NGC ID# 25YH, PCGS# 8390

- 4616 1898 MS64 NGC.** The 1898 Liberty half eagle is surprisingly elusive in grades above the MS64 level. This sharply detailed Choice example offers well-preserved greenish-gold surfaces and vibrant mint luster throughout. NGC has graded 35 numerically finer examples (10/15). NGC ID# 25YP, PCGS# 8396

**1906 Five Dollar, MS66
Frosty, Conditionally Rare**

- 4617 1906 MS66 NGC.** Relatively little coin-to-coin contact was needed in early 20th century banks to mar the surfaces of gold pieces to the point of fitting the "bagmarked" descriptive. The survival of this essentially untouched Premium Gem is remarkable. This rare coin displays frosty straw-gold luster and blemish-free surfaces. Trivial strike weakness is seen on the hair curls around Liberty's face. Census: 28 in 66 (2 in 66+, 1 in 66 ★), 10 finer (10/15). NGC ID# 25Z9, PCGS# 8413

INDIAN HALF EAGLES

- 4618 1908 MS63 PCGS.** This debut Indian Head five is usually available, widely popular among type collectors. The present Select example offers sharp design elements and satiny yellow-gold luster. Light, scattered abrasions in the fields define the grade. NGC ID# 28DE, PCGS# 8510

**1908 Indian Head Five, MS64+
Attractive Type Coin**

- 4619 1908 MS64+ PCGS. CAC.** This Plus-graded near-Gem type coin boasts sharp design elements recessed amid satiny yellow-gold luster that is largely free of abrasions. The 1908 Indian half eagle survives in greater quantity in high grade than most other dates in the series, benefiting from its novelty appeal as the first of the Pratt design. Only the 1909-D is more readily acquired. NGC ID# 28DE, PCGS# 8510

- 4620 1908-D MS64 PCGS.** Orange-kissed yellow-gold surfaces are luminous with devices well-defined everywhere but the bottom of the necklace. This well-preserved 1908-D half eagle has just 11 superiors in MS65 or better at PCGS (10/15).
Ex: FUN Signature (Heritage, 1/2012), lot 6415.
From The Leon Hendrickson Collection. NGC ID# 93KW, PCGS# 8511

- 4621 1909-D MS64+ PCGS. CAC.** A high-end Choice example of this popular Indian Head type issue, this 1909-D half eagle displays vibrant mint luster and only minor signs of contact. The sharpness of the design elements is impressive.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5081.
From The Leon Hendrickson Collection. NGC ID# 28DJ, PCGS# 8514

**1909-S Five Dollar, MS62
Seldom Seen in Mint State**

4622 1909-S MS62 NGC. Despite a mintage of nearly 300,000 coins, the 1909-S half eagle is a better date in Uncirculated grades, particularly above MS62. This piece is lightly abraded, but displays satiny olive-gold luster with hints of peach in the recesses. The strike is well-executed and the overall eye appeal is pleasing for the grade. Census: 73 in 62, 18 finer (10/15). NGC ID# 25ZL, PCGS# 8516

4623 1910-D MS62 PCGS. The 1910-D Indian half eagle has proven quite challenging in Mint State. This piece is lightly abraded, as the grade suggests, but displays eye appeal superior to that of most other MS62s. The strike is sharp, and the surfaces show medium yellow-gold luster. NGC ID# 28DL, PCGS# 8518

4624 1910-S MS61 NGC. Elusive in Mint condition, the 1910-S half eagle is actually rare any finer than MS62, despite a moderately high mintage of 770,200 coins. Rich honey-gold toning, with occasional coppery accents, increases the eye appeal of this lustrous example. The mintmark is softly defined but easy to identify under low magnification. NGC ID# 28DN, PCGS# 8519

**1910-S Indian Half Eagle, MS62
Very Scarce in Finer Grades**

4625 1910-S MS62 NGC. The 1910-S Indian half eagle had a fairly substantial mintage of more than 770,000 pieces, but Mint State survivors are disproportionately scarce, and are rarely seen above the MS62 grade level. This sharply struck coin is lightly abraded, but is nonetheless appealing for its undeniably original patina that includes shades of olive, honey, and russet. NGC has graded 34 numerically finer examples (10/15). NGC ID# 28DN, PCGS# 8519

4626 1911-S MS62 NGC. The 1911-S Indian half eagle is slightly scarcer in Mint State than its mintage of more than 1.4 million pieces would suggest. This example is moderately well-struck with satiny green-gold luster. Scattered abrasions define the grade. NGC ID# 25ZM, PCGS# 8522

**1911-S Half Eagle, MS63
Deep Orange and Yellow Patina**

4627 1911-S MS63 PCGS Secure. This gorgeous Select Mint State piece has deep yellow-gold luster with peach-orange overtones. The surfaces are brilliant and frosty, and the design definition is bold. Here is a remarkable example of a date that is elusive in higher grades, with only 32 such pieces certified by PCGS (10/15). Ex: ANA Signature (Heritage, 8/2010), lot 6003; Long Beach Signature (Heritage, 5/2012), lot 5092. From The Leon Hendrickson Collection. NGC ID# 25ZM, PCGS# 8522

1914 Half Eagle, Well-Struck MS64

4628 1914 MS64 PCGS. The lustrous surfaces of this yellow-gold near-Gem display hints of light green and exhibit well-struck design elements, including the eagle's shoulder feathers. Scattered marks prevent Gem classification. Housed in a green label holder. PCGS reports only 32 pieces finer (10/15). NGC ID# 28DU, PCGS# 8527

4629 1916-S MS62 NGC. The 1916-S was the final Indian half eagle produced prior to the key-date 1929. As the only issue of the year for this denomination, an example is essential for a complete date set. This piece is slightly soft on the lower headdress feathers but displays pleasing olive-gold luster. Light surface chatter limits the grade. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

4630 1841 XF45 NGC. The 1841 Liberty eagle is more elusive than its mintage of 63,131 pieces would imply. This Choice XF specimen shows light wear on the top of Liberty's hair and the eagle's wingtips and neck, but the lightly abraded greenish-gold surfaces retain traces of original mint luster. NGC ID# 262H, PCGS# 8582

4631 1841 XF45 NGC. The 1841 eagle boasts one of the higher mintages of the period (63,131 coins) and as a result is among the more collectible issues. Nonetheless, high-grade examples are scarce. This Choice XF coin displays pleasing detail with bright yellow-gold surfaces. Scattered abrasions, including an old cut on Liberty's cheek, are not unusual for the grade and issue. NGC ID# 262H, PCGS# 8582

4632 1845 XF45 NGC. With a small mintage of 26,153 pieces, the 1845 gold eagle is scarce in all grades and prohibitively rare in Mint State. This Choice XF representative displays excellent detail for the grade with bright yellow-gold patina that shows hints of luster in the protected regions of the fields. Census: 23 in 45, 66 finer (10/15). NGC ID# 262U, PCGS# 8592

4633 1848-O XF45 NGC. Variety 1. An outstanding example of this elusive No Motto New Orleans issue, showing original antique-gold surfaces that have faint remnants of luster in the fields. Wear is light and even, and the surfaces are remarkably smooth and problem-free. Eye appeal is exceptional for the issue and grade. NGC ID# 2634, PCGS# 8600

4634 1849 AU58 NGC. The 1849 is one of the more available eagle issues from the 1840s, but Mint State pieces are scarce. This nearly Uncirculated representative displays trivial wear over well-struck design elements with remnants of luster in the fields. Yellow-gold in color with minimal abrasions. NGC ID# 2635, PCGS# 8601

4635 1850 Large Date AU50 PCGS. The 1850 Liberty eagle with a Large Date is more available than its Small Date counterpart. This attractive AU specimen shows a touch of wear on the hair and tip of the coronet, but the lightly abraded surfaces retain traces of original mint luster. Population: 40 in 50, 52 finer (10/15). NGC ID# 2637, PCGS# 8603

4636 1852 AU58 PCGS. CAC. The 1852 eagle is available in most circulated grades, but the population declines significantly in Mint State and upper AU levels. This near-Mint representative exhibits vivid orange-gold patina with scattered areas of luster in the fields. The peripheral stars are weakly defined, but the interior motifs are sharp. Population: 15 in 58, 16 finer (10/15). NGC ID# 263C, PCGS# 8608

4637 1853 — Improperly Cleaned — NGC Details. Unc. The rarity of the 1853 eagle in Mint State gives this lightly cleaned example moderate appeal. Luster remains in the fields and the reverse shows rich orange-gold color. The strike is bold and there are no major abrasions. A few trivial hairlines on the obverse are all that suggest an old cleaning. NGC ID# 263E, PCGS# 8610

4638 1854-O Small Date AU55 NGC. Variety 1. The 1854-O Small Date Liberty eagle splits a mintage 52,500 pieces with its Large Date counterpart. This Choice AU specimen shows just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Census: 55 in 55, 35 finer (10/15). NGC ID# 263H, PCGS# 8614

4639 1854-O Large Date XF45 PCGS. Variety 4. The 1854-O Large Date eagle was made in error when the diesinker mistakenly used a date punch for the silver dollar on this smaller die. Traces of luster are visible in the recessed areas of this Choice XF example. The yellow-gold surfaces display hints of green and exhibit well-defined motifs. PCGS reports fewer Large Date submissions in all grades (93) than Small Date coins (139). Population for the Large Date: 12 in 45, 70 finer (10/15). NGC ID# 263J, PCGS# 98614

4640 1854-O Large Date AU55 PCGS. Variety 2. The 52,500-coin mintage of the 1854-O eagle was split between those pieces with the Large Date logotype and those with the Small Date. The Large Date variety is slightly scarcer. This Choice AU example is struck from the low mintmark reverse die, which is seen far less often than the high mintmark reverse. The design elements are well-detailed and the yellow-gold surfaces retain glimpses of luster in the fields. Population: 13 in 55, 17 finer (10/15). NGC ID# 263J, PCGS# 98614

4641 1855-O — Improperly Cleaned — NGC Details. AU. Variety 2. With a mintage of 18,000 pieces, the 1855-O eagle is scarce in all grades. Most examples grade XF or lower, and Mint State pieces are almost unobtainable. This coin displays well-struck design elements with little wear. Bright yellow-gold surfaces show scattered hairlines, and residual putty in the reverse shield recesses confirms an old cleaning. NGC ID# 263M, PCGS# 8617

1856 Liberty Eagle, MS60
Lustrous, Original Patina

4642 1856 MS60 NGC. A rare Uncirculated example of this otherwise available Philadelphia issue, showing satiny orange-gold luster with an attractive shimmer when turned in-hand. There are no significant abrasions, but light chatter over each side limits the grade. The peripheral stars lack full definition, although the interior motifs are boldly rendered. Census: 13 in 60, 16 finer (10/15). NGC ID# 263P, PCGS# 8619

1856-S Eagle, Partially Lustrous AU58

4643 1856-S AU58 NGC. Due to the rarity of higher-grade examples, this near-Mint 1856-S ten dollar will appeal to a wide range of budget-conscious enthusiasts. The strike is well-executed, and the motifs show little wear. Luster remains in the protected regions of the fields amid warm honey-gold coloration. Census: 37 in 58, 2 finer (10/15). NGC ID# 263S, PCGS# 8621

1856-S Liberty Eagle, AU58
Only Two Finer Coins at NGC

4644 1856-S AU58 NGC. Medium S. The plentiful supplies of California gold ensured a substantial mintage for the 1856-S eagle, at 68,000 coins, but most went directly into the hard-money-oriented commercial channels of the Old West. This near-Mint State example is far finer than usually seen, with generous luster clinging to well-struck orange-gold surfaces. Census: 37 in 58, 2 finer (10/15). NGC ID# 263S, PCGS# 8621

**1861 Liberty Ten, AU58
Very Scarce Any Finer**

- 4645 1861 AU58 PCGS.** Rounded hair bun hub. A pumpkin-gold example of this popular Civil War issue. A band of luminous luster fills both borders. A number of small marks are noted in the fields, though none of them merit individual mention. Population: 34 in 58, 33 finer (10/15).

Ex: Central States Signature (Heritage, 4/2006), lot 3955, which realized \$2,300. NGC ID# 2647, PCGS# 8633

- 4646 1861-S VF20 NGC.** Although its small mintage of 15,500 pieces is not unusual for Civil War-era gold eagles, the 1861-S ten is a scarce coin in all grades. The combined NGC and PCGS population of 139 pieces is likely inflated by resubmissions, and only a single Mint State example is known. This midgrade representative displays pleasantly smooth olive-gold surfaces and even wear. Census: 1 in 20, 78 finer (10/15). NGC ID# 55H3, PCGS# 8634

**1865-S Ten Dollar, XF45 Details
865 Over Inverted 186**

- 4647 1865-S 865 Over Inverted 186 — Mounts Removed, Damaged — ANACS. XF45 Details.** Mount removal is mostly hidden by the holder, leaving only scattered tooling and polishing visible to the unaided eye. The motifs remain well-detailed, and the surfaces display bright yellow-gold color. The Inverted 186 variety is slightly more plentiful than its Normal Date counterpart, but any 1865-S eagle is rare. Fewer than 100 pieces are thought to be extant in all grades. NGC ID# 28ED, PCGS# 8643

**1868-S Eagle, Conditionally Rare
Choice About Uncirculated**

- 4648 1868-S AU55 PCGS.** Except for 1875, the San Francisco Mint struck ten dollar gold every year between 1854 and 1889. Mintages were quite low between 1855 and 1878, and usually the output did not reach 20,000 pieces. The 1868-S is a typically rare issue where only 13,500 pieces were struck, and from the few survivors PCGS and NGC have yet to certify a Mint State example. No one collected eagles by date and mintmark in the Old West, where such pieces were strictly regarded as bullion until the next century. This pleasing piece displays fantastic rich, orange-gold color, a reasonably sharp strike, and no obtrusive bagmarks. Nearly full mint luster remains. Population: 6 in 55, 3 finer (10/15). NGC ID# 264P, PCGS# 8654

- 4649 1874 MS61 PCGS.** The 1874 is among the more plentiful issues in the series to that point, but it can hardly be regarded as such in Uncirculated grades, where it is rare. This example has good definition and radiant luster over lightly abraded rose-gold surfaces. A singular linear depression occurs left of the chin. Population: 25 in 61, 15 finer (10/15). NGC ID# 2657, PCGS# 8669

**1879 Liberty Ten, Frosty MS63
Elusive This Well-Preserved**

- 4650 1879 MS63 PCGS.** A boldly struck, frosty example of this conditionally elusive Philadelphia eagle, showing warm rose interior hues amid otherwise vibrant green-gold luster. There are no severe abrasions, only trivial chatter limiting the grade. Finer examples will prove extremely difficult to acquire. Population: 28 in 63, 12 finer (10/15). NGC ID# 265M, PCGS# 8683

- 4651 1882 MS64 NGC.** Boldly gold-orange margins give way to a mix of peach and pale yellow with blue tinges. Excellent detail is seen on both Liberty's portrait and the surrounding stars. Census: 50 in 64 (1 in 64 ★), 1 finer (10/15). NGC ID# 2662, PCGS# 8695

- 4652 1882-S MS62 NGC.** A conservative mintage of 132,000 pieces offers many Mint State examples clustered in the MS60 to MS62 levels, but few coins certified any finer. This flashy, medium-gold example displays Mint-fresh luster and a sharp strike. Abrasions consist of light marks and no heavy hits. NGC reports just 25 numerically finer coins (10/15). NGC ID# 55GK, PCGS# 8698

- 4653 1884-CC XF45 PCGS. CAC. Variety 1-A.** Prominent die scratches appear near Liberty's eye and under the ear. Few survivors from a mintage of 9,925 coins rival this Choice XF example for its eye appeal. Blatantly original green and reddish-gold surfaces show minor friction over typically struck motifs. Gold specialists will appreciate this offering and should bid accordingly. NGC ID# 266B, PCGS# 8704

4654 1886 MS62 NGC. One of several ten dollar gold issues that saw their population change with repatriates from European accumulations. This lustrous example seems positioned at the top end of the MS62 grade, with relatively few bagmarks and attractive rich-gold patina. Sharp definition is present on the motifs. NGC reports just 31 numerically finer examples (10/15). NGC ID# 266F, PCGS# 8708

4655 1888-S MS63+ PCGS. A well-struck, frosty example of this conditionally elusive San Francisco issue, showing minimally abraded orange-gold luster with lilac and rose highlights throughout. PCGS reports four MS64 examples finer, one of which was recovered in the Saddle Ridge Hoard (11/15). NGC ID# 266M, PCGS# 8714

4656 1892 MS63+ PCGS. Nearly 800,000 1892 ten dollar gold pieces were struck in Philadelphia, making it one of the more available issues in the series. Even so, high-end examples command a premium and this lustrous coin qualifies. Bright cartwheel mint luster rolls across the fully struck, rich-gold surfaces. The eye appeal is exceptional for the Select Uncirculated level. Population: 3 in 63+, 23 finer (10/15). NGC ID# 266V, PCGS# 8721

1893 Ten Dollar, MS63 Prooflike Elusive in This Format

4657 1893 MS63 Prooflike NGC. The 1893 ten dollar, with a generous mintage exceeding 1.8 million pieces and a high survival rate, is one of the most common and available issues in the Liberty Head eagle series. Examples with a prooflike finish, however, are another story. NGC has graded only about 160 coins in this format, mostly in MS60 to MS62 Prooflike.

Deep reddish-gold patination adorns both sides of this Select example. Sharply struck design elements and pleasing field-motif contrast further enhance the coin's visual allure. Scattered light marks do little to inhibit the remarkable eye appeal. This is a great acquisition for the ten dollar gold specialist. Census: 24 in 63 Prooflike, 1 finer (10/15). NGC ID# 266Z, PCGS# 78725

1893 Ten Dollar, MS64 Prooflike Only One Other So Graded, None Finer

4658 1893 MS64 Prooflike NGC. A surprising number of Prooflike 1893 tens have been certified by NGC (162 pieces), but MS64 is the finest and only one other coin shares that lofty grading level. The fields on this coin display remarkable depth of reflectivity and are balanced in appearance from side to side. Even reddish-golden color is seen throughout with the expected number of small abrasions for the grade. Sharply struck in all areas. NGC ID# 266Z, PCGS# 78725

4659 1895 MS61 Prooflike NGC. The 1895 eagle is infrequently located with a prooflike format. Indeed, of the more than 11,000 ten dollar pieces graded by NGC, a mere 22 examples are given this designation. Deep reddish-gold patination covers both sides of this sharply struck MS61 Prooflike coin. Scattered contact marks limit the grade. Census: 11 in 61 Prooflike, 8 finer (10/15). NGC ID# 2678, PCGS# 78732

1899 Ten Dollar, MS65 Suitable for Type Purposes

4660 1899 MS65 NGC. A plethora of 1899 eagles resides in MS64 and lower grades, but the number of Gems known is significantly smaller. This piece displays rich orange-gold luster and sharply rendered design elements. A tiny tick on Liberty's chin is the only abrasion of note. NGC lists 22 finer representatives (10/15). NGC ID# 267J, PCGS# 8742

4661 1899-S MS63 NGC. The 1899-S ten dollar is scarce in the Select level of preservation and rare any finer. Apricot-gold surfaces possess sharply struck design elements and yield pleasing luster. A few minute marks determine the grade. Census: 69 in 63 (1 in 63+), 17 finer (10/15). NGC ID# 267L, PCGS# 8744

4662 1901-S MS64+ NGC. Lustrous surfaces add to the eye appeal of this high-end near-Gem. The design elements display a high degree of detail, further adding to the attractive appearance. A few minuscule dark flecks are present when viewed beneath a loupe. NGC ID# 267S, PCGS# 8749

4663 1901-S MS64+ PCGS. This radiant, sun-gold eagle is a high-end near-Gem, brilliantly lustrous and fully struck. The frosty surfaces display a Mint-fresh appearance that is often seen from this San Francisco issue, which was generally well-produced from a mintage of more than 2.8 million pieces. The Plus designation signals an attractive opportunity for type and gold specialists. NGC ID# 267S, PCGS# 8749

4664 1901-S MS65 NGC. Readily available, the 1901-S eagle is popular for type purposes. This Gem example boasts sharp design elements illuminated by vibrant straw-gold luster. A few trivial ticks are not out of line for the grade. NGC ID# 267S, PCGS# 8749

4665 1902-S MS64 NGC. Aside from some softness on the lower stars, the design elements of this impressive Choice example are sharply detailed, and the brightly lustrous surfaces are minimally marked. NGC ID# 267U, PCGS# 8751

4666 1903-O MS62 PCGS. Variety 2. Mint State examples of this New Orleans issue are elusive with pleasing eye appeal. This MS62 coin is lightly abraded, as the grade suggests, but original orange-gold luster and sharp design elements balance the visual attributes. NGC ID# 267W, PCGS# 8753

4667 1903-S MS64+ PCGS. The 1903-S is the only issue in the Liberty ten series with a higher third party population in MS64 than in MS62. But MS64+ pieces are certainly rare, with only 14 examples graded as such at PCGS (10/15). This caramel-gold near-Gem is boldly struck, lustrous, and free from any relevant marks. NGC ID# 267X, PCGS# 8754

**1903-S Ten Dollar, MS65
Frosty and Well-Preserved**

4668 1903-S MS65 PCGS. The availability of the 1903-S Liberty eagle drops of significantly at the Gem grade level, and finer pieces are scarcely seen. This example offers sharp design elements and vibrant, frosty luster in honey and orange-gold hues. A few trivial grazes are all that preclude an even finer grade. Population: 62 in 65 (4 in 65+), 23 finer (10/15). NGC ID# 267X, PCGS# 8754

4669 1906-D MS64 PCGS. CAC. Struck during the first year of coinage at the Denver Mint, this apricot-gold near-Gem exhibits a precise strike and potent luster. Both sides are exceptionally smooth aside from a brief mark near the D in UNITED. NGC ID# 2685, PCGS# 8760

4670 1907-D Liberty MS63 NGC. CAC. Ex: Eric P. Newman Collection. Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins*, write of this issue: "The 1907-D eagle represents a classic example of why mintage figures should be discounted when determining rarity. In this case, the mintage of more than one million pieces makes the 1907-D eagle appear common, when it is really a semi-scarce date." Most surviving Mint State examples are heavily abraded, and those grading finer than MS64 are prohibitively rare. This luminous yellow-gold representative boasts unusually strong visual appeal for the grade, with the grade-limiting surface flaws being uniformly light and dispersed. A sharp strike further heightens the overall appeal.
Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3325. NGC ID# 268A, PCGS# 8764

INDIAN EAGLES

4671 1907 No Periods MS62 PCGS. The yellow-gold surfaces of this ten dollar exhibit well-struck design elements and just a few minuscule marks. Satiny mint luster radiates boldly from both sides. This is an appealing first-year type coin that is just a shade from the next highest grade. NGC ID# 28GF, PCGS# 8852

4672 1908 Motto MS63 NGC. A pleasing first-year With Motto type coin, showing well-struck devices, satiny luster, and orange-gold color. Light abrasions on Liberty's cheek limit the grade, but they are not overly detracting. The With Motto issue accounts for most of the Philadelphia eagle production in 1908 (341,300 pieces). NGC ID# 28GJ, PCGS# 8859

4673 1908 Motto MS63 PCGS. With Motto coins represent the vast majority of Indian Head eagles manufactured at the Mint in 1908 (341,370 pieces struck). The strike is typically bold for the issue. Green-gold surfaces show a majority of grade-limiting abrasions in the fields, particularly the left obverse, while Liberty's cheek is relatively clean. NGC ID# 28GJ, PCGS# 8859

4674 1909 MS62 PCGS. The yellow-gold surfaces of this eagle display hints of green and exhibit notably well-struck design elements, with only slight blending at the eagle's shoulder. The fine-grained surfaces retain most of the luster and show a minimal number of scattered marks and scuffs. NGC ID# 28GM, PCGS# 8862

4675 1909 MS62 NGC. An eye-appealing example for the grade, this Uncirculated 1909 Indian eagle displays rich orange-gold luster and boldly rendered design elements. There are no singularly bothersome abrasions, only light surface chatter on the obverse. NGC ID# 28GM, PCGS# 8862

4676 1909 MS63 NGC. Wheat-gold surfaces display copper-orange accents and vibrant luster, generating excellent eye appeal throughout this well-struck Select eagle. The exposed areas show surprisingly few marks for the grade, with small ticks largely hidden within the design elements. Locating a finer example will prove exceedingly difficult. NGC ID# 28GM, PCGS# 8862

4677 1909-D MS62 NGC. Satiny luster glimmers over granular straw-gold surfaces. The overall impression is strong with a trace of softness over the hair strands, lower headdress feathers, and upper portion of the eagle's wing — all normal for the date. A total of 121,540 coins makes up the entire 1909-D mintage, and survivors are scarcely seen finer. NGC ID# 28GN, PCGS# 8863

**1909-S Ten Dollar, MS62
CAC-Approved Quality and Appeal**

4678 1909-S MS62 NGC. CAC. The 1909-S was struck to the extent of 292,350 coins, but examples are only scarcely seen in Uncirculated grades. MS62 is about the finest grade that can still be considered collectible. Select representatives are decidedly more challenging. Khaki-gold coloration and frosty luster combine over this CAC-approved example. Liberty's hair strands and lower headdress feathers are lightly impressed, but the eagle's shoulder and breast feathers are crisp. NGC ID# 28GP, PCGS# 8864

4679 1910-D MS64 NGC. A well-struck orange-gold Choice Indian type coin. Lustrous and attractive with a pristine obverse field and a smooth reverse save for marks near the M in UNUM. For the issue, the MS64 grade is the best compromise between quality and value. NGC ID# 28GS, PCGS# 8866

4680 1910-S MS62 PCGS. The 1910-S is the most elusive issue in mint condition among the P, D, and S-mint eagles of 1910. Peach and khaki-gold hues blend with frosty luster over moderately granular surfaces. Typical incompleteness affects 19, the lower headdress feathers, and the eagle's shoulder and leg. Lightly abraded with a reeding mark across the jawline. NGC ID# 268D, PCGS# 8867

4681 1911 MS64 PCGS. The fine-grained surfaces of this highly attractive near-Gem ten dollar offer exceptional eye appeal, with rose and lilac highlights over lustrous, sun-gold surfaces. The strike is sharp, too, including the trouble spots on the bonnet and the eagle's shoulders and legs. There are no individually significant marks, just a few light nicks that are visible with a lens. A visually and technically pleasing coin in all ways for the assigned grade. NGC ID# 28GT, PCGS# 8868

4682 1911 MS64 PCGS. This impressive Indian ten dollar gold piece displays lightly marked orange-gold surfaces with original frosty mint luster on both sides, and well-detailed design elements throughout. A pleasing example for the cost-conscious collector. NGC ID# 28GT, PCGS# 8868

1912 Eagle, Lustrous MS64+

4683 1912 MS64+ PCGS. The 1912 ten dollar is available through near-Gem but becomes more difficult to locate any finer. Indeed, PCGS has seen only about 45 submissions in Gem and higher grades (10/15). Yellow-gold lustrous surfaces endow this MS64+, complemented by well-struck design elements. Occasional light marks determine the grade. NGC ID# 28GW, PCGS# 8871

4684 1912-S MS61 NGC. Wheat-gold color prevails over each side of this frosty S-mint eagle. Blushes of reddish-gold appear at the upper reverse. A die crack encircles most of the obverse rim. Notable abrasions occur on Liberty's temple, neck, and headdress. An uneven strike shows softness over the lower feathers and the eagle's shoulder. NGC ID# 269G, PCGS# 8872

4685 1912-S MS61 PCGS. This impressive Mint State example displays vivid orange-gold surfaces, with a scattering of minor contact marks on both sides and much original mint lustre. The design elements are well-detailed and the overall presentation is quite pleasant. NGC ID# 269G, PCGS# 8872

4686 1912-S MS61 NGC. A well-struck, satiny example with bright yellow-gold luster. Minor surface chatter on Liberty's cheek and in the fields limits the grade but poses little distraction. This issue becomes significantly harder to obtain above the MS62 level. NGC ID# 269G, PCGS# 8872

4687 1913-S AU53 NGC. A small production of 66,000 coins ranks the 1913-S among the most sought-after issues in the series. Moderately granular khaki-gold surfaces display a slight reddish tinge and softly frosted luster. Well-struck with light friction and tiny ticks peppered throughout. NGC ID# 28GZ, PCGS# 8874

4688 1914-S AU58 PCGS. San Francisco Indian tens are conditionally rare in Mint State, since most pieces participated in West Coast commerce instead of residing in European bank hoards. The present lightly worn peach-gold example retains substantial cartwheel luster and is free from mentionable abrasions. NGC ID# 28H4, PCGS# 8877

4689 1914-S AU58 PCGS. CAC. Slight wear over the high points of the eagle and obverse portrait prevent an Uncirculated designation on this otherwise well-struck and lustrous 1914-S eagle. The wheat-gold surfaces are free of severe abrasions, although significant die erosion is evident in the fields. NGC ID# 28H4, PCGS# 8877

**1915 Indian Ten, MS64+
Scarce in Higher Grades**

4690 1915 MS64+ NGC. The 1915 Indian eagle is a plentiful date in the series but it becomes very scarce in grades above the MS64 level. This high-end Choice example displays sharply detailed design elements and vibrant mint luster, with well-preserved green and rose-gold surfaces. Eye appeal is terrific. NGC ID# 28H5, PCGS# 8878

**1915-S Ten Dollar, Lustrous AU58
Surprisingly Attractive for the Grade**

4691 1915-S AU58 NGC. The 1915-S is a better date in the Indian eagle series, boasting a low mintage of 59,000 coins and a comparably small survival rate in high grade. The present near-Mint example is visually finer than most lower-end Uncirculated pieces, showing smooth, satiny luster and a rich array of color that includes bronze, lilac, rose, and orange-gold. A trace of friction over Liberty's cheek and the high points of the eagle's shoulder and talons is all that sets this piece apart from the Mint State category. NGC ID# 28H6, PCGS# 8879

4692 1926 MS64 NGC. An impressive near-Gem with only minimal surface marks, this piece exhibits faint pinkish overtones on its satiny yellow-gold surfaces.
Ex: Rosemont Signature (Heritage, 4/2008), lot 9498; Fall ANA Signature (Heritage, 10/2012), lot 6127. NGC ID# 28H9, PCGS# 8882

4693 1926 MS65+ NGC. The 1926 is a late-date anomaly struck to the extent of more than 1 million coins. Examples are collectible through MS65, though Plus-designated coins only represent about 1% of all certified Gems. This lovely rose-gold example has frosty luster over sharply struck relief elements. Each side is free of noteworthy contact. NGC reports 52 finer submissions (11/15). NGC ID# 28H9, PCGS# 8882

4694 1932 MS64 NGC. The lustrous, yellow-gold surfaces of this near-Gem eagle are imbued with hints of rose and lime-green and exhibit well-struck design elements. Some scattered obverse marks, including a rim bruise at 11 o'clock, prevent Gem classification. NGC ID# 28HB, PCGS# 8884

**1932 Ten Dollar, MS65+
Frosty Indian Head Type Coin**

- 4695** 1932 MS65+ PCGS. Miraculously, the 1932 Indian eagle managed to escape the gold confiscation that was enacted just one year after its production and remains plentiful for type purposes today. This high-end Gem is boldly struck and displays the radiant, frosty luster for which the issue is well-known. Blushes of pale rose-gold in the central regions add modest color to the otherwise wheat-gold surfaces. No major abrasions appear beneath a loupe. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

- 4696** 1850 — **Cleaning** — PCGS Genuine. AU Details. An affordable, yet, well-detailed example of this inaugural double eagle issue, displaying bright yellow-gold surfaces and trivial wear. Minor, scattered abrasions are typical of the issue and grade, and faint hairlines denote old cleaning. NGC ID# 268F, PCGS# 8902

**1851-O Twenty Dollar, AU Details
Popular Southern Gold Issue**

- 4697** 1851-O — **Improperly Cleaned** — NGC Details. AU. Variety 2. The mintmark is positioned just left of center over the N, and the left foot of the first 1 is centered between two dentils. Each side of this New Orleans twenty dollar gold coin exhibits light green-gold color and glimpses of original mint luster near the legends and other protected regions. Stars 1 to 5 are flat, but the other design elements are well-defined. Unsurprisingly, myriad marks appear throughout. A popular Southern gold issue for type purposes.

**1851-O Double Eagle, AU Details
Pleasing Color**

- 4698** 1851-O — **Improperly Cleaned** — NGC Details. AU. Variety 1. A pleasing New Orleans type coin, this 1851-O double eagle shows well-defined motifs and relatively smooth surfaces. Light hairlines, faintly evident with a loupe, expose a light cleaning, although each side displays attractive olive-gold patina with deeper orange-gold overtones in the protected areas. A small planchet lamination is seen on the obverse near star 1. NGC ID# 268J, PCGS# 8905

**1852 Twenty Dollar, AU53
Partially Lustrous Fields**

- 4699** 1852 AU53 NGC. Attractive yellow-gold surfaces display generally well-defined design elements, as well as residual luster in the protected areas. We note fewer contact marks than what might be expected. The S.S. *Central America* and S.S. *Republic* wrecks contained about 130 1852 double eagles.
Ex: FUN Signature (Heritage, 7/2007), lot 2813. NGC ID# 268K, PCGS# 8906

- 4700** 1853 AU53 NGC. Moderate luster remains in the protected regions of the fields on this About Uncirculated 1853 double eagle. The obverse is lightly die lapped, but the boldness of the motifs is unaffected. The straw-gold surfaces are smooth and problem-free. NGC ID# 268M, PCGS# 8908

**1854 Small Date Twenty, AU55
Scarce Repunched Date Variety**

- 4701** 1854 Small Date AU55 PCGS. Breen-7167. The date is clearly repunched southwest, most prominently on the flag of the 1, the 5, and the 4. Doug Winter notes that only around 5% of Small Date coins are of this variety. Brightly lustrous yellow-gold surfaces showcase full star centers, strong hair detail, and crisp feathers. Each side is moderately abraded, and a small planchet void occurs near the dentils between stars 9 and 10. A pleasing Type One double eagle. NGC ID# 268R, PCGS# 8911

**1854 Small Date Twenty, AU55
Sharp, Partially Lustrous**

- 4702 1854 Small Date AU55 NGC.** The Small Date 1854 double eagle is far more plentiful than its Large Date counterpart, but neither variety is particularly available in the upper AU grades, and Mint State 1854 twenties are rare. This partially lustrous Small Date example is surprisingly sharp throughout despite minor die lapping on the obverse. Smooth surfaces display original olive-gold patina. NGC ID# 268R, PCGS# 8911

- 4703 1855-S XF45 PCGS.** An appealing Choice XF Type Two twenty with generally olive-gold patina that has wisps of copper-tinted luster in protected regions. A bagmark affects the E in TWENTY, but an old, toned-over reed mark near star 5 on the obverse is not as severe as it appears at first glance.
Ex: Long Beach Signature (Heritage, 5/2009), lot 1822. NGC ID# 268X, PCGS# 8916

**1855-S Bold S Twenty, AU53
From the S.S. Central America**

- 4704 1855-S AU53 PCGS. CAC. Variety 14-E.** *Ex: S.S. Central America, SSCA 6488.* Large bold S. This is one of the earlier S-mint varieties found aboard the doomed S.S. *Central America*, which sank in 1857. Lustrous yellow-gold surfaces are sharply struck throughout and show a scattering of mostly light marks and grade-consistent circulation wear.
Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 10075. NGC ID# 268X, PCGS# 8916

- 4705 1857-S — Environmental Damage — PCGS Genuine. Unc Details.** This coruscating caramel-gold double eagle has the look of a Gem upon cursory inspection, but the obverse is mildly granular near stars 1 and 11. Likely from the S.S. *Central America* shipwreck, the coin is an example of Variety 20C, which was recovered in quantity in high grades. An opportunity for those in search of eye appeal at a reasonable price. NGC ID# 2696, PCGS# 8922

- 4706 1858-S XF45 NGC.** A radiant straw-gold example from the early days of the San Francisco Mint. The strike is typical, and traces of luster remain at the periphery of the moderately marked surfaces.
Ex: Dallas Signature (Heritage, 10/2006), lot 3190. NGC ID# 2699, PCGS# 8925

- 4707 1860 XF45 NGC.** Eye appeal is exceptional for the Choice XF grade, including areas of semiprooflike mirroring in the fields and well-detailed relief elements. Bright yellow-gold surfaces fail to reveal any noteworthy abrasions, although light chatter is present. NGC ID# 269D, PCGS# 8929

**1861 Double Eagle, Lustrous AU55
Perfect No Motto Type Coin**

- 4708 1861 AU55 PCGS.** The issue's historically significant date and ready availability explain the popularity of the 1861 double eagle among type enthusiasts. This Choice AU No Motto twenty is ideal for the budget-minded collector looking for a lustrous, sharply struck example. Bright lemon-gold surfaces showcase rose accents and abundant mint frost. The stars have full centers, the date is bold, and the feathers are crisply defined with inconspicuous blending over the curls and bun. Wispy marks are mostly shallow and undistracting. NGC ID# 269G, PCGS# 8932

**1864-S Double Eagle, AU50
Deep Old-Time Patina**

- 4709 1864-S AU50 NGC.** Most of the higher-end 1864-S double eagles known originated in the S.S. *Republic* and S.S. *Brother Jonathan* shipwrecks. Old-time AU examples, such as this piece, are scarcely seen. This coin is well-detailed with medium olive-gold patina that displays hints of orange-gold luster in the protected regions of the fields. NGC ID# 269T, PCGS# 8942

- 4710 1873 Open 3, Doubled Die Obverse, FS-101, MS61 PCGS.** Doubling on LIBERTY is the pickup point on this Open 3 *Cherrypickers'* variety. This Uncirculated example displays frosty, original luster with grade-consistent, scattered abrasions. The strike is well-executed, and the overall eye appeal is pleasing for the MS61 level. PCGS# 148749 Base PCGS# 8967

**1873 Open 3, Doubled Die Obverse Double Eagle, MS62
A Well-Struck Example**

- 4711 1873 Open 3, Doubled Die Obverse, FS-101, MS62 PCGS. CAC.** Doubling is evident on LIBERTY and the beads around the headband. The 1873 Liberty double eagle with an Open 3 in the date is one of the more available Type Two issues and a favorite choice of type collectors. This attractive well-struck MS62 example displays lustrous peach-gold surfaces with the expected number of minor contact marks for the grade. PCGS# 148749 Base PCGS# 8967

- 4712 1873-S Closed 3 MS60 NGC.** Brilliant luster flows across both sides of this Mint-fresh twenty, which features the Closed 3 date logotype. Open 3 coins are seen less frequently than the Closed 3 survivors. Myriad small abrasions dot the sharply struck surfaces, yet the vibrant luster and rich-gold color give this MS60 double eagle nice appeal. NGC ID# 26AL, PCGS# 8969

**1874-CC Twenty Dollar, AU Details
Affordable Carson City Twenty**

- 4713 1874-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A.** The partially lustrous surfaces of the 1874-CC double eagle are slightly softened by light cleaning but nonetheless exhibit pleasing bronze-gold coloration. The protected areas of the fields have modest reflectivity, and the design elements are well-defined. A few scattered reed marks are the only mentionable abrasions. NGC ID# 26AP, PCGS# 8971

- 4714 1875-CC — Improperly Cleaned — NGC Details. Unc. Variety 1-B.** Always the preferred Carson City double eagle for type, this example retains appeal despite a light cleaning. Luster remains, albeit subdued, on the obverse while the reverse is more normally lustrous. Tiny abrasions exist, but most require a lens. A small russet area of toning on the reverse at 9 o'clock may be an alloy spot, or a stain possibly related to the cleaning. NGC ID# 26AT, PCGS# 8974

**1876-CC Twenty Dollar, XF45
Elusive Wide CC Mintmark**

- 4715 1876-CC XF45 NGC. CAC. Variety 3-D.** Breen called this Wide CC variety rare, and it is seldom offered today in any grade. This Choice XF example offers hints of luster in the protected regions of the fields amid medium green-gold color. Wear is minimal with the central devices retaining most details. A CAC endorsement accompanies pleasantly smooth surfaces. NGC ID# 26AW, PCGS# 8977

- 4716 1877-S AU58 PCGS.** Light wear on the highest points and minor abrasions across the attractive, rich-gold fields determine the near-Mint grade. Nearly full mint luster remains, as do some isolated orange-gold highlights that enhance the already considerable eye appeal. An attractive Type Three candidate from the San Francisco branch mint. NGC ID# 254B, PCGS# 8984

**1878 Twenty Dollar, MS62+
Frosty and Strongly Struck**

- 4717 1878 MS62+ NGC.** Mike Fuljenz notes that the 1878 is "a favorite of mine in MS62 and higher." Deep yellow-gold color dominates this frosty MS62+ example, while lighter rose-gold hues appear near the centers. The stars and hair strands are razor-sharp. Each side displays a number of tiny abrasions, the only mentionable one being a thin linear mark adjacent to star 9. An attractive early Type Three double eagle with semiprooflike tendencies. Census: 5 in 62+, 8 in 62 ★, 28 finer (10/15). NGC ID# 26B3, PCGS# 8985

- 4718 1881-S AU58 PCGS.** While the Philadelphia Mint curtailed its double eagle production in the 1880s, the San Francisco branch perked right along. A mintage of 727,000 pieces makes this an available S-Mint twenty in AU and low Mint State grades. Most coins are bagmarked... many with a "dirty gold" patina. This example has its share of light marks, but the pleasing yellow-gold color and substantial remaining mint luster recommend it. NGC ID# 26BD, PCGS# 8995

- 4719 1882-CC — Improperly Cleaned — NGC Details. AU. Variety 1-B.** The second C in the mintmark is high. Orange and green-gold surfaces show crisp hair strands, while the lower stars are incomplete. Myriad wispy marks from the noted cleaning appear over each side, along with small abrasions from brief circulation. Still, a desirable semiprooflike CC example from a low mintage of 39,140 coins. NGC ID# 26BF, PCGS# 8997

**1882-S Liberty Twenty, MS62
Seldom Seen Finer**

- 4720 1882-S MS62 PCGS.** Vibrantly lustrous with frosty orange-gold surfaces that illuminate sharp design elements. This 1882-S double eagle shows only light, scattered marks, producing unusually strong eye appeal for the MS62 grade. The appeal of this coin is further heightened by the rarity of higher-grade examples. NGC ID# 26BG, PCGS# 8998

**1883-S Double Eagle, MS62+
Conditionally Rare Issue**

- 4721 1883-S MS62+ PCGS. CAC.** Small Squat S. Due to gold coin exports to Europe, prominently bagmarked 1883-S twenties are found with little difficulty. Nonetheless, examples are elusive with both a smooth reverse and a moderately abraded obverse. This peach-gold representative is well struck and offers vibrant cartwheel luster. NGC ID# 26BJ, PCGS# 9000

**1888-S Double Eagle, MS63
Frosty and Attractive**

- 4722 1888-S MS63 PCGS.** The vast majority of Mint State 1888-S double eagles resides in the MS61 to MS62 grade range; Select pieces, such as this example, are elusive by comparison, and MS64 or better representatives are rarely seen. This is an especially attractive coin with fewer abrasions than are expected for the MS63 level. The devices are sharp and each side displays frosty green-gold luster with hints of rose in the centers. PCGS lists 64 pieces finer, all MS64 or MS64+ (10/15). NGC ID# 26BU, PCGS# 9009

- 4723 1889-S MS62 NGC.** Booming luster and rich lemon-gold color ensure the eye appeal of this well struck Liberty type coin. Moderate field marks correspond to the third party grade. NGC ID# 26BW, PCGS# 9012

- 4724 1890 MS62 NGC.** The 1890 is available through MS61 but becomes more of a challenge in MS62. Anything finer is rare, with Select examples having realized five-digit figures on a couple of occasions. Frosty luster rolls over green and rose-gold surfaces that feature fully struck devices. NGC reports 22 submissions finer (10/15). NGC ID# 26BX, PCGS# 9013

- 4725 1896 Repunched Date, FS-301, MS63 NGC.** All four date digits are obviously repunched north. The first logotype punch appears to be smaller, a misleading phenomenon seen on various other repunched date varieties from the 19th century. This lustrous lemon-gold representative is crisply struck and exhibits the expected number of obverse abrasions. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

- 4726 1900 MS64+ PCGS.** A charming orange-gold representative. The strike is sharp and the lustrous surfaces show only minimal contact. A small area of struck-in grease, as made, is relegated to the upper portion of the RT in LIBERTY. NGC ID# 26CP, PCGS# 9037

**1903-S Twenty, MS64
Deeply Lustrous, Original Patina**

- 4727 1903-S MS64 PCGS.** Gem examples are rare for this heavily exported San Francisco date, making near-Gem coins such as this one the most logical selection for most collectors. Housed in a green label holder, the coin has rich, original patina with lilac at the rims and a thick band of orange highlights around the gleaming gold portrait of Liberty. Exceptional mint luster shines beneath the frosted surfaces. Only minor, ticklike marks prevent a higher grade. PCGS shows 14 Gems finer (10/15). NGC ID# 26CX, PCGS# 9044

**1903-S Twenty Dollar, MS64+
Rare in Finer Grades**

- 4728 1903-S MS64+ PCGS. CAC.** Available through the Choice grade level, the 1903-S double eagle becomes a significant rarity in MS65. This Plus-graded near-Gem will appeal to the budget-conscious collector. The strike is well-executed, and the frosty surfaces yield rich orange-gold luster with pale rose-gold highlights in the obverse fields. PCGS lists 14 finer representatives (10/15). NGC ID# 26CX, PCGS# 9044

**1904 Twenty Dollar, MS65+
Frosty and Fully Struck**

- 4729 1904 MS65+ NGC.** The 1904 double eagle is a frequent target of type collectors, as attractive, sharply struck coins are readily available through MS65. Premium Gems are scarce, and this example approaches the quality of that grade level. The fields are largely undisturbed, and a couple of trivial marks on Liberty's cheek define the grade. Each side has frosty yellow-gold surfaces and fully defined motifs, accounting for the top-notch aesthetic appeal. NGC ID# 26CY, PCGS# 9045

4730 1904 MS62 ★ Prooflike NGC. Of the 360 pieces certified by NGC at MS62 with Prooflike surfaces, just two examples have achieved the important Star designation (10/15). Flashy medium-gold fields are boldly prooflike throughout, with minor chatter that determines the numeric grade but undeniable eye appeal nonetheless. NGC ID# 26CY, PCGS# 79045

4731 1904 MS63 Prooflike NGC. An unusually large number of 1904 double eagles (782 pieces) have been certified as Prooflike by NGC (11/15). This brassy example is superior to most of those, with moderate to deep mirrors and a sharp strike. Light, scattered marks are noted on both sides.

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 4395. NGC ID# 26CY, PCGS# 79045

1904 Twenty Dollar, Prooflike Surfaces Choice Mint State, Sun-Gold Color

4732 1904 MS64 Prooflike NGC. CAC. Our consignor managed to assemble a handful of nice 1904 Prooflike double eagles — no small feat, since the format is in short supply in Choice condition. This shimmering near-Gem boasts undeniably prooflike surfaces throughout both sides, a function of fresh dies before their mirrored reflectivity wore off through repeated strikings. The strike is essentially full, with only minor contact precluding an even finer grade. Census: 54 in 64 (2 in 64 ★) Prooflike, 12 finer (10/15). NGC ID# 26CY, PCGS# 79045

1904 Double Eagle, MS64 Prooflike Minimal Marks, Gleaming Eye Appeal

4733 1904 MS64 Prooflike NGC. CAC. The 1904 Philadelphia issue is the most available Type Three double eagle, but in Prooflike format it is scarce and desirable. Perhaps the fact that just 98 proofs were struck (about half that number survive) adds to allure of a Choice prooflike example. This coin shows no heavy marks and the fields are free of all but the most minor chatter. The honey-gold surfaces are brilliantly reflective. CAC endorsed. Census: 54 in 64 (2 in 64 ★) Prooflike, 12 finer (10/15). NGC ID# 26CY, PCGS# 79045

1904 Double Eagle, MS64 Prooflike Deeply Mirrored Fields

4734 1904 MS64 Prooflike NGC. CAC. The flashy yellow-gold surfaces are full of life and luster on this vibrant example, one from a readily available Philadelphia issue but seldom seen so fine and with the Prooflike kicker. A perceptive acquisition for a high-grade type set collector looking for that “something extra.” CAC endorsed for its high-quality surfaces and notable eye appeal. Census: 54 in 64 (2 in 64 ★) Prooflike, 12 finer (10/15). NGC ID# 26CY, PCGS# 79045

4735 1904-S MS62 Prooflike NGC. Only 107 of the more than 24,000 1904-S double eagles certified by NGC have been assigned the prooflike designation. Deep reddish-gold toning graces this MS62 Prooflike piece, and the design features are well-defined. Scattered contact marks preclude a higher grade. Census: 48 in 62 (1 in 62 ★) Prooflike, 29 finer (10/15). NGC ID# 26CZ, PCGS# 79046

1906-D Twenty Dollar, MS63 Debut Denver Issue

4736 1906-D MS63 NGC. The first double eagle issue struck at the Denver Mint and one of only two D-mint dates in the Liberty Head series. This Select 1906-D twenty displays sharp detail and vibrant, frosty luster. Light scattered abrasions limit the grade but none pose singular distraction. There is no evidence of die lapping. NGC ID# 26D5, PCGS# 9050

SAINT-GAUDENS DOUBLE EAGLES

4737 1908 No Motto MS66 NGC. The Wells Fargo Hoard yielded some incredibly high-grade 1908 No Motto twenties, and while this Premium Gem does not rival those exceptional specimens, it is extremely pleasing for its grade level. One of several remarkable double eagles from this consignor at the MS66 grade, each of special quality. The present coin is frosty and sharp with coruscating mint luster, virtually unmarked, an ideal type coin. NGC ID# 26F6, PCGS# 9142

4738 1908 No Motto, Wells Fargo Nevada, MS66 PCGS. Ex: Wells Fargo Nevada Gold. The infusion of 19,900 high-grade 1908 No Motto double eagles from the Wells Fargo Hoard made this issue the opposite of a condition rarity. Thousands of MS66 and MS67 coins entered the marketplace, as well as 200+ MS68 examples and 10 unbelievable MS69 coins. While the present coin grades “only” MS66, it is a brilliant and frosty, greenish-gold Premium Gem that saw virtually no post-Mint handling or transport. Housed in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 4739 1908 No Motto, Wells Fargo Nevada, MS66+ PCGS.** A delightful high-end Premium Gem from the famous Wells Fargo Hoard, this coin offers well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908 Saint-Gaudens Twenty, MS64+
With Motto**

- 4740 1908 Motto MS64+ PCGS. CAC.** This Plus-graded MS64 example is about as fine as the 1908 With Motto double eagle is usually available, an ideal choice for the budget-conscious collector seeking a first-year example of this type. The strike is well-executed, and the lustrous yellow-gold surfaces exhibit few noticeable abrasions. NGC ID# BNAK, PCGS# 9147

**1908 With Motto Twenty, MS64+
Seldom Available Finer**

- 4741 1908 Motto MS64+ PCGS. CAC.** The debut issue of the With Motto design with significant type coin appeal. This Plus-graded Choice example offers lustrous yellow-gold surfaces with well-defined relief elements and minimal abrasions. Finer pieces exist, but are out of reach for most budget-conscious collectors. NGC ID# BNAK, PCGS# 9147

**1908-S Double Eagle, AU Details
Smallest Regular-Issue Mintage**

- 4742 1908-S — Improperly Cleaned — NGC Details. AU.** The California branch mint coined a tiny production of 22,000 double eagles in 1908, all after July 1 when the motto was mandated by Congress. The total represents the smallest mintage among regular-issue dates in the Saint-Gaudens series. This AU example has bright wheat-gold surfaces with minute marks scattered throughout. The devices are well-detailed with moderate high-point friction.

- 4743 1909-D AU58 NGC.** The 1909-D is one of the lowest-mintage dates in the Saint-Gaudens set (52,500 coins). The devices on this near-Mint example offer typically strong detail for the issue. Satiny luster glistens over green and rose-gold surfaces showing only two reeding marks in the upper-left obverse field that merit attention. NGC ID# 26FD, PCGS# 9152

- 4744 1910 MS64 NGC.** Near-Gems are relatively available in today's marketplace, but the number of certified Gems and the frequency with which they appear at auction falls off dramatically. This Choice P-mint twenty features strong strike characteristics, orange and rose-gold coloration, and vibrant luster over lightly abraded surfaces. NGC ID# 26FF, PCGS# 9154

- 4745 1910 MS64+ PCGS.** Finer than the typical example, this Plus-designated Choice 1910 double eagle displays frosty wheat-gold luster without bothersome abrasions. The strike is sharp and eye appeal is pleasing. An area of tiny pepper specks appears with a loupe on the lower-right obverse. NGC ID# 26FF, PCGS# 9154

- 4746 1910-D MS64+ PCGS.** While full Gem examples of the 1910-D are available, the issue is scarce any finer. This high-end near-Gem example approaches a higher grade, with only a few minor marks and lustrous and attractive, medium-gold surfaces. Well-struck — as is typical for this Denver issue — with abundant eye appeal. NGC ID# 26FG, PCGS# 9155

- 4747 1910-D MS64+ PCGS. CAC.** PCGS and CAC have dually recognized this Denver double eagle for its quality and eye appeal. The strike is exceedingly sharp on the torch hand, visage, and Capitol. Rose-gold surfaces reveal a single thin mark that extends outward from Liberty's torso into the left obverse field. Otherwise, immaculately preserved with vibrant luster. NGC ID# 26FG, PCGS# 9155

- 4748 1910-D MS65+ PCGS.** A high-end Gem representative of this early series branch mint issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. The 1910-D is very scarce in finer grades. NGC ID# 26FG, PCGS# 9155

- 4749 1911-D MS65 NGC.** A blazing yellow-gold example, frosty and lustrous over the finely granular surfaces typical of all 1911 double eagles. This Denver Mint issue shows a sharp strike on Liberty's branch and torch hands, with an exceptionally mark-free surfaces for the grade. The eye appeal is excellent. NGC ID# 26FK, PCGS# 9158

- 4750 1911-D/D FS-501 MS64 PCGS. CAC.** The undertype D shows plainly to the right of the primary mintmark on this popular *Cherry-pickers* variety. The design elements are well-detailed and the lustrous surfaces show only minor signs of contact. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1912 Double Eagle, MS64
Rare in Finer Grades**

- 4751 1912 MS64 PCGS.** This Choice 1912 Saint-Gaudens double eagle is among the finest examples pursuable by budget-conscious collectors, as Gem or better representatives are rarely seen. The design elements are sharply rendered amid frosty, wheat-gold luster. A few trivial grazes limit the grade but none are individually noteworthy. NGC ID# 26FM, PCGS# 9160

**1913-S Double Eagle, MS63
A Low-Mintage Issue**

- 4752 1913-S MS63 PCGS.** The 1913-S is a popular date in the Saint-Gaudens double eagle series because of its low mintage of 34,000 pieces, the third lowest behind the 1908-S and the High Relief among the regular issues. This Select example displays hints of light green on its yellow-gold surfaces and exhibits well-struck design elements. A handful of minute spots is noted, a typical characteristic of this issue. NGC ID# 26FR, PCGS# 9163

**1915 Twenty Dollar, MS63+
Slightly Better in High Grade**

- 4753 1915 MS63+ PCGS.** The 1915 Saint-Gaudens double eagle has a reputation for being more elusive than the immediately surrounding issues due to its small mintage of 152,000 coins. This Plus-graded Select example boasts well-defined design elements and satiny orange-gold luster with few significant abrasions. NGC ID# 26FV, PCGS# 9167

**1915-S Double Eagle, MS66
Only One Coin Finer**

- 4754 1915-S MS66 NGC.** As Superb Gems are almost unknown, this MS66 1915-S Saint-Gaudens double eagle is among the finest examples available to most collectors. The strike is sharp, and the satiny surfaces display rich orange-gold luster. No bothersome abrasions are observed. NGC has seen a single MS67 coin finer (10/15). NGC ID# 26FW, PCGS# 9168

- 4755 1916-S MS64 PCGS. CAC.** An unusually radiant example, this Choice 1916-S Saint-Gaudens double eagle showcases mint-fresh cartwheel luster that is beautifully preserved for the MS64 level. The strike is bold, and the eye appeal is exceptional. CAC-endorsed in an old green label holder. NGC ID# 34NJ, PCGS# 9169

- 4756 1922 MS64+ PCGS. CAC.** A flashy and lightly marked sun-gold Saint-Gaudens near-Gem. The strike is generally sharp although the reverse margins show minor inexactness. A partial wire rim is present on the right borders of both sides. NGC ID# 26G3, PCGS# 9173

1922-S Double Eagle, Well-Defined MS62

- 4757 1922-S MS62 PCGS.** A considerable portion of the 2.6 million-piece mintage of the 1922-S double eagle was melted in the 1930s. The yellow-gold surfaces of this MS62 survivor display considerable luster and well-struck design features. Scattered light marks determine the grade, along with light reverse alloy spots. Housed in a green-label holder. NGC ID# 26G4, PCGS# 9174

**1922-S Double Eagle, MS62+
Elusive Branch Mint Issue**

- 4758 1922-S MS62+ NGC.** The 1922-S "suffered tremendously from the massive meltings of gold coins in the 1930s," according to Garrett and Guth's *Gold Encyclopedia*. Present-day numismatists benefit from the 1,500 to 2,000 examples that were shipped overseas and held safely in international vaults. Rose-gold centers combine with greenish-gold margins. A thick layer of mint frost blankets surfaces that display well-detailed motifs and myriad ticks. Several small alloy spots occur near the right reverse rim. NGC ID# 26G4, PCGS# 9174

- 4759 1923 MS65 NGC.** 1923 twenty is generally considered as one of the available dates in the series, but it certainly does not deserve the same "common date" status as the next few years of coinage from Philadelphia. This well-preserved double eagle is fully brilliant with pinkish-gold color and excellent eye appeal. The surfaces show only a few tiny abrasions, none distracting in the least. Just three numerically finer examples are certified by PCGS and none by NGC. NGC ID# 26G5, PCGS# 9175

- 4760 1924 MS66 NGC.** Nearly mark-free surfaces display a sharp strike and excellent mint bloom over the smoothly frosted fields and devices. This 1924 double eagle exemplifies the ideal type coin at the Premium Gem grade. One or two trivial luster grazes are the only marks visible without magnification, and the rich, apricot-gold color completes the outstanding eye appeal. NGC ID# 26G7, PCGS# 9177

- 4761 1924 MS66 NGC.** Apricot-gold and brighter peach hues characterize the frosty surfaces of this Premium Gem 1924 double eagle. The strike is boldly executed and there are no significant abrasions. A favorite issue among type collectors and investors. NGC ID# 26G7, PCGS# 9177

- 4762 1924 MS66 NGC.** Frosty original luster spans shades of rose, peach, and yellow-gold as it rolls over beautifully preserved surfaces. This Saint-Gaudens type coin is boldly struck and offers excellent eye appeal. NGC ID# 26G7, PCGS# 9177
- 4763 1924 MS66 PCGS.** The 1924 Saint-Gaudens double eagle is the type coin of choice for budget-conscious collectors. This Premium Gem example is finer than the typical example and shows frosty yellow-gold luster with sharp design elements. Scattered, trivial ticks are not out of line for the grade on this type. NGC ID# 26G7, PCGS# 9177
- 4764 1924 MS66 PCGS.** This readily available double eagle offers Mint-fresh, unabraded surfaces with a great strike on Liberty and virtually no distractions. A deserving Premium Gem — with claims to an even higher grade. Colorful toning accents include reddish-orange, lilac, and pale-yellow highlights that cascade over the satin-smooth surfaces. Just 92 coins have a higher numeric grade at PCGS (10/15). NGC ID# 26G7, PCGS# 9177
- 4765 1924 MS66 PCGS.** The 1924 Saint-Gaudens double eagle is always in demand with type collectors, seeking high-grade specimens for their collections. This sharply detailed Premium Gem exhibits vivid orange-gold surfaces with vibrant mint luster and no mentionable distractions. NGC ID# 26G7, PCGS# 9177
- 4766 1924 MS66+ PCGS.** Rich, vibrant luster cartwheels over frosty surfaces on this high-end Premium Gem type coin, illuminating boldly rendered design elements. The 1924 is well-known as the chief type coin candidate in the series, but the luster is seldom so radiant as it is on this piece. NGC ID# 26G7, PCGS# 9177
- 4767 1924 MS66 NGC. CAC.** A spectacular Premium Gem representative of this popular type issue, with sharply detailed design elements and virtually pristine lustrous surfaces. Overall eye appeal is terrific. NGC ID# 26G7, PCGS# 9177
- 4768 1925 MS66 PCGS.** While the absence of any significant marks and a sharp strike provide allure, the main attractions of this Premium Gem twenty are the satin-smooth, orange-gold surfaces and gleaming mint luster. The eye appeal is tremendous. PCGS reports just seven numerically finer coins. NGC ID# 26GA, PCGS# 9180
- 4769 1926-S — Rim Filing — NGC Details. AU.** The 1926-S mintage is more than twice its Philadelphia Mint counterpart, but relatively few examples were issued prior to the 1933 gold recall. The supermajority of the issue was melted into gold bricks, some of which may still reside at Fort Knox. A lustrous caramel-gold example that appears problem-free upon initial evaluation. The reverse rim is filed, most prominently near 2:30. NGC ID# 26GF, PCGS# 9185
- 4770 1927 MS66 PCGS.** Although available in MS66, the 1927 double eagle becomes conditionally scarce any finer. This vibrantly lustrous type coin displays bold motifs and warm straw-gold surfaces. A loupe reveals a scattering of microscopic specks on the lower-left portion of the obverse, undetectable to the naked eye. There are 18 Superb Gems finer at PCGS (10/15). NGC ID# 26GG, PCGS# 9186
- 4771 1927 MS66+ PCGS.** A lovely green-gold representative that boasts sweeping luster and a good strike. A loupe reveals only incidental contact. Although saved in quantity as bullion by foreign banks, the 1927 becomes highly elusive at the MS66+ level. NGC ID# 26GG, PCGS# 9186
- 4772 1928 MS65 ★ NGC. CAC.** This delightful Gem offers outstanding visual appeal and exceptional quality for the grade, as attested by both the Star designation and CAC sticker. The design elements are sharply detailed throughout and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 34VK, PCGS# 9189
- 4773 1928 MS66 ★ NGC.** This spectacular Premium Gem displays well-preserved yellow and rose-gold surfaces, with vibrant mint luster and sharply detailed design elements. The outstanding visual appeal is confirmed by the Star designation. NGC ID# 34VK, PCGS# 9189

- 4774 1928 MS66 ★ NGC.** The rich yellow and orange-gold surfaces of this spectacular Premium Gem display vibrant mint luster on both sides and show no mentionable distractions. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 34VK, PCGS# 9189
- 4775 1928 MS66 ★ NGC.** The well-preserved yellow and peach-gold surfaces of this spectacular Premium Gem radiate vibrant mint luster and the design elements are sharply detailed throughout. Eye appeal is outstanding. NGC ID# 34VK, PCGS# 9189

S.S.C.A. RELIC GOLD MEDALS

- 4776 2009 “Humbert Commemorative” Gem Proof Ultra Cameo NGC.** This needle-sharp, deeply mirrored Gem proof was struck from recovered S.S. *Central America* gold, ore which had its origin in the gold fields of California in the mid-19th century. Although not an official U.S. Mint issue, this piece possesses a wealth of appeal for its iconic design and hefty weight: 2.5 ounces of .9999 fine gold.

2009 Modern ‘Humbert Commemorative’ Slug Gem Ultra Cameo Proof

- 4777 2009 “Humbert Commemorative” Gem Proof Ultra Cameo NGC.** A hefty 2.5 ounce private gold issue struck from bullion recovered from the S.S. *Central America*. The die work is beautifully rendered, showcasing the bulk and heft of the original Humbert slugs but in glittering proof format. Pure gold, .9999 fine, with stark field-device contrast and pristine surfaces.

CALIFORNIA FRACTIONAL GOLD

- 4778 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS67 NGC.** Boldly struck considering the rusted condition of the dies, with mostly prooflike surfaces on both sides and no visible post-strike distractions. Tempting lemon-yellow coloration frames thickly frosted motifs. The obverse star points are intact. Tied for the finest certified. Census: 2 in 67, 0 finer (10/15). NGC ID# 2BMB, PCGS# 10529
- 4779 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS67 NGC.** Breen-Gillio Die State II. A Frontier, Deviercy & Co. quarter but lacking the FD initials. The rich reddish-golden surfaces are well-struck in the centers, but die polishing has attenuated some of the legends on the reverse. NGC ID# 2BMB, PCGS# 10529
- 4780 1875 Indian Octagonal 25 Cents, BG-798, Low R.5, MS65 Deep Mirror Prooflike NGC.** This Christoph Mohrig quarter has a distinctive hand-engraved date. The norm for this variety is uneven strike details, but the only softness seen on this piece is on the peripheral stars. The fields are deeply reflective with scattered cherry-red patina around the margins, and no obvious abrasions. Census: 2 in 65 Deep Mirror Prooflike, 0 finer (10/15). PCGS# 910625
- 4781 1874 Indian Round 25 Cents, BG-876, Low R.4, MS65 PCGS.** A splendid honey-gold Gem that exhibits moderately mirrored fields and a crisp strike. No marks are apparent, although a spindly bisecting vertical crack traverses the reverse. Population: 14 in 65, 0 finer (10/15). NGC ID# 2BVA, PCGS# 10737

4782 1875 Indian Round 25 Cents, BG-878, R.3, MS65 Deep Mirror Prooflike NGC. Die State One. A Christoph Mohrig quarter dollar with an Indian Head obverse. This early die state shows the design elements much better than the second state, which shows diminished central details from overzealous die polishing. This is a remarkably clean, problem-free example with extraordinary depth of reflectivity in the fields. Census: 5 in 65 Deep Mirror Prooflike, 5 finer (10/15). NGC ID# 2BVD, PCGS# 910739 Base PCGS# 10739

4783 1859 Liberty Round 50 Cents, BG-1002, High R.4, MS66 PCGS. Breen-Gillio Die State I. A lovely high-grade sun-gold representative. Flashy and unabraded with the usual incompleteness of strike on the 9 in the date, which is opposite the high point of the portrait. Perfect aside from a few microscopic flan flaws on the reverse. Population: 2 in 66, 0 finer (10/15). NGC ID# 2BYB, PCGS# 10831

**1868 Half Dollar, MS66+
BG-1074, Indian, Round
Single-Finest Certified**

4784 1868 Indian Round 50 Cents, BG-1074, R.6, MS66+ PCGS. Christopher Ferdinand Mohrig was the issuer of this rare Breen-Gillio variety. Most examples are softly brought up at the centers, as is the case for the present piece. The strike is sharper, though, than on the Jay Roe plate coin. The mirrored butter-gold surfaces appear pristine. As of (10/15), the single-finest among 18 examples graded at PCGS. NGC has certified just one example, as MS64. NGC ID# 2C2S, PCGS# 10903

**1876/5 Indian Head Gold Dollar
BG-1129, MS63 Deep Mirror Prooflike**

4785 1876/5 Indian Octagonal Dollar, BG-1129, R.4, MS63 Deep Mirror Prooflike NGC. This Indian Head one dollar gold piece was engraved by Christoph Mohrig of San Francisco. While numerous examples are known of this variant, very few display the depth of mirrored fields seen on this piece. Not only are the fields mirrorlike, but the devices are noticeably frosted on each side, giving the coin a cameo appearance. Weakly struck, as always seen, with as-made granularity in the fields. Census: 4 in 63 Deep Mirror Prooflike, 6 finer (10/15). NGC ID# 2C3X, PCGS# 910940

PATTERNS

**1855 Flying Eagle Cent, Proof Brown Details
Judd-168 Original, Counterstamped 'S.C. Kingman'**

4786 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4 — Obverse Graffiti — NGC Details. Proof. A popular Flying Eagle cent pattern struck in bronze, noted as Obverse Graffiti by NGC, but the marking is actually from a prepared punch counterstamp by "S.C. Kingman." Samuel Clayton Kingman (1830-1922) was a longtime Bridgeport, CT resident and a Major in the Civil War. He was a skilled machinist and inventor with several patents, as well as a gunsmith and crack marksman with a rifle. The counterstamp on this piece is confirmed by the identical stamp on a bullet mold made by Kingman. Two other early coins in this sale — a 1795 Flowing Hair half dollar (lot 4353), and a 1795 Draped Bust dollar (lot 4456) — appear with the same counterstamp. This pattern cent retains its proof reflectivity with Unc details, or nearly so, and no distractions other than the interesting counterstamp.

**1870 Standard Silver Half, PR64 Cameo
Contrasted Judd-951 Example**

4787 1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR64 Cameo NGC. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. This gleaming Choice proof Cameo displays deep mirroring in the fields and frosty luster over the design elements, with a glint of golden toning overall. A slightly deficient strike shows weakness on the highest points of the central portrait and on the N in CENTS on the reverse. There are no bothersome marks or hairlines. Census: 8 in 64, 2 finer (9/15). NGC ID# 6M58, PCGS# 61197

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000

LOT NO.	AMOUNT

LOT NO.	AMOUNT

Last Name: _____

Bid in whole dollar amounts only.

Please print your bids.

[illegible]

Please make a copy of this bid sheet for your records.

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Proxy bidding ends one hour prior to the session start time. Live Proxy bidding continues through the session.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone
Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGELive!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature- Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015

How to Ship Your Purchases

[illegible]

Agent Shipping Release Authorization form

Heritage Auction Galleries requires "Third Party Shipping" for certain items in this auction not picked up in person by the buyer. It shall be the responsibility of the successful bidder to arrange pick up and shipping through a third party; as to such items auctioneer shall have no liability.

Steps to follow:

1. Select a shipping company from the list below or a company of your choosing which will remain on file and in effect until you advise otherwise in writing.
2. Complete, sign, and return an Agent Shipping Release Authorization form to Heritage (this form will automatically be emailed to you along with your winning bid(s) notice or may be obtained by calling Client Services at 866-835-3243). The completed form may be faxed to 214-409-1425.
3. Heritage Auctions' shipping department will coordinate with the shipping company you have selected to pick up your purchases.

Shippers that Heritage has used are listed below. However, you are not obligated to choose from the following and may provide Heritage with information of your preferred shipper.

Navis Pack & Ship
11009 Shady Trail
Dallas, TX 75229
Ph: 972-870-1212
Fax: 214-409-9001
Navis.Dallas@GoNavis.com

The Packing & Moving Center
2040 E. Arkansas Lane, Ste #222
Arlington, TX 76014
Ph: 817-795-1999
Fax: 214-409-9000
thepackman@sbcglobal.net

Craters & Freighters
2220 Merritt Drive, Suite 200
Garland, TX 75041
Ph: 972-840-8147
Fax: 214-780-5674
dallas@cratersandfreighters.com

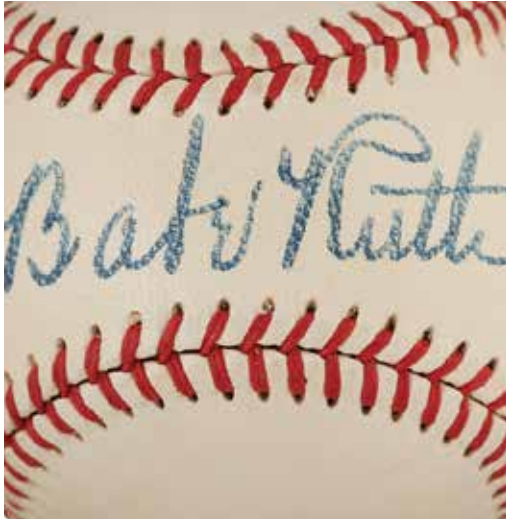

- It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.

What makes a domain name valuable?

The domain name resale market is hotter than ever, routinely yielding six and seven figure sales privately and at auction each year. Why are these names in such demand by businesses and investors? Simply put, domain names are the foundation of an Internet business, creating unique alternative investments for individuals looking to diversify their holdings. Short, powerful **.com** names such as the examples below pair low supply with high demand, increasing their value for both investors and companies. Available now:

Cap.com | Nut.com | Tablets.com | Door.com | Malibu.com

Over **\$5,000,000** in domain names have been sold by Heritage Auctions over the last year alone, including these recent auctions sales/results:

NL.com \$575,000 | Digital.com \$373,000 | Cute.com \$230,000
Luxe.com \$173,000 | Classic.com \$173,000

If you are looking for domain names to purchase for investing or branding, give us a call. We'll be happy to provide you a list of valuable domain names that aren't on the public market for sale.

MyRECOMMENDATIONS

ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at HA.com/Coin.

Lot 3002

• \$50

A collection of various US coins and medals, including gold, silver, and copper pieces, displayed on a dark blue background. The items include a large gold eagle coin, several silver coins with different designs (some featuring profiles, others eagles or allegorical figures), and several copper coins. Some coins are dated 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, 1872, 1873, 1874, 1875, 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025. The coins are arranged in a scattered pattern across the page.
